Line 6k - Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)-(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

INSTRUCTIONS FOR THE SF-424A *(continued)*

Line 7 - Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Show under the program narrative statement the nature and source of income. The estimated amount of program income may be considered by the federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal-Resources

Lines 8-11 - Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a) - Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b) - Enter the contribution to be made by the applicant.

Column (c) - Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d) - Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e) - Enter totals of Columns (b), (c), and (d).

Line 12 — Enter the total for each of Columns (b)-(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13 - Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14 - Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15 - Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16 - 19 - Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20 - Enter the total for each of the Columns (b)-(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21 - Use this space to explain amounts for individual direct object-class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22 - Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23 - Provide any other explanations or comments deemed necessary.

VOL 56 ISS 250 DE 30 1991 UMI

OMB Approval No. 0348-0040

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.
7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

Standard Form 424B (4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program andto purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.
11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).
12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).
14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.
15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.
16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.
17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.
18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

CERTIFICATIONS REGARDING LOBBYING; DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS; AND DRUG-FREE WORKPLACE REQUIREMENTS

Applicants should refer to the regulations cited below to determine the certification to which they are required to attest. Applicants should also review the instructions for certification included in the regulations before completing this form. Signature of this form provides for compliance with certification requirements under 34 CFR Part 82, "New Restrictions on Lobbying," and 34 CFR Part 85, "Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants)." The certifications shall be treated as a material representation of fact upon which reliance will be placed when the Department of Education determines to award the covered transaction, grant, or cooperative agreement.

1. LOBBYING

As required by Section 1352, Title 31 of the U.S. Code, and implemented at 34 CFR Part 82, for persons entering into a grant or cooperative agreement over $100,000, as defined at 34 CFR Part 82, Sections 82.105 and 82.110, the applicant certifies that:

(a) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the making of any Federal grant, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal grant or cooperative agreement;

(b) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

(c) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants, contracts under grants and cooperative agreements, and subcontracts) and that all subrecipients shall certify and disclose accordingly.

2. DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS

As required by Executive Order 12549, Debarment and Suspension, and implemented at 34 CFR Part 85, for prospective participants in primary covered transactions, as defined at 34 CFR Part 85, Sections 85.105 and 85.110 –

A. The applicant certifies that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State, or local) terminated for cause or default; and

B. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

3. DRUG-FREE WORKPLACE (GRANTEES OTHER THAN INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. The applicant certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an on-going drug-free awareness program to inform employees about–

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will–

(1) Abide by the terms of the statement; and

(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted–

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

B. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

_____

Check ☐ if there are workplaces on file that are not identified here.

DRUG-FREE WORKPLACE (GRANTEES WHO ARE INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. As a condition of the grant, I certify that I will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in conducting any activity with the grant; and

B. If convicted of a criminal drug offense resulting from a violation occurring during the conduct of any grant activity, I will report the conviction, in writing, within 10 calendar days of the conviction, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant.

As the duly authorized representative of the applicant, I hereby certify that the applicant will comply with the above certifications.

VOL 56 ISS 250 DEC 30 1991 UMI

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion -- Lower Tier Covered Transactions

This certification is required by the Department of Education regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, for all lower tier transactions meeting the threshold and tier requirements stated at Section 85.110.

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion--Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.
2. Identify the status of the covered Federal action.
3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.
4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.
5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.
6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.
7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.
8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."
9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.
10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).
11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.
12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.
13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.
14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.
15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.
16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescissions and Deferrals

The White House, Washington
December 19, 1991

Dear Mr. Speaker: In accordance with the Congressional Budget and Impoundment Control Act of 1974, I herewith report three new and two revised deferrals of budget authority for FY 1992 now totaling $3,944,898,210.

These deferrals affect International Security Assistance programs as well as programs of the Agency for International Development and the Departments of Agriculture and State. The details of these deferrals are contained in the attached report.

Sincerely,

George Bush

The Honorable Thomas S. Foley
Speaker of the House of Representatives
Washington, DC 20515

Deferral No. D92-1A

Supplemental Report
Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D92-1 transmitted to Congress on September 30, 1991.

This revision increases by $1,623,312,000 the previous deferral of $244,777,065 in the Economic support fund, resulting in a total deferral of $1,868,089,065. The increase results from a greater-than-anticipated level of unobligated funds being carried over from FY 1991, and funds made available through March 31, 1992, by P.L. 102-145, the second Continuing Resolution for FY 1992.

Deferral No. 92-1A

JUSTIFICATION: This action defers funds pending approval of specific loans and grants to eligible countries by the Secretary of State after review by the Agency for International Development and the Treasury Department. This interagency review process will ensure that each approved program is consistent with the foreign and financial policies of the United States and will not exceed the limits of available funds. This action is taken pursuant to the Antideficiency Act (31 U.S C 1512).

Estimated Program Effect: None

Outlay Effect: None

1/ This account was the subject of a similar deferral in FY 1991 (D91-1C).
2/ This deferred amount has been reduced to $1,243,865 045 due to subsequent releases.
* Revised from previous report.

VOL 56 ISS 250 DE 30 1991 UMI

Deferral No. 92–8

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93–344

AGENCY: Funds Appropriated to the President	**New budget authority** (P.L. 102–145) $ 4,100,000,000
BUREAU: International Security Assistance	**Other budgetary resources** −2,050,000,000
Appropriation title and symbol: Foreign military financing (FMF) 1/ 1121082	**Total budgetary resources** 2,050,000,000
	Amount to be deferred: Part of year $ 1,908,000,000 Entire year ____

Grant program: [X] Yes [ ] No	
Type of account or fund: [X] Annual [ ] Multi–year: ____ (expiration date) [ ] No–Year	**Type of budget authority:** [X] Appropriation [ ] Contract authority [ ] Other ____

JUSTIFICATION: The President is authorized by the Arms Export Control Act to sell or finance by grant, credit, or guarantee articles and defense services to friendly countries to facilitate the common defense. Further, the President is authorized by the International Narcotics Control Act of 1989 to provide military and law enforcement assistance to counter illegal narcotics. Under Section 2 of the Arms Export Act, the Secretary of State, under the direction of the President, is responsible for sales made under the Act, including determining whether there shall be a sale to a country and the amount thereof. Executive Order No. 11958 further requires the Secretary of State to obtain the prior concurrence of the Secretaries of Defense and Treasury, respectively, regarding standards and criteria for credit transactions that are based upon national security and financial policies. These funds have been deferred pending the approval of the Departments of State, Defense, and Treasury for the specific sales to eligible countries. Consultation among these Departments will ensure that each approved program is consistent with the foreign, national security, and financial policies of the United States and will not exceed the limits of available funds. This action is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Estimated Program Effect: None

JUSTIFICATION: This account was established to facilitate cease–fire monitoring, demobilization, and transition to peace Funds were transferred into this account pursuant to P.L. 101–513, Section 531(f) (2). These funds are available solely to support costs of demobilization, retraining, relocation, and reemployment in civilian pursuits of former combatants in the conflict in El Salvador. Funds are available for obligation and expenditure only upon notification by the President to the Congress that the Government of El Salvador and representatives of the Farabundo Marti National Liberation Front (FMLN) have reached a permanent settlement of the conflict, including a final agreement on a cease–fire. This action is taken pursuant to the Antideficiency Act (31 U.S. C. 1512).

Type of account or fund: [ ] Annual	Type of budget authority: [X] Appropriation
[ ] Multi-year: _____ (expiration date)	[ ] Contract authority
[X] No-Year	[ ] Other

JUSTIFICATION: Purchasers of National Forest timber are required to deposit to the Forest Service the established cost for disposing of brush and other debris resulting from timber cutting operations by 16 U.S.C. 490. The deposits becoming available in the current year are estimated and the related disposal operations are planned for the following year. Efficient program planning and accomplishment is facilitated by operating a stable program well within the funds available in any one year for this purpose. Much of the brush disposal work for which fees are collected cannot be done in the same year because of weather conditions or because harvesting is not completed. The Forest Service is planning for a stable year-to-year program which will require $73 million in 1992. The current fiscal year reserve of $101 million is established pursuant to the provisions of the Antideficiency Act (31 U.S.C. 1512) as a reserve for contingencies.

Estimated Program Effect: None

2/ This deferral amount has been reduced to $72,627,985 due to subsequent releases.

Deferral No. D92-6A

Supplemental Report
Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D92-6 transmitted to Congress on September 30, 1991.

This revision to a deferral of the Department of State's Emergency refugee and migration assistance fund increases the amount previously reported as deferred from $30,052,650 to $54,802,650. This increase of $24,750,000 reflects the funds made available through March 31, 1992, provided by P.L. 102-145, the second Continuing Resolution for FY 1992.

[ ] Multi–year: _____ (expiration date)	[ ] Contract authority
[X] No–Year	[ ] Other _____

JUSTIFICATION: Section 501(a) of the Foreign Relations Authorization Act, 1976 (Public Law 94–141) and Section 414(b) (1) of the Refugee Act of 1980 (Public Law 96–212) amended Section 2(c) of the Migration and Refugee Assistance Act of 1962 (22 U.S.C. 2601) by authorizing a fund to enable the President to provide emergency assistance for unexpected urgent refugee and migration needs.

Executive Order No. 11922 of June 16, 1976, allocated all funds appropriated to the President for the Emergency Fund to the Secretary of State but reserved for the President the determination of assistance to be furnished and the designation of refugees to be assisted by the Fund.

These funds have been deferred pending Presidential decisions required by Executive Order No. 11922. Funds will be released as the President determines assistance to be furnished and designates refugees to be assisted by the Fund. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

[Federal Acquisition Circular 90-10]

Federal Acquisition Regulation; Introduction of Miscellaneous Amendments

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Summary presentation of interim rules with request for comment.

SUMMARY: This document introduces the documents set forth below which comprise Federal Acquisition Circular (FAC) 90-10. The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council are issuing FAC 90-10 to amend the Federal Acquisition Regulation (FAR) to implement changes in the following subject areas:

Item	Subject	FAR case	DAR case	Analyst
I	Increase in Cost or Pricing Data Threshold (Interim rule)	91-53	90-303	Olson
II	Removal of Toshiba Sanctions	91-66	91-78	Rosinski
III	Alternative Dispute Resolution (Interim rule)	91-62	90-323	O'Neill

DATES: For effective dates, see separate documents which follow. Please cite FAC 90-10 and the appropriate FAR case number(s) in all correspondence related to this and the following documents.

FOR FURTHER INFORMATION CONTACT: the analyst whose name appears in relation to each far case or subject area. For general information, contact the far secretariat, room 4041, GS Building, Washington, DC 20405, (202) 501-4755. Please cite FAC 90-10 and far case number(s).

SUPPLEMENTARY INFORMATION: Federal Acquisition Circular 90-10 amends the Federal Acquisition Regulation (FAR) as specified below:

Item I—Increase in Cost or Pricing Data Threshold (FAR Case 91-53)

This interim rule amends FAR subparts 14.2, 15.8, and 52.2 to increase the threshold for submission of certified cost or pricing data from $100,000 to $500,000 for contracts awarded by the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard pursuant to the requirements of section 803 of Public Law 101-510. The statutory threshold applicable to contracts awarded by other agencies remains at $100,000.

Item II—Removal of Toshiba Sanctions (FAR Case 91-66)

Subpart 25.10, Sanctions for Violations of Export Controls, the provision at 52.225-12, Notice of Restrictions on Contracting with Sanctioned Persons, and the clause at 52.225-13, Restrictions on Contracting with Sanctioned Persons, are being deleted, in their entirety, from the regulation because the sanctions imposed by Executive Order 12661 dated December 27, 1988, expire on December 28, 1991. Therefore, the regulatory policy contained in the subpart, provision, and clause no longer applies.

Item III—Alternative Dispute Resolution (FAR Case 91-62)

This interim rule revises FAR Subpart 33.2 and section 52.233-1 to add policy, guidance, and criteria for use of alternative dispute resolution techniques.

Dated: December 23, 1991.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition Policy.

Federal Acquisition circular

Federal Acquisition Circular (FAC) 90-10 is issued under the authority of the Secretary of Defense, the Administrator of General Services, and the Administrator for the National Aeronautics and Space Administration.

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 90-10 is effective December 30, 1991, except for Item II, Removal of Toshiba Sanctions, which is effective December 29, 1991.

[FAC 90-10; FAR Case 91-53; Item I]

Federal Acquisition Regulation; Increase in Cost or Pricing Data Threshold

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comment.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to revise FAR parts 14, 15, and 52 to increase the threshold for submission of cost or pricing data for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard.

DATES: *Effective Date:* December 30, 1991.

Comment Date: Comments should be submitted to the FAR Secretariat at the address shown below on or before February 28, 1992 to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), ATTN: Deloris Baker, 18th & F Streets, NW., room 4041, Washington, DC 20405.

Please cite FAC 90-10, FAR case 91-53 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Olson at (202) 501-3221 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501-4755. Please cite FAC 90-10, FAR case 91-53.

SUPPLEMENTARY INFORMATION:

A. Background

Section 803 of Public Law 101-510 amended subsection 2306a(a)(1) of title 10, United States Code, by increasing the threshold for submission of cost or pricing data from $100,000 to $500,000 for DOD, NASA, and the Coast Guard.

B. Regulatory Flexibility Act

This interim rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most contracts awarded to small entities are awarded on a competitive, fixed-price basis and the requirements for certified cost or pricing data do not apply. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. Comments from small entities concerning the affected FAR subpart will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite 5 U.S.C. 601, *et. seq.* (FAC 90-10, FAR Case 91-53) in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96-511) is deemed to apply because the interim rule contains information collection requirements. Accordingly, a request for approval of a revision to reduce the burden of a currently approved information collection requirement concerning increase in cost or pricing data threshold was submitted to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* Public comments concerning this request were invited through a Federal Register (56 FR 56887) notice on November 7, 1991. Approval for the revised burden was granted under OMB Control Number 9000-0013 on November 27, 1991.

D. Determination To Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense (DOD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) to issue the regulations in Item I of FAC 90-10 as an interim rule. This action is necessary because section 803 of Public Law 101-510 amended subsection 2306a(a)(1) of title 10, United States Code, to increase the threshold for submission of cost or pricing data for the DoD, the NASA, and the Coast Guard.

In view of the statutory change, it is determined that compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. However, pursuant to Public Law 98-577 and FAR 1.501, public comments received in response to this interim rule will be considered in formulating the final rule.

List of Subjects in 48 CFR Parts 14, 15, and 52

Government procurement.

Dated: December 23, 1991.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition Policy.

Federal Acquisition Circular (FAC) 90-10 amends the Federal Acquisition Regulation (FAR) as specified below:

Increase in Cost or Pricing Data Threshold

This interim rule amends FAR subparts 14.2, 15.8, and 52.2 to increase the threshold for submission of certified cost or pricing data from $100,000 to $500,000 for contracts awarded by the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard pursuant to the requirements of section 803 of Public Law 101-510. The statutory threshold applicable to contracts awarded by other agencies remains at $100,000.

Therefore, 48 CFR parts 14, 15, and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 14, 15, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 14—SEALED BIDDING

14.201-7 [Amended]

2. Section 14.201-7 is amended in paragraphs (a), (b)(1), and (c)(1) by removing the period after the figure "$100,000" and inserting ", or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, is expected to exceed $500,000." in its place.

PART 15—CONTRACTING BY NEGOTIATION

3. Section 15.804-2 is amended by revising paragraph (a) to read as follows:

15.804-2 Requiring certified cost or pricing data.

(a)(1) Except as provided in 15.804-3, certified cost or pricing data are required before accomplishing any of the following actions:

(i) The award of any negotiated contract (except for undefinitized actions such as letter contracts) expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, for contracts awarded after December 5, 1990, expected to exceed $500,000.

(ii) The modification of any sealed bid or negotiated contract (whether or not cost or pricing data were initially required) when the modification involves a price adjustment expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, for modifications of any sealed bid or negotiated contract awarded after December 5, 1990 (whether or not cost or pricing data were initially required), when the modification involves a price adjustment expected to exceed $500,000. (For example, a $30,000 modification resulting from a reduction of $70,000 and an increase of $40,000 is a pricing adjustment exceeding $100,000, and a $150,000 modification resulting from a reduction of $350,000 and an increase of $200,000 is a pricing adjustment exceeding $500,000.) This requirement does not apply when unrelated and separately priced changes for which cost or pricing data would not otherwise be required are included for administrative convenience in the same modification.

(iii) The award of a subcontract at any tier, if the contractor and each higher tier subcontractor have been required to furnish certified cost or pricing data,

VOL 56 ISS 250 DE 30 1991 UMI

when the subcontract is expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, for subcontracts awarded under prime contracts awarded after December 5, 1990, when the subcontract is expected to exceed $500,000. (But see 15.804–3(i).)

(iv) The modification of any subcontract covered by subdivision (a)(1)(iii) of this subsection, when the price adjustment (see subdivision (a)(1)(ii) of this subsection) is expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, for subcontracts awarded under prime contracts awarded after December 5, 1990, when the modification involves a price adjustment expected to exceed $500,000.

(2) The contracting officer may obtain certified cost or pricing data for pricing actions below the pertinent threshold in subparagraph (a)(1) of this subsection provided the action exceeds the small purchase limitation. For such pricing actions, the instances in which certified cost or pricing data and inclusion of defective pricing clauses would be justified should be few; however, the contracting officer shall give special consideration to requiring certified cost or pricing data for such pricing actions if the offeror, contractor, or subcontractor—

(i) Has been the subject of recent or recurring, and significant findings of defective pricing;

(ii) Currently has significant deficiencies in its cost estimating systems; or

(iii) Has recently been indicted for, convicted of, or the subject of an administrative or judicial finding of fraud regarding its cost estimating systems or cost accounting practices.

The contracting officer shall document the file to justify the requirement for cost or pricing data not required by regulation. The documentation shall include the contracting officer's written finding that certified cost or pricing data are necessary, the facts supporting that finding, and the approval of the finding at a level above the contracting officer.

(3) The contracting officer shall not require certified cost or pricing data when awarding a contract below the small purchase limitation at 13.000.

(4) When certified cost or pricing data are not required, the contracting officer may request partial or limited data to determine a reasonable price (see 15.804–6(a)(2)).

• • • • •

4. Section 15.804–3 is amended by (a) removing in the second sentence of paragraph (c)(7) the phrase "is $100,000 or more" and inserting "exceeds the pertinent threshold set forth at 15.804–2(a)(1)" in its place; (b) revising the introductory text of paragraph (e); and (c) amending the fifth sentence of paragraph (i) by removing the figure "$100,000" and inserting "the pertinent threshold set forth at 15.804–2(a)(1)" in its place to read as follows:

15.804–3 Exemptions from or waiver of submission of certified cost or pricing data.

• • • • •

(e) *Claiming and granting exemption.* To receive an exemption under paragraph (c) or (d) of this subsection, the offeror must ordinarily claim it on Standard Form 1412, Claim for Exemption from Submission of Certified Cost or Pricing Data, when the total proposed amount exceeds the pertinent threshold set forth at 15.804–2(a)(1), and more than one catalog item for which an exemption is claimed exceeds $50,000. When an exemption is claimed for more than one item in a proposal, a separate SF 1412 is required for each item exceeding $50,000 except as otherwise provided in the solicitation. The contracting officer may grant an exemption and need not require the submission of SF 1412 when—

• • • • •

15.804–4 [Amended]

5. Section 15.804–4 is amended in paragraph (b) by removing the figure "$100,000" both times it occurs and inserting "the pertinent threshold set forth at 15.804–2(a)(1)" in its place.

6. Section 15.804–6 is amended by revising the heading and paragraph (a) to read as follows:

15.804–6 Submission of data.

(a)(1) The contracting officer shall specify (i) whether or not cost or pricing data are required, (ii) whether or not certification will be required, and (iii) the form (see paragraph (b) of this subsection) in which the cost or pricing data shall be submitted. Even if the solicitation does not so specify, however, the contracting officer is not precluded from requesting such data if they are later found necessary.

(2) When certified cost or pricing data are not required because an action is below the pertinent threshold set forth at 15.804–2(a)(1), the contracting officer may request partial or limited data to determine a reasonable price. The contracting officer shall request only that data which the contracting officer considers necessary to determine a reasonable price. For example, cost data might be necessary to support an analysis of material costs, but not for labor and overhead costs. When such partial or limited data are requested, the contracting officer should require, as a minimum, the submission of information on the prices and quantities at which the offeror has previously sold the same or similar products.

• • • • •

Table 15–2 Instructions for Submission or a Contract Pricing Proposal

7. Table 15–2, which follows section 15.804–6(b)(2), is amended in item 1 in the entry "Competitive Methods" by removing the words "over $100,000" and inserting in their place "exceeding the pertinent threshold set forth at 15.804–2(a)(1)"; in the first sentence of the entry "Noncompetitive Methods" by removing the words "over $100,000" and inserting in their place "exceeding the pertinent threshold set forth at 15.804–2(a)(1)"; and in the fourth sentence of the entry "Noncompetitive Methods" by removing the figure "$100,000" and inserting in its place "the pertinent threshold set forth in 15.804–2(a)(1) (iii) and (iv)".

• • • • •

15.806–1 [Amended]

8. Section 15.806–1 is amended in the first sentence of paragraph (b) by removing the figure "$100,000" the first time it appears and inserting in its place "the pertinent threshold set forth at 15.804–2(a)(1)(iii)"; and by removing the figure $100,000" the second time it appears and inserting in its place "the pertinent threshold set forth at 15.804–2(a)(1)(iv)".

• • • • •

15.806–2 [Amended]

9. Section 15.806–2 is amended in paragraph (a)(2) by removing the figure "$100,000" and inserting in its place "the pertinent threshold set forth at 15.804–2(a)(1) (iii) and (iv)".

• • • • •

15.808 [Amended]

10. Section 15.808 is amended in paragraph (a)(6) by removing the words "over $100,000" and inserting in their place "exceeding the thresholds set forth at 15.804–2(a)(1)"; and in paragraph (a)(7) by removing the phrase "in the case of any price negotiation under $100,000" and inserting in its place "by the contracting officer under 15.804–2(a)(2)".

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.214–27 [Amended]

11. Section 52.214–27 is amended by removing in the heading of the clause the date "(JAN 1991)" and inserting in its place "(DEC 1991)"; and inserting in paragraph (a), after the figure "$100,000", the words ", or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, more than $500,000,".

12. Section 52.214–28 is amended by removing in the heading of the clause the date "(APR 1985)" and inserting in its place "(DEC 1991)"; inserting in paragraph (a), after the figure "$100,000", the words ", or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000,"; and revising paragraphs (b) and (d) to read as follows:

52.214–28 Subcontractor Cost or Pricing Data—Modifications—Sealed Bidding.

• • • • •

Subcontractor Cost or Pricing Data—Modifications—Sealed Bidding (Dec 1991)

• • • • •

(b) Before awarding any subcontract expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000 when entered into, or pricing any subcontract modification involving aggregate increases and/or decreases in costs, plus applicable profits, expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000, the Contractor shall require the subcontractor to submit cost or pricing data (actually or by specific identification in writing), unless the price is—

• • • • •

(d) The Contractor shall insert the substance of this clause, including this paragraph (d), in each subcontract that exceeds $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, in each subcontract that exceeds $500,000 when entered into. (End of clause)

52.215–23 [Amended]

13. Section 52.215–23 is amended by removing in the heading of the clause the date "(JAN 1991)" and inserting in its place "(DEC 1991)"; and inserting in paragraph (a), after the figure "$100,000,", the words "or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000,".

14. Section 52.215–24 is amended by removing in the heading of the clause the date "(APR 1985)" and inserting in its place "(DEC 1991)"; and revising paragraphs (a) and (c) to read as follows:

52.215–24 Subcontractor Cost or Pricing Data.

• • • • •

Subcontractor Cost or Pricing Data

(Dec. 1991)

(a) Before awarding any subcontract expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000, when entered into, or before pricing any subcontract modification involving a pricing adjustment expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000, the Contractor shall require the subcontractor to submit cost or pricing data (actually or by specific identification in writing), unless the price is—

• • • • •

(c) In each subcontract that exceeds $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, in each subcontract that exceeds $500,000, when entered into, the Contractor shall insert either—

• • • • •

15. Section 52.215–25 is amended by removing in the heading of the clause the data "(APR 1985)" and inserting in its place "(DEC 1991)"; and revising paragraphs (a), (b), and (d) to read as follows:

52.215–25 Subcontractor Cost or Pricing Data—Modifications.

• • • • •

Subcontractor Cost or Pricing Data—Modifications (Dec 1991)

(a) The requirements of paragraphs (b) and (c) of this clause shall (1) become operative only for any modification to this contract involving a pricing adjustment expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000; and (2) be limited to such modifications.

(b) Before awarding any subcontract expected to exceed $100,000, or $500,000 for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, when entered into, or pricing any subcontract modification involving a pricing adjustment expected to exceed $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, expected to exceed $500,000, the Contractor shall require the subcontractor to submit cost or pricing data (actually or by specific identification in writing), unless the price is—

• • • • •

(d) The Contractor shall insert the substance of this clause, including this paragraph (d), in each subcontract that exceeds $100,000, or for the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard, in each subcontract that exceeds $500,000, when entered into. (End of clause)

[FAC 90–10; FAR Case 91–66; Item II]

Federal Acquisition Regulation; Removal of Toshiba Sanctions

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition and Defense Acquisition Regulations Councils have agreed to delete, in their entirety, FAR Subpart 25.10, Sanctions for Violations of Export Controls, the provision at 52.225–12, Notice of Restrictions on Contracting with Sanctioned Persons, and the clause at 52.225–13, Restrictions on Contracting with Sanctioned Persons.

EFFECTIVE DATE: December 29, 1991.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Rosinski at (202) 501–0692 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–10, FAR Case 91–66.

SUPPLEMENTARY INFORMATION:

A. Background

The current FAR subpart 25.10, and its prescribed provisions and clauses, imposes (a) procurement sanctions on Toshiba Corporation and its subsidiary, Toshiba Machine Company, and on Kongsberg Vaapenfabrikk and its subsidiary, Kongsberg Trading Company, and (b) import sanctions on all products produced by Toshiba Machine Company and Kongsberg Trading Company. These sanctions were imposed by Executive Order 12661, dated December 27, 1988. The sanctions expire on December 28, 1991; accordingly, the regulation is deleted, in

VOL 56 ISS 250 DEC 30 1991 UMI

its entirety, effective on December 29, 1991.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration, certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because it merely removes the sanctions imposed by Executive Order 12661 which will expire on December 28, 1991. Effects on small entities, if any, would result from the expiration of the Executive Order and not from this regulatory change.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 25 and 52

Government procurement.

Dated: December 23, 1991.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition Policy.

Federal Acquisition Circular (FAC) 90–10 amends the Federal Acquisition Regulation (FAR) as specified below:

Removal of Toshiba Sanctions

FAR Subpart 25.10, Sanctions for Violations of Export Controls, the provision at FAR 52.225–12, Notice of Restrictions on Contracting with Sanctioned Persons, and the clause at FAR 52.225–13, Restrictions on Contracting with Sanctioned Persons, are being deleted, in their entirety, from the FAR because the sanctions imposed by Executive Order 12661 dated December 27, 1988, will expire on December 28, 1991. Therefore, the regulatory policy contained in the subpart, the provision, and the clause no longer applies after December 28, 1991.

Therefore, 48 CFR parts 25 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 25 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 25—FOREIGN ACQUISITION

25.10 [Removed]

2. Supart 25.10, consisting of §§ 25.1000 through 25.1005, is removed.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.225–12 and 52.225–13 [Removed and reserved]

3. Sections 52.225–12 and 25.225–13 are removed and reserved.

[FAC 90–10; FAR Case 91–62; Item III]

Federal Acquisition Regulation; Alternative Dispute Resolution

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comment.

SUMMARY: Federal Acquisition Circular (FAC) 90–10 amends the Federal Acquisition Regulation (FAR) to revise subpart 33.2 and section 52.233–1 to implement the Administrative Dispute Resolution Act (Pub. L. 101–552) and recommendations from the Defense Advisory Panel on Government-Industry Relations (DAPGIR). The revisions encourage the use of alternative dispute resolution (ADR) techniques to resolve issues in controversy.

DATES: *Effective Date:* December 30, 1991.

Comment Date: Comments should be submitted to the FAR Secretariat at the address shown below on or before February 28, 1992 to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets, NW, Room 4041, Attn: Ms. Deloris Baker, Washington, DC 20405.

Please cite FAC 90–10, FAR case 91–62 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill at (202) 501–3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405, (202) 510–4755. Please cite FAC 90–10, FAR case 91–62.

SUPPLEMENTARY INFORMATION:

A. Background

Revisions to FAR subpart 33.2 and 52.233–1 have been made in this interim rule. FAR 33.201, Definitions, is revised to add definitions of the terms "Alternative dispute resolution," "Issue in controversy," and "Neutral person." FAR 33.202, Contract Disputes Act of 1978, is revised to include a reference to Public Law 101–552 and to clarify the language. FAR 33.204, Policy, is revised to encourage use of alternative dispute resolution (ADR) techniques. FAR 33.207, Contractor claim certification, is revised at paragraph (a) to require that any claim subject to ADR, regardless of dollar amount, be certified by the contractor. A new section is added at 33.214, Alternative dispute resolution. It describes the objective of ADR, sets forth criteria for use of such techniques, authorizes agencies to establish ADR procedures, and suggests use of a neutral person. FAR 52.233–1, Disputes, is revised to encourage consideration of ADR to resolve disputes.

B. Regulatory Flexibility Act

This interim rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because less than 20% of small entities are affected by the disputes process and the economic impact on small businesses is expected to be less than significant. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. Comments are invited from Small Businesses and other interested parties. Comments from small entities concerning the affected FAR subpart will also be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–10, FAR Case 91–62) in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

D. Determination to Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense (DOD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) that compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. This action is necessary to implement the Administrative Dispute Resolution Act (Pub. L. 101–552). The Act requires that FAR regulations be promulgated by November 15, 1991. Pursuant to Public Law 98–577 and FAR 1.501, public comments received in response to this notice will be considered in formulating the final rule, however.

List of Subjects in 48 CFR Parts 33 and 52

Government procurement.

Dated: December 23, 1991.

Harry S. Rosinsky,

Acting Director, Office of Federal Acquisition Policy.

Federal Acquisition Circular (FAC) 90–10 amends the Federal Acquisition Regulation (FAR) as specified below:

Alternative Dispute Resolution

This interim rule revises FAR subpart 33.2 and section 52.233–1 to add policy, guidance, and criteria for use of alternative dispute resolution techniques.

Therefore, 48 CFR parts 33 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 33 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 33—PROTESTS, DISPUTES, AND APPEALS

2. Section 33.201 is amended by adding, in alphabetical order, definitions to read as follows:

33.201 Definitions.

Alternative dispute resolution means any procedure or combination of procedures voluntarily used to resolve issues in controversy without the need to resort to litigation. These procedures include, but are not limited to, settlement negotiations, conciliation, facilitation, mediation, fact-finding, minitrials, and arbitration.

Issue in controversy means a material disagreement between the Government and the contractor related to a claim or which could result in a claim. An issue in controversy can be all or part of a claim.

Neutral person, as used in this subpart, means an impartial third party, who serves as a mediator, fact finder, or arbitrator, or otherwise functions to assist the parties to resolve the issues in controversy. A neutral person may be a permanent or temporary officer or employee of the Federal Government or any other individual who is acceptable to the parties. A neutral person shall have no official, financial, or personal conflict of interest with respect to the issues in controversy, unless such interest is fully disclosed in writing to all parties and all parties agree that the neutral person may serve (5 U.S.C. 583).

3. Section 33.202 is revised to read as follows:

33.202 Contract Disputes Act of 1978.

The Contract Disputes Act of 1978 (41 U.S.C. 601–613) (the Act), as amended by the Administrative Dispute Resolution Act (Pub. L. 101–552), establishes procedures and requirements for asserting and resolving claims subject to the Act. In addition, the Act provides for: (a) the payment of interest on contractor claims; (b) certification of contractor claims; and (c) a civil penalty for contractor claims that are fraudulent or based on a misrepresentation of fact.

4. Section 33.204 is revised to read as follows:

33.204 Policy.

The Government's policy is to try to resolve all contractual issues in controversy by mutual agreement at the contracting officer's level. Agencies are encouraged to use alternative dispute resolution (ADR) procedures to the maximum extent practicable in accordance with the authority and the requirements of the Administrative Dispute Resolution Act (Pub. L. 101–552) and agency policies.

5. Section 33.207 is amended by revising paragraph (a) introductory text to read as follows:

33.207 Contractor claim certification.

(a) A contractor claim exceeding $50,000, or any claim regardless of amount when using alternative dispute resolution procedures, shall be accompanied by a certification that—

* * * * *

33.214 [Redesignated as 33.215]

6. Section 33.214 is redesignated as 33.215 and a new 33.214 is added to read as follows:

33.214 Alternative dispute resolution.

(a) The objective of using alternative dispute resolution (ADR) procedures is to increase the opportunity for relatively inexpensive and expeditious resolution of issues in controversy. Essential elements of ADR include—

(1) Existence of an issue in controversy;

(2) A voluntary election by both parties to participate in the ADR process;

(3) An agreement on alternative procedures and terms to be used in lieu of formal litigation;

(4) Participation in the process by officials of both parties who have the authority to resolve the issue in controversy; and

(5) Certification by the contractor in accordance with 33.207.

(b) ADR procedures may be used at any time that the contracting officer has authority to settle the issue in controversy and may be applied to a portion of a claim. When ADR procedures are used subsequent to issuance of a contracting officer's final decision, their use does not alter any of the time limitations or procedural requirements for filing an appeal of the contracting officer's final decision and does not constitute a reconsideration of the final decision.

(c) When appropriate, a neutral person may be used to facilitate resolution of the issue in controversy using the procedures chosen by the parties.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

7. Section 52.233–1 is amended by—

(a) Revising the introductory text, the date of the clause, and paragraph (a);

(b) Redesignating paragraphs (g) and (h) as (h) and (i) and adding a new paragraph (g);

(c) Removing the date "APR 1984" in Alternate I and inserting in its place "DEC 1991.";

(d) Redesignating paragraph (h) of Alternate I as paragraph (i);

(e) Removing from the introductory paragraph of Alternate I the words "paragraph (h)", everytime they appear, and inserting in their place "paragraph (i)"; and

(e) Removing the derivation lines following "(End of clause)" and Alternate I to read as follows:

52.233–1 Disputes.

As prescribed in 33.215, insert the following clause:

Disputes (Dec 1991)

(a) This contract is subject to the Contract Disputes Act of 1978, as amended (41 U.S.C. 601–613).

* * * * *

(g) At the time a claim by the Contractor is submitted to the Contracting Officer or a claim by the Government is presented to the Contractor, the parties, by mutual consent,

VOL
56
ISS
250
DE
30
1991
UMI

may agree to use alternative means of dispute resolution. When using alternative dispute resolution procedures, any claim, regardless of amount, shall be accompanied by the certification described in paragraph (d)(2) of this clause, and executed in accordance with paragraph (d)(3) of this clause.

(End of clause)

December 30, 1991

Part VIII

Department of Education

34 CFR Parts 300 and 303

Assistance to States for Education of Handicapped Children and Early Intervention Program for Infants and Toddlers With Handicaps; Proposed Rule

VOL 56 ISS 250 DEC 30 1991 UMI

DEPARTMENT OF EDUCATION

34 CFR Parts 300 and 303

Assistance to States for Education of Handicapped Children and Early Intervention Program for Infants and Toddlers With Handicaps

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations at 34 CFR part 300, implementing the Assistance to States for Education of Handicapped Children program authorized by part B of the Individuals with Disabilities Education Act (part B), and the regulations at 34 CFR part 303, implementing the Early Intervention Program for Infants and Toddlers with Handicaps authorized by part H of the Individuals with Disabilities Education Act (part H), by removing from their nonsupplanting regulations the provisions that prohibit the use of funds awarded under those programs to displace State or local funds for any "particular cost".

DATES: Comments must be received before March 30, 1992.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Ms. Lucille Sleger, Program Administration Branch, Division of Assistance to States, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW., Switzer Building, room 3615, Washington, DC 20202–2720; telephone: (202) 732–1104; (202) 732–1090 for TDD services.

FOR FURTHER INFORMATION CONTACT: Ms. Rhonda Weiss; telephone: (202) 732–1373; (202) 732–1090 for TDD services.

SUPPLEMENTARY INFORMATION: Part B authorizes formula grants to States, and through them to local educational agencies, to help provide special education and related services to children with disabilities. To receive Part B funds from the State, each local educational agency is required to submit an application that contains specified assurances regarding use of those funds, including an assurance that Part B funds will be used to supplement and, to the extent practicable, increase the level of State and local funds expended for the education of children with disabilities, and in no case to supplant those State and local funds. The statutory requirement prohibiting local educational agencies from supplanting State and local funds with part B funds is implemented by 34 CFR 300.230 of the part B regulations.

Part H authorizes assistance to States to help them plan, develop, and implement a State-wide system of early intervention programs for infants and toddlers with disabilities and their families. Each participating State must make an application to the Secretary for its Part H grant award. The statute requires this application to contain specified assurances regarding the use of part H funds, including an assurance, similar to the assurance in part B, that part H funds will be used to supplement, and not supplant, State and local funds expended for early intervention services for infants and toddlers with disabilities. The statutory requirement prohibiting States from supplanting State and local funds with part H funds is implemented by 34 CFR 303.124 of the part H regulations.

During the Education Summit held in September 1989, President Bush made a commitment to the State Governors that the Federal Government would give States more flexibility in the use of Federal education program funds while ensuring accountability in the use of those funds by recipients. These proposed regulatory changes, which would continue to require that States maintain or increase the total amount of funds spent to meet Part B and Part H requirements, are being made consistent with this commitment. These proposed regulatory changes also are supportive of the goals of the AMERICA 2000 Education Strategy, because they will increase the ability of State and local educational agencies to develop and implement innovative strategies to meet the needs of children with disabilities more effectively. The part B and part H nonsupplanting provisions, which are virtually identical, currently include the following two-pronged test for determining compliance with the nonsupplanting requirements for these programs:

Aggregate Test: The total amount of State and local funds budgeted for expenditures in the current fiscal year for the education of children with disabilities under Part B or for early intervention services for infants and toddlers with disabilities and their families under part H must be at least equal to the amount of those funds actually expended in the most recent preceding fiscal year for which information is available.

Particular Cost Test: Funds awarded under part B and Part H may not be used to displace State or local funds for any "particular cost".

The "particular cost" test was included in the part B regulations, first published in 1977, to assist in ensuring that part B funds would be used to increase State and local efforts for the education of children with disabilities. Because the Secretary sought to coordinate the fiscal requirements in Part H with those of part B as closely as possible, the nonsupplanting provisions in the part H regulations published in 1989 were modeled after those in the part B regulations. However, based on the Secretary's experience in administering part B, the Secretary has found that under the "particular cost" test, local educational agencies have been found out of compliance with the part B nonsupplanting requirement, even in instances in which the total amount of State and local funds budgeted for the education of children with disabilities in a fiscal year was maintained at, or increased from the amount expended in the most recent preceding fiscal year. For example, if a local educational agency spends part B funds to pay for a teacher's salary that was previously paid for with State or local funds, a supplanting violation would occur, even though the total amount of State and local funds spent on special education is greater than the amount spent the previous year.

The Secretary believes that the particular cost test is unnecessary to ensure compliance with the statutory requirements that Federal funds be used to supplement, or increase, the level of State and local funds expended to meet the special educational needs of children with disabilities and the early intervention needs of infants and toddlers with disabilities and their families, and not to replace those State and local funds. The Secretary also believes that the particular cost provision limits the ability of State and local agencies to make financial adjustments that could assist in improving the quality of services for children with disabilities and for infants and toddlers with disabilities and their families.

Therefore, to give States and local educational agencies more flexibility in the use of part B and part H funds, while still requiring States to maintain or increase the total amount of State and local funds expended to meet part B and part H requirements, the Secretary proposes to amend the part B regulations at 34 CFR 300.230 by deleting the particular cost provision at § 300.230(b)(2) and to amend the part H regulation at 34 CFR 303.124 by deleting the particular cost provision at § 320.303.124(b)(2). Also, the Secretary proposes to delete the comment following § 300.230 of the Part B regulations and the note following § 303.124 of the part H regulations since this comment and note were intended primarily to distinguish between the "aggregate" and "particular cost" tests. The Secretary believes that these proposed regulatory changes will serve to enhance State and local efforts to meet the special educational needs of children with disabilities and the early intervention needs of infants and toddlers with disabilities and their families, and will in no way serve to diminish the rights and protections guaranteed to children with disabilities and their parents by part B of the Act and the rights and protections guaranteed to infants and toddlers with disabilities and their families by part H of the Act.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility and Certification

The Secretary certifies that these proposed regulations would not have a significant impact on a substantial number of small entities.

To the extent that these proposed regulations would affect States and State agencies, the regulations would not have an impact on small entities, since States and State agencies are not defined as "small entities" in the Regulatory Flexibility Act.

The few small entities that would be affected by these proposed regulations are small local educational agencies receiving Federal funds under this program. However, the regulations would not have a significant economic impact on the small local educational agencies affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

Paperwork Reduction Act of 1980

These proposed regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in room 3615, Switzer Building, 330 C Street, SW., Washington, DC, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comments on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

List of Subjects

34 CFR Part 300

Administrative practice and procedures, Education, Education of individuals with disabilities, Grant programs—education, Privacy, Private schools, Reporting and recordkeeping requirements.

34 CFR Part 303

Education, Education of the handicapped, Grant programs—education, Medical personnel, State educational agencies.

Dated: November 1, 1991.

Lamar Alexander,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.027; Assistance to States for Education of Handicapped Children and 84.181; Early Intervention program for Infants and Toddlers with Handicaps)

The Secretary proposes to amend title 34 of the Code of Federal Regulations by amending parts 300 and 303 as follows:

PART 300—ASSISTANCE TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN

1. The authority citation for part 300 continues to read as follows:

Authority: 20 U.S.C. 1411–1420, unless otherwise noted.

§ 300.2 [Amended]

2. Section 300.230 is amended by removing the colon after the word "section" in paragraph (b); removing "(1) The" in paragraph (b)(1) and adding in its place ", the"; removing paragraph (b)(2) and redesignating paragraphs (b)(1)(i) and (ii) as (b)(1) and (2), respectively; and removing the Comment following the section.

PART 303—EARLY INTERVENTION PROGRAM FOR INFANTS AND TODDLERS WITH HANDICAPS

3. The authority citation for part 303 continues to read as follows:

Authority: 20 U.S.C. 1471–1485, unless otherwise noted.

§ 303.124 [Amended]

4. Section 303.124 is amended by removing the dash after the word "section" in paragraph (b); removing the "(1) The" in paragraph (b)(1) and adding in its place ", the"; removing paragraph (b)(2) and redesignating paragraphs (b)(1)(i) and (ii) as (b)(1) and (2), respectively; and removing the Note following the section.

Environmental Protection Agency

Twenty-Ninth Report of the Interagency Testing Committee to the Administrator; Notice

VOL 56 ISS 250 DE 30 1991 UMI

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-41036; FRL 4007-6]

Twenty-Ninth Report of the Interagency Testing Committee to the Administrator; Receipt of Report and Request for Comments Regarding Priority Testing List of Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Interagency Testing Committee (ITC), established under section 4(e) of the Toxic Substances Control Act (TSCA), transmitted its Twenty-Ninth Report to the Administrator of EPA on November 27, 1991. As noted in this Report, which is included with this notice, the Committee revised the Priority Testing List by adding one chemical, white phosphorus, and one chemical group, the alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers. These chemicals are recommended. There are no designated or recommended with intent-to-designate chemicals.

The ITC removed six chemicals from the Priority Testing List in the 29th Report as a result of EPA actions. Five brominated flame retardants, designated in the 25th ITC Report, were removed because EPA issued a proposed rule on June 25, 1991 (56 FR 29140). 4-Vinylcyclohexene, designated in the 26th Report, was removed because EPA issued a consent order on September 23, 1991 (56 FR 47912).

EPA invites interested persons to submit written comments on the Report.

DATES: Written comments should be submitted by January 29, 1992.

ADDRESSES: Send four copies of written submissions to: TSCA Public Docket Office (TS-793), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. NE G-004, 401 M St., SW., Washington, DC 20460. Submissions should bear the document control number (OPPTS-41036; FRL 4007-6). The public record supporting this action, including comments, is available for public inspection in Rm. NE G-004 at the address noted above from 8 a.m. to noon and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E-543B, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: EPA has received the TSCA Interagency Testing Committee's Report to the Administrator.

I. Background

TSCA (Pub. L 94-469, 90 Stat. 2003 et seq; 15 U.S.C. 2601 et seq.) authorizes the Administrator of EPA to promulgate regulations under section 4(a) requiring testing of chemicals and chemical groups in order to develop data relevant to determining the risks that such chemicals and chemical groups may present to health or the environment. Section 4(e) of TSCA established the Interagency Testing Committee to recommend chemicals and chemical groups to the Administrator of EPA for priority testing consideration. Section 4(e) directs the ITC to revise the TSCA section 4(e) Priority Testing List at least every 6 months. The ITC's most recent revisions to this List are included in the Committee's Twenty-Ninth Report. The Report was received by the Administrator on November 27, 1991, and is included in this Notice. The Report adds one chemical and one chemical group to the TSCA section 4(e) Priority Testing List.

II. Written and Oral Comments

EPA invites interested persons to submit detailed comments on the ITC's new recommendations. The Agency is interested in receiving information concerning additional or ongoing health and safety studies on the subject chemicals as well as information relating to the human and environmental exposure to these chemicals.

A notice will be published at a later date in the Federal Register adding the substances recommended in the ITC's Twenty-Ninth Report to the TSCA section 8(d) Health and Safety Data Reporting Rule (40 CFR part 716), which requires the reporting of unpublished health and safety studies on the listed chemicals. The delay in publishing this notice is necessary to avoid an overlap in the reporting period for chemicals included in the ITC's 28th list. That notice will also add the chemicals to the TSCA section 8(a) Preliminary Assessment Information Rule (40 CFR part 712). The section 8(a) rule requires the reporting of production volume, exposure, and release information on the listed chemicals.

III. Status of List

The ITC's Twenty-Ninth Report notes the addition of one chemical and one chemical group to the Priority Testing List, and the removal of 5 brominated flame retardants and 4-vinylcyclohexene from the List. The current Priority Testing List contains 26 chemicals and 21 chemical groups, 13 of these chemicals are designated.

Authority: 15 U.S.C. 2603.

Dated: December 16, 1991.

Charles M. Auer,

Director, Existing Chemical Assessment Division, Office of Pollution Prevention and Toxics.

Twenty-Ninth Report of the TSCA Interagency Testing Committee to the Administrator, Environmental Protection Agency

Summary

The U.S. Congress created the Interagency Testing Committee (ITC) under the Toxic Substances Control Act (TSCA) to recommend chemicals and chemical groups to the Administrator of the U.S. Environmental Protection Agency (EPA) for priority testing consideration and to facilitate coordination of chemical testing sponsored or required by U.S. Government organizations represented on the Committee. Congress directed the Committee to: (1) Organize their recommendations as the Priority Testing List, (2) revise the Priority Testing List at least every 6 months and (3) transmit these revisions to the EPA Administrator for publication in the Federal Register.

As a result of its deliberations during this reporting period (5/16/91 to 11/27/91), the Committee is revising the TSCA section 4(e) Priority Testing List by recommending one chemical and one chemical group. The Committee's computerized, substructure-based chemical selection expert systems were used to identify the chemicals in groups that are likely to satisfy multiple data needs of Member Agencies and others. During this reporting period, the Committee (1) considered available information on 5 chemicals and 14 chemical groups, (2) discussed information on Committee activities at the North American Benthological Society Technical Information Workshop on Toxicity Assessment Techniques for Aquatic Invertebrates, (3) participated in CPSC's, EPA's and NCI's chemical testing meetings, (4) met with the Synthetic Organic Chemical Manufactures Association and the Chemical Manufactures Association to discuss completed, ongoing and planned testing of chemical groups, (5) processed chemicals nominated by Maryland's Department of the Environment, (6) prepared testimony for U.S. Senate hearings on chemicals causing adverse reproductive effects, (7) published

unambiguous tables of the 124 chemicals and 39 chemical groups on or removed from the Priority Testing List, (8) initiated a review of 350 studies submitted to the EPA or retrieved from recent literature for chloroalkyl phosphates, (9) shared test data resulting from EPA's implementation of ITC's testing recommendation with a permitting authority and (10) deferred one chemical from testing consideration.

Chemicals or chemical groups (entries) on the Priority Testing List are designated, recommended with intent-to-designate or recommended by the Committee. Designations were created by the U.S. Congress when they drafted TSCA. Recommendations with intent-to-designate were established by the Committee in their 17th Report (50 FR 47603; November 19, 1985). Recommendations were established by the Committee in their 11th Report (47 FR 54626; December 3, 1982).

Revisions to the Priority Testing List

Revisions to the Priority Testing List are presented, together with the types of testing recommended, in Table 1. The footnote letters following Table 1 acknowledge the Committee's efforts to comprehensively search ongoing testing-related activities for chemicals under section 110 of the Superfund Amendments and Reauthorization Act (SARA), section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA), section 301 of the Clean Air Act Amendments, Priority 1 substances in the Organization for Economic Cooperation and Development's chemical testing program and available information previously submitted under TSCA section 8(a) and 8(d). Table 1 reads as follows:

TABLE 1.—REVISIONS TO THE SECTION 4(E) PRIORITY TESTING LIST

Group	CAS No.	Chemical	Action	Date	Recommended Tests
	7723-14-0	White phosphorus[1] [2]	Recommended	11/91	Chemical fate: Persistence in surface waters and sediments. Health effects: None. Ecological effects: Toxicity to migratory birds and other wildlife.
Alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers.			Recommended	11/91	Chemical fate: Physical and chemical properties and biodegradation screening. Health effects: Screening for subchronic, mutagenic, reproductive, developmental and neurotoxic effects, except diphenyl oxide. Ecological effects: Screening for toxicity to algae, aquatic invertebrates and fish.

[1] Superfund Amendments and Reauthorization ACt (SARA) Section 110.
[2] Emergency Planning and Community Right-to-Know Act (EPCRA) section 313.

Listed below are the individual chemicals for the diaryl ethers in Table 1. Chemical nos. 1 through 7 are alkyldiaryl ethers, chemical no. 8 is a bromodiaryl ether, chemical nos. 9 through 12 are chlorodiaryl ethers, chemical nos. 13 and 14 are hydroxymethyl diaryl ethers.

No.	Chemical Name	CAS No.
1.	Benzene, 1,1'-oxybis-	101-84-8[1] [2]
2.	1,4-Diphenoxybenzene	3061-36-7
3.	Benzene, 1-methyl-3-phenoxy-	3586-14-9
4.	Benzene, 1,1'-oxybis[methyl-	28299-41-4
5.	1,1'-Biphenyl, phenoxy-	28984-86-6
6.	Benzene, 1,1'-oxybis[(1,1,3,3-tetramethylbutyl)-	61702-88-3
7.	Benzene, 1,1'-oxybis[dodecyl-	69834-19-1
8.	Benzene, 1-(bromomethyl)-3-phenoxy-	51632-16-7
9.	2-Chloro-l-(3-methylphenoxy)-4-(trifluoromethyl)benzene	42874-96-4
10.	Phenol, 3-[2-chloro-4-(trifluoromethyl)phenoxy]-,acetate	50594-77-9
11.	Benzoic acid, 3-[2-chloro-4-(trifluoromethyl)phenoxy]-	63734-62-3
12.	Benzoic acid, 3-[2-chloro-4-(trifluoromethyl)phenoxy]-,potassium salt	72252-48-3
13.	Benzenemethanol, 3-phenoxy-,	13826-35-2
14.	Benzenemethanol, 3-phenoxy-, acetate	50789-44-1

8. Appointed on September 28, 1991; on an IPA from August 1990 to August 1991.
9. Appointed on August 15, 1991
10. Appointed on September 11, 1991.
11. Appointed on November 26, 1991

The Committee very much appreciates the efforts of former members and alternates from ATSDR (Deborah Barsotti, member from 3/89-11/91), EPA (Letitia Tahan, member from 8/89-8/91 and Vince Nabholtz, alternate from 8/89-8/91), NSF (Bill Pengelly, member from 8/90-8/91), and OSHA (Loretta Schuman, member from 9/89-8/91). These members and alternates were responsible for initiating and sustaining intraagency efforts that resulted in Member Agency nomination of chemical groups (brominated flame retardants, isocyanates, IRIS (RfC/RfD) chemicals, aldehydes, alkynes, nitroalcohols, phophoniums, hydrazines, oxiranes, alkoxysilanes, aldehyde hydrates and isothiocyanates) and chemicals (1,1' methylenebis-4-isocyanatocyclohexane and *N*-phenyl-1-naphthylamine) that were included in the Committee's 25th, 26th, 27th and 28th Reports. The ITC acknowledges the assistance and support given by the staff of Syracuse Research Corp. (technical support contractor) and personnel of the EPA Office of Pollution Prevention and Toxics.

Chapter 1—Introduction

1.1 *Background.* The U.S. Congress created the TSCA Interagency Testing Committee (ITC) in 1976 and provided the ITC with statutory authority to screen, select and recommend chemicals and chemical groups to the EPA Administrator for priority health effects, chemical fate, and ecological effects testing consideration. When screening chemicals or chemical groups for consideration, Congress directed the Committee (which consists of members from 8 statutory and 10 liaison U.S. Government organizations) to consider 8 statutory factors including: (1) Quantities manufactured or released, (2) numbers of individuals exposed, (3) duration of exposure, (4) extent of human exposure, (5) structural relationships to known toxic substances, (6) availability of existing toxicity data, (7) reliability of available toxicity data to predict hazard, and (8) availability of testing facilities to develop data for the recommended tests. Congress also directed the Committee to give priority attention to those chemicals or chemical groups known to cause or suspected of causing cancer, gene mutations or birth defects. Based on these Congressional directives, the Committee recommends chemicals or chemical groups that appear to have insufficient health effects, chemical fate, or ecological effects test data and that may present an unreasonable risk of injury to health or the environment, reasonably be anticipated to enter the environment in substantial quantities or involve significant or substantial human exposure.

Congress also created the ITC to facilitate coordination of chemical testing sponsored or required by U.S. Government organizations and to enhance information exchange to promote cost-effective use of U.S. Government chemical testing resources by recommending testing of chemicals or chemical groups that are likely to satisfy multiple data needs of Member Agencies and others. The Committee's statutory responsibilities are described in section 4(e) of the Toxic Substances Control Act (TSCA; Public Law 94-469, 90 Stat. 2003 et seq., 15 U.S.C. 2601 et seq.).

The Committee prepares the Priority Testing List of chemicals or chemical groups recommended for testing (by the chemical's manufacturers), transmits the Priority Testing List to the Administrator of the U.S. Environmental Protection Agency (EPA) and determines the order in which the EPA Administrator shall implement the testing recommendations under TSCA section 4(a) by designating those chemicals, from among its recommendations, to which the Administrator should respond within 12 months. Congress directed the Committee to revise the Priority Testing List at least every 6 months and required the EPA Administrator to publish the Committee's Reports in the **Federal Register**.

1.2 *Committee's previous reports.* Twenty-eight previous Reports to the EPA Administrator have been issued by the Committee and published in the **Federal Register**. In these 28 Reports, the Committee recommended testing for 123 chemicals and 38 chemical groups. Chemical groups consist of one or more chemicals, isomers, congeners, mixtures, and so on that have a common substructure, use, testing information deficiency, exposure scenario, etc., and for which there is one common testing recommendation, e.g., aldehydes

recommended for ecological effects testing in the 27th Report. Chemicals can be members of chemical groups, but each is counted as a single chemical if their testing recommendations are different, e.g., the five chloroalkyl phosphates recommended in the 23rd Report.

1.3 *Committee's activities during this reporting period.* Between May 16, 1991 and November 27, 1991, the Committee examined lists of ongoing activities related to reducing testing information deficiencies for commercial chemicals, used their computerized, substructure-based, chemical selection expert systems to identify chemical groups in need of testing, identified chemicals that appeared to have insufficient health effects, chemical fate or ecological effects test data, considered the multiple data needs of Member Agencies and others, and recommended chemicals and chemical groups with insufficient test data based on concerns for potential toxicity, exposure or environmental release.

1.3.a *Chemical and chemical group selections.* The Committee recommended one chemical (white phosphorus) and one chemical group (alkyl-, bromo-, chloro-, hydroxymethyl diarylethers) for testing (Table 1). White phosphorus and alkyl-, bromo-, chloro-, hydroxymethyl diarylethers were recommended, not designated, because the Committee wants to review the TSCA section 8(a) and 8(d) information and any use exposure and release information as well as any physical chemical property information that is voluntarily submitted, before deciding whether to designate or withdraw these chemicals for testing. When the Committee recommended white phosphorus for chemical fate and ecological effects testing, it considered the data needs of the U.S. Department of the Interior, the ongoing activities of the Department of Defense and the regulatory authorities of the Department of Transportation. Test data needs are considered during selection of chemicals and chemical groups for testing. However, it may be difficult to identify test data needs or to anticipate how test data might be used until EPA implements the ITC's testing recommendations and industry develops sufficient data to distinguish between hazardous versus non-hazardous chemicals (e.g., see third paragraph of chapter 1.3.c below). When the Committee recommended alkyl-, bromo-, chloro-, hydroxymethyl diarylethers for health effects, chemical fate and ecological effects screening tests, it considered the uncertainties related to production and use, potential exposures and releases from production, processing and use, potential for persistence in the environment, potential to cause adverse health or ecological effects and the paucity of publicly-available data for over 90 percent of these chemicals. These recommendations are consistent with the Committee's comprehensive approach of using their computerized processes to: (1) Identify chemicals in substructure-based groups in need of screening tests, (2) review recently requested production and exposure data and non-public health and safety studies, (3) meet with interested groups to identify commercially-important chemicals that need to be tested (4) withdraw chemicals or tests to avoid unnecessary or duplicative testing, (5) characterize testing information deficiencies identified by Member Agencies as well as others, and (6) integrate available information into a consolidated testing program likely to serve multiple users.

There are numerous advantages associated with nominating chemicals to the Committee. These were described in detail in chapter 1.3.a of the 27th Report (56 FR 9534, March 6, 1991). Further information about nominating chemicals or chemical groups to the Committee can be obtained by calling the Committee's Executive Director at area code 202/260-1820 or the Committee's Executive Assistant at area code 202/260-1825.

1.3.b *Comprehensive information processing.* During this reporting period, several For Your Information (FYI), TSCA section 8(d) and 8(e) documents were reviewed. These documents are stored on microfiche in the TSCA Public Docket Office, Office of Pollution Prevention and Toxics, Environmental Protection Agency, Room G-004 NE Mall, 401 M Street, SW., Washington, D.C. 20460. These microfiched documents are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161 (1-800-336-4700), and from Chemical Information Systems, Inc., 7215 York Road, Baltimore, Maryland 21212 (1-800-CIS-USER). The Committee referenced several of these documents in chapter 2 of this report and readers are referred to the above addresses to obtain further information. Interested parties can also obtain, from the EPA address, copies of publicly-available reports, letters and published references supporting recommendations of chemicals in this report.

The Committee continues to comprehensively search available domestic and international lists of ongoing activities related to reducing testing information deficiencies on chemicals under review. Efforts to conduct these searches have identified numerous chemicals previously reviewed or recommended by the Committee. Many of the chemicals previously reviewed or recommended by the Committee are on ATSDR's list, the Toxics Release Inventory or the list of Hazardous Air Pollutants because of test data developed, in part, as a response to EPA's implementation of ITC's testing recommendation or as a result of other testing after ITC review. Committee recommendations have resulted in the submission of: (1) Substantive TSCA section 8(a) production, exposure and release information, (2) thousands of non-public TSCA section 8(d) studies and (3) hundreds of TSCA section 4(a) and (d) studies that were conducted as a result of the EPA's implementation of the Committee's testing recommendations. The Committee continues to review information on these and other lists. Efforts to conduct searches also identified chemicals for which TSCA information-gathering activities are ongoing (see Table 1 footnotes). The Committee makes the results of these searches publicly available by referencing TSCA submissions in Reports to the EPA Administrator or making tables and references of these submissions available in the public dockets supporting a Report to the EPA Administrator.

During this reporting period, the Committee considered available information on 5 chemicals and 14 chemical groups. Chemical groups under consideration include: alkenes, alkylamines, alkylethers, alkylsulfonates, amino aromatics, anhydrides, anthraquinones, aromatic dianhydrides, aromatic sulfhydryls, aromatic sulfonates, aryl ethers, benzothiazoles, carbamates, dialkylamines, dihydroxybenzenes, ethylhexyl derivatives, fluorinated and iodinated organics, glycol ethers, haloalkyl ethers, heterocyclics, hindered phenols, imidazoles, inorganics, isoindoles, isophthalic acids, IRIS chemicals, nitriles, nitroaromatics, nitroparaffins, *N*-phenylenediamines, phenolic antioxidants, phosphates, pyrrolidinones, sulfenamides, sulfonic acids, thiocarbamates, thiols, triazines, and xanthenes. The Committee recommended one chemical and one chemical group to the TSCA section 4(e) Priority Testing List. Review of the remaining chemicals and chemical groups is ongoing.

VOL 56 ISS 250 DE 30 1991 UMI

1.3.c *Information dissemination.* To emphasize the Committee's efforts to promote public understanding of the ITC's functions and purposes, the Committee is listing some of the Committee-related activities that occurred during this reporting period. On May 23, 1991, the Executive Director presented a keynote speech at the North American Benthological Society Technical Information Workshop on Toxicity Assessment Techniques for Aquatic Invertebrates. On several occasions, the Committee's Chairperson, Vice-Chairperson, Executive Director or Members participated in CPSC's, EPA's and NCI's meetings to discuss chemical testing.

To facilitate coordination of chemical testing and to promote conservation of chemical testing resources the Executive Director met with the Synthetic Organic Chemical Manufactures Association and the Chemical Manufactures Association to discuss completed, ongoing and planned testing of chemical groups. The Committee processed chemicals referred to the ITC by Maryland's Department of the Environment. The Executive Director prepared testimony for U.S. Senate hearings on chemicals causing adverse reproductive effects.

To enhance communication, the Executive Director and Executive Assistant frequently respond to questions related to chemicals reviewed or recommended by the ITC. During this reporting period, the Executive Director responded to a call from Peter Howe of EPA's Region V, who called to learn if the ITC had recommended 4-(1,1,3,3-tetramethylbutyl)phenol (TMBP) for testing. TMBP was recommended for testing in November 1982 as part of the Committee's 11th Report. EPA's implementation of the ITC's testing recommendation and industry testing of TMBP produced chemical fate and ecological effects data (TMBP is persistent and highly toxic to aquatic organisms) that Region V used as part of the Agency's National Pollutant Discharge Elimination System permitting activities.

To promote a comprehensive evaluation of recent exposure information similar to that requested in the 28th Report, the Committee is soliciting voluntary use exposure and release information that is unlikely to be submitted in response to the TSCA Section 8(a) rule that is promulgated for any chemical or chemical group recommended for testing. In this 29th Report, the Committee is soliciting voluntary use exposure and release information for the one chemical and one chemical group recommended for testing and listed in Table 1.

To promote a comprehensive evaluation of recent physical and chemical property information similar to that requested in the 28th Report, the Committee is soliciting voluntary submission of this information for the one chemical and one chemical group recommended for testing and listed in Table 1.The Committee is soliciting voluntary submissions, because under 40 CFR 716.50, TSCA Section 8(d) studies of physical and chemical properties must be submitted only if they are performed for the purpose of determining the environmental or biological fate of a substance, and only if they investigated water solubility, adsorption/desorption on particulate surfaces, vapor pressure, octanol/water partition coefficient, density, dissociation constant, etc. The Committee recognizes that before chemicals are manufactured, many physical and chemical properties are measured (including those mentioned above, but also including flash point, melting point, boiling point, etc.), but not for the purpose of determining the environmental or biological fate of a substance. Member Agencies often need these physical and chemical properties that would not be developed as part of an environmental or biological fate assessment.

The Committee hopes that a voluntary approach for use exposure data and physical chemical property information will prove more efficient than pursuing notice-and-comment rulemaking under a TSCA section 8(a) Comprehensive Assessment Information Rule.

1.3.d *Referrals.* During this reporting period, the Committee did not refer any chemicals to Member Agencies or other organizations for testing consideration.

1.3.e *Deferrals.* The Committee is deferring 5-chloro-2-(2,4-dichlorophenoxy) phenol (CAS No. 3380-34-5), because of uncertainties related to testing under TSCA. Deferred and other chemicals are recycled through the Committee's computerized processes to identify chemicals whose production volumes have substantially changed.

1.3.f *Removals.* Six chemicals were removed from the Priority Testing List as a result of EPA responses to Committee recommendations. Five brominated flame retardants designated in the Committee's 25th Report were removed from the Priority Testing List on June 25, 1991 when EPA promulgated a Notice of Proposed Rulemaking. 4-Vinylcyclohexene, designated in the Committee's 26th Report was removed from the Priority Testing List on September 23, 1991 when EPA published a negotiated Consent Order.

In addition, the Committee is providing a complete list of 98 chemicals and 18 chemical groups that have been recommended and removed from the Priority Testing List since the ITC's 1st Report in October 1977 (Table 2). Reasons for removing chemicals from the Priority Testing List as well as the reference for the original Committee designation or recommendation are contained in the FR citations listed in Table 2. The Report numbers for the original Committee designation or recommendation are listed in Table 2. Reports have been consistently published every 6 months since October 1977. Table 2 reads as follows:

TABLE 2.—REMOVALS FROM THE TSCA SECTION 4(E) PRIORITY TESTING LIST

Report	Chemical/Group	Citation	Publication Date
1	Alkyl epoxides	49 FR 449	January 4, 1984
1	Alkyl phthalates	46 FR 53775	October 30, 1981

1.4 *The TSCA section 4(e) Priority Testing List.* Section 4(e)(1)(B) of TSCA directs the Committee to: "* * * make such revisions in the [priority] list as it determines to be necessary and * * * transmit them to the Administrator together with the Committee's reasons for the revisions." Under this authority, the Committee is revising the Priority Testing List by recommending one chemical and one chemical group. These revisions are listed in Table 1.

The Priority Testing List (Table 3) includes 26 chemicals and 21 chemical groups designated, recommended with intent-to-designate or recommended for testing. Individual chemicals in Priority Testing List chemical groups are listed in Table 1 or the paragraph following Table 1 of this and previous Reports with appropriate notes that minimize ambiguities related to TSCA section 8(a) and 8(d) reporting requirements. Tables 2 (Removals from the Priority Testing List) and 3 (the Priority Testing List) list the 124 chemicals and 39 chemical groups that have been recommended or designated for testing since the Committee's 1st Report in October 1977. Table 3 reads follows:

TABLE 3.—THE TSCA SECTION 4(E) PRIORITY TESTING LIST

Date	Entry	Action
May 1988	Ethoxylated quaternary ammonium compounds	Recommended
May 1988	Imidazolium quaternary ammonium compounds	Recommended
November 1988	Tetrakis(2-chloroethyl)ethylene diphosphate	Recommended with intent-to-designate
November 1988	Tris(1,3-dichloro-2-propyl) phosphate	Recommended with intent-to-designate
November 1988	Tris(1-chloro-2-propyl) phosphate	Recommended with intent-to-designate
November 1988	Tris(2-chloro-1-propyl) phosphate	Recommended with intent-to-designate
November 1988	Tris(2-chloroethyl)-phosphate	Recommended with intent-to-designate
November 1988	Butyraldehyde	Recommended
November 1989	Brominated flame retardants	Recommended
May 1990	Isocyanates	Recommended with intent-to-designate
May 1990	Brominated flame retardants	Recommended
May 1990	Alkyl phosphates	Recommended
November 1990	Sodium cyanide	Designated
November 1990	Acrylic acid	Designated
November 1990	Acetophenone	Designated
November 1990	Phenol	Designated
November 1990	*N,N*-Dimethylaniline	Designated
November 1990	Ethylacetate	Designated
November 1990	2,6-Dimethylphenol	Designated
November 1990	Aldehydes	Recommended with intent-to-designate
November 1990	2,4-Dinitrophenol	Recommended
November 1990	3,4-Dimethylphenol	Recommended
November 1990	*N*-phenyl-1-naphthylamine	Recommended
November 1990	Sulfones	Recommended
November 1990	Substantially produced chemicals in need of subchronic tests	Recommended
May 1991	Acetone	Designated
May 1991	*n*-Butanol	Designated
May 1991	Isobutanol	Designated
May 1991	Di-(2-ethylhexyl)adipate	Designated
May 1991	Dimethyl terephthalate	Designated
May 1991	Thiophenol	Designated
May 1991	*m*-Dinitrobenzene	Recommended
May 1991	Allyl alcohol	Recommended
May 1991	2,4-Dichlorophenol	Recommended

VOL 56 ISS 250 DE 30 1991 UMI

TABLE 3.—THE TSCA SECTION 4(E) PRIORITY TESTING LIST—Continued

Date	Entry	Action
May 1991	Alkynes	Recommended
May 1991	Nitroalcohols	Recommended
May 1991	Phosphoniums	Recommended
May 1991	Hydrazines	Recommended
May 1991	Oxiranes	Recommended
May 1991	Alkoxysilanes	Recommended
May 1991	Aldehyde hydrates	Recommended
May 1991	Propylene glycol ethers and esters	Recommended
May 1991	Methyl ethylene glycol ethers	Recommended
May 1991	Isothiocyanates	Recommended
May 1991	Cyanoacrylates	Recommended
November 1991	White phosphorus	Recommended
November 1991	Alkyl-, bromo-, chloro-, hydroxymethyl diarylethers	Recommended

Chapter 2—Recommendations of the Committee

2.1 *Chemicals recommended for priority consideration by the EPA Administrator.* As provided by section 4(e)(1)(B) of TSCA, the Committee is adding to the section 4(e) Priority Testing List one chemical and one chemical group (see Table 1). The recommendation of these chemicals is made after considering the factors identified in section 4(e)(1)(A) and other relevant information, such as the chemical testing data needs of Member Agencies.

2.2 *Designated chemicals.* None.

2.3 *Recommended with intent-to-designate chemicals.* None.

2.4 *Recommended chemicals*—2.4.a *White phosphorus.* White Phosphorus is recommended for testing based on concerns of the Department of Interior (DOI). DOI is concerned about and has few data on the persistence of white phosphorus in wetland sediments, the adverse effects of persistent white phosphorus to birds and wildlife that feed on sediments contaminated with white phosphorus, the potential for food chain effects and potential elimination of endangered species that may feed on carcasses of birds and wildlife that die from white phosphorus poisoning. The Department of Defense (DOD) is also concerned about the persistence and adverse effects of white phosphorus and has a task force that is developing a strategy for remediation of military sites contaminated with white phosphorus. The ITC is working with DOI and DOD to facilitate coordination of testing efforts and is aware of the Department of Transportation's regulation of white phosphorus as a flammable solid.

Summary of recommended studies. It is recommended that white phosphorus be tested for:

Chemical fate. Persistence in surface waters and sediments.

Health effects. None.

Ecological Effects. Toxicity to migratory birds and other wildlife.

White phosphorus

Physical and Chemical Information

CAS Number: 7723-14-0
Synonyms: Yellow phosphorus
Empirical Formula: P_4
Molecular Weight: 123.9
Physical State at 25 °C: Solid.
Description of Chemical: Colorless off white waxy solid, cubic crystals that spontaneously inflame in air at 30 °C. (Ref. 32, Windholz et al., 1983)
Melting Point: 44.1 °C
Vapor Pressure: 0.023 torr 25 °C (Ref. 26, Spanggord et al., 1985)1 atm at 76.6 °C (Ref. 3, Berkowitz et al., 1981)
Specific Gravity: Not Applicable
Log Octanol/Water
Partition Coefficient: 1200 ± 100 (Ref. 26, Spanggord et al., 1985)
Water Solubility at 25 °C: 4.1 mg/L (Ref. 26, Spanggord et al., 1985)
Log K_{oc}: 2,400 (Ref. 17, Lyman et al., 1990)
Henry's Law Constant: 2.1×10^{-3} atm m^3 $mole^{-1}$ at 25 °C.

Rationale for Recommendations

A. *Exposure information—Production/use/disposal/exposure/release.* In 1990, approximately 700 million pounds of white phosphorus were produced (Ref. 5, CMR, 1991); 1991 production is expected to be 792 million lbs (Ref. 27, SRI International, 1991).

Direct use of P_4 is mainly restricted to military applications (Ref. 30, Van Wazer, 1982); however, white phosphorus is commercially available for other applications such as in rodenticides (Ref. 23, Sax and Lewis, 1987). Otherwise white phosphorus is converted to phosphorus sulfides, halides, phosphorus pentoxide, phosphoric acid, and red phosphorus. The major uses of phosphorus compounds are in detergents, in the food and beverage industry and as fertilizers.

B. *Evidence for exposure—Human exposure.* The NOES conducted during 1981-83 by NIOSH reported that 135,453 workers (6811 females) were exposed to white phosphorus at 7,607 production and use facilities involving 83 occupations in 86 industries. The OSHA Permissible Exposure Limit for occupational exposure to white phosphorus is 0.1 mg/m^3 8-hour Time Weighted Average.

C. *Environmental exposure.* Catastrophic waterfowl mortality has been observed in the Eagle River Flats firing range, a salt marsh in Cook inlet in Alaska. Careful study of dying birds indicated that white phosphorus residues were present in their fat, gizzard contents and other digestive tissues, liver, skin, and breast muscle. White phosphorus was also found in the sediments on which they were feeding. Other munitions-derived chemicals were also found, but not at levels high enough to cause death. Feeding studies at levels similar to those found in the sediment produced death (Ref. 21, Racine et al., 1991). Other sites of exposure would be manufacturing operations and munitions packaging facilities. Direct release occurs during the production of white phosphorus (Ref. 15, Idler, 1969) and during the manufacture and combustion of white phosphorus/felt smoke-producing devices (Ref. 2, Bentley et al., 1978). During deployment of munitions, about 10 percent of the white phosphorus is not oxidized; thus it is

available for release in the environment (Ref. 26, Spanggord et al., 1985).

Test firing of U.S. Army munitions, especially smokes, into marshy areas may have serious consequences to waterfowl inhabiting these areas. A memorandum from the Regional Contaminants Coordinator (Region 7 - Alaska) describing the problem of white phosphorus in Eagle River Flats contained the following description (Ref. 22, Robinson-Wilson, 1991):

> White phosphorus is used in both flares and smokes by the U.S. Army. Shells are fired out over the impact area where they explode in the air, releasing the burning white phosphorus into the atmosphere. At ERF [Eagle River Flats], the falling particles of burning white phosphorus fall either onto snow or water, where they are quenched. Waterfowl, mainly dabbling ducks and swans, pick up white phosphorus particles during feeding. The particles are believed to have an oxidized coating and the birds are not exposed to the white phosphorus until the particles are ground up in their gizzards and released during digestion.

According to the TRI, 19,097 lbs were released to air, 11,569 lbs were discharged to water, 3,719,412 lbs were released to land, and 219,456 lbs were transferred to other off-site locations in 1988 (Ref. 29, TRI, 1991). In 1989, 16,174 lbs were released to air, 3,033 lbs were discharged to water, 3,291,402 lbs were released to land, and 85,573 lbs were transferred to other off-site locations (Ref. 29, TRI, 1991).

I. Chemical Fate Information

A. *Persistence.* In the few studies conducted near discharge sites, rapid dissipation out from the source was noted; however, it was determined in studies on the sediments from these locations that the surface deposits of a few parts per million probably oxidized quickly; whereas deeper deposits of higher concentrations could be stable for years (Ref. 1, Ackman et al., 1971; Ref. 26, Spanggord et al., 1985). This persistence is ascribed to the fact that most sediments are anaerobic a short distance below the surface, (Ref. 26, Spanggord et al., 1985; Ref. 8, Davidson et al., 1987; Ref. 28, Sullivan et al., 1979). This type of persistence is especially of concern to waterfowl which feed in these areas, since the particles of white phosphorus which are embedded in the sediment of the shallow water are believed to be ingested by ducks and swans.

B. *Rationale for chemical fate testing.* The U.S. Department of Interior is concerned about the fate of white phosphorus in sediments of a dabbling duck feeding environment. Release and persistence under these conditions is only poorly understood and further testing is needed.

II. Health Effects Information

The Committee is not recommending health effects testing at this time because it wants to review non-public health effects studies that may be submitted in response to the TSCA section 8(d) rule that EPA will publish for chemicals in the ITC's 29th Report.

A. *Metabolism and pharmacokinetics.* White phosphorus is rapidly absorbed from the digestive tract of mice, rats, and rabbits (complete within 24 hours). When radioactive P_4 is administered, radioactivity accumulates primarily in the liver, kidney, lung, bone, and skeletal muscle (Ref. 4, Cameron and Patrick, 1966; Ref. 13, Ghoshal et al., 1971; Ref. 16, Lee et al., 1975). Elimination is mainly via urinary excretion as inorganic and organic phosphates; some fecal elimination also occurs (Ref. 4, Cameron and Patrick, 1966; Ref. 16, Lee et al., 1975). It does not appear that white phosphorus is absorbed from the lungs or skin of laboratory animals (Ref. 7, Dalhamn and Holma, 1959).

There is no direct pharmacokinetic information for humans, but absorption from the digestive tract can be inferred by toxicity data (Ref. 20, Polson et al., 1983). There is no convincing evidence that white phosphorus is absorbed as a result of exposure by inhalation or dermal contact (Ref. 8, Davidson et al., 1987).

B. *Acute and subchronic (short-term) effects.* White phosphorus is highly toxic to humans and laboratory animals exposed by the oral route. Oral LD_{50} values for male and female rats are 3.76 and 3.03 mg/kg, and for male and female mice, 4.85 and 4.82 mg/kg, respectively (Ref. 16, Lee et al., 1975). The estimated minimal lethal oral dose in humans is 50 mg (0.7 mg/kg), but 15 mg (0.2 mg/kg) may cause serious toxicity (gastrointestinal, liver, renal, cardiovascular, and CNS effects) (Ref. 25, Sollman, 1957; Ref. 18, McCarron et al., 1981; Ref. 9, Diaz-Rivera et al., 1950).

Acute inhalation LC_{50} values for rats and mice are 1,400 and 660 mg/m^3, respectively. Because white phosphorus ignites spontaneously, (Ref. 30, Van Wazer, 1982), its contact with skin can cause serious burns. Dermal exposure of humans to white phosphorus via industrial accidents and on the battlefield has led to 3rd degree burns and death, massive hemolysis, and low plasma calcium (Ref. 31, Walker et al., 1947).

Young female rats fed diets containing median daily doses of white phosphorus of 0.075 mg/kg/day for 22 weeks showed severely depressed weight gain and weight loss, leading to a final weight less than the starting weight. Male rats fed 0.0027 mg per kg per day showed fluctuations in growth prior to the 15th week, but from the 15th to 25th week of exposure growth was rapid and was 13 percent above that of controls by the 25th treatment week (Ref. 24, Sollman, 1925).

C. *Genotoxicity.* White phosphorus was negative in Ames/*Salmonella* tests when evaluated as an undiluted saturated solution in distilled water; a concentration of up to 100 µL/plate in both the presence and absence of S9 fraction of liver did not induce increased incidence of mutations (Ref. 10, Ellis et al., 1978).

No data were located regarding the genotoxicity of white phosphorus in humans.

D. *Chronic toxicity.* Oral exposure of groups of 6 rats to 0.2, 0.4, 0.8, or 1.6 mg per kg per day of white phosphorus dissolved in peanut oil and mixed with stock diet for their lifetimes (up to 512 days) caused dose-related mortality. Retarded growth (effect level not reported) was believed due to inanition rather than systemic toxicity. Histopathological evaluation showed changes in the long bones (thickening of the epiphyseal line; extension of the trabeculae into the shaft). White phosphorus (0.05 mg per kg per day) dissolved in peanut oil and administered by subcutaneous injection to rats and guinea pigs for their lifetimes caused the same effects on bone, but to a lesser degree in the guinea pigs. Livers of these treated rats showed mild fatty degeneration, and lungs were also affected (bronchopneumonia, pneumonitis, bronchitis). These effects were not seen in guinea pigs (Ref. 11, Fleming et al., 1942).

Chronic exposure of humans to white phosphorus causes a characteristic lesion, necrosis of the jaw, which has been documented through numerous cases involving occupational exposure. In one study, the incidence of this condition was less than 5 percent of those exposed (Ref. 25, Sollman, 1957), and the estimated mortality rate from white phosphorus necrosis was about 20 percent, according to another study (Ref. 14, Hunter, 1969). Levels of exposure were not quantified.

E. *Reproductive and developmental effects.* Elemental yellow phosphorus was administered by gavage in corn oil to 8-week-old male and female rats in doses of 0, 0.005, 0.015, or 0.075 mg per kg per day for 80 days prior to mating, and continued through mating, gestation and lactation, then through a second

VOL 56 ISS 250 DE 30 1991 UMI

cycle from mating through lactation. Seven of the 30 high-dose females died during parturition, and hair loss was noted on both forelimbs of the high-dose males and females. No effects were seen on body weights or reproductive indices. No evidence of developmental toxicity was noted. The NOAEL was 0.015 mg per kg per day (Ref. 19, Monsanto, 1965).

No data were found on the reproductive or developmental toxicity of white phosphorus in humans.

III. Ecological Effects Information.

A. *Acute and subchronic (short-term) effects.* Both laboratory and field studies indicated that white phosphorus is highly toxic to aquatic organisms. The effluent from white phosphorus production contains both suspended and dissolved white phosphorus, and environmental release can occur from the combustion of munitions with remobilization from aquatic sediments as well as sinks in anaerobic soils. The LC_{50} values for five freshwater fish species range from 2.4 to 73 µg/L; the most sensitive species is *Lepomis macrochirus*. The LC_{50} values for five invertebrate species range from 30 to >560 µg/L; the most sensitive species is *Daphnia magna*. Available LC_{50} data for fish and invertebrates indicate that the toxicity of white phosphorus is cumulative. Single doses of 3 to 6 mg/kg have been reported to cause death in mallards and black ducks within 24 hours (Ref. 6, Coburn et al., 1950). A memo from the Regional Contaminants Coordinator (Region 7 - Alaska) describing the problem of white phosphorus in Eagle River Flats contained the following description (Ref. 22, Robinson-Wilson, 1991).

> Birds typically go through protracted convulsions before death, indicating a possible nervous system involvement. Birds that are affected are often taken by bald eagles and/or gulls before they die. However, few bald eagles or gulls have been found dead on ERF [Eagle River Flats] to date. ..[one] bald eagle was found and subsequent analysis of tissues found that WP [white phosphorus] was present. Since no data are available on WP toxicity in raptors and since no data exists on transfer of WP between trophic levels, we cannot state that WP was the toxic agent, but all the circumstantial evidence points to WP as the toxic agent.

B. *Chronic (long-term) effects.* Chronic white phosphorus exposure in *Pimephales promelas* reduced survival at 1.5 µg/L, and hatchability was reduced at 0.4 µg/L. In studies with macroinvertebrates, exposure to 8.7 µg/L reduced survival in *Daphnia magna* (Ref. 8, Davidson et al., 1987).

C. *Other ecological effects (biological, behavioral, or ecosystem processes).* The issue of wildlife toxicity was raised when it was discovered that a long-standing problem of waterfowl mortality at Eagle River Flats in Alaska was apparently being caused by the ingestion of particles of white phosphorus that had settled into marsh sediments. This has resulted in the death of 1000 to 2000 migratory dabbling ducks and 10 to 50 swans per year for the last 10 years (Ref. 21, Racine et al., 1991).

D. *Bioconcentration and Food-chain transport.* Bioconcentration in 3 species of fish ranged from 11.7 to 67.7 in muscle and from 51.5 to 2,000 fold in liver (Ref. 8, Davidson et al., 1987). In 6 species of invertebrates, bioconcentration ranged from 10.5 to 1,267 fold. In 2 species of seaweed the factor was 22.2 to 22.8 fold (Ref. 12, Fletcher, 1971).

E. *Rationale for ecological effects testing recommendation.* The U.S. Department of Interior is concerned about the toxicity of white phosphorus to migratory birds that seasonally reside on bodies of water containing white phosphorus particles in the water and in the sediment. Ecological effects testing is recommended because data are insufficient to reasonably determine or predict the toxicity of white phosphorus to migratory birds and other wildlife.

2.4.b *Alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers.* The Committee is recommending 14 alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers for physical chemical property, biodegradation rate, health effects and ecological effects screening tests. These chemicals will allow the Committee to evaluate the persistence and toxicity of the diaryl ether substructure. Alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers are defined as any two aromatic rings joined by an oxygen (i.e., Ar-*O*-Ar where Ar is any aryl group) where there are alkyl, bromo, chloro or hydroxymethyl substituents on one or both of the aromatic rings or on a methyl group attached to one of the aromatic rings. One minor exception to this definition is an acetate ester of hydroxymethyl diaryl ether. This chemical was included because the Committee believed that the ester would be metabolized to the alcohol. The Committee is making this recommendation based on: (1) concerns for potential persistence and toxicity, (2) the paucity of publicly-available data for a majority of these chemicals, and (3) the need to carefully review any studies that may be submitted under TSCA section 8(d), before designating or withdrawing recommended testing for any of these diaryl ethers.

Several diaryl ethers were previously reviewed. Diphenyl oxide was previously nominated for oncogenicity testing by the National Cancer Institute's Chemical Selection Working Group. The chemical was not selected for testing, pending the results of industry testing (Helmes et al., 1983, Ref. 13). 1-Amino-4-hydroxy-2-phenoxy-9,10-anthraquinone was recommended in ITC's 21st Report. Penta-, octa- and decabromodiphenyl ethers were designated in the ITC's 25th Report. 3-Phenoxybenzaldehyde was recommended in the ITC's 27th Report. Benzenesulfonic acid, 4,4'-oxybis-, dihydrazide was recommended in the ITC's 28th Report.

The 14 chemicals being recommended at this time were selected from a TSCA Inventory group of 55 diaryl ethers that have the general formula Ar-*O*-Ar. Of the 55 diaryl ethers that were considered, all but 16 were eliminated on the basis of substructural characteristics which indicated they would be better considered along with other chemical groups such as xanthenes, anthraquinones, sulfonic acids, isoindoles, amino and nitro aromatics, etc. Nonabromodiphenyl ether was not recommended because the Committee wanted to review any data developed for bromodiphenyl ethers. 5-Chloro-2-(2,4-dichlorophenoxy) phenol was deferred because of pesticide uses.

The Committee hopes that manufacturers, processors, and users will voluntarily provide use, exposure, and release data not required under TSCA section 8(a). Uncertainties related to production, toxicity and persistence may be clarified after the Committee's review of the data obtained from the automatic 8(a) and 8(d) rules.

Summary of recommended studies. Testing recommendations for the 14 diaryl ethers listed in the paragraph following Table 1 are summarized in Table 1.

Physical and Chemical Information

The Committee found limited information on measured physical and chemical properties for the diaryl ethers listed in the paragraph following Table 1: four boiling points, one log octanol/water partition coefficient, three melting points, one water solubility, and one vapor pressure (Ref. 1, Aldrich, 1988; Ref. 2, Ambrose et al., 1976; Ref. 4, Banerjee et al., 1980; Ref. 5, Bein, 1985; Ref. 9, Dean, 1985; Ref. 12, Hansch and Leo, 1985; Ref. 24, Weast, 1985).

Rationale for Recommendation

A. *Exposure information—Production/use/disposal/exposure/release.* The Committee believes that the diaryl ethers listed in the paragraph following Table 1 are commercially available, and that some of them may be produced in substantial quantities. Composite production volume for this group exceeds 70 million pounds; actual production volumes are confidential business information.

Alkyl diaryl ethers are used as heat transfer fluids, resins for laminated electrical insulators, chemical intermediates and antioxidants; the bromodiaryl ether is used as an intermediate in production of pyrethroids; chlorodiaryl ethers are used as bacteriostatic and preservative agents for cosmetics and detergents (Ref. 7, Chemcyclopedia 91, 1990; Ref. 8, Dagani, 1985; Ref. 11, Gusten et al., 1973; Ref. 18, Sax and Lewis, 1987). No use information was found for the hydroxymethyl diaryl ethers.

B. *Evidence for exposure—Human exposure.* The National Occupational Exposure Survey (NOES) conducted during 1981-83 by NIOSH reported that 90,789 workers were potentially exposed to diphenyl oxide in 24 industries and 145 workers were potentially exposed to 1-methyl-3-phenoxybenzene in business services (Ref. 16, NIOSH, 1989). Only diphenyl oxide has an OSHA Permissable Exposure Limit.

C. *Environmental exposure.* Diphenyl oxide has been detected in 1 of 14 treated drinking water supplies (Ref. 10, Fielding et al., 1981) and detected at concentrations of 69 and 388 µg/L in wastewater extract from the organics and plastics industry, 12 µg/L from the plastics and synthetics industry, 18 µg/L

VOL 56 ISS 250 DE 30 1991 UMI

from rubber processing industry, 30 and 38 μg/L from the soaps and detergents industry, 35 μg/L from the electronics industry, and 1620 μg/L in wastewater extract from the organic chemicals industry (Ref. 6, Bursey and Pellizzari, 1982). Diphenyl oxide has been identified in wastewater, river and estuary water, and river, estuary and bay sediment (Ref. 14, Hites and Lopez-Avila, 1980).

I. Chemical Fate Information

The Committee searched published and unpublished chemical fate literature and found that there were studies on only one of the recommended diaryl ethers. In acclimated river water, diphenyl oxide (23.8 mg/L initial concentration) exhibited approximately 20 percent biodegradation under aerobic conditions during an 80 day incubation period (Ref. 15, Ludzack and Ettinger, 1963). In a review, diphenyl oxide was characterized as "unlikely to be removed during biological sewage treatment even after prolonged exposure" (Ref. 19, Thom and Agg, 1975). A degradation half-life in soil of 11 days was estimated from analysis of percolate groundwater samples; biodegradation is expected to be the primary fate process contributing to environmental degradation (Ref. 25, Zoeteman et al., 1981).

Alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers are recommended for physical and chemical property and biodegradation rate screening tests because there are insufficient data to reasonably determine or predict environmental persistence.

II. Health Effects Information

A search of published and unpublished health effects literature revealed that there were studies on six of the recommended diaryl ethers. The majority of health effects studies were published on diphenyl oxide or mixtures containing diphenyl oxide including: 18 oral, dermal and inhalation acute toxicity studies on 5 mammalian species (Ref. 17, RTECS 1991, Ref. 22, TSCATS 1991); 6 oral and inhalation prechronic studies on 3 mammalian species (Ref. 20, TOXLINE 1991); 9 genotoxicity studies, including those on mutagenicity in bacteria and yeast (Ref. 20, TOXLINE 1991, Ref. 22, TSCATS 1991), negative cytogenetics in hamsters (Ref. 22, TSCATS 1991), and DNA effects in rats (Ref. 22, TSCATS 1991); 1 negative developmental toxicity study in rats that used 77 percent diphenyl oxide and 33 percent biphenyl as the test substance (Ref. 20, TOXLINE 1991);1 positive developmental toxicity study in sea urchins (Ref. 20, TOXLINE); and 3 oral and intraperitoneal pharmacokinetics studies in rats (Ref. 20, TOXLINE 1991).

For the other five diaryl ethers recommended for testing [benzene, 1-methyl-3-phenoxy-; benzenemethanol, 3-phenoxy-; benzene, 1,1'-oxybis[methyl-; 1,1'-biphenyl, phenoxy-; benzene, 1(bromomethyl)-3-phenoxy-], there were 7 oral and dermal acute toxicity studies on 4 mammalian species (Ref. 20, TOXLINE 1991, Ref. 21, TOXLIT 1991, Ref. 17, RTECS 1991); 2 prechronic studies in rats (Ref. 22, TSCATS 1991, Ref. 20, TOXLINE 1991); and six genotoxicity studies, including those on mutagenicity in bacteria and cytogenetics in mice (Ref. 21, TOXLIT 1991, Ref. 20, TOXLINE 1991).

Alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers are recommended for health effects screening tests (except for diphenyl oxide) because there are insufficient data to reasonably determine or predict health effects.

III. Ecological Effects Information

Except for acute aquatic toxicity data for diphenyl oxide (LC_{50} values ranged from 3 to 4 mg/L for freshwater fish and 0.67 to 1.4 mg/L for freshwater invertebrates, Ref. 3, AQUIRE 1991) and 3-phenoxy-benzenemethanol (EC_{50} values ranged from 1.4 to 95.0 mg/L for freshwater algae, Ref. 3, AQUIRE 1991), no ecological effects testing information was located for the other 12 diaryl ethers.

Alkyl-, bromo-, chloro-, hydroxymethyl diaryl ethers are recommended for ecological effects screening tests because there are insufficient data to reasonably determine or predict ecological effects.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Chapter I

[Docket No. 91N-0300]

Withdrawal of Certain Pre-1986 Proposed Rules; Final Action

AGENCY: Food and Drug Administration, HHS.

ACTION: Withdrawal of proposed rules.

SUMMARY: The Food and Drug Administration (FDA) announces that it is withdrawing 89 proposed rules that were published in the **Federal Register** on or before December 31, 1985. In many cases, these proposals have been superseded by subsequent actions or events or no longer reflect the agency's regulatory objectives or priorities. In other cases, sufficient time has elapsed that it would be appropriate to publish a new proposal or tentative final rule before proceeding to final action. Accordingly, the agency concludes, after considering the public comments submitted in response to a notice published in the **Federal Register** of August 28, 1991 (56 FR 42778) announcing its intent to withdraw 115 proposed rules, that further action to issue final rules based on 89 of these proposals is not warranted, and that the proposals should be formally withdrawn. The agency also announces that it is deferring a decision on withdrawal of 26 of the 115 proposals listed in that notice of intent.

DATES: The proposed rules are withdrawn on December 30, 1991.

FOR FURTHER INFORMATION CONTACT: Robert L. Spencer, Office of Policy, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3480.

SUPPLEMENTARY INFORMATION:

I. Introduction

In the **Federal Register** of August 28, 1991 (56 FR 42668), FDA announced that it had begun a comprehensive review of the agency's regulations process, including a review of the backlog of advance notices of proposed rulemaking, notices of proposed rulemaking, and other notices for which no final rule or notice of withdrawal has been issued. The review was begun partly in response to criticism that the agency's backlog of pending proposals dilutes the agency's ability to concentrate its attention on higher priority regulations mandated by statute or necessary to protect public health.

As a first step, FDA reviewed all of the proposals that the agency published in the **Federal Register** prior to December 31, 1985, but for which no final rules or notices of withdrawal have been published. The agency then tentatively concluded that 115 of these pre-1986 proposals should be withdrawn. The August 28, 1991, notice of intent (hereafter referred to as the notice of intent) identified these 115 pre-1986 proposals and invited interested persons to submit comments on FDA's intent to withdraw these proposals.

FDA received 34 written comments regarding the agency's intent to withdraw the 115 pre-1986 proposed rules. These comments were from a member of Congress, consumer organizations, trade associations, professional associations, law firms, consultants, individuals and commercial organizations. The comments generally supported the agency's efforts to withdraw the pre-1986 proposals; however, the comments requested additional procedures to provide for increased opportunity for public comment on the proposed withdrawals. Many of the comments concerned one or more of the specific proposals identified for withdrawal in the notice of intent. The comments specifically addressed 30 of the 115 proposals listed in the notice of intent; no specific comments were received regarding the other 85 proposals listed in the notice. The agency is deferring action on 9 of the 85 proposals on which no comments were received as well as 17 of the proposals on which comments were received.

The following is a summary of the comments received and the agency's response to these comments.

II. Summary of and Responses to Comments

A. General Comments

1. Six of the comments submitted expressed general support for FDA's action to withdraw pre-1986 proposed rules that have low priority or are outdated. One of these comments suggested that FDA consider the withdrawal of any proposal that is more than 4 years old because, with the advances being made in understanding the toxicology of chemical substances, issues more than 4 years old may well be scientifically and technically outdated. Another comment stated that, because of the long time that elapsed since the proposals were published, circumstances require a reexamination of these proposals to determine whether they are relevant and whether the factual basis and applicable science and policy still apply. Still another of these comments suggested that, in the future, FDA should not initiate proposed rulemaking unless it intends to complete the rulemaking in a timely manner.

As noted in the preamble to the notice of intent (56 FR 42668), FDA agrees that many of these pre-1986 proposals have become outdated in the time that has elapsed since their publication and that, before the agency could proceed further, it would be necessary to reexamine the factual and scientific bases for the proposals, the agency would publish a new proposal or tentative final rule before proceeding to final action.

The agency disagrees, however, with the comment that the agency should consider withdrawing a proposal solely on the basis of age, e.g., if it is more than 4 years old. Although the amount of time that has elapsed since publication of the proposal should be one of the criteria used in an initial screening of proposals for consideration to withdraw, a final decision to withdraw a proposal or to proceed to final rulemaking must address other factors including, but not limited to, statutory requirements and the public health.

The agency also agrees in principle with the comment that the agency should not initiate proposed rulemaking unless it intends to complete the rulemaking in a timely manner. Although the need for a particular rule may change with changes in the circumstances that caused the agency to initiate the rulemaking proceeding, the agency intends in the future to adhere to the general principle that any rulemaking activity important enough to initiate is important enough to be accompanied by a plan, timetable, and agency-level commitment sufficient to ensure its timely completion. This goal of timely completion includes not only the promulgation of a final rule but also recognizing when the time has come to withdraw a proposal.

2. One comment asked that FDA clarify that it is not disavowing any positions or standards established in the proposed rules the agency intends to withdraw.

Preambles to proposed rules are advisory opinions under 21 CFR 10.85(d) until they are amended or revoked. The agency's withdrawal of the pre-1986 proposals listed below constitutes a revocation of these preambles as advisory opinions under 21 CFR 10.85(g). As FDA acknowledged in the notice of intent, some of the withdrawn proposals still reflect current agency views and thus may still provide useful guidance. However, the withdrawn proposals no longer necessarily represent the formal position of FDA, and do not bind or otherwise obligate or commit the agency to the views expressed. Interested persons who believe that guidance provided in the preambles to the withdrawn proposals should be restated in the form of an advisory opinion should submit a request for an advisory opinion as provided in 21 CFR 10.85.

3. One comment asked that FDA reconsider the approach taken in inviting public comment on the agency's notice of intent to withdraw proposed rules. The comment suggested that FDA should describe the substance of the proposal at issue so that the public could intelligently comment on the agency's action. Another comment stated that the mere publishing of the titles and other references provides little assistance to persons reviewing the list of pre-1986 proposals, particularly where some of the proposals were more than 30 years old. This comment suggested that it would have been helpful if FDA had included brief summaries of the essence of the proposals on the withdrawal list, and possibly the reasons for their proposed withdrawal.

The notice of intent identified each of the proposals being considered for withdrawal by title, docket number, and the **Federal Register** publication date and cite. The agency believes that, in almost all cases, the title described the substance of the proposed rule sufficiently to allow readers to make an initial determination as to whether the proposed withdrawal might affect an issue in which they were interested. Any interested person could obtain additional, detailed information by reading the specific proposal in the cited **Federal Register** issue.

In addition, to assist persons interested in obtaining additional information about a certain proposal, the agency included in the notice the name, address, and telephone number of an agency contact. This employee was prepared to answer any questions and to provide copies of each of the listed proposals upon request.

The agency considered providing more information concerning the substance of each of the 115 proposals in the notice of intent. FDA believed, however, that persons interested in commenting would want to read the underlying proposals themselves, regardless of how detailed a summary the agency had provided in the notice of intent. In the end, the agency decided to move ahead with this initiative to reduce the backlog of pre-1986 proposals in a manner it judged to be efficient, expeditious, and more than adequately protective of the interests of affected parties. Based on the comments received, it appears that interested persons understood the intent of the notice and were able to formulate comments addressing their concerns.

Any person who believes that the subject of a withdrawn proposal still should be addressed by regulation is free to petition the agency to recommend rulemaking. Any such petition must be in accordance with § 10.30 (21 CFR 10.30) or other applicable FDA procedure and must present the legal, factual, and public health rationale for devoting FDA resources to the promulgation of such a rule.

4. One comment recommended that FDA make copies of the proposals listed in the notice of intent available to the public for a period of 1 year before removing the proposed regulations. Alternatively, the comment requested that the comment period for eight specific proposals remain open for a period of not less than 90 days to allow interested persons to review the substance of the proposals and present comments if appropriate.

Copies of all of the proposals listed in the notice of intent have been available to the public at all times since the documents were published in the **Federal Register**. Any member of the public may visit FDA's Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday, and review and/or obtain copies of all proposed rules, received comments, and other reference materials. After reviewing these documents, interested persons may submit comments on the proposals or on the received comments.

Because the 115 proposals listed in the notice of intent to withdraw have been available to the public for more than 5 years, and in some cases for more than 25 years, the agency believes that it would unnecessarily delay final action to withdraw these pre-1986 proposals the comment period was extended as requested in the comment.

5. One comment stated that it is not appropriate to withdraw a proposed rule simply because it is more than 6 years old and has not been designated as high priority. The comment added that each proposal should be considered independently, to be pursued if it has merit and withdrawn if it does not.

The proposals listed in the notice of intent were not proposed for withdrawal simply because they were published in the **Federal Register** before 1986. Each of the pre-1986 proposals, including those that were not included in the notice of intent, was reviewed on its merits by the appropriate program officials in each of FDA's Centers, by the Office of the General Counsel, and by other senior agency officials. The intent of the notice was not to withdraw proposed rules simply on the basis of age. Although the notice was confined to announcing the agency's intent to withdraw only proposed rules that had been published prior to 1986, the date of publication was not the sole or most important criterion for inclusion in the notice.

The agency had initially identified a larger number of pre-1986 proposals, all of which were considered for withdrawal. Where reviewers determined that further agency action to issue a final rule based on the pre-1986 proposal might be appropriate, the proposal was deleted from the list of proposals included in the notice of intent. Only those pre-1986 proposals that the agency found not to warrant the issuance of a final rule based on the proposal were included in the final list published in the notice of intent.

B. Specific Comments

The agency received specific comments concerning 30 of the 115 proposals listed in the notice of intent. These comments generally supported FDA's action to withdraw 11 of these 30 proposals and objected to FDA's action to withdraw 19 of these 30 proposals.

The specific comments received regarding these 30 proposals and the agency's response are as follows:

1. Methyl Salicylate; Oil of Wintergreen; Notice of Proposal to Establish Tolerance for Residues—Docket No. 91N-0301—September 28, 1962, 27 FR 9521.

One comment supporting the withdrawal of this proposal argued that data demonstrate that methyl salicylate is generally recognized as safe (GRAS) under its intended conditions of use, that FDA is fully justified in withdrawing this 1962 proposal, and that no further action is warranted.

FDA is withdrawing this proposal. Although FDA agrees that the proposal should be withdrawn, the agency's decision is not based on the merits of the argument that methyl salicylate (oil of wintergreen) is GRAS. The agency has not yet made such a determination. The agency's decision to withdraw this 1962 proposal is because the agency would initiate new notice and comment rulemaking before proceeding further in any determination concerning the GRAS status of methyl salicylate. The agency would not issue a final rule based solely on the proposal, which was issued almost 30 years ago.

2. Xylitol; Proposed Revocation of Food Additive Regulation—Docket No. 89-0421—October 20, 1971, 36 FR 20306.

VOL 56 ISS 250 DEC 30 1991 UMI

One comment from a commercial organization stated that the firm previously had an interest in this product for many years and had made a number of submissions to the Agency in connection with this proposed rule to revoke the food additive regulation providing for the use of xylitol in foods for special dietary use. The comment added that the firm no longer has a commercial interest in this product and supports withdrawal of the 1971 proposal. The comment suggested, however, that FDA should consider revising 21 CFR 172.395 to include additional uses of xylitol in candies, chewing gums, jams, and jellies.

FDA has decided to defer a decision as to whether this proposal should be withdrawn. Although the only comment received regarding this specific proposal supports the agency's initial decision to withdraw it, the agency has reconsidered the issues involved. In a future issue of the **Federal Register**, FDA will either publish a final rule based on the proposal, repropose the amendment in a new rulemaking proceeding, or withdraw the proposal.

3. Legal Status of Approved Labeling for Prescription Drugs; Prescribing for Uses Unapproved by the Food and Drug Administration—Docket No. 91N–0312—August 15, 1972, 37 FR 16503.

After further examination of this proposal, the agency, on its own initiative, has decided not to withdraw this proposed rule at this time. Although the agency does not intend to proceed to a final rule on the basis of this 1972 proposed rule, the agency has established an Unlabeled Use Task Force to examine the promotion and use of prescription drugs for indications not included in their approved labeling. (The agency's position concerning the veterinary use of human drugs is set forth in Compliance Policy Guide 7125.35 "Human Drugs Distributed to Veterinarians for Animal Use.") Therefore, the agency will defer consideration on the withdrawal of this proposed rule until after the task force has completed its review.

4. Infant Foods; Percentage Declaration of Ingredients—Docket No. 76P–03290–September 7, 1976, 41 FR 37595; and,

5. Infant and Junior Foods; Establishment of Common or Usual Name—Docket No. 76P–0330–September 7, 1976, 41 FR 37593.

One consumer organization objected to the withdrawal of these two proposed rules to require percentage-ingredient labeling of baby foods and a percentage declaration of the characterizing ingredient(s) as part of the common or usual name of such foods. The comment urged FDA to finalize these two proposals instead of rescinding them.

FDA does not intend to issue final rules on the basis of these two proposals and, therefore, has decided to withdraw the proposed rules. As noted in the preamble to the notice of intent (56 FR 42668), this action does not mean that the agency has no interest in the issues concerning percentage-ingredient labeling of baby foods. The agency is in the process of reviewing and revising all food labeling, in part in response to the Nutrition Labeling and Education Act of 1990. If the agency decides to proceed further to require percentage-ingredient labeling for baby foods, it will do so through new notice and comment rulemaking.

6. Saccharin and Its Salts—Docket No. 76N–0510—January 7, 1977, 42 FR 1486; and,

7. Saccharin and Its Salts—Docket No. 77N–0085—April 15, 1977, 42 FR 19996.

Two comments supported the withdrawal of these two proposals. The first proposal was to amend the interim food additive regulation for saccharin and its salts to establish a tolerance for toluenesulfonamide of 25 parts per million. The second proposal would ban the use of saccharin and its salts in foods, drugs, and cosmetics. These comments asserted that the safety of saccharin is no longer of concern and that these 1977 proposals have become outdated. One comment from a consumer organization asked the agency to keep the docket on these two proposals open for at least 90 days to allow for additional public comments if appropriate.

While not addressing the issue concerning the safety of saccharin and its salts, the agency has decided to withdraw these two proposals. The Saccharin Study and Labeling Act enacted on November 23, 1977, prohibited for 18 months any new regulations restricting or banning the sale of saccharin or products containing it. Congress has extended the legislative moratorium several times. Most recently, it was extended to May 1, 1992. Even if it were not extended further, the agency would have to consider any new data concerning the safety of saccharin and its salts and initiate new rulemaking proceedings prior to taking any action to alter the regulatory status of saccharin. This decision to withdraw these two 1977 proposals does not preclude the agency from reproposing a ban or other restrictions on the use of saccharin and its salts at a later date should such action be warranted.

8. Over-the-Counter Drugs; General Conditions for Use and Labeling of Inactive Ingredients—Docket No. 77N–0010—April 12, 1977, 42 FR 19156.

One comment objected to FDA's proposal to withdraw this proposal to amend regulations which establish the general conditions for use of inactive ingredients in over-the-counter (OTC) drug products so that these products are generally recognized as safe, effective, and not misbranded. The comment stated that the proposed rule has become an industry standard for the 15 years since it was first proposed. The comment added that inactive ingredient manufacturers and users have a problem with uncertainty as to the regulatory status of inactive ingredients that will be exacerbated if the proposed rule is withdrawn.

FDA concludes that the proposed rule should not be withdrawn at this time. FDA agrees with the comment that the principles set forth in the proposed rule have utility and should be retained in some manner. The agency intends to reevaluate the issues addressed in the proposed rule and determine whether to proceed with the rulemaking, repropose the requirements and provide new opportunity for comment, or to withdraw the proposed rule.

9. Ionizing Radiation Therapy Equipment; Notice of Intent to Propose Rules and Develop Guidelines—Docket No. 77N–0031—March 22, 1977, 42 FR 15428;

10. X-Ray Intensifying Screens; Intent to Develop a Radiation Protection Recommendation—Docket No. 78N–0074—June 2, 1978, 43 FR 24066;

11. Diagnostic Ultrasound Equipment; Intent to Propose Rules and Develop Regulations—Docket No. 78N–0288—February 13, 1979, 44 FR 9542; and

12. Procedures to Minimize Medical X-Ray Exposure of the Human Embryo and Fetus; Recommendations for Medical Radiation Exposure of Women of Childbearing Potential—Docket No. 75N–0340—November 20, 1979, 44 FR 66616.

Two professional associations supported FDA's action to withdraw these four proposals for which final rules were never developed. One of these comments stated that other FDA regulations and Nuclear Regulatory Commission regulations have significantly improved radiation equipment safety and superseded the need to develop regulations concerning ionizing radiation therapy equipment.

The agency agrees that these four proposals, three of which were only announcements of FDA's intent to issue proposed rules, should be withdrawn. If the agency decides that rulemaking is required in the future, it will initiate new proceedings.

13. Butylated Hydroxytoluene; Use Restrictions—Docket No. 77N–0003—May 31, 1977, 42 FR 27603.

One consumer organization urged FDA to ban the use of the food preservative butylated hydroxytoluene (BHT) until its safety has been established. The comment stated that conflicting and inconclusive studies regarding BHT's safety demand that FDA reappraise the safety of this food additive.

The agency is deferring a decision as to the withdrawal of this proposal. Although the 1977 proposal would have restricted the use of BHT as a direct and indirect food additive and not have banned the use of BHT as requested in the comment, the agency is in the process of reviewing the conflicting data and information it has received concerning the safety of BHT. After further review of this data and information concerning the safety of BHT, the agency will either initiate a new rulemaking proceeding or withdraw the 1977 proposal.

14. New Drugs for Investigational Use; Prompt Reporting of Animal Studies and Data—Docket No. 77N–0059—July 15, 1977, 42 FR 36490.

One consumer organization asked that FDA keep the docket on this proposal open for at least 90 days to allow the organization and other interested parties to review the substance of the proposal and present comments if appropriate.

The agency has decided to withdraw this proposed rule. The proposal was intended to ensure prompt reporting of animal studies and data following the submission of an investigational new drug application. The proposed requirements are superseded by the existing regulations at 21 CFR Part 312—Investigational New Drug Applications. Requirements for reporting of animal studies and data are set forth under §§ 312.23(a)(8), 312.32, and 312.33.

15. Skim Milk Cheese for Manufacturing; Proposal to Amend Identity Standard—Docket No. 77P–0071—October 4, 1977, 42 FR 53979.

One consumer organization asked that FDA keep the docket on this proposal open for at least 90 days to allow the organization and other interested parties to review the substance of the proposal and present comments if appropriate. The commercial organization that filed the petition on which this proposal was based did not submit comments on the notice of intent to withdraw this proposal.

The agency has decided to withdraw this 1977 proposal to amend the identity standard for skim milk cheese for manufacturing. The amendment would have provided for the use of skim milk cheese in producing lower fat cheese products. The agency's decision to withdraw the proposal is based primarily on the time that has elapsed since the proposal was issued and the apparent lack of interest on the part of the petitioner to pursue this action. In addition, circumstances have changed with the publication on November 27, 1991, of a proposed amendment to FDA's standard of identity regulations that will reduce regulatory barriers to the marketing of low fat substitutes for standardized cheese products (56 FR 60512). The agency's decision to withdraw the proposal does not, however, address the merits of the use of skim milk cheese in producing lower fat cheese products. If the agency, on its own initiative or in response to a new petition, decides that an amendment to the food standards regulations is warranted, it will initiate new rulemaking proceedings.

16. Sorbic Acid and Its Salts; Proposed Affirmation and Deletion of GRAS Status—Docket No. 77G–0379—March 10, 1978, 43 FR 9823.

One commercial organization urged the agency to complete this proposed rulemaking to affirm potassium sorbate and sorbic acid as GRAS as direct human food ingredients, to delete calcium and sodium sorbates from the GRAS list, and to amend the standards of identity for some cheeses, fruit jellies, jams and preserves, and margarine. The comment argued that sufficient scientific data were submitted to FDA on the safety of sorbic acid and its potassium salt during the rulemaking to enable the agency to affirm the GRAS status of these direct food additives for use as chemical preservatives. The firm stated that it was unaware of any new safety information on the calcium and sodium salts or on the stability of the sodium salt of sorbic acid to alter the agency's earlier conclusion that the GRAS status of calcium and sodium sorbates should be revoked.

The agency has reconsidered the issues involved in the agency's GRAS review program and has decided to defer a decision as to whether this proposal should be withdrawn. In a future issue of the **Federal Register**, FDA will publish a final rule based on the proposal, repropose the amendment in a new rulemaking proceeding, or withdraw the proposal.

17. Ethylene Oxide, Ethylene Cholohydrin, and Ethylene Glycol; Proposed Maximum Residue Limits and Maximum Daily Levels of Exposure—Docket No. 77N–0424—June 23, 1978, 43 FR 27474.

Two comments from commercial organizations objected to FDA's action to withdraw this proposal to impose restrictions on the continued use of ethylene oxide as a sterilant for certain drug products and medical devices for human use. The comments stated that this proposed rule is commonly used by medical device manufacturers as a guideline for product residual levels and patient exposure limits. The comments also stated that elimination of this guidance would not only serve to create chaos in the regulatory review process (both domestic and international) and in product development activities as well. The comments urged FDA to maintain its acceptance of the 1978 residue limits until such time as appropriate guidance documents can be issued. One of these comments, noting the shortcomings of the 1978 proposal, suggested that the International Standards Organization document developed by ISO/TC 198 and ISO/TC 194, "Sterilization of Health Care Products," be used as a reference document for establishing product residual levels.

FDA has decided to defer its decision to withdraw this proposal. The agency is evaluating toxicological studies on the affects of ethylene oxide residuals conducted subsequent to the issuance of the proposal. In addition, FDA is considering the utility of international standards already being proposed in this area as an alternative to promulgation of an agency rule. The decision concerning the necessity of an FDA rule will await the outcome of that process which is not expected to be completed until early 1993. Therefore, FDA's decision to issue a final rule based on the proposal and the received public comments; to repropose the rulemaking proceeding based on the toxicological studies conducted subsequent to the issuance of the proposal; or to withdraw the proposal will be announced in a future issue of the **Federal Register**.

18. Common or Usual Names for Vegetable Protein Products and Substitutes for Meat, Seafood, Poultry, Eggs, or Cheese Which Contain Vegetable Protein Products as Sources of Protein; Tentative Final Rule—Docket No. 75N–0205—July 14, 1978, 43 FR 30472.

One trade association supported FDA's announced intent to withdraw this tentative final regulation to establish common or usual names for all use of vegetable protein products. The comment stated that 13 years of experience, in which significant advances have been made in the utilization of soy proteins, have

VOL
56
ISS
250
DE
30
1991
UMI

reconfirmed that the tentative final regulation is not workable (in whole) or desirable.

Without addressing the merits of the comment, FDA agrees that the tentative final rule should be withdrawn. The agency's decision to withdraw this 1978 tentative final rule is based on the time that has elapsed since publication of the tentative final rule. If the agency determines that rulemaking is warranted, it will initiate a new proceeding.

19. Tocopherols and Derivatives; Proposed Affirmation of GRAS Status for Certain Tocopherols and Removal of Certain Others from GRAS Status as Direct Human Food Additives—Docket No. 78N-0213—October 27, 1978, 43 FR 50193.

Three comments supported the agency's action to withdraw this proposal to affirm the GRAS status of certain tocopherols and derivatives as direct human food ingredients and to remove certain other tocopherols and derivatives from GRAS status as direct human food ingredients provided that this withdrawal does not constitute a finding that these tocopherol forms are not GRAS as human food ingredients.

The agency has reconsidered the issues involved in the agency's GRAS review program and has decided to defer a decision as to whether this proposal should be withdrawn. In a future issue of the **Federal Register**, FDA will either publish a final rule based on the proposal, repropose the amendment in a new rulemaking proceeding, or withdraw the proposal.

20. Cellulose Derivatives; Affirmation of GRAS Status—Docket No. 78N-0144—February 23, 1979, 44 FR 10751.

Four comments objected to FDA's intent to withdraw this proposal to affirm the GRAS status of cellulose derivatives and urged FDA to complete the rulemaking proceeding. These comments stated that sufficient data have been submitted to establish the safety of cellulose and to allow the agency to issue a final rule affirming the GRAS status of cellulose derivatives.

The agency has reconsidered the issues involved in the GRAS status of cellulose derivatives and has decided to defer a decision as to whether this proposal should be withdrawn. Among the issues that the agency is considering is whether dioxins or furans that may be formed during the bleaching of cellulose for paper may be present in cellulose or cellulose derivatives intended for food additive use. In a future issue of the **Federal Register**, FDA will either publish a final rule based on the proposal, repropose the amendment in a new rulemaking proceeding, or withdraw the proposal.

21. Requirements for Estrogen Labeling Directed to Patients—Docket No. 78N-0303—April 17, 1979, 44 FR 22752.

One consumer organization asked that the docket for this proposal remain open for at least 90 days to allow interested persons to review the substance of the proposal and present comments if appropriate to the FDA.

FDA is withdrawing this proposal. This proposed rulemaking would have exempted distribution of estrogen patient warning labeling to male patients and would have allowed distribution of the labeling after administration of the drug when, at the time of administration, the patient is unable to read and understand the labeling because of impaired consciousness. The agency has seen no sustained interest in this issue from physicians or pharmacists. If the agency in the future decides that a regulation is required, it will initiate a new rulemaking proceeding.

22. Lakes of Color Additives; Intent to List—Docket No. 79N-0043—June 22, 1979, 44 FR 36411.

Two trade associations and an individual objected to FDA's announced intent to withdraw this 1979 advance notice of proposed rulemaking announcing its intention to propose regulations concerning lakes of color additives. The comments argued that substantial years of work by the industry to resolve issues concerning this matter with FDA would be wasted if the proceeding were substantially delayed. One comment argued that agency action concerning the issue is one that must eventually be addressed in a rulemaking proceeding.

The agency has decided not to withdraw this advance notice of proposed rulemaking at this time.

23. Caffeine; Deletion of GRAS Status; Proposed Declaration That No Prior Sanction Exits, and Use on an Interim Basis Pending Additional Study—Docket No. 80N-0418—October 21, 1980, 45 FR 69817.

One consumer organization opposed recision of this proposal that would, among other things, delete caffeine used as an added food ingredient from the list of substances that are GRAS and declare that no prior sanction exists for the use of caffeine as an added food ingredient. The comment stated that there is evidence to suggest that the consumption of caffeine interferes with reproduction and urged FDA to revive its program to alert pregnant women to the dangers proposed by caffeine.

The agency agrees that the proposal should not be withdrawn at this time. The Agency will defer its decision until such time as it has reviewed all data and information it has received concerning the safety of caffeine. The agency then will either issue a final rule based on the proposal and the received comments, repropose a rule concerning the use of caffeine as a food ingredient, or withdraw the proposal.

24. Ascorbic Acid and Its Sodium and Calcium Salts, Erythorbic Acid and Its Sodium Salt, and Ascorbyl Palmitate; Proposed Affirmation of GRAS Status and Removal of Calcium Ascorbate From the List of GRAS Ingredients—Docket No. 82N-0246—January 14, 1983, 48 FR 1735.

One commercial organization suggested that this proposal to affirm that ascorbic acid and sodium ascorbate, its sodium salt; erythorbic acid and sodium erythorbic acid and sodium erythorbate, its sodium salt; and ascorbyl palmitate are GRAS as direct human food ingredients not be withdrawn. This comment added that this proposal remains the most recent FDA statement that the agency regards sodium erythorbate as GRAS and asked that the proposal not be withdrawn until further action by FDA with respect to GRAS affirmation of erythorbates. One other commercial organization stated that, although it would not object to the withdrawal of this proposal, if the agency decides at some point to reinstate the GRAS affirmation procedure for these ingredients, the agency should consider the comments submitted to the agency in response to the original proposal.

FDA has decided to defer its decision to withdraw this GRAS proposal. FDA's decision to issue a final rule based on the proposal and the received public comments, to repropose the rulemaking proceeding, or to withdraw the proposal will be announced in a future issue of the **Federal Register**.

25. Biotin; Proposed Affirmation of GRAS Status—Docket No. 78N-0306—January 14, 1983, 48 FR 1739.

One commercial organization stated that it has no objection to the withdrawal of this proposal to affirm that biotin is GRAS as a direct human food ingredient because the regulation at 21 CFR 182.8159 is quite adequate. The comment added, however, that if the agency decides at some point to reinstate a GRAS affirmation proposal for biotin, the agency should consider the comments that the firm submitted in response to the original proposal.

FDA has decided to defer its decision to withdraw this GRAS proposal. FDA's decision to issue a final rule based on the proposal and the received public comments, to repropose the rulemaking proceeding, or to withdraw the proposal will be announced in a future issue of the **Federal Register**.

26. Glycerin; Affirmation of GRAS Status as a Direct Human Food Ingredient—Docket No. 78N-0348, February 8, 1983, 48 FR 5758.

One commercial organization commented on this proposal to affirm glycerin as GRAS as a direct human food ingredient. The firm stated that it had responded to all FDA requests for information concerning the synthetic glycerin it produced in compliance with 21 CFR 182.1320 and other applicable regulations. These requests began in 1989 and the most recent submission was March 11, 1991. The firm stated that this information was provided at significant cost to the firm and that it was puzzled by the decision to withdraw this proposed rule when the review was quite active.

FDA has decided to defer its decision to withdraw this GRAS proposal. FDA's decision to issue a final rule based on the proposal and the received public comments, to repropose the rulemaking proceeding, or to withdraw the proposal will be announced in a future issue of the **Federal Register**.

27. Regenerated Collagen; Proposed GRAS Status as a Direct Human Food Additive—Docket No. 82N-0219—April 26, 1983, 48 FR 18833.

Two commercial organizations urged FDA to complete this rulemaking procedure to affirm that regenerated collagen is GRAS as a direct human food ingredient. These comments stated that a codified regulation for regenerated collagen would serve the needs of U.S. industry and protect the public from regenerated collagen produced in a manner different from the specifications in the GRAS affirmation proposal.

FDA has decided to defer its decision to withdraw this GRAS proposal. FDA's decision to issue a final rule based on the proposal and the received public comments, to repropose the rulemaking proceeding, or to withdraw the proposal will be announced in a future issue of the **Federal Register**.

28. Protein Hydrolysates and Enzymatically Hydrolyzed Animal (Milk Casein) Protein; Proposed GRAS Status—Docket No. 82N-0006—December 8, 1983, 48 FR 54990.

On behalf of its client, one consulting organization objected to FDA's announced intent to withdraw this proposal to affirm that certain protein hydrolysates and enzymatically hydrolyzed animal (milk casein) protein are GRAS for use as direct human food ingredients. The comment stated that the rulemaking process should be completed as proposed because the withdrawal of the proposed rule will convey a message of uncertainty regarding the regulatory status of these ingredients.

FDA has decided to defer its decision to withdraw this GRAS proposal. FDA's decision to issue a final rule based on the proposal and the received public comments, to repropose the rulemaking proceeding, or to withdraw the proposal will be announced in a future issue of the **Federal Register**.

29. Hydrochloric Acid; Proposed Affirmation of GRAS Status as Direct Human Food Ingredient—Docket No. 80N-0148—April 26, 1984, 49 FR 17966.

A law firm, on behalf of its client, commented that the 1984 proposal to affirm that hydrochloric acid is GRAS as a direct human food ingredient should be withdrawn because it is scientifically, administratively, and economically unsound. The comment stated that the proposal, which would not permit byproduct hydrochloric acid as a direct food ingredient, would cause significant economic disruption within the fluorocarbon industry. Although not objecting to the agency's action to withdraw this proposal, another law firm stated that its client understood that if the proposal is withdrawn, current regulations support its client's determination that byproduct hydrochloric acid is GRAS. A commercial organization recommended that the agency amend the proposal to include types of hydrochloric acid consistent with the Food Chemical Codex definition of food-grade acid or, alternatively, expand the list of acceptable processes to include byproduct hydrochloric acid from the fumed silica process and other suitable manufacturing processes.

FDA has decided to defer its decision to withdraw this GRAS proposal. FDA's decision to issue a final rule based on the proposal and the received public comments, to repropose the rulemaking proceeding, or to withdraw the proposal will be announced in a future issue of the **Federal Register**.

30. Margarine; Proposal to Amend the Standard of Identity—Docket No. 82P-0186—October 30, 1984, 49 FR 43560.

A trade association urged FDA to finalize the proposed rule as originally published, or to issue a tentative final rule and proceed to final rulemaking as expeditiously as possible. The proposal would amend the standard of identity for margarine to remove the list of permitted emulsifiers and the maximum use level restrictions for each from the current standard and to retain the provision for the use of safe and suitable emulsifiers without specified limitations.

The agency expects to complete this rulemaking proceeding. Therefore, the agency is deferring its decision to withdraw this proposed rule until a later date.

III. Additional FDA-Initiated Actions

In addition, the agency, on its own initiative, has further reviewed the proposals listed in the notice of intent and is deferring its decision to withdraw the following nine proposals:

1. Glycerophosphates; Proposed Affirmation and Deletion of GRAS Status—Docket No. 78N-0335—May 15, 1979, 44 FR 28336.

This proposal was inadvertently included in the notice of intent. On March 14, 1991, FDA issued a tentative final rule in the **Federal Register** (56 FR 10843) tentatively affirming the GRAS Status of glycerophosphates. This tentative final rule was based on the proposed rule published on May 15, 1979 (44 FR 28336) and the received comments. The agency is in the process of completing this rulemaking proceeding.

2. Brown and Yellow Mustard and Their Derivatives; Proposed Affirmation of GRAS Status as Direct Human Food Ingredient—Docket No. 77N-0033—August 26, 1977, 42 FR 43092;

3. Gelatin; Affirmation of GRAS Status as a Direct and Indirect Human Food Ingredient—Docket No. 77N-0232—November 11, 1977, 42 FR 58763;

4. Lard and Lard Oil; Proposed Affirmation of GRAS Status as Indirect Human Food Ingredients—Docket No. 78N-0336—May 18, 1979, 44 FR 29102;

5. Sodium Dithionite and Zinc Dithionite; Proposed Affirmation of GRAS Status—79N-0095—January 25, 1980, 45 FR 6117;

6. Japan Wax; Proposed Deletion from GRAS Status as an Indirect Human Food Ingredient—Docket No. 80N-0196—July 9, 1982, 47 FR 29965;

7. Thiodipropionic Acid and Dilaural Thiodipropionate; Proposed Removal of GRAS Status—Docket No. 80N-0361—August 13, 1982, 47 FR 35240;

8. Zinc Salts; Proposed Affirmation of GRAS Status—Docket No. 82N-0167—October 26, 1982—47 FR 47441; and

9. Unmodified Food Starches and Acid Modified Starches; Proposed Affirmation of GRAS Status as Direct and Indirect Human Food Ingredients—Docket No. 84N-0341—April 1, 1985, 50 FR 12821.

After considering the comments received on other proposals to implement the agency's GRAS review

VOL 56 ISS 250 DEC 30 1991 UMI

program. FDA has decided to defer its decisions on the withdrawal of all of the GRAS proposals included in the notice of intent. The agency is in the process of reexamining the issues involved in each of these proposed regulations that implement the agency's GRAS review program and expects to decide, in the near future, to either issue a final rule based on the proposal and the received public comments, repropose the rulemaking proceeding, or withdraw the proposal. The agency's decision in each case will be the subject of a future **Federal Register** publication.

Therefore, for the reasons set forth above, and under the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act, the agency announces that it is withdrawing the following proposed rules, published in the **Federal Register** on the dates indicated:

Title	Docket No.	FR publication date and cite
Prescription Drugs; Proposed Changes in Labeling Requirements Prescription Drugs	85N-0358	Nov. 10, 1961, 26 FR 10601.
Prescription Drugs; Further Proposals to Amend Labeling Requirements	85N-0358	May 10, 1962, 27 FR 4482.
Methyl Salicylate; Oil of Wintergreen; Notice of Proposal to Establish Tolerances for Residues	91N-0301	Sept. 26, 1962, 27 FR 9521.
Antibiotics in Combination with Analgesic Substances, Antihistaminics, and Caffeine; Proposal to Delete from List of Oral Drugs Acceptable for Certification.	91N-0302	Aug. 17, 1963, 28 FR 8471.
Food Additives in Animal Feed; Proposed Antibiotics for Growth Promotion and Feed Efficiency	91N-0304	Nov. 19, 1964, 29 FR 15536.
Tests, Methods of Assay and Certification of Certain Antibiotic Drugs	85N-0380	Oct. 6, 1965, 30 FR 12746.
Certain Drug-Labeling Exemptions; Proposed Termination	85N-0356	Nov. 23, 1966, 31 FR 14840.
Drugs; Current Good Manufacturing Practice in Manufacture, Processing, Packing or Holding; Repackaged Tablets or Capsules.	85N-0359	Mar. 2, 1967, 32 FR 3470.
Time-Release Dosage Forms of Drugs; Statement Regarding New-Drug Status	91N-0307	Sept. 6, 1967, 32 FR 12756.
Promotional Labeling of Oral Contraceptives; Proposed Statement of Policy	85N-0383	Sept. 13, 1967, 32 FR 13008
Drugs for Human Use; Drug Efficacy Study Implementation; Announcement and Proposal Regarding Methylergonovine Maleate Tablets and Methylergonovine Maleate Injection.	91N-0309	June 5, 1968, 33 FR 8348.
Kanamycin Sulfate; Kanamycin B Content Testng Method	91N-0310	Apr. 26, 1969, 34 FR 6983.
Pyrimethamine, Sulfaquinoxaline; Proposal to Revoke Exemption from Certification	91N-0311	Mar. 25, 1971, 36 FR 5619.
Food Additives; Proposed Revocation of Use of Morpholine	85N-0363	Nov. 3, 1972, 37 FR 23456.
Labeling or Misbranding of Drugs; Misleading Proprietary or Trade Names	85N-0357	Mar. 27, 1974, 39 FR 11298.
2-Mercaptoimidazoline; Use in Closures and Product Delivery Systems for Drugs and Cosmetics and in Components of Medical Devices.	91N-0255	May 2, 1974, 39 FR 15306.
Intramammary Infusion Products for Treating Mastitis; Proposed Revocation and Amendment of Antibiotic Certification Provisions and Related Regulations.	85N-0360	Aug. 30, 1974, 39 FR 31647
Aflatoxin in Shelled Peanuts and Peanut Products Used as Human Food; Proposed Tolerance	75N-0048	Dec. 6, 1974, 39 FR 42748.
Conditions for Marketing Human Prescription Drugs; Proposed Rulemaking and Notice of Enforcement Policy for Drugs Subject to the Effectiveness Requirements of the Drug Amendments of 1962.	75N-0052	June 20, 1975, 40 FR 26142.
Animal Food and Feed; Prohibited Substances	75N-0180	Sept. 9, 1975, 40 FR 41797.
Methadone; Proposal to Amend Procedures for Denying or Revoking Approval of Applications to Receive Shipments.	75N-0151	Nov. 7, 1975, 40 FR 52049
Drained Weights for Processed Fruits and Vegetables; Standards of Fill of Container and Label Statement	75P-0166	Nov. 7, 1975, 40 FR 52172.
Chloroform in Contact With Food; Proposal to Amend Food Additive Regulations	76N-0097	Apr. 9, 1976, 41 FR 15029.
Human Drugs; Current Good Manufacturing Practice in the Manufacture, Processing, Packing, or Holding of Large Volume Parenterals.	76N-0099	June 1, 1976, 41 FR 22202.
Infant Foods; Percentage Declaration of Ingredients	76P-0329	Sept. 7, 1976, 41 FR 37595.
Infant and Junior Foods; Establishment of Common or Usual Name	76P-0330	Sept. 7, 1976, 41 FR 37593.
Saccharin and its Salts	76N-0510	Jan. 7, 1977, 42 FR 1486.
Administrative Practices and Procedures; Publicity Policy	76N-0478	Mar. 4, 1977, 42 FR 12436.
Saccharin and its Salts	77N-0085	Apr. 15, 1977, 42 FR 19996.
Ionizing Radiation Therapy Equipment; Notice of Intent to Propose Rules and Develop Guidelines	77N-0031	Mar. 22, 1977, 42 FR 15428.
Enriched Rice; Proposal to Revise Standard	77N-0116	July 15, 1977, 42 FR 36487.
Drugs for Human and Veterinary Use; Public Disclosure of Specifications	77N-0124	July15, 1977, 42 FR 36485.
New Drugs for Investigational Use; Prompt Reporting of Animal Studies and Data	77N-0059	July 15, 1977, 42 FR 36490.
New Animal Drugs; Bovine Teat Dips	76N-0286	Aug. 9, 1977, 42 FR 40217.
New Drugs for Investigational Use; Availability of Draft of Bioresearch Monitoring Data Collection Form	77N-0190	Aug. 16, 1977, 42 FR 41301.
Annatto Extract, Paprika Oleoresin, and Turmeric Oleoresin; Removal of Provisions for Trichloroethylene	75P-0132	Sept. 27, 1977, 42 FR 49464.
Trichloroethylene; Removal from Food Additive Use	76N-0489	Sept. 27, 1977, 42 FR 49465.
Trichloroethylene in Human Drug and Cosmetic Products; Declaration of New Drug Status and Determination of Status in Cosmetics.	77N-0029	Sept. 27, 1977, 42 FR 49467.
Trichloroethylene; Prohibition in Animal and Pet Food	75P-0132	Sept. 27, 1977, 42 FR 49468.
Trichloroethylene in Animal Drug Products; Proposed Declaration of New Animal Drug Status	76N-0476	Sept. 27, 1977, 42 FR 49470.
Clinical Investigators; Proposed Establishment of Regulations on Obligations of Sponsors and Monitors	77N-0195	Sept. 27, 1977, 42 FR 49612.
Pasteurized Process Cheese and Cheese Products; Proposed Revision of Definitions and Standards of Identity.	77P-0070	Oct. 4, 1977, 42 FR 53970.
Skim Milk Cheese for Manufacturing; Proposal to Amend Identity Standard	77P-0071	Oct. 4, 1977, 42 FR 53979.
Preservation of Cosmetics Coming In Contact With The Eye; Intent to Propose Regulations and Request for Information.	77N-0105	Oct. 11, 1977, 42 FR 54837.
Drained Weight or Solid Content Weight for Canned Fruits and Vegetables; Label Statement, Standards of Fill of Container, and Temporary Labeling Exemption.	77P-0097	Dec. 9, 1977, 42 FR 62282.
Public Information; Disclosure of Existence	77N-0248	Mar. 28, 1978, 43 FR 12869.
Food Labeling; Ingredient Labeling Exemptions	76P-0430 77P-0123 77P-0357	Apr. 7, 1978, 43 FR 14675.
X-Ray Intensifying Screens; Intent to Develop a Radiation Protection Recommendation	78N-0074	June 2, 1978, 43 FR 24066.
Common or Usual Names for Vegetable Protein Products and Substitutes for Meat, Seafood, Poultry, Eggs, or Cheeses Which Contain Vegetable Protein Products as Sources of Protein; Tentative Final Rule.	75N-0205	July 14, 1978, 43 FR 30472.
Obligations of Clinical Investigators of Regulated Articles; Proposed Establishment of Regulations	77N-0278	Aug. 8, 1978, 43 FR 35210.
Bioresearch Monitoring Program; Clarification of Part Designation	78N-0282	Sept. 26, 1978, 43 FR 43468.

Title	Docket No.	FR publication date and cite
Orange B; Termination of Listing	78C-0215	Oct. 3, 1978, 43 FR 45611.
Estrogenic, Oral Contraceptive, and Progestational Drug Products; Proposed Requirements for Patient Labeling.	78N-0274	Oct. 13, 1978, 43 FR 47198.
2-Nitropropane; Proposed Removal from Food Additive Use	78N-0112	Dec. 1, 1978, 43 FR 56247.
Estrogens to Treat Postpartum Breast Engorgement; Proposed Requirements for Patient Labeling	78N-0383	Dec. 5, 1978, 43 FR 56906.
Status of Injectable Animal Drugs; Intent Regarding Sterility and Pyrogenicity of Injectable Animal Drugs	78N-0267	Dec. 15, 1978, 43 FR 58591.
Recombinant DNA; Intent to Propose Regulations	78N-0012	Dec. 22, 1978, 43 FR 60134.
Estradiol Benzoate, Progesterone, Testosterone Propionate, and Estradiol Monopalmitate for Use in Food-Producing Animals.	78N-0435	Jan. 5, 1979, 44 FR 1381.
Diagnostic Ultrasound Equipment; Intent to Propose Rules and Develop Regulations	78N-0266	Feb. 13, 1979, 44 FR 9542.
New Animal Drugs for Use in Animal Feeds; Definitions and General Considerations; Postponement of Final Action.	77N-0076	Mar. 6, 1979, 44 FR 12208.
Medical Devices; Classification of pH Catheter Probes	78N-1419	Mar. 9, 1979, 44 FR 13303.
Medical Devices; Classification of Catheter Guide Holders	78N-1425	Mar. 9, 1979, 44 FR 13309.
Medical Devices; Classification of Electrocardiograph Conducting Media	78N-1455	Mar. 9, 1979, 44 FR 13337.
Requirements for Estrogen Labeling Directed to Patients	78N-0303	Apr. 17, 1979, 44 FR 22752.
Protection of Human Subjects; Proposed Establishment of Regulations	78N-0031	Apr. 24, 1979, 44 FR 24106.
Hydrazine; Proposed Removal from Food Additive Use	78N-0208	June 12, 1979, 44 FR 33693.
Hydrazine in Human Drug Products; Declaration of New Drug Status	78N-0394	June 12, 1979, 44 FR 33694.
Medical Devices; Classification of Iron Kinetics Tests	78N-1870	Sept. 11, 1979, 44 FR 52992.
Medical Devices; Classification of Red Cell Survival Tests	78N-1875	Sept. 11, 1979, 44 FR 52997.
Medical Devices; Classification of Systems for the Identification fo Hepatitis B Antigen	78N-1934	Sept. 11, 1979, 44 FR 53056.
Medical Devices; Classification of Nonindwelling Blood Nitrogen Partial Pressure (PN2) Analyzer	78N-1651	Nov. 2, 1979, 44 FR 63309.
Medical Devices; Classification of Gas Cylinders	78N-1801	Nov. 2, 1979, 44 FR 63421.
Medical Devices; Classification of Gas Cylinder Holders	78N-1802	Nov. 2, 1979, 44 FR 63422.
Procedures to Minimize Medical X-Ray Exposure of the Human Embryo and Fetus; Recommendations for Medical Radiation Exposure of Women of Childbearing Potential.	75N-0340	Nov. 20, 1979, 44 FR 66616.
Biological Products; Labeling Standards; Position and Prominence of Proper Name	79N-0263	Jan. 25, 1980, 45 FR 6120.
Medical Devices; Voluntary Standards Development; Requests for Data and Information on In Vitro Diagnostics.	80N-0100	Feb. 1, 1980, 45 FR 7493.
Devices Used as a Radiation Source (in Combination With a Psoralen Drug) in the Photochemotherapy for Psoriasis; Intent to Propose Rules and Develop Recommendations.	79N-0013	Feb. 8, 1980, 45 FR 8870.
Additional Standards for Human Blood and Blood Products; Antihemophilic Factor (Human)	79N-0326	Apr. 4, 1980, 45 FR 22975.
Diluents for Cosmetic Color Additive Mixtures; Intent to Propose Rules; Request for Information	78N-0390	Apr. 22, 1980, 45 FR 26977.
Substances Prohibited from Use in Animal Food or Feed; Tentative Final Rule	75N-0160	Apr. 29, 1980, 45 FR 28349.
Allergenic Products; Proposed Testing and Labelling Requirements	79N-0410	May 2, 1980, 45 FR 29305.
Quality Control Testing of Platelet Concentrate (Human) and Cryoprecipitated Antihemophilic Factor (Human)	80N-0035	July 8, 1980, 45 FR 45924.
Blood and Blood Components; Error and Accident Reports	79N-0094	Aug. 8, 1980, 45 FR 52821.
Food Labeling; Net Weight Labeling Requirements	79N-0292	Aug. 8, 1980, 45 FR 53023.
Shipping Temperature Requirements for Certain Biological Products	80N-0497	Dec. 30, 1980, 45 FR 85785.
Apple Juice and Concentrated Apple Juice; Possible Establishment of Standards	82N-0216	Aug. 13, 1982, 47 FR 35234.
Medical Devices; Notice of Intent to Initiate Proceedings to Require Premarket Approval of Preamendments Devices.	83N-0240	Sept. 6, 1983, 48 FR 40272.
Clarification of Potency Standard for Certain Antibiotic Drugs	83N-0301	Dec. 2, 1983, 48 FR 54364.
Cheese and Related Cheese Products; Repeal of Four Class Standards of Identity	80N-0372	Apr. 23, 1984, 49 FR 17017.

Dated: December 19, 1991.

Michael R. Taylor,

Deputy Commissioner for Policy.

Executive Order 12786 of December 26, 1991

Adjustments of Certain Rates of Pay and Allowances

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 704 of Public Law 101–194; section 302 of the Federal Employees Pay Comparability Act of 1990, as incorporated in section 529 of Public Law 101–509; section 633 of Public Law 101–509; section 301(a) of Public Law 102–40; section 305 of Public Law 102–140; section 601 of Public Law 102–190; section 31 of title 2, United States Code; section 104 of title 3, United States Code; sections 5303, 5318, and 5382 of title 5, United States Code; and section 461(a) of title 28, United States Code, it is hereby ordered as follows:

Section 1. *Statutory pay systems.* The rates of basic pay or salaries of the following statutory pay systems are set forth on the schedules attached hereto and made a part hereof:

(a) The General Schedule (5 U.S.C. 5303, 5332(a)) at Schedule 1;

(b) The Foreign Service Schedule (5 U.S.C. 5303; 22 U.S.C. 3963) at Schedule 2; and

(c) The schedules for the Veterans Health Administration of the Department of Veterans Affairs (5 U.S.C. 5303; 38 U.S.C. 7404; section 301(a) of Public Law 102–40) at Schedule 3.

Sec. 2. *Senior Executive Service.* Pursuant to section 5382 of title 5, United States Code, the rates of basic pay for members of the Senior Executive Service are set forth on Schedule 4 attached hereto and made a part hereof.

Sec. 3. *Executive salaries.* The rates of pay or salaries for the following offices and positions are set forth on the schedules attached hereto and made a part hereof:

(a) The Executive Schedule (5 U.S.C. 5312–5316, 5318) at Schedule 5;

(b) The Vice President (3 U.S.C. 104) and the Congress (2 U.S.C. 31) at Schedule 6; and

(c) Justices and judges (28 U.S.C. 5, 44(d), 135, 252, and 461(a)) at Schedule 7.

Sec. 4. *Uniformed services.* Pursuant to section 601 of Public Law 102–190, the rates of monthly basic pay (37 U.S.C. 203(a)), the rates of basic allowances for subsistence (37 U.S.C. 402), and the rates of basic allowances for quarters (37 U.S.C. 403(a)) for members of the uniformed services are set forth at Schedule 8 attached hereto and made a part hereof.

Sec. 5. *Interim geographic adjustments.* (a) Pursuant to section 302 of the Federal Employees Pay Comparability Act of 1990, as incorporated in section 529 of Public Law 101–509, employees under the statutory pay systems covered under section 1 of this order, and members of the United States Park Police, who are assigned to a duty station located in one of the geographical areas listed in Schedule 9 shall be entitled, except as may be provided under subsection (b) of this section, to receive an interim geographic adjustment at the rate shown on Schedule 9, which schedule is attached hereto and made a part hereof.

VOL

UMI

(b)(1) The Office of Personnel Management shall prescribe regulations governing the application of interim geographic adjustments to General Schedule employees, including the determination of what, if any, geographic adjustment shall be payable in the case of employees receiving special pay rates.

(2) The Secretary of State shall prescribe regulations governing the application of interim geographic adjustments to employees under the Foreign Service Schedule, consistent with the regulations and determinations prescribed under paragraph (1) of this subsection.

(3) The Secretary of Veterans Affairs shall prescribe regulations governing the application of interim geographic adjustments to employees under the schedules for the Veterans Health Administration of the Department of Veterans Affairs, consistent with the regulations and determinations prescribed under paragraph (1) of this subsection.

(4) The Secretary of the Interior shall prescribe regulations governing the application of interim geographic adjustments to members of the United States Park Police, consistent with the regulations and determinations prescribed under paragraph (1) of this subsection.

(c) The Office of Personnel Management is hereby designated and empowered to exercise the authority of the President under section 302(c)(1)(D) of the Federal Employees Pay Comparability Act of 1990, as incorporated in section 529 of Public Law 101–509, to extend the application of interim geographic adjustments shown on Schedule 9, upon the request of an agency head, to employees who would not otherwise be covered.

Sec. 6. *Effective dates.* The rates of monthly basic pay and allowances for subsistence and quarters for members of the uniformed services provided for at Schedule 8 are effective on January 1, 1992. The other schedules provided for herein are effective on the first day of the first applicable pay period beginning on or after January 1, 1992.

Sec. 7. Executive Order No. 12736 of December 12, 1990, is superseded.

George Bush

THE WHITE HOUSE,
December 26, 1991.

Billing code 3195–01–M

Presidential Documents

Notice of December 26, 1991

Continuation of Libyan Emergency

On January 7, 1986, by Executive Order No. 12543, President Reagan declared a national emergency to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the actions and policies of the Government of Libya. On January 8, 1986, by Executive Order No. 12544, the President took additional measures to block Libyan assets in the United States. The President has transmitted a notice continuing this emergency to the Congress and the **Federal Register** every year since 1986. Because the Government of Libya has continued its actions and policies in support of international terrorism as evidenced by its involvement in the destruction of Pan Am Flight 103, the national emergency declared on January 7, 1986, and the measures adopted on January 7 and January 8, 1986, to deal with that emergency, must continue in effect beyond January 7, 1992. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency with respect to Libya. This notice shall be published in the **Federal Register** and transmitted to the Congress.

George Bush

THE WHITE HOUSE,
December 26, 1991.

LIST OF PUBLIC LAWS

Note: The List of Public Laws for the first session of the 102d Congress has been completed and will be resumed when bills are enacted into public law during the second session of the 102d Congress, which convenes on January 3, 1992. A cumulative list of Public Laws for the first session will be published in Part II of the **Federal Register** on January 2, 1991.

The List of Public Laws may be used in conjunction with "P L U S" (Public Laws Update Service) on 202-523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202-512-2470).

Last List December 26, 1991

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233**.

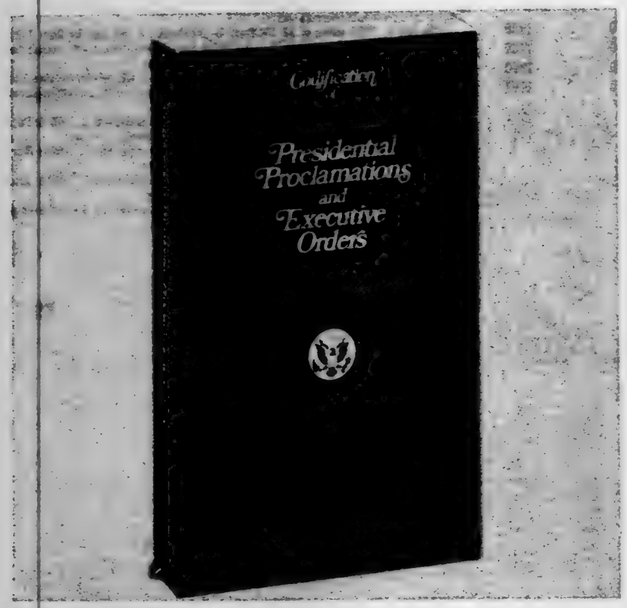
[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39 consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49 consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1990. The CFR volume issued January 1, 1987, should be retained.



[5] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar 31 1991. The CFR volume issued April 1, 1990, should be retained.

[6] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1991. The CFR volume issued July 1, 1989 should be retained.

[7] No amendments to this volume were promulgated during the period July 1, 1990 to June 30, 1991. The CFR volume issued July 1, 1990, should be retained.

.... Order now ! . . . .

For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

Rules and Regulations

Federal Register
Vol. 56, No. 251
Tuesday, December 31, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

GENERAL ACCOUNTING OFFICE

4 CFR Parts 91 and 92

Standards for Waiver of Claims for Erroneous Payments of Pay and Allowances, and of Travel, Transportation, and Relocation Expenses and Allowances

AGENCY: General Accounting Office.

ACTION: Final rule.

SUMMARY: This rule updates the General Accounting Office's waiver regulations at 4 CFR parts 91 and 92 as amended at 56 FR 49582, Sept. 30, 1991, to conform the regulations to newly enacted legislation raising from $500 to $1500 the amount of a claim of the United States that agencies may waive. It does not affect the separate authority of the Director of the Administrative Office of the United States Courts to waive claims aggregating not more than $10,000.

EFFECTIVE DATE: December 5, 1991.

FOR FURTHER INFORMATION CONTACT: Robert L. Higgins, Associate General Counsel, U.S. General Accounting Office, 441 G Street NW., Washington, DC 20548, (202) 275–6410.

SUPPLEMENTARY INFORMATION: Title VI, section 657, Public Law 102–190, 105 stat. 1290, effective December 5, 1991, increased from $500 to $1500 the amount of a claim of the United States arising out of an erroneous payment of pay and allowances and travel and transportation expenses that agencies may waive under 5 U.S.C. 5584, 10 U.S.C. 2774, and 32 U.S.C. 716. This rule conforms the GAO's regulations to the new limitation.

List of Subjects

4 CFR Part 91

Accounting, Claims, Government employees, Military personnel, Relocation expenses, Travel and Transportation expenses, Wages.

4 CFR Part 92

Accounting, Administrative practice and procedure, Claims, Government employees, Investigations, Military personnel, Wages.

For the reasons set out in the preamble, parts 91 and 92 of title 4, chapter I, subchapter G, Code of Federal Regulations, are amended as follows:

PART 91—[AMENDED]

Part 91 is amended as follows:

1. The authority citation for 4 CFR part 91 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 5 U.S.C. 5584, 10 U.S.C. 2774, and 32 U.S.C. 716, as amended by Pub. L. 99–224, 99 Stat. 1741, December 28, 1985, Title X, sec. 1009, Pub. L. 100–702, 102 Stat. 4667, November 19, 1988, and Title VI, sec. 657, Pub. L. 102–190, 105 Stat. 1290, December 5, 1991.

2. Section 91.4 is amended by revising paragraph (c)(1) to read as follows:

§ 91.4 Authority to waive.

* * * * *

(c) * * *

(1) May grant waiver in whole or in part of a claim of the United States in an amount aggregating not more than $1500, when all of the requirements for waiver are met, except that the Director of the Administrative Office of the United States Courts may grant waiver in whole or in part of a claim in an amount aggregating not more than $10,000;

* * * * *

PART 92—[AMENDED]

Part 92 is amended as follows:

1. The authority citation for 4 CFR part 92 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 5 U.S.C. 5584, 10 U.S.C. 2774, and 32 U.S.C. 716, as amended by Pub. L. 99–224, 99 Stat. 1741, December 28, 1985, Title X, sec. 1009, Pub. L. 100–702, 102 Stat. 4667, November 19, 1988, and Title VI, sec. 657, Pub. L. 102–190, 105 Stat. 1290, December 5, 1991.

2. Section 92.2 is amended by revising paragraph (c) and by designating the concluding text of the section as paragraph (d) to read as follows:

§ 92.2 Where to apply.

* * * * *

(c) The agency or department shall submit all waiver applications aggregating more than $1500 for which the agency recommends approval and all appeals regardless of the amount for consideration by the General Accounting Office to: Director, Claims Group, General Government Division. U.S. General Accounting Office, Washington, DC 20548.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 831

Retirement—Service Credit; Correction

AGENCY: Office of Personnel Management.

ACTION: Final rule; correction.

SUMMARY: This document corrects an error made in a final rule under 5 CFR parts 831 and 842 published October 29, 1991 (56 FR 55595). The Office of the Federal Register notified OPM that § 831.306(e) should have been listed as "revised" rather than "added." This correction provides the proper codification instruction.

EFFECTIVE DATE: November 29, 1991.

FOR FURTHER INFORMATION CONTACT: Patricia A. Rochester, (FTS) 266–0299 or (202) 606–0299.

Office of Personnel Management.

Constance Berry Newman,
Director.

Accordingly, amendatory instruction 2 appearing in the third column of page 55595 of OPM's final rules under part 831 published on October 29, 1991, (56 FR 55595) is corrected to show § 831.306(e) as being "revised," not "added."

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 726]

Navel Oranges Grown in Arizona and Designated Part of California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona navel oranges that may be shipped to domestic markets during the period from December 27, 1991, through January 2, 1992. Consistent with program objectives, such action is needed to establish and maintain orderly marketing conditions for fresh California-Arizona navel oranges for the specified week. Regulation was recommended by the Navel Orange Administrative Committee (Committee), which is responsible for local administration of the navel orange marketing order.

EFFECTIVE DATE: Regulation 726 (7 CFR Part 907) is effective for the period from December 27, 1991, through January 2, 1992.

FOR FURTHER INFORMATION CONTACT: Christian D. Nissen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–1754.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 907 (7 CFR part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the "Act."

This final rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 130 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order and approximately 4,000 navel orange producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

The California-Arizona navel orange industry is characterized by a large number of growers located over a wide area. The production area is divided into four districts which span Arizona and part of California. The largest proportion of navel orange production is located in District 1, Central California, which represented about 79 percent of the total production in 1990–91. District 2 is located in the southern coastal area of California and represented almost 18 percent of 1990–91 production; District 3 is the desert area of California and Arizona, and it represented slightly less than 3 percent; and District 4, which represented slightly less than 1 percent, is northern California. The Committee's revised estimate of 1991–92 production is 64,600 cars (one car equals 1,000 cartons at 37.5 pounds net weight each), as compared with 32,895 cars during the 1990–91 season.

The three basic outlets for California-Arizona navel oranges are the domestic fresh, export, and processing markets. The domestic fresh (regulated) market is a preferred market for California-Arizona navel oranges while the export market continues to grow. The Committee has estimated that about 68 percent of the 1991–92 crop of 64,600 cars will be utilized in fresh domestic channels (43,650 cars), with the remainder being exported fresh (14 percent), processed (16 percent), or designated for other uses (2 percent). This compares with the 1990–91 total of 16,675 cars shipped to fresh domestic markets, about 51 percent of that year's crop. In comparison to other seasons, 1990–91 production was low because of a devastating freeze that occurred during December 1990.

Volume regulations issued under the authority of the Act and Marketing Order No. 907 are intended to provide benefits to producers. Producers benefit from increased returns and improved market conditions. Reduced fluctuations in supplies and prices result from regulating shipping levels and contribute to a more stable market. The intent of regulation is to achieve a more even distribution of oranges in the market throughout the marketing season.

Based on the Committee's marketing policy, the crop and market information provided by the Committee, and other information available to the Department, the costs of implementing the regulations are expected to be more than offset by the potential benefits of regulation.

Reporting and recordkeeping requirements under the navel orange marketing order are required by the Committee from handlers of navel oranges. However, handlers in turn may require individual producers to utilize certain reporting and recordkeeping practices to enable handlers to carry out their functions. Costs incurred by handlers in connection with recordkeeping and reporting requirements may be passed on to growers.

Major reasons for the use of volume regulations under this marketing order are to foster market stability and enhance producer revenue. Prices for navel oranges tend to be relatively inelastic at the producer level. Thus, even a small variation in shipments can have a great impact on prices and producer revenue. Under these circumstances, strong arguments can be advanced as to the benefits of regulation to producers, particularly smaller producers.

The Committee adopted its marketing policy for the 1991–92 season on June 25, 1991. The Committee reviewed its marketing policy at district meetings as follows: Districts 1 and 4 on September 24, 1991, in Visalia, California; and District 2 and 3 on October 1, 1991, in Ontario, California. The Committee subsequently revised its marketing policy at a meeting on October 15, 1991. The marketing policy discussed, among other things, the potential use of volume and size regulations for the ensuing season. The Committee considered the use of volume regulation for the season. This marketing policy is available from the Committee or Mr. Nissen. The Department reviewed that policy with respect to administrative requirements and regulatory alternatives in order to determine if the use of volume regulations would be appropriate.

The Committee met publicly on December 23, 1991, in Newhall, California, to consider the current prospective conditions of supply and demand and recommended, with 7 members voting in favor, 3 opposing, and 1 abstaining, that 800,000 cartons is the quantity of navel oranges deemed advisable to be shipped to fresh domestic markets during the specified week. The marketing information and data provided to the Committee and used in its deliberations was compiled by the Committee's staff or presented by the Committee members at the meeting. This information included, but was not limited to, price data for the previous week from Department market news reports and other sources, preceding week's shipments and shipments to date, crop conditions and weather and transportation conditions.

The Department reviewed the Committee's recommendation in light of the Committee's projections as set forth in its 1991–92 marketing policy. The recommended amount of 800,000 cartons compares to the 1,000,000 cartons specified in the Committee's shipping schedule. Of the 800,000 cartons, 92.67 percent or 741,360 cartons are allotted for District 1, and 7.33 percent or 58,640 cartons are allocated for District 3. Handlers in Districts 2 and 4 will not be regulated as they are not shipping a sufficient quantity of navel oranges to warrant volume regulation at this point in the season.

During the week ending on December 19, 1991, shipments of navel oranges to fresh domestic markets, including Canada, totaled 1,796,000 cartons compared with 1,991,000 cartons shipped during the week ending on December 20, 1990. Export shipments totaled 129,000 cartons compared with 260,000 cartons shipped during the week ending on December 20, 1990. Processing and other uses accounted for 349,000 cartons compared with 485,000 cartons shipped during the week ending on December 20, 1990.

Fresh domestic shipments to date this season total 8,167,000 cartons compared with 11,535,000 cartons shipped by this time last season. Export shipments total 964,000 cartons compared with 1,298,000 cartons shipped by this time last season. Processing and other use shipments total 1,591,000 cartons compared with 2,497,000 cartons shipped by this time last season.

For the week ending December 19, 1991, regulated shipments of navel oranges to the fresh domestic market were 1,761,000 cartons on an adjusted allotment of 1,814,000 cartons which resulted in net undershipments of 53,000 cartons. Regulated shipments for the current week (December 20 through December 26) are estimated at 1,050,000 cartons on an adjusted allotment of 1,009,000 cartons. Thus, overshipments of 41,000 cartons could be carried forward into the week ending on January 2, 1992.

The average f.o.b. shipping point price for the week ending on December 19, 1991, was $10.33 per carton based on a reported sales volume of 1,472,000 cartons. The season average f.o.b. shipping point price to date is $10.43 per carton. The average f.o.b. shipping point prices for the week ending on December 20, 1990, was $8.70 per carton; the season average f.o.b. shipping point price at this time last year was $9.12.

The Department's Market News Service reported that, as of December 24, demand for first grade size 72s is moderate, fairly good for size 88s, and good for other sizes. Prices are reported as about steady.

Committee members discussed implementing volume regulation at this time, as well as different levels of allotment. It was reported that weather conditions have improved in District 1, and that maturity problems are continuing to affect some districts. Several Committee members commented the market is slow, and is expected to continue as such through the upcoming holiday week. Another member commented that inventory levels are high at the handler and retail levels. Three Committee members favored open movement at this time, while the majority of Committee members favored the issuance of general maturity allotment.

According to the National Agricultural Statistics Service, the 1990–91 season average fresh equivalent on-tree price for California-Arizona navel oranges was $7.75 per carton, 119 percent of the season average parity equivalent price of $6.52 per carton.

Based upon fresh utilization levels indicated by the Committee and an econometric model developed by the Department, the 1991–92 season average fresh on-tree price is estimated at $8.33 per carton, about 85 percent of the estimated fresh on-tree parity equivalent price of $7.44 per carton.

Limiting the quantity of navel oranges that may be shipped during the period from December 27, 1991, through January 2, 1992, would be consistent with the provisions of the marketing order by tending to establish and maintain, in the interest of producers and consumers, an orderly flow of navel oranges to market.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of this volume regulation, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities and that this action will tend to effectuate the declared policy of the Act.

A proposed rule regarding the implementation of volume regulation and a proposed shipping schedule for California-Arizona navel oranges for the 1991–92 season was published in the September 30, 1991, issue of the Federal Register (56 FR 49432). The Department is currently in the process of analyzing comments received in response to this proposal and, if warranted, may finalize that action this season. However, issuance of this final rule implementing volume regulation for the regulatory week ending on January 2, 1992, does not constitute a final decision on that proposal.

Pursuant to 5 U.S.C. 553, it is further found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register. This is because there is insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act.

In addition, market information needed for the formulation of the basis for this action was not available until December 24, 1991, and this action needs to be effective for the regulatory week which begins on December 27, 1991. Further, interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and handlers were apprised of its provisions and effective time. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified

List of Subjects in 7 CFR Part 907

Marketing agreements, Oranges, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 907 is amended as follows:

1. The authority citation for 7 CFR part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

VOL 56 ISS 251 DEC 31 1991 UMI

2. Section 907.1026 is added to read as follows:

Note.—This section will not appear in the Code of Federal Regulations.

§ 907.1026 Navel Orange Regulation 726.

The quantity of navel oranges grown in California and Arizona which may be handled during the period from December 27, 1991, through January 2, 1992, is established as follows: (a) District 1: 741,360 cartons; (b) District 2: unlimited cartons; (c) District 3: 58,640 cartons; (d) District 4: unlimited cartons.

Dated: December 24, 1991.

Charles R. Brader,

Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Parts 1807, 1822, 1823, 1890t, 1927, 1941, 1943, 1944, 1945, 1951, 1955, and 1965

Real Estate Title Clearance and Loan Closing

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its Real Estate Title Clearance and Loan Closing regulations. This action will: (1) Eliminate gender-biased language, (2) eliminate inconsistencies between the CFR and the internal FmHA Instructions, (3) incorporate 7 CFR part 1890t, "Timesaving and Program Improvement," into the regulation, (4) renumber 7 CFR Parts 1807 to 1927, Subpart B, (5) change the title of 7 CFR part 1927 to "Federal Statute of Limitations and Title Clearance and Loan Closing," (6) provide clarification of loan approval officials' responsibilities in reviewing preliminary title information, (7) increase the deductible for liability coverage for attorneys, title insurance companies, and their employees, (8) eliminate certain FmHA forms and develop other FmHA forms, (9) eliminate the designation process for attorneys and title insurance companies, (10) change the requirement for describing notes in mortgages by specifying that, in most cases, only the note(s) for the new Loan(s) need(s) to be described when a subsequent loan is made and a subsequent mortgage is taken, and (11) to add a new section to include Administrator's exception authority. The purpose of this action is to bring FmHA procedures into conformance with title evidence requirements accepted by conventional lending institutions.

EFFECTIVE DATE: January 30, 1992.

FOR FURTHER INFORMATION CONTACT: Karen Savoie Murray, Senior Loan Specialist, Single Family Housing Processing Division, Farmers Home Administration, USDA, room 5338, South Agricultural Building, 14th and Independence Avenue, SW., Washington, DC 20250, telephone (202) 382-0099.

SUPPLEMENTARY INFORMATION:

Classification

This final action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291, and has been determined to be "non-major" since the annual effect on the economy is less than $100 million and there will be no significant increase in cost or price for consumers, individual industries; Federal, State or Local Government agencies; or geographic regions. Furthermore, there will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This action is not expected to substantially affect budget outlay or to affect more than one agency or to be controversial. The net result is expected to provide better service to rural residents.

Regulatory Flexibility Act

This final rule has been reviewed with respect to the Regulatory Flexibility Act (5 U.S.C. 601-612). The undersigned has determined that this action will not have a significant economic impact on a substantial number of small entities because only the approval method of these entities will be altered, not the frequency of their use. The self-certification method will increase the ease and efficiency of approving attorneys and title companies for loan closing purposes.

Intergovernmental Consultation

Programs Affected: These programs/activities listed in the Catalog of Federal Domestic Assistance under Numbers:

10.405	Farm Labor Housing Loans and Grants
10.415	Rural Rental Housing Loans
10.416	Soil and Water Loans
10.404	Emergency Loans
10.406	Farm Operating Loans
10.407	Farm Ownership Loans
10.410	Low Income Housing Loans

Catalog Nos. 10.405, 10.415, and 10.416 are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and Local officials (7 CFR part 3015, subpart V, 48 FR 29112, June 24, 1983). Catalog Nos. 10.404, 10.406, 10.407, 10.410, and non-program loans are excluded from the scope of Executive Order 12372.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal Action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91-190, an Environmental Impact Statement is not required.

Discussion of Comments Received

The proposed rule published in the **Federal Register** on March 24, 1989 (54 FR 12211), provided for a 60-day comment period. The comment period closed on May 23, 1989, but all comments received were considered. Thirty comments were received; twelve from attorneys who all appeared to be designated attorneys under the current system, three were from OGC attorneys, one from a rural advocacy group, and fourteen from FmHA employees at all levels. Twenty two respondents opposed the proposed changes, all based on the removal of the current designation system. One State Director strongly favored the new system because of the volume of attorneys and title companies that had to be maintained under the designation system. The comments are broken down as follows:

Four attorneys and four FmHA employees felt that the number of attorneys and title companies closing FmHA loans would increase under the certification system. The Agency feels that this is a desirable change because it would increase the applicant's options for closing agents and introduce competition that is expected to keep closing costs lower.

Five attorneys and two FmHA employees felt that the new system would increase the closing costs that would be charged to the applicants. We could find no verifiable basis for this comment. The intent in increasing the allowable insurance deductible was to eliminate or reduce the extra insurance requirements (and cost) imposed on closing agents by the existing regulations, and ultimately reduce the applicant's closing costs. The new requirements should more closely reflect the insurance coverage that closing agents are already carrying to close conventional mortgages.

Three attorneys and six FmHA employees anticipate a decrease in the quality of loan closings. Seven attorneys and nine FmHA employees feel the new regulation will increase the training burden on local offices. Three attorneys, one OGC attorney, and five FmHA employees felt the new system would slow down the loan closing process because the County Office would have to spend more time to review loan closing documents. Since the revised regulation is designed to be self-instructional, the closing agents will have more guidance that they were given under the old regulation. One employee felt the number of attorneys used per County should be limited to reduce these potential problems. FmHA has determined that there is no fair and equitable way to restrict the number of settlement agents. Five attorneys stated that FmHA closings were significantly different from conventional closings, but did not explain how this action negatively impacted FmHA closings. This action makes FmHA paperwork and settlement agent requirements more like those of conventional lenders. Forms have been combined, and in many cases simplified. Instructional forms manual inserts (not previously available) have been developed for all closing forms. The new regulation has combined 7 CFR parts 1807 and 1890t.2, for one clear and concise set of instructions. The regulation itself can now be used for instructing closing agents on the procedures FmHA requires to close its loans. It is not the responsibility of FmHA to train closing agents on state real estate law. FmHA feels that these comments are unfounded.

Four FmHA employees and five attorneys opposed the certification system because they felt it would increase the burden of work on the County Office. All but one respondent mentioned verifying the closing agents qualifications every time that agent closed a loan as a primary cause for the perceived increase in work. Under the new certification system, proposed closing agents will sign a statement in which they certify as to their qualifications. No further action is required by the approval official to approve a closing agent. It has been the experience of FmHA that attorneys and title companies either had the required qualifications, or withdrew their designated status. The burden on the County Office is expected to be minimal.

Six attorneys, the rural advocacy group, and one FmHA employee disliked the bonding and insurance requirements set forth in the proposed rule. The Agency proposed to increase the amount of errors and omissions coverage for attorneys from $100,000 to $250,000, and increase the allowable deductible from $1,000 to $5,000. Fidelity coverage of at least $50,000, increased from $10,000, must be provided for each individual who will have access to the loan funds. One attorney felt we should not have any requirements for these items and claimed he was closing FmHA loans now and is not a designated attorney. One attorney felt we should require malpractice insurance instead of a bond. The rural advocacy group and the remainder of attorneys felt the proposed requirements were still too restrictive and discouraged closing agents from participating. The FmHA employee felt they were too liberal and did not adequately protect the Government. The Agency feels that the new requirements are adequate because they more closely reflect the requirements of conventional lenders.

One FmHA employee recommended we adopt a system of contracting for attorney services, but in that case, the attorneys would be hired by FmHA, which would give the appearance that they were working for FmHA. Two FmHA employees felt that the list of designated attorneys and title companies helped inexperienced applicants select a closing agent, and eliminating the designation process would leave applicants with no guidance. The designated attorney system was not designated to provide advice to applicants. It is for the purpose of verifying credentials of closing agents who wished to close FmHA loans. The same credentials are required under the new regulation, but instead of State Office verification, the closing agent self-certifies that the requirements are met. We do not feel that it is the responsibility of the Agency to influence the applicant's choice of closing agent. Doing so would create the appearance of a conflict of interest.

Summary of Other Revisions

Additional revisions are included in this final rule that were not published for proposed rule as they clarify the intent of the regulation, and changes within the scope of internal agency management.

Several definitions were added as a result of comments received. Definitions for fee simple, closing agent, title, and certificate of title were added. The term "closing agent" was incorporated in lieu of "approval attorney/title company" in response to a comment suggesting that we use a uniform term throughout FmHA regulations. The regulation has been restructured to make it clear what the FmHA expects the closing agent to be responsible for, regardless of whether the closing agent is an attorney or a title company. This is to avoid the appearance that FmHA is requiring title companies to practice law, and not allowing attorneys to obtain title insurance.

Conflict of interest clauses have been clarified, prohibiting closing agents from performing closings for family, partners, and business associates. Language has been added prohibiting closing agents from acting on behalf of both the buyer and the seller.

Instructions for rejecting closing agents are also included. Instructions for releasing loans funds before a prior lien has been discharged were removed because placing a mortgage on the property will not give FmHA the required lien priority if the prior mortgage has not been discharged.

List of Subjects in 7 CFR Parts 1807, 1822, 1823, 1890t, 1927, 1941, 1943, 1944, 1945, 1951, 1955, and 1965

Loan closing agents, Loan programs—Agriculture, Loan programs—Housing and community development and mortgages, Home improvement, Loan program—Housing and community development, Low and moderate income housing—Rental, Mobile homes, Mortgages, Deeds of trust, Title insurance, Rural housing, Subsidies, Foreclosure, Administrative practice in procedure, Government acquired property, Government property management, Sale of Government acquired property, Surplus Government property, Non-profit organizations, Credit, Indians, Accounting servicing.

Therefore, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1807—TITLE CLEARANCE AND LOAN CLOSING [REMOVED]

1. Part 1807 is removed and reserved.

PART 1822—RURAL HOUSING LOANS AND GRANTS

2. The authority citation for part 1822 is revised to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart G—Rural Housing Site Loan Policies, Procedures, and Authorizations

3. In § 1822.270, paragraph (b) is revised to read as follows:

VOL 56 ISS 251 DEC 31 1991 UMI

§ 1822.270 Technical, legal, and other services.

* * * * *

(b) Title Clearance and Legal Services. For a loan to a public nonprofit organization, title clearance and legal services will be obtained in accordance with instructions from the OGC, observing the provisions of subpart B of part 1927 of this chapter to the extent feasible. For a loan to a private nonprofit organization, the provisions of subpart B of part 1927 of this chapter regarding title clearance and legal services will apply. The applicant will be encouraged to have the same approved closing agent, where practical, perform the title clearance work in connection with the purchase of the land and the sale of the individual sites.

* * * * *

4. In § 1822.274, paragraphs (a), (b), and (c)(2) are revised to read as follows:

§ 1822.274 Loan closing.

(a) *Applicable instructions.* The complete loan docket will be sent to the OGC for loan closing instructions. RHS loans will be closed in accordance with applicable provisions of Subpart B of Part 1927 of this chapter, and State Instructions which supplement this Instruction, and closing instructions of the OGC, and with the assistance of the approved attorney, representatives of the title insurance company, or local attorney, whichever is appropriate.

(b) *Mortgage.* Unless the OGC determines the Form to be inappropriate, real estate mortgage Form FmHA 1927–1 (state), "Real Estate Mortgage for _____," will be used for all RHS Section 524 loans modified as prescribed by or with the advice of the OGC with respect to the name, address, and other identification of the borrower, the style of execution, and the acknowledgement. Additional paragraphs will be included in the mortgage to read as follows:

The borrower agrees not to discriminate in the sale of the dwelling financed under this mortgage due to a prospective purchaser's race, color, national origin, sex, religion, age, marital status, or handicap. The borrower further agrees to comply with all Federal, State, or local laws and ordinances prohibiting discrimination in the sale of housing. The borrower's failure or refusal to comply with this agreement will be a basis for the FmHA to deny future requests for participation in its rural housing programs and activities.

This instrument also secures the obligations and covenants of borrower set forth in Borrower's Loan Resolution of _____ (date), which is hereby incorporated herein by reference.

(c) * * *

(2) The note will be signed in accordance with subpart B of part 1927 of this chapter and the forms manual insert for Form FmHA 1944–52 (available in any FmHA office).

* * * * *

5. Section 1822.277 is revised to read as follows:

§ 1822.277 Complaints regarding discrimination in opportunity to buy developed sites.

Any applicant wishing to purchase a site financed by an RHS loan who believes he or she has been discriminated against because of race, color, national origin, religion, sex, handicap, or age, may file a complaint with the County Supervisor or State Director. Any such complaint will be handled in accordance with § 1944.239 of part 1944, subpart E of this chapter.

6. In § 1822.278, paragraph (g) is revised to read as follows:

§ 1822.278 Special requirements for RHS Section 523 loans (loans to organizations providing sites for self-help housing).

* * * * *

(g) *Mortgage.* Unless the OGC determines the Form to be inappropriate, real estate mortgage Form FmHA 1927–1 (state), "Real Estate _____ for _____ (Direct Loan)," will be used modified as prescribed by or with the advice of the OGC with respect to the name, address, and other identification of the borrower, the style of execution, and the acknowledgement. Additional paragraphs will be included in the mortgage to read as follows:

The borrower agrees not to discriminate in the sale of the dwelling financed under this mortgage due to a prospective purchaser's race, color, national origin, religion, sex, handicap, or age, may file a complaint with the County Supervisor or State Director. Any such complaint will be handled in accordance with § 1944.239 of part 1944, subpart E of this chapter.

This instrument also secures the obligations and covenants of borrower set forth in Borrower's Loan Resolution of _____ *(date)*, which is hereby incorporated herein by reference.

PART 1823—ASSOCIATION LOANS AND GRANTS-COMMUNITY FACILITIES, DEVELOPMENT, CONSERVATION, UTILIZATION

Subpart N—Loans to Indian Tribes and Tribal Corporations

7. The authority citation for of part 1823 continues to read as follows:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

8. Section 1823.414 is amended by revising the introductory text of paragraph (a)(1) and (2) to read as follows:

§ 1823.414 Title to security property.

* * * * *

(a) * * *

(1) *Trust property.* The applicant will request BIA to furnish Title Status Reports to the County Supervisor. The County Supervisor will review the reports in accordance with subpart B of part 1927 of this chapter. Form FmHA 1927–13, "Waiver of Encumbrances, Exceptions, and Reservations," will be used as appropriate. The County Supervisor will ask the State Director for advice if necessary.

* * * * *

(2) *Nontrust land.* Title clearance will be obtained in accordance with subpart B of part 1927 of this chapter.

* * * * *

9. Section 1823.414 (a)(1)(i) is amended by changing the reference "Forms 427–1" to read "Forms 1927–1."

Exhibit A of Subpart N [Amended]

10. Exhibit A of Subpart N is amended by changing the references "Form FmHA 427–9" to "Form FmHA 1927–9," "Form FmHA 427–10" to Form FmHA 1927–10," "Form FmHA 427–13" to "Form FmHA 1927–13," "Form FmHA 440–1" to "Form FmHA 1940–1," and "Form FmHA 427–1" to "Form FmHA 1927–1."

PART 1890t—TIMESAVING AND PROGRAM IMPROVEMENT [REMOVED]

11. Part 1890t is removed and reserved.

12. A new part 1927 consisting of subpart B is being added to read as follows:

PART 1927—TITLE CLEARANCE AND LOAN CLOSING

Subpart B—Real Estate Title Clearance and Loan Closing

Sec.

1927.51 General.
1927.52 Definitions.
1927.53 Costs of title clearance and closing of transactions.
1927.54 Requirements for closing agents.
1927.55 Title clearance services.
1927.56 Scheduling loan closing.
1927.57 Preparation of closing documents.
1927.58 Closing the transaction.
1927.59 Subsequent loans and/or transfers with assumptions.
1927.60–1927.61 [Reserved]
1927.62 Voluntary conveyances.
1927.63–1927.64 [Reserved]
1927.65 Additional requirements in connection with loans to homestead entrymen, contract purchasers of farm units from the Bureau of Reclamation, and certain American Indians.
1927.66 Cancellation of loan, assumption, or credit sale.
1927.67–1927.89 [Reserved]
1927.90 State supplements.
1927.91 Exception authority.
1927.92–1927.99 [Reserved]
1927.100 OMB control number.

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Real Estate Title Clearance and Loan Closing

§ 1927.51 General.

(a) *Types of loans covered by this subpart.* This subpart sets forth the authorities, policies, and procedures for real estate title clearance and closing of loans, assumptions, voluntary conveyances and credit sales in connection with the following types of Farmers Home Administration (FmHA) loans: Farm Ownership (FO), Nonfarm Enterprise (FO–NFE), Emergency (EM), Operating (OL), Rural Housing (RH), Rural Housing Site Loans (RHS), Farm Labor Housing (LH), Rural Rental Housing (RRH), Rural Cooperative Housing (RCH), Soil and Water (SW), Indian Land Acquisition Loans involving non-trust property, and Non Program (NP) loans. This subpart does not apply to guaranteed loans.

(b) *Programs not covered by this subpart.* Title clearance and closing for all other types of FmHA loans and assumptions will be handled as provided in the applicable program instructions or as provided in special authorizations from the National Office.

(c) *Review by the Office of the General Counsel (OGC).* When required by applicable program regulations, such as for multi-family housing (MFH) organizations or other complex cases as determined by the State Director, the State Director will request OGC to review the docket and issue closing instructions.

§ 1927.52 Definitions.

Approval official. The FmHA employee who has been delegated the authority to approve, close, and service the particular kind of loan will approve an attorney or title company as closing agent to close these loans. If, due to the amount of the loan request, the loan is approved outside the initiating office, the initiating office will approve the closing agent before forwarding the loan material to the loan approval official.

Approved attorney. A duly licensed attorney who provides title opinions or insurance, closes loans, assumptions, credit sales and voluntary conveyances; and disburses funds in connection with FmHA loans. The FmHA approval official approves the attorney on a case-by-case basis after reviewing the attorney's certification. Attorneys may use title insurance to meet the loan closing requirements of FmHA. For the purpose of this subpart "approved attorney" will subsequently be referred to as "attorney" or "closing agent."

Approved title insurance company. A title insurance company (including its local representatives, employees, and agents) that closes loans, assumptions, credit sales, and voluntary conveyances; provides title insurance; and disburses funds in connection with FmHA loans. The FmHA approval official approves the title insurance company for loan closing purposes on a case-by-case basis after reviewing the title insurance company's certification. For the purpose of this subpart "approved title insurance company" will subsequently be referred to as "title company" or "closing agent."

Borrower. The party(ies) indebted after the loan, assumption, or credit sale is closed.

Closed loan. A loan is considered to be closed when the mortgage is filed for record.

Closing agent. The attorney or title company selected by the applicant and approved by FmHA to provide closing services for the proposed loan.

Cosigner. A party who joins in the execution of a promissory note or assumption agreement to guarantee repayment of the debt.

Credit sale. A sale in which FmHA provides credit to the purchaser(s) of FmHA inventory property. Title clearance and closing of a credit sale are the same as for an initial loan except the property is conveyed by quitclaim deed.

Exceptions. Exceptions include but are not limited to recorded covenants, conditions, restrictions, reservations, liens, encumbrances, easements, rights-of-way, leases, mineral, oil, gas and geothermal rights (with or without the right of surface entry), timber and water rights, judgments, pending court proceedings, probate proceedings and agreements which limit or affect the title to the property.

Fee simple. An estate in land of which the owner has unqualified ownership and power of disposition.

FmHA. The United States of America acting through the Farmers Home Administration of the Department of Agriculture.

Land contract (Contract for Deed). This is a contract between the buyer and seller of land in which the buyer has the right to possession and use of the land and over a period of time (usually in excess of one year) makes periodic payments of a portion of the purchase price to the seller. The seller retains legal title to the property until the final payment is made, at which time the buyer will receive a deed to the land vesting fee title in the buyer. This is a security device whereby the seller finances a portion of the purchase price for the buyer.

Mortgage. Real estate security instrument; includes deed of trust and deed to secure debt. Forms FmHA 1927–7 (state), FmHA 1927–11 (state), and FmHA 1927–12 (state) will be used to secure a mortgage to FmHA.

Office of General Counsel (OGC). Refers to the United States Department of Agriculture (USDA) Regional Attorney, Associate Regional Attorney, or Assistant Regional Attorney, who provides legal counsel to FmHA for loan making and loan servicing actions.

Program regulations. Refers to the FmHA regulations for the particular loan program involved (e.g., 7 CFR part 1944 subpart A for rural housing loans).

Quitclaim deed. A transfer of the grantors' interest in the title, without warranties or covenants. This type of deed is used by FmHA to convey title to purchasers of inventory property.

Seller. Individual(s) or other entity(ies) which are conveying ownership in real property to an FmHA applicant/buyer.

Title, certificate of title. A certified statement as to land ownership, based upon examination of record title.

Title clearance. Examination of a title and its exceptions, to assure FmHA that the loan is legally secured and has the required priority.

Title defects. Any exception or legal claim of ownership (through deed, lien, judgment, or other recorded document), on behalf of a third party, which would prevent the seller from conveying a clear title.

Vendee. The buyer.

Vendor. The seller.

Voluntary conveyance. A method of liquidation by which title to FmHA security is transferred by a borrower to FmHA by deed in lieu of foreclosure.

Warranty deed. A deed in which the grantor warrants that he/she has the right to convey the property, the title is free from encumbrances, and the grantor shall take further action necessary to perfect or defend the title.

§ 1927.53 Costs of title clearance and closing of transactions.

The borrower or the seller, or both, will be responsible for payment of all

VOL 56 ISS 251 DEC 31 1991 UMI

costs of title clearance and closing of the transaction and will arrange for payment before the transaction is closed. In voluntary conveyance cases to FmHA, these costs will be paid as provided in § 1955.10 (g) of subpart A of part 1955 of this chapter. In a case involving the purchase or sale of real estate, the option or sales contract must state who will pay the title clearance and closing costs. These costs will include any costs of abstracts of title, land surveys, attorney's fees, owner's and lender's policies of title insurance, obtaining curative material, notary fees, documentary stamps, recordation costs, tax monitoring service, and other expenses necessary to complete the transaction.

§ 1927.54 Requirements for closing agents.

(a) *General.* An attorney or title company may act as a closing agent and close FmHA real estate loans, provide necessary title clearance, and perform such other duties as are set forth in this subpart. A closing agent will be responsible for closing FmHA loans and disbursing both FmHA loan funds and funds provided by the borrower in connection with the FmHA loan. The borrower will select his or her closing agent. The approval official will approve attorneys and title companies on a case-by-case basis prior to loan closing and without discrimination, based on the information supplied by the attorney on Form FmHA 1927–19, "Certification of Attorney," or by the title company on Form FmHA 1927–20, "Certification of Title Insurance Company." FmHA will use Form FmHA 1927–2, "Transmittal of Form FmHA 1927–19/1927–20," to transmit the appropriate form to the attorney or title company chosen by the applicant.

(b) *Approval of attorneys.* Any attorney selected by an FmHA applicant must submit a completed Form FmHA 1927–19 to the approval official, who will approve on a case-by-case basis any qualified attorney who is duly licensed to practice law in that State and complies with the bonding and insurance requirements in this section. Any attorney who has been debarred or suspended from participation in FmHA programs in accordance with FmHA Instruction 1940–M (available in any FmHA office) will not be approved.

(1) An attorney must have in full force and effect an acceptable liability insurance policy for errors and omissions in an amount of at least $250,000 per occurrence. This liability policy may have a deductible of what is customary in the area, but not more than $5,000 per claim unless prior authorization is obtained from the National Office on a statewide basis. If submitted to the National Office for a larger liability deductible, the request must be supported with information from the state bar showing what is customary throughout the state.

(2) An attorney must have in full force and effect a fidelity type bond of at least $50,000 or equivalent fidelity type protection. If partners, associates or members of the attorney's staff have access to the funds in the escrow account, each such individual must either have a separate fidelity type bond to cover any fraudulent or dishonest act or such person(s) may be covered by a blanket fidelity bond, provided that $50,000 of protection is maintained for each individual person.

(c) *Approval of title companies.* Any title company selected by an FmHA applicant must submit Form FmHA 1927–20 to the approval official who will approve, on a case-by-case basis, any company which issues title insurance policies in a form acceptable to FmHA, is licensed to do business in the state, is not debarred or suspended, and will meet the following requirements:

(1) The title company agrees, in writing, that it can furnish a title insurance binder and a mortgagee or joint mortgagee-owner policy of title insurance.

(2) The title company certifies that it has the financial ability to cover losses resulting from errors and omissions made in its activities as a title company.

(3) The title company must certify that it has fidelity coverage of at least $50,000 on each individual who will have access to the loan funds, or provide an indemnification agreement satisfactory to FmHA providing for reimbursement to FmHA for any loss caused by fraud or dishonesty or failure by the attorneys, agents or employees of the title company to comply with FmHA's written closing instructions. The approval official is authorized to approve title companies without each certification if the approval official and OGC determine that state law imposes requirements which give FmHA at least equivalent protection.

(4) The title company agrees that the mortgages title policy will be in a form acceptable to FmHA and will contain only standard types of exceptions and exclusions approved in advance by the approval official with the advice of OGC. If the company issues different types of mortgagee title policies the approval official will inform the title company which types are acceptable.

(5) The title insurance company agrees that the representative who supervises the closing of the transaction will be authorized by the company to receive funds and give receipts for the company's charges.

(d) *Responsibility of approval official.* In addition to approving closing agents, the approval official will inform all closing agents used in connection with FmHA closing of their duties and responsibilities under this subpart, applicable state supplements, and any changes or additional requirements which may be imposed. A package containing a copy of this subpart, applicable forms, state supplements, and other pertinent material will be provided to the closing agent as needed.

(e) *Conflict of interest.* A closing agent who has, or whose spouse, children, partners or business associates have, a financial interest in the real estate which will secure the FmHA debt cannot be involved in the title clearance or loan closing process. Financial interest includes having either an equity, creditor or debtor interest in any corporation, trust or partnership with a financial interest in the real estate which will secure the FmHA debt. Closing agents will not represent both the buyer and seller in FmHA transactions, except for credit sale transactions.

(f) *Special provisions.* Closing agents are responsible for:

(1) Having current knowledge of the requirements of state laws in connection with loan closing and title clearance,

(2) Advising the State Director of any changes in state laws which necessitate changes in state mortgage forms and/or state supplements, and

(3) Processing title work and loan closings in a timely, professional manner.

(g) *Rejecting closing agents.* If the approval official cannot approve the closing agent selected by the applicant in accordance with paragraphs (b) or (c) of this section, the following actions will be taken:

(1) The closing agent will be notified within five business days of the specific reasons for rejection. No appeal rights are appropriate, as the closing agent is not the direct recipient of program benefits.

(2) The applicant will be notified within five business days of the rejection. It is the applicant's responsibility to decide whether to continue with the rejected closing agent, if the reasons for rejection can be removed before any legal costs are incurred, or if another closing agent will be selected.

§ 1927.55 Title clearance services.

(a) *Responsibilities of closing agents.* Services to be provided to FmHA and the borrower by a closing agent in connection with the transaction vary depending whether a title insurance policy or title opinion is being furnished. The closing agent is expected to perform these services without unnecessary delay.

(1) *Title insurance.* A satisfactory title insurance binder and mortgagee and owner's title policies in a form satisfactory to FmHA and in an amount sufficient to adequately secure the FmHA mortgage must be provided, including any title examination or curative action necessary to issue such a policy.

(2) *Title opinion.* Title opinion services will include:

(i) A review of the legal description and title to the security,

(ii) A preliminary and final title opinion or certificate of title,

(iii) Preparing, obtaining, or approving curative material, conveyances, and security instruments,

(iv) Advising the approval official and borrower of the nature and legal effect of outstanding interests or exceptions such as liens, encumbrances, leases, easements, convenants, conditions, restrictions, reservations, and rights relating to mineral, oil, gas, geothermal, timber and water rights (including the presence or absence of the right of entry by the holder of such rights), prior sales of part of the property, judgments, probate proceedings or pending court actions affecting the real property or other outstanding exceptions or interests to assist in determining:

(A) Whether the outstanding interests or exceptions affect the value of the property or its operation, and

(B) Which exceptions must be corrected in order for the borrower(s) to obtain good and marketable title of record in accordance with prevailing title examination standards, and for FmHA to obtain a valid lien of the required priority.

(v) Provide copies of these interests and exceptions as requested by the approval official.

(b) *Initial responsibility of approval official.* The approval official will furnish the closing agent with Form FmHA 1927–4, "Transmittal of Title Information," all the information and documents called for therein (including waivers, easements, and FmHA forms), and any information not contained in this subpart regarding FmHA policies and procedures applicable to the type of transaction involved.

(c) *Ordering title services.* The approval official will notify the borrower and seller, if applicable, that an attorney or title company must be employed to examine the title and perform other services in connection with the closing of the transaction. Application for title examination or insurance will be made by the borrower to an attorney or title company. Application for mortgage title insurance will be on a form which has been approved by the approval official. The mortgagee policy will be for at least the amount of the loan. The United States of America will be named as the insured mortgagee. Attorney services may be requested in the form of FmHA Guide Letter No. 1927–1 (available in any FmHA office).

(d) *Use of title opinion.* If a title opinion will be issued, a title examination will include searches of the records, or certificates from the clerks of the appropriate State courts, Federal Bankruptcy courts and United States district courts, for the period determined necessary by local custom, to issue a title opinion. A preliminary title opinion will be issued to the approval official on Form FmHA 1927–9, "Preliminary Title Opinion." If that form is not legally sufficient in a particular state, an OGC approved state form will be used. The closing agent will determine:

(1) All owner(s) of record of the real property,

(2) Whether there are any outstanding mortgages, liens, judgments or pending suits in Federal or State courts (as disclosed by a lis pendens or other similar notice of a pending lawsuit),

(3) Whether there are outstanding Federal or State tax claims (including taxes which under state law may become a lien superior to a previously attaching mortgage lien),

(4) Whether outstanding bankruptcy, insolvency, or probate proceedings involving any part of the property, whether already owned by the borrower, or to be acquired by assumption or with loan funds, or involving the borrower or the seller exist,

(5) If a water right is to be included in the security for the loan. The closing agent must attach a full legal description of the water right,

(6) If wetlands easements or other conservation easements have been placed on the property,

(7) If there are any liens or recorded claims which would prevent FmHA from obtaining an enforceable mortgage lien of the required priority on the security property, and

(8) If there are any exceptions of record.

(e) *Use of title insurance.* When title insurance is to be obtained, the approval official will be furnished with a title insurance binder disclosing any defects in, encumbrances against, and exceptions to the title, the conditions to be met to make the title insurable, and the curative or other actions to be taken before closing of the transaction. The binder must include a commitment to issue a mortgagee title policy in an among at least equal the amount of the loan. In the case of an assumption without a subsequent loan, the existing policy may be continued if the coverage meets or exceeds the assumption balance and the title company agrees in writing to extend coverage in full force and effect.

(f) *Approval official's responsibilities after receipt of preliminary title opinion or title insurance binder.* Upon receipt of the preliminary title opinion or title insurance binder, the approval official will:

(1) Check the opinion or binder carefully. If any required information is omitted, or if the standard form of opinion or binder is amended, the approval official will return it for completion or correction. If the closing agent is unable or unwilling to comply, the approval official will send the opinion or binder with a full explanation to OGC through the State Director for advice.

(2) Check the legal description of the land, water rights, rights-of-way, easements, and other security involved, to determine that the description covers all of the property rights intended to be taken as security.

(3) Review all exceptions to title shown in the preliminary title opinion or title insurance binder. The approval official will determine which exceptions must be modified, eliminated or waived, or whether an agreement with prior lienholders is necessary or advisable to protect FmHA's interests. If prior encumbrance(s) will remain, the approval official should obtain and review a copy of each to insure that its terms are acceptable to FmHA. If an option or sales contract which lists acceptable exceptions is involved, the approval official will determine whether the exceptions in the preliminary title opinion or title insurance binder are the same as those in the option or sales contract and inform the applicant of discrepancies.

If the approval official has any doubt as to the acceptability or effect of any exception, the applicant will be requested to obtain a clarification. The approval official will consult with the closing agent and/or the State Director when necessary to determine the acceptability of any exception.

VOL 56 ISS 251 DEC 31 1991 UMI

(4) If the approval official determines that any defects cannot be corrected, or the effect of certain exceptions on the title, suitability, security value, or successful operation of the property is not clear, and they cannot be corrected or eliminated without undue expense, the approval official will forward the preliminary title opinion or title insurance binder to the State Director together with comments regarding the objectionable features and copies of the exceptions when needed.

(i) If, with the advice of OGC, the State Director determines that the exceptions will not adversely affect the title to the property or its suitability, security value, or successful operation, the State Director will advise the approval official. The approval official will then arrange for closing.

(ii) If the State Director, with the advice of OGC, finds that these exceptions will adversely affect the title to the property, its suitability, security value, or successful operation, the State Director may waive them conditionally and instruct the approval official as to how the conditions may be met, or instruct the approval official that the loan cannot be closed because of the defect.

§ 1927.56 Scheduling loan closing.

The approval official may arrange a closing when he/she determines that exceptions shown in the preliminary title opinion or title insurance binder (if any) will not adversely affect the suitability, security value or successful operation of the property.

(a) The approval official will make sure that all requirements of subpart I of part 1940 of this chapter have been met before the loan is closed.

(b) In arranging for loan closing, the approval official will send Form FmHA 1927-15, "Loan Closing Instructions," to the closing agent and at the same time send written notification of loan closing to the applicant. For single family housing loans Form FmHA 1927-16, "Notification of Loan Closing," will be used to notify the applicant.

§ 1927.57 Preparation of closing documents.

(a) *Preparation of deeds.* The closing agent will prepare, complete, or approve deeds necessary for title clearance and closing of the transaction. FmHA forms will be used whenever possible.

(1) *Types of estates for married borrowers.* If the borrowers are married, FmHA prefers, but will not require, that title to the real estate will be held in such a way that, upon the death of a borrower, it will pass to the surviving spouse by law to prevent the real estate from being tied up in probate proceedings. Title may be held in any manner that permits obtaining the required mortgage.

(2) Deeds will be prepared as follows:

(i) Conveyances of title to borrowers by parties other than FmHA will be by general warranty deed. If a general warranty deed cannot be obtained, a special warranty deed, quitclaim deed, or grant deed may be used if the entity providing title clearance (closing agent) determines that the deed used will vest in the borrower a good and marketable title of record. All conveyances by FmHA will be by quitclaim deed.

(ii) The deed to the security property will show the exceptions to which the title is subject and should, where customary, contain a tie-in description showing that it covers the same land or part of the same land as that designated or described in another deed or mortgage described specifically by date, parties, and recording data.

(iii) Each deed should recite legal consideration.

(b) *Preparation of mortgages.* The closing agent will insure that all mortgages are properly prepared, completed, executed, and filed for record. Where applicable, the mortgages should recite that it is a purchase money mortgage. The following requirements will be observed in preparing FmHA mortgages:

(1) *Real estate mortgage forms.* FmHA mortgage forms will be used in all cases and other FmHA forms will be used whenever possible. Form FmHA 1927-1 (State), "Real Estate Mortgage or Deed of Trust For ———," will be used for all insured and direct loans except where Form FmHA 1927-7 (State), "Real Estate Deed of Trust for ———," is used for all rural housing loans. These forms will be prepared and distributed in accordance with state supplements. When a loan is made to a homestead entryman or to a contract purchaser of a farm unit from the Bureau of Reclamation, a rider to Form FmHA 1927-1 (State) will be used per state supplement.

(2) *Number of copies.* (i) The original recorded mortgage is to be retained in the borrower's case file unless the original mortgage is retained by the recorder, and a conformed copy will be provided to the borrower.

(ii) When the original is to be retained by the recorder, an original and two conformed copies will be prepared. One conformed copy will be retained in the borrower's case file and one conformed copy will be provided to the borrower.

(iii) Extra copies of mortgages may be needed in individual cases in some participation loans, loans on reclamation projects, when security is taken on trust or restricted property involving loans to Native American, and other similar situations.

(iv) The closing agent will distribute copies to appropriate parties at loan closing or as soon as possible thereafter.

(3) Persons required to execute mortgage. The mortgage will be executed by the borrower and all other persons having an interest in the real property being mortgaged whose execution is necessary for FmHA to have the required lien priority, (for example, a spouse's right of dower or curtesy) so that, in the event of default, the mortgage will be enforceable against all such interests. Persons signing the promissory note and the mortgage will use exactly the same names which appear on the title.

(i) When the applicant is a corporation or cooperative, the mortgage will be executed by the authorized officers on behalf of the corporation or cooperative. Authorization must be granted to the officers by either:

(A) The Articles of Incorporation and Bylaws, or

(B) A duly adopted resolution of the board of directors authorizing such execution and indicating which officers are authorized to execute the loan documents on behalf of the corporation/cooperative, unless applicable FmHA instruction or state law prohibits. The resolution must bear the certification of the corporate/cooperative secretary that it was duly adopted and not revoked and have the corporate seal affixed, if applicable, to be acceptable. When shareholder approval is necessary the resolution must recite that shareholder approval has been obtained.

(ii) When the applicant is a partnership, the mortgage must be executed by the partners required by the partnership agreement to execute loan documents on its behalf.

(iii) When the applicant is a trust, the requirements of the trust agreement and state law shall control as to who is authorized to execute the loan documents.

(4) *Date of execution.* The mortgage will be dated and executed on the same date as the promissory note. If necessary, the mortgage may be done on a different date provided it is not executed before the date of the note or after the date of closing.

(5) *Title exceptions.* The mortgage will specifically describe all exceptions it will be subject to, if customary under local practice or required by state law or state supplement. The exceptions will normally be shown as part of or immediately following the legal description of the land and must be the same as shown on the final title opinion or mortgagee policy of title insurance. In cases where specific description of each exception to title is not customary or required, these exceptions may be described by use of a general statement similar to the following (unless inconsistent with applicable State law): "Subject, however, to all outstanding covenants, conditions, restrictions, reservations, liens, encumbrances, easements, rights of way, leases, mineral, oil, gas and geothermal rights (with or without the right of surface entry), timber and water rights, judgments, pending court proceedings, probate proceedings and agreements which limit the title to the property."

(6) *Releasing or retaining existing mortgages in refinancing cases.* When there is an outstanding FmHA real estate mortgage against the property and the loan secured by the mortgage is being refinanced with the current loan, the mortgage for the outstanding loan will be superseded and will be released at the time of loan closing, unless it is necessary under state law to keep the existing mortgage in effect to retain a valid lien of the same priority for the obligation being refinanced.

(7) *Describing notes in mortgages.* In most cases only the note(s) for the new loan(s) needs to be described when a subsequent loan is made and a subsequent mortgage is taken. The note(s) for any unpaid loan(s) secured by real estate will not be described in the mortgage unless the approval official determines:

(i) It is necessary to do so to protect the government's interest,

(ii) The description of the unpaid prior secured note(s) in the mortgage being taken would not result in a higher title insurance premium for the new mortgage, or

(iii) State law requires that all original notes be presented when filing a security instrument. A State supplement should reflect this exception when applicable.

(8) *Determining due date of final installments.* The "Due Date of Final Installment," as shown in the mortgage, is determined by adding the number of years over which the loan is payable to the date of the promissory note: for example, if the note is dated March 30, 1987, and the final payment is due and payable 20 years from that date, the "Due Date of Final Installment" is March 30, 2007.

(9) *Alteration of mortgage form.* A mortgage form may be altered pursuant to a state supplement having prior approval of the National Office, or in a special case, to comply with the terms of loan approval prescribed in accordance with program instructions. No other alterations in the printed mortgage forms will be made without prior approval of the National Office. Any changes made by deletion, substitution, or addition (excluding filling in blanks) will be initialed in the margin by all persons signing the mortgage.

(10) *Special requirements imposed by program instructions.* Some program instructions require that the mortgage forms be modified. In such cases, either OGC or the approval official will modify the FmHA mortgage form as specified. The closing agent will make sure that the modification has been made prior to execution of the mortgage.

(11) *Mortgages on leasehold estates.* When the FmHA security interest is a leasehold estate, unless state law or state supplement otherwise provides, the Form FmHA 1927-1 (State) or Form FmHA 1927-7 (State) will be modified as follows:

(i) In the space provided on the mortgage for the description of the real property security, the leasehold estate and the land covered by the lease must be described. The following language must be used: "All of borrower's right, title and interest in and to a leasehold estate for an original term of ____ years, commencing on _____, 19____ created and established by and between _____ as lessor and owner and _____ as lessee, including any extensions and renewals thereof, a copy of which lease was recorded/filed in book ____, page ____, as instrument number _____, in the Office of the _____ (e.g., County Clerk), for the aforesaid county and state and covering the following real property: _____."

(ii) Immediately preceding the covenant starting with the words "should default," the following covenant will be added: "( ) Borrower covenants and agrees to pay, when due, all rents and any and all other charges required by said lease, to comply with all other requirements of said lease, and not to surrender or relinquish, without the government's prior written consent, any of borrower's right, title or interest in or to said leasehold estate or under said lease while this mortgage remains of record."

(12) *Mortgages on land purchase contract.* When the FmHA security interest is on a borrower's interest in a land purchase contract, OGC will provide language to be used to modify the Form FmHA 1927-1 (State) or Form FmHA 1927-7 (State).

(c) *Preparation of the promissory note.* The closing agent will make sure that the promissory note (or assumption agreement) is completed in accordance with the FMI and executed. The approval official will determine who is to execute the promissory note, including cosigners if necessary, in accordance with program instructions and provide the closing agent with the names of these individuals. If the applicant is a corporation, partnership, or trust, the approval official will provide the name(s) and title(s) of the individual(s) executing the promissory note on behalf of the entity. Any other signatures on the note (or assumption agreement) needed to insure the required security, as provided in state supplements, will be obtained. Persons having a disability of minority or mental incompetency, or persons who have not been legally admitted for residency in the U.S., its territories, or possessions, are not to execute the promissory note. The date shown on the note will be the date it is executed by the borrower which may not be later than the date of the mortgage.

(d) *Preparation of protective instruments.* The closing agent will properly prepare, complete, and/or approve releases and curative documents necessary for title clearance and closing, in recordable form and record them if required.

(1) *Prior lienholder's agreement.* If any liens (other than FmHA liens or tax liens to local governmental authorities) or security agreements (hereafter called "liens"), with priority over FmHA's mortgage will remain against the real property securing the loan(s), the lienholders must execute, in recordable form, agreements containing all of the following provisions:

(i) The prior lienholder shall agree not to declare the lien in default or accelerate the indebtedness secured by the prior lien for a specific period of time after notice to FmHA. The agreement must:

(A) Provide that the specified period of time will not commence until the lienholder gives written notice of the borrower's default and the prior lienholder's intention to accelerate the indebtedness to the FmHA office servicing the loan,

(B) Include the address of the FmHA servicing office,

(C) Give FmHA the option to cure any monetary default by paying the amount of the borrower's delinquent payments to the prior lienholder, or pay the obligation in full and have the lien assigned to FmHA, and

(D) Provide that the prior lienholder will not declare the lien in default for any nonmonetary reason if FmHA commences liquidation proceedings

VOL
56
ISS
251
DE
31
1991
UMI

against the property and thereafter acquires the property.

(ii) When the prior lien secures future advances, including the lienholder's costs for borrower liquidation or bankruptcy, which under state law have priority over the mortgage being taken (or a FmHA mortgage already held), the prior lienholder shall agree not to make advances for purposes other than taxes, insurance or payments on other prior liens without written consent of the State Director.

(iii) The prior lienholder shall consent to FmHA making (or transferring) the loan and taking (or retaining) the related mortgage if the prior lien instrument prohibits a loan or mortgage (or transfer) without the prior lienholder's consent.

(iv) The prior lienholder shall consent to FmHA transferring the property subject to the prior lien after FmHA has obtained title to the property either by foreclosure or voluntary conveyance if the prior lien instrument prohibits such transfer without the prior lienholder's consent.

(2) *Notice of foreclosure agreements.* These agreements will be obtained only when required by a state supplement. As a precautionary measure, the state supplement will require notice agreements when OGC determines that state law permits junior liens of private parties to be extinguished by foreclosure of a prior lien without the junior lienholder being made parties or being given actual notice. The state supplement will specify the number of days within which notice of foreclosure is required by the agreement.

(3) *Leaseholds.* When the FmHA security interest is on a leasehold, the approval official must review the lease to make sure that it meets the security and duration requirements of the program instructions. If not, it will be necessary for the landlord and tenant to amend the lease to meet these requirements at closing.

(4) Agreement by holder of vendor's interest under land contract. If the buyer's interest in the security property is that of a buyer under a land contract, it will be necessary for the seller (vendor) to execute, in recordable form, an agreement containing all of the following provisions:

(i) The vendor shall agree not to sell or voluntarily transfer the vendor's interest under the land contract without the prior written consent of the FmHA State Director.

(ii) The vendor shall agree not to encumber or cause any liens to be levied against the property.

(iii) The vendor shall agree not to commence or take any action to accelerate, forfeit or foreclose the buyer's interest in the security property until a specified period of time after notifying the State Director of intent to do so. This period of time will be ninety (90) days unless a state supplement otherwise provides. The agreement shall give FmHA the option to cure any monetary default by paying the amount of the buyer's delinquent payments to the vendor, or paying the vendor in full and having the contract assigned to FmHA.

(iv) The vendor shall consent to FmHA making the loan and taking a security interest in the borrower's interest under the land contract as security for the FmHA loan.

(v) The vendor shall agree not to take any actions to foreclose or forfeit the interest of the buyer under the land contract because FmHA has acquired the buyer's interest under the land contract by foreclosure or voluntary conveyance or because FmHA has subsequently sold or assigned the buyer's interest to a third party who will assume the buyer's obligations under the land contract.

(vi) When FmHA acquires a buyer's interest under a land contract by voluntary conveyance or foreclosure, FmHA will not be deemed to have assumed any of the buyer's obligations under the contract, provided that the failure of FmHA to perform any such obligations while it holds the buyer's interest is a ground to commence an action to terminate the land contract.

(5) *Form of agreement.* The form of prior lienholder's agreement, forbearance agreement, notice of foreclosure or assignment, and agreement by holder of vendor's interest under land contract will be prescribed in a state supplement with the concurrence of OGC. When only forbearance agreements are needed, they will be obtained on Form FmHA 1927–8, "Agreement with Prior Lienholder," or, if that form is not legally satisfactory, on a state form having the same title. When only notice of foreclosure or assignment are required, a separate form for this purpose will be used. When both forbearance agreements and notices of foreclosure or assignment are required, Form FmHA 1927–8 may be amended in order to serve both purposes, a substitute state form may be used for both purposes, or Form FmHA 1927–8 may be used and the notice agreement obtained on a separate state form.

(6) Executing, acknowledging, and recording. When an agreement is required by paragraphs (d)(1), (d)(2), (d)(3), or (d)(4) of this section, the closing agent will determine at the time of closing that the agreement is properly completed, executed, sealed, witnessed, acknowledged, and recorded as required by state law or state supplement.

(e) *Correction of errors in recorded security instruments.* A state supplement, subject to OGC's review and approval, will be issued to provide guidance in correcting error(s) in recorded security instruments.

§ 1927.58 Closing the transaction.

The closing agent will cooperate with the approval official, the borrower and the seller, and other necessary parties to arrange the time and place of closing. The closing agent will make sure that FmHA obtains a valid mortgage lien on the property of the priority required by FmHA, subject only to any defects and exceptions approved by the approval official or State Director.

(a) *Disbursement of loan funds.* When the closing agent indicates that the conditions necessary to close the loan have been met, loan funds will be forwarded to the closing agent. Loan funds will not be disbursed prior to filing of the mortgage for record; however, when necessary, loan funds may be placed in escrow before the mortgage is filed for record and disbursed after it is filed. No development funds will be kept in escrow by the closing agent after loan closing. Loan funds for the payment of a lien may be disbursed only upon receipt of a discharge, satisfaction, or release (or assignment where necessary to protect the interests of FmHA).

(b) *Title examination and liens or claims against borrowers.* The closing agent will examine the title for liens against the property and claims against the borrower from the terminal date of the preliminary title examination up to and including the time of recording the current mortgage. If there are no entries of record during the period, except the documents required in connection with title clearance and any partial release(s) or subordination(s) previously approved by FmHA, the transaction may be closed. If there are other entries of record during this period, the transaction will not be closed until these entries have been cleared of record or administratively approved. The closing agent will advise the approval official of the nature of such intervening instruments and the effect they may have on obtaining a valid mortgage of the priority required or the title insurance policy to be issued.

(c) *Taxes and assessments.* The closing agent will determine if all taxes and assessments against the property which are due and payable are paid at or before the time of loan closing. If the seller and the borrower have agreed to prorate any taxes or assessment which are not yet due and payable for the year in which the closing of the transaction takes place, the seller's proportionate share of the taxes and assessments will be deducted from the proceeds to be paid to seller at closing and will be credited to the amount required to be paid by borrower at closing. Certificates or receipts should be produced from the taxing authorities to show that taxes or assessments which are due and payable have been paid and, if possible, the certificates or receipts, or copies, will be kept in the borrower's County Office or District Office case file. Appropriate prorations as agreed upon between the borrower and seller may also be made for taxes paid by the seller which are applicable to a period after the closing date, common area maintenance fees, prepaid rentals, insurance (unless the borrower is to obtain a new policy of insurance) and growing crops.

(d) *Affidavit regarding work of improvement*—(1) *Execution by borrower.* The closing agent will require that a Form FmHA 1927–5, "Affidavit Regarding Work of Improvement," be completed and executed (including acknowledgment) when a loan is being made to a borrower who already owns the real estate to be mortgaged. This affidavit will be executed by the borrower at closing.

(2) *Execution by seller.* The closing agent will require that Form FmHA 1927–5 be completed and executed (including acknowledgment) by the seller when the FmHA is making a loan to a borrower to enable the borrower to acquire the property (including transfers). This affidavit will be executed by the seller at closing.

(3) *Legal insufficiency of affidavit form.* If Form FmHA 1927–5 is not legally sufficient in a particular state, a state form approved by OGC will be used.

(4) *Recording.* The affidavit will not be recorded unless the closing agent deems it necessary and state law permits.

(5) *Delay in closing.* The loan will not be closed if, at the loan closing, the seller (in a sale transaction) or the borrower (in a nonpurchase money loan situation) indicates that construction, repair or remodeling has been commenced or completed on the property, or related materials or services have been delivered to or performed on the property within the time limit specified in the affidavit, unless a state supplement otherwise provides. The closing agent will notify the approval official, who will determine if the work of improvement will result in a lien prior to the FmHA lien. The State Director will, with the advice and concurrence of OGC, provide in a state supplement the period of time to be used in completing the affidavit.

(e) *Completion of closing documents.* The closing agent will determine that deeds, promissory notes, mortgages, releases, and other curative instruments are completed in accordance with the FMI (sealed and witnessed if required by state law) and, if necessary, acknowledged and filed for record at the proper time.

(f) *Assignment of future income.* If Form FmHA 443–16, "Assignment of Income from Real Estate Security," is required in a particular case, the approval official will prepare the form and have it available for execution by the borrower when the transaction closes. The closing agent will see that the form is properly completed, executed (sealed and witnessed if required by state law), and acknowledged by the borrower.

(g) *Return of loan documents to approval official after loan closing.* Within 15 days after loan closing, the closing agent will return completed and executed copies of Form FmHA 1927–17, "Loan Closing Statement," the promissory note, all other documents required for loan closing (except the mortgage), and the final title opinion or policy of title insurance to the approval official. If the recorded mortgage is customarily returned to the borrower or closing agent after recording, then it must be forwarded to the approval official immediately.

(h) *Final opinion or mortgage title policy.* As soon as possible after the transaction has been closed:

(1) *Final opinion.* The attorney will issue a final opinion to FmHA and the borrower on Form FmHA 1927–10, "Final Title Opinion." If that form is not legally sufficient in a particular state, a state form approved by OGC may be used. Issuance of the final opinion should not be held up pending the return of recorded instruments. If it is not possible for the final title opinion to show the book and page of recordation of the FmHA security instrument, the words "and is recorded" in paragraph II B of Form FmHA 1927–10 may be deleted and the following blank space completed to show the filing office and the filing instrument number if available. Attached to the final opinion will be required documents then available, including any which the approval official has furnished to the attorney which were not previously returned. The attorney will ensure that all recorded instruments are forwarded or delivered, to the proper parties after recording. The certification of title will be forwarded for a voluntary conveyance.

(2) *Mortgagee title policy.* The closing agent will send or deliver the mortgagee title policy, with the United States listed as mortgage holder, to the approval official. The policy will be subject only to standard exceptions and those outstanding encumbrances, exceptions, reservations, and other defects approved by the approval official. If an owner's policy of title insurance is requested, the closing agent will send or deliver it to the borrower. The closing agent will ensure that all recorded instruments are delivered or sent to the proper parties after recording.

(3) *Responsibilities of the approval official.* The approval official will check the final title opinion or mortgagee title policy to make sure that the lien priority required in the loan approval has been obtained. Forms FmHA 1927–15 and FmHA 1927–17 will be checked to see that funds were disbursed as authorized. If these conditions have not been met, the approval official will report it to the State Director for advice.

(i) *Other services of the closing agent.* (1) The closing agent will assist the approval official in preparing, completing, obtaining execution, acknowledgment, and recording the required documents when necessary. Standard FmHA forms will be used whenever possible. The closing agent will keep the approval official advised as to the progress of title clearance and preparation of material for closing the transaction.

(2) The closing agent will provide services for voluntary conveyances as set forth in § 1927.62 of this subpart, and § 1955.10 of subpart A of part 1955 of this chapter.

§ 1927.59 Subsequent loans and/or transfers with assumptions.

Title services and closing for subsequent loans to an existing borrower will be done in accordance with previous instructions in this subpart, except that:

(a) *Loans closed using title insurance.* (1) Title insurance will only be obtained when:

(i) Additional land is being acquired,

(ii) An initial loan is being refinanced with a subsequent loan, or

(iii) An additional loan is being made where the prior secured loan was not subject to title clearance (e.g. where the prior loan was secured by the best mortgage obtainable).

(2) When a new mortgage title policy is required:

(i) It will cover the entire real property which is to secure the loan, including the

VOL 56 ISS 251 DEC 31 1991 UMI

real property already owned and any additional real property being acquired by the borrower with the loan proceeds.

(ii) Title insurance coverage will be obtained for the entire amount of any subsequent loan plus the amount of any existing loan being refinanced. If the existing loan is not being refinanced, the new mortgage policy will insure only the amount of the subsequent loan.

(b) *Loans closed using title opinions.* Unless the approval official is aware of problems with or discrepancies in the original title opinion, the title will be researched back to the date of the last FmHA mortgage except when the conditions of § 1927.59 (a)(1)(i), (ii), or (iii) exist, or the closing agent determines that a more extensive search is necessary. In these cases the title will be examined in accordance with § 1927.55 of this subpart.

(c) *Title services required in connection with assumptions.* This is set forth in subparts A, B, and C of part 1965 of this chapter as appropriate for the loan type.

§§ 1927.60–1927.61 [Reserved]

§ 1927.62 Voluntary conveyances.

When a borrower offers to convey security, the approval official will process and close the transaction according to § 1955.10 of subpart A of part 1955 of this chapter. The closing agent will issue a certification of title stating that title is vested in the United States of America subject only to FmHA liens or prior liens previously approved by FmHA under § 1955.10 of subpart A of part 1955 of this chapter.

§§ 1927.63–1927.64 [Reserved]

§ 1927.65 Additional requirements in connection with loans to homestead entrymen, contract purchasers of farm units from the Bureau of Reclamation, and certain American Indians.

Whenever loans or assumptions are subject to agreements with other agencies (e.g. loans to or assumptions by homestead entrymen, American Indians, or contract purchasers from the Bureau of Reclamation) the title clearance and closing of the transaction will be handled in accordance with special instructions issued by FmHA and/or other parties involved applicable to the type of transaction, as well as those of this subpart. The special instructions may be in form of a Memorandum of Understanding with the advice and approval of OGC.

§ 1927.66 Cancellation of loan, assumption, or credit sale.

If it is determined that the transaction will not be closed, the approval official will promptly notify the borrower and the following parties who are involved in the case at the time the determination is made: The seller, attorney(s), OGC, and the title company.

§§ 1927.67–1927.89 [Reserved]

§ 1927.90 State supplements.

The state supplement issued pursuant to this subpart will have prior National Office approval and will be the minimum necessary to comply with state laws.

§ 1927.91 Exception authority.

The Administrator may, in individual cases, make an exception to any requirement provision of this subpart which is not inconsistent with applicable law or opinion of the Comptroller General. The Administrator may exercise this authority upon written request from the State Director or an Assistant Administrator provided the Administrator determines that application of the requirement or provision would adversely affect the Government's interest. Request for exception must be supported with documentation to explain adverse effect on the Governor's interest, proposed alternative courses of actions, and show how the adverse effect will be eliminated or minimized if the exception is granted.

§§ 1927.92–1927.99 [Reserved]

§ 1927.100 OMB control number.

The reporting requirements contained in this regulation have been approved by the Office of Management and Budget and have been assigned OMB control number 0575–0147. Public reporting burden for this collection of information is estimated to vary from 5 minutes to 1.5 hours per response, with an average of .38 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, room 404–W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB# 0575–0147), Washington, DC 20503.

PART—1941 OPERATING LOANS

15. The authority citation for part 1941 continues to read as follows:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23 7 CFR 2.70.

Subpart A—Operating Loan Policies, Procedures, and Authorizations

§ 1914.19 [Amended]

15a. In § 1941.19, paragraphs (b) is amended by changing the reference "Form FmHA 427–1" to read "Form FmHA 1927–1."

Exhibit A of Subpart A [Amended]

15b. Exhibit A of subpart A part 1941 is amended under the "Form No." columns, by changing "427–8" to read "1927–8"; by changing "427–9" to read "1927–9"; and by removing the line that begins with "427–5".

Subpart B—Closing Loans Secured by Chattels

16. Section 1941.84 is amended by revising paragraphs (c) and (f) to read as follows:

§ 1941.84 Title clearance and closing requirements.

* * * * *

(c) When real estate is taken as security, title clearance and loan closing requirements will be carried out in accordance with subpart B of part 1927 of this chapter.

* * * * *

(f) Each real estate lien will be taken on Form FmHA 1927–1 (state), "Real Estate Mortgage for _____," unless a State supplement requires the use of another Form.

* * * * *

PART 1942—ASSOCIATIONS

16A. The authority citation for part 1942 continues to read as follow:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Community Facility Loans

§ 1942.17 [Amended]

16b. § 1942.17(j)(4)(i)(B) is amended in the introductory text by changing the reference "Form FmHA 427–9" to read "Form FmHA 1927–9"; and by changing the reference "Form FmHA 427–10" to read "Form FmHA 1927–10".

PART 1943—FARM OWNERSHIP, SOIL AND WATER AND RECREATION

17. The authority citation for part 1943 continues to read:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Insured Farm Ownership Loan Policies, Procedures and Authorizations.

§ 1943.19 [Amended]

18. In § 1943.19, the second sentence of paragraph (b)(3)(ii), paragraph (b)(4), and the first sentence of the introductory text of paragraph (b)(5) are revised to read as follows:

§ 1943.19 Security.

* * * * *

(b) * * *

(3) * * *

(ii) * * * Any agreements needed will be obtained as provided in subpart B of part 1927 of this chapter.

(4) The approved closing agent or the OGC will furnish advice on obtaining security when a life estate is involved.

(5) Any loan of $10,000 or less may be secured by the best lien obtainable without title clearance or legal service as required in subpart B of part 1927 of this chapter provided the County Supervisor believes from a search of the County records that the applicant can give a mortgage on the farm. * * *

* * * * *

§ 1943.32 [Amended]

19. In § 1943.32, paragraph (a) is amended in the column titled "FmHA Form No." by changing "427–8" to read "1927–8".

20. Section 1943.34(a) is revised to read as follows:

§ 1943.34 Requesting title service and accepting option.

* * * * *

(a) The County Supervisor will request the applicant to obtain title clearance as provided in subpart B of part 1927 of this chapter, when required, if this has not been done.

* * * * *

21. In § 1943.35, paragraph (c)(2) is revised to read as follows:

§ 1943.35 Action after loan approval.

* * * * *

(c) * * *

(2) Interested parties will be notified of the cancellation as provided in subpart B of part 1927 of this chapter.

* * * * *

22. In § 1943.38, paragraph (a) is revised to read as follows:

§ 1943.38 Loan closing actions.

* * * * *

(a) *Real estate mortgage loans.* When a loan is to be secured by a real estate mortgage, it will be closed in accordance with the applicable provisions of subpart B of part 1927 of this chapter except as modified for loans of $10,000 or less in § 1943.19(b)(4).

* * * * *

§ 1943.38 [Amended]

22a. In § 1943.38, paragraph (f)(3) is amended by changing the reference "Form FmHA 405–1" to read "Form FmHA 1905–1".

Exhibit A of Subpart A [Amended]

23. In Exhibit A of subpart A, paragraph II D 1 is amended in the first sentence by changing "Form FmHA 427–1" to read "Form FmHA 1927–1."

Subpart B—Insured Soil and Water Loan Policies, Procedures, and Authorizations

24. In § 1943.69, the second sentence of paragraph (b)(3)(ii), paragraph (b)(4) and the first sentence of the introductory text of paragraph (b)(5) are revised to read as follows:

§ 1943.69 Security.

* * * * *

(b) * * *

(3) * * *

(ii) * * * Any agreements needed will be obtained as provided in subpart B of part 1927 of this chapter.

(4) The approved closing agent or OGC will furnish advice on obtaining security when a life estate is involved.

(5) Any loan of $10.000 or less may be secured by the best lien obtainable without title clearance or legal services as required in subpart B of part 1927 of this chapter, provided the County Supervisor believes from a search of the county records that the applicant can give mortgage on the farm.* * *

* * * * *

25. Section 1943.84 is amended by revising the first sentence to read as follows:

§ 1943.84 Requesting title service.

When the loan is approved and real estate will serve as security, the County Supervisor will request the applicant to obtain title clearance as provided in subpart B of part 1927 of this chapter, when required if this has not been done. * * *

26. In § 1943.85, paragraph (c)(2) is revised to read as follows:

§ 1943.85 Action after loan approval.

* * * * *

(c) * * *

(2) Interested parties will be notified of the cancellation as provided in subpart B of part 1927 of this chapter.

* * * * *

27. In § 1943.88, paragraph (a) is revised to read as follows:

§ 1943.88 Loan closing actions.

* * * * *

(a) *Real estate mortgage loans.* When a loan is to be secured by a real estate mortgage, it will be closed in accordance with the applicable provisions of subpart B of part 1927 of this chapter except as modified for loans of $10,000 or less in paragraph 1943.69(b)(5).

* * * * *

PART 1944—HOUSING

28. The authority citation for part 1944 is revised to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Section 502 Rural Housing Loan Policies, Procedures, and Authorizations

29. In § 1944.18, paragraphs (a)(3), (b)(4), and (b)(11) are revised to read as follows:

§ 1944.18 Security requirements.

(a) * * *

(3) The provisions of subpart B of part 1927 of this chapter regarding title clearance and the use of legal services are complied with.

(b) * * *

(4) *Best mortgage obtainable.* Loans of $7,500 or less scheduled for repayment in not more than 15 years from the date of the note must be secured by a mortgage, except as provided in paragraph (b)(1) of this section, but title clearance and the use of legal services in accordance with subpart B of part 1927 of this chapter are not required. The best mortgage obtainable without use of these procedures will be sufficient unless the loan approval official determines that the procedures in subpart B of part 1927 of this chapter are necessary to assure repayment or accomplish the objective of the loan. Evidence of ownership must comply with § 1944.24 (d)(2).

* * * * *

(11) *Land purchase contract.* When the ownership interest is by virtue of a land purchase contract, a prior lienholder's agreement must be obtained as required by subpart B of part 1927 of this chapter.

* * * * *

30. In § 1944.24, the first sentence of paragraph (d)(1) and the fourth sentence of paragraph (d)(2) are revised to read as follows:

§ 1944.24 Technical services.

* * * * *

(d) * * *

VOL 56 ISS 251 DEC 31 1991 UMI

(1) When real estate will be taken as security except on a best mortgage obtainable basis (including a mortgage on a leasehold), title clearance and legal services for making and closing the loan will be provided in accordance with subpart B of part 1927 of this chapter.

* * *

(2) * * * Proof of ownership need not be as much as that required by Subpart B of Part 1927 of this chapter. * * *

31. In § 1944.30, paragraph (a) is amended in the column titled "Form No." by changing "FmHA 427–8" to read "FmHA 1927–8" and by revising the line beginning with the words "FmHA 427–9" to read as follows:

§ 1944.30 Preparation of loan docket.

(a) * * *

Form No.	Name of form	Total No. of copies	No. signed by borrower	Loan docket	Copy for borrower
FmHA 1927–9	Preliminary Title Opinion	2		1–0	1–C (approved attorney).

32. In § 1944.30, paragraph (b)(5) is revised to read as follows:

§ 1944.30 Preparation of loan docket.

* * * * *

(b) * * *

(5) Agreements from prior lienholders, if any, when necessary to comply with § 1944.18(b)(6) and subpart B of part 1927 of this chapter.

* * * * *

§ 1944.31 [Amended]

33. Section 1944.31(d)(1) is amended by changing the phrase "part 1807 of this chapter (FmHA Instruction 427.1)" to read "subpart B of part 1927 of this chapter."

§ 1944.32 [Amended]

34. Section 1944.32(c) is amended by changing the phrase "part 1807 of this chapter (FmHA Instruction 427.1)" to read "subpart B of part 1927 of this chapter."

35. In § 1944.33, introductory text of paragraph (c) and the first sentence of paragraph (d) are revised to read as follows:

§ 1944.33 Loan closing.

* * * * *

(c) *Promissory note.* Form FmHA 440–16, "Promissory Note," will be prepared and signed in accordance with subpart B of part 1927 of this chapter, and the FMI for the Form.

* * * * *

(d) *Real estate mortgage.* Form FmHA 1927–1, "Real Estate Mortgage for (state)," will be used for loans to be secured by a real estate mortgage. * * *

* * * * *

36. In § 1944.37, paragraph (c) is revised to read as follows:

§ 1944.37 Subsequent Section 502 loans.

* * * * *

(c) When a real estate mortgage is required in connection with a subsequent RH loan, outstanding RH notes will not be described in the mortgage unless required in accordance with subpart B of part 1927 of this chapter.

* * * * *

37. Section 1944.38 is amended in the third sentence by changing the reference "Form AD 625, 'Application for Federal Assistance (Short Form),'" to read "Form SF 424.1, 'Application for Federal Assistance (For Non-construction),'" and by removing the fifth and sixth sentences.

38. In § 1944.46, the second sentence of paragraph (d), and paragraph (i) are revised to read as follows:

§ 1944.46 Construction financing for builders by private credit sources.

* * * * *

(d) * * * Applicants who own the building site will be required to obtain and submit to the County Supervisor preliminary title evidence in accordance with subpart B of part 1927 of this chapter. * * *

* * * * *

(i) When construction is completed, the loan will be closed in accordance with subpart B of part 1927 of this chapter, usually within 10 days after satisfactory completion of construction.

* * * * *

38a. Subpart A of part 1944 is amended by removing Exhibits E, E–1 and E–2.

Subpart D—Farm Labor Housing Loan and Grant Policies, Procedures and Authorizations

39. In § 1944.168, paragraph (b)(1) and the first sentence of the introductory text of paragraph (c) are revised to read as follows:

§ 1944.168 Security requirements.

* * * * *

(b) * * *

(1) A loan to an organization or association of farmers which can give a real estate mortgage will be secured by a mortgage on good and marketable title to the real estate including the housing, the related facilities, and the site, subject to any exceptions that may be waived as provided in subpart B of part 1927 of this chapter.

* * * * *

(c) *Loan to an individual farmowner or family farm corporation or partnership.* For every loan to an individual farm owner or family farm corporation or partnership, a real estate mortgage will be taken on the farm, whenever practicable, in accordance with subpart B of part 1927 of this chapter. * * *

* * * * *

§ 1944.169 [Amended]

40. Section 1944.169(f) is amended by changing the phrase "Part 1807 of this chapter (FmHA Instruction 427.1)" to read "subpart B of part 1927 of this chapter."

41. In § 1944.175, paragraph (e)(3) is revised to read as follows:

§ 1944.175 Actions subsequent to loan and/or grant approval.

* * * * *

(e) * * *

(3) All interested parties will be notified of cancellation as provided in subpart B of part 1927 of this chapter.

* * * * *

42. In § 1944.176, the first sentence of paragraph (a), the introductory text of paragraph (c) and paragraphs (d)(2) and (d)(5) are revised to read as follows:

§ 1944.176 Loan and/or grant closing.

(a) *Applicable instructions.* LH loans and/or grants will be closed in accordance with applicable provisions of subpart B of part 1927 of this chapter and State supplements. * * *

* * * * *

(c) *Mortgage.* Unless the OGC determines the Form to be inappropriate, real estate mortgage Form FmHA 1927–1 (state), "Real Estate Mortgage for _____," will be used. For loans and/or grants to organizations, Form FmHA 1927–1 will be modified as prescribed by or with the advice of the OGC with respect to the name, address, and other identification of the borrower, style of execution, acknowledgement, and any other provisions.

* * * * *

(d) * * *

(2) The note will be dated the date of loan closing as authorized in subpart B of part 1927 of this chapter.

* * * * *

(5) The promissory note(s) will be signed in accordance with subpart B of part 1927 of this chapter and any supplemental instructions from OGC.

* * * * *

Subpart E—Rural Rental Housing Loan Policies, Procedures, and Authorizations

43. In § 1944.235, paragraphs (a)(2), and the first sentence of paragraph (f)(2) are revised to read as follows:

§ 1944.235 Actions subsequent to loan approval.

(a) * * *

(2) FmHA will obtain closing instructions from OGC in accordance with the requirements of subpart B of part 1927 of this chapter and § 1944.236(a) and § 1944.236(b)(4) of this subpart.

* * * * *

(f) * * *

(2) *Notification.* Notify all interested parties of cancellation as provided in subpart B of part 1927 of this chapter.

* * * * *

44. Section 1944.236, the first sentence of paragraph (a), the introductory text of paragraph (b), the second sentence of paragraph (c)(2) and paragraph (c)(4) are revised to read as follows:

§ 1944.236 Loan closing.

(a) *Applicable regulations.* RRH loans will be closed in accordance with subpart B of part 1927 of this chapter and any State supplements. * * *

(b) *Mortgage.* Unless OGC determines the Form to be inappropriate, Form FmHA 1927–1 (state), "Real Estate Mortgage for _____," will be used. For loans to organizations, Form FmHA 1927–1 will be modified as prescribed by or with the advice of OGC with respect to the name, address, and other identification of the borrower, the style of execution and the acknowledgement.

* * *

* * * * *

(c) * * *

(2) * * * The note will be dated the date of loan closing except as authorized in subpart B of part 1927 of this chapter. * * *

* * * * *

(4) The note(s) will be signed in accordance with the FMI and subpart B of part 1927 of this chapter.

* * * * *

Subpart J—Section 504 Rural Housing Loans and Grants

45. In § 1944.463, the first sentence of paragraph (e)(1) and paragraph (e)(2) are revised to read as follows:

§ 1944.463 Technical services.

* * * * *

(e) * * *

(1) Total FmHA indebtedness of $7,500 or less, secured with a real estate mortgage, need not meet the title requirements of subpart B of part 1927 of this chapter. * * *

(2) Total FmHA indebtedness of more than $7,500, secured with a real estate mortgage, title clearance and legal services for making and closing the loan will be provided in accordance with subpart B of part 1927 of this chapter.

46. In § 1944.469, paragraph (b) and the first sentence of paragraph (d) are revised to read as follows:

§ 1944.469 Loan closing or grant settlement.

* * * * *

(b) *Promissory note.* Form FmHA 1940–16, "Promissory Note," will be used for each loan made under this subpart. The note will be prepared and signed according to subpart B of part 1927 of this chapter, including co-signers when appropriate. Each promissory note will be prepared for monthly payment.

* * * * *

(d) *Mortgage.* Form FmHA 1927–1, "Real Estate Mortgage for (state)," will be used for each loan to be secured by a real estate mortgage. * * *

* * * * *

PART 1945—EMERGENCY

47. The authority citation for part 1945 is revised to read as follows:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart C—Economic Emergency Loans

48. In § 1945.129, paragraphs (b)(1), (b)(2)(i)(A), the introductory text of paragraphs (b)(2)(ii), and the first sentence of paragraph (b)(2)(v) are revised to read as follows:

§ 1945.129 Approval and closing.

* * * * *

(b) * * *

(1) Loans secured by real estate are considered closed on the date the mortgage is filed for record. Such loans will be closed in accordance with the applicable provisions of subpart B of part 1927 of this chapter.

(2) * * *

(i) * * *

(A) FmHA real estate mortgage or deed of trust Form FmHA 1927–1 (state), "Real Estate Mortgage for _____," will be used in all cases.

* * * * *

(ii) *Leaseholds.* Security instruments for loans received by leaseholders will describe the security in accordance with subpart B of part 1927 of this chapter, and the following provisions will also apply:

* * * * *

(v) *Requesting title service.* When the loan is approved, the County Supervisor will see that the title service is requested in accordance with subpart B of part 1927 of the chapter, if this has not already been done. * * *

* * * * *

Subpart D—Emergency Loan Policies, Procedures and Authorizations

49. In § 1945.169, the introductory text of paragraph (j)(4) is revised as follows:

§ 1945.169 Security requirements.

* * * * *

(j) * * *

(4) If the conditions set out in paragraphs (j)(1), (2), and (3) of this section exist and an EM loan is approved, it can be closed provided the FmHA escrow agent or approved attorney certifies on Form 1927–10, "Final Title Opinion," or in separate writing that:

* * * * *

50. In § 1945.189, paragraphs (a)(1), (a)(2)(i), the introductory text of paragraph (a)(3), and paragraph (a)(6) are revised to read as follows:

§ 1945.189 Loan closing.

(a) * * *

(1) *General.* Loans secured by real estate are considered closed on the date the mortgage is filed for record. Such loans will be closed in accordance with the applicable provisions of subpart B of part 1927 of this chapter.

(2) * * *

(i) FmHA real estate mortgage or deed of trust Firm FmHA 1927–1 (state), "Real Estate Mortgage for _____," will be used in all cases where real estate is taken as security.

* * * * *

(3) *Leaseholds.* Security instruments for loans secured by leaseholds will describe security in accordance with subpart B of part 1927 of this chapter,

VOL 56 ISS 251 DEC 31 1991 UMI

and the following provisions will also apply:

* * * * *

(6) *Requesting title service.* When the loan is approved, the County Supervisor will see that title service is requested in accordance with subpart B of part 1927 of this chapter, if this has not already been done.

* * * * *

PART 1951—SERVICING AND COLLECTIONS

51. The authority citation for part 1951 is revised to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart S—Farmer Programs Account Servicing Policies

§ 1951.911 [Amended]

52. Section 1951.911 (a) (7) (i) is amended by changing the phrase "7 FR part 1807 (FmHA instruction 427.1)" to read "subpart B of part 1927 of this chapter."

PART 1955—PROPERTY MANAGEMENT

53. The authority citation for part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Liquidation of Loans Secured by Real Estate and Acquisition of Real Chattel Property

54. Section 1955.3 is amended by revising the definition of "Closing agent" to read as follows:

§ 1955.3 Definitions.

* * * * *

Closing agent. An attorney or title insurance company which is approved as a loan closing agent in accordance with subpart B of part 1927 of this chapter.

* * * * *

Subpart C—Disposal of Inventory Property

55. Section 1955.103 is amended by revising the definition of "Closing agent" to read as follows:

§ 1955.103 Definitions.

* * * * *

Closing agent. An attorney or title insurance company which is approved as a loan closing agent in accordance with subpart B of part 1927 of this chapter.

* * * * *

PART 1965—REAL PROPERTY

56. The authority citation for part 1965 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases

57. In § 1965.12, the second sentence of paragraph (c) is revised to read as follows:

§ 1965.12 Subordination of FmHA mortgage to permit refinancing, extension, increase in amount of existing prior lien, to permit a new prior lien, or to permit reamortization.

* * * * *

(c) *Request for subordination.* * * * If an agreement to give notice of foreclosure is required for approval of an initial FmHA loan, an agreement with the new prior lienholder will be obtained as required in subpart B of part 1927 of this chapter. * * *

* * * * *

58. In § 1965.27, the seventh sentence of paragraph (b)(13) and the first sentence of paragraph (g)(8) are revised to read as follows:

§ 1965.27 Transfer of real estate security.

* * * * *

(b) * * *

(13) * * * Prior lienholder's agreements will be obtained in accordance with subpart B of part 1927 of this chapter. * * *

* * * * *

(g) * * *

(8) *Title clearance and legal services.* Title clearance and legal services for closing transfers will be accomplished in accordance with subpart B of part 1927 of this chapter. * * *

* * * * *

59. In § 1965.31, the first sentence of paragraph (c) is revised to read as follows:

§ 1965.31 Taking liens or real estate as additional security in servicing FmHA loans.

* * * * *

(c) *Forms.* Each real estate lien taken as additional security for the FmHA loans will be taken on Form FmHA 1927-1 (state), "Real Estate Mortgage for _____" unless a State supplement requires the use of a form of mortgage comparable to that which secures the existing loan(s) to be additionally secured. * * *

Subpart B—Security Servicing for Multiple Housing Loans

60. In § 1965.65, paragraph (g)(1) is revised to read as follows:

§ 1965.65 Transfer of real estate security and assumption of loans.

* * * * *

(g) * * *

(1) Title clearance and legal services, including OGC closing instructions, will be obtained according to subpart B of part 1927 of this chapter.

* * * * *

61. In § 1965.77, paragraph (c)(7)(vii) is revised to read as follows:

§ 1965.77 Consent to sale or other disposition of security property.

* * * * *

(c) * * *

(7) * * *

(vii) To purchase or acquire property to be used for purposes for which a loan of the same type involved is authorized, if the FmHA debt will be as well secured after the transaction as before. FmHA will obtain a lien on the acquired property, and will obtain title evidence according to subpart B of part 1927 of this chapter.

* * * * *

62. In § 1965.79, the first sentence of paragraph (b)(16) is revised to read as follows:

§ 1965.79 Subordination.

* * * * *

(b) * * *

(16) An agreement to provide notice of foreclosure must be obtained from any new prior lienholder as required in subpart B of part 1927 of this chapter.

* * *

63. In § 1965.126, paragraph (e)(3) is revised to read as follows:

§ 1965.126 Transfer of property with assumption of indebtedness.

* * * * *

(e) * * *

(3) *Title clearance and loan closing.* Title clearance and closing of the assumption (and subsequent loan, if any) will be done in accordance with subpart B of part 1927 of this chapter and subpart A of part 1944 of this chapter for a Section 502 loan, or subpart J of part 1944 of this chapter for a Section 504 loan.

* * * * *

Dated: September 25, 1991.

LaVerne Ausman,

BILLING CODE 3410-07-M

Food Safety and Inspection Service

9 CFR Parts 317 and 381

[Docket No. 87-025E]

RIN 0583-AA69

Net Weight Labeling of Meat and Poultry Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule; delay of effective date.

SUMMARY: On November 30, 1990, the Food Safety and Inspection Service (FSIS) published a final rule, effective January 2, 1992, that amended the Federal meat and poultry products inspection regulations to provide uniform net weight labeling requirements for meat and poultry products. The Agency has determined that the provisions in the rule which require scales to be tested and inspected prior to use in accordance with National Institute of Science and Technology (NIST) Handbook 44, "Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices," will not become effective until March 2, 1992. Additionally, the provisions requiring scales to be installed, maintained and operated to ensure accurate weights in accordance with applicable requirements contained in Handbook 44, and requiring such scales to be tested for accuracy, in accordance with NIST Handbook 44, once a year thereafter, will not become effective until March 2, 1992. All other provisions of the final rule will become effective January 2, 1992.

EFFECTIVE DATE: Sections 317.20 (a) and (c), 317.21, 381.121c (a) and (c), and 381.121d will not be effective until March 2, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. William C. Smith, Director, Processed Products Inspection Division, Science and Technology, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Area Code (202) 720-3840.

SUPPLEMENTARY INFORMATION: FSIS's net weight labeling of meat and poultry products final rule (FR 49826) is effective January 2, 1992. The rule establishes objective, numerical variations from labeled net weight which are to be determined by prescribed procedures adopted by way of incorporation by reference of the Third Edition of the National Bureau of Standards (NBS) Handbook 133. This will permit Federal, State, and local agencies to enhance the industry-wide use of strict net weight standards at the packing, warehouse and retail level, and will establish greater uniformity with regulations of net weight compliance used by the Food and Drug Administration for other types of foods.

Sections 317.20(c) and 381.121c(c) of the meat and poultry products inspection regulations prohibit the use of any scale at federally inspected establishments unless the scale has been found upon test and inspection, as specified in NIST Handbook 44, to provide accurate weight. Additionally, before a scale may be used to weigh meat and poultry products, §§ 317.20(a) and 381.121c(a) require that scales be installed, maintained and operated to ensure accurate weights, and that such scales meet the applicable requirements contained in NIST Handbook 44.

Sections 317.21 and 381.121d require that official establishments have the scales tested and certified for accuracy, in accordance with NIST Handbook 44, once a year, by a State or local government weights and measures authority, or by a State registered or licensed scale repair firm or person, or have an FSIS approved net weight program under a quality control program.

FSIS has determined that more time is needed to coordinate the actions that must be undertaken by State or local government authorities, official establishments, and FSIS to assure compliance with §§ 317.20 (a) and (c), 317.21 or 381.121c (a) and (c), and 317.21 or 381.121d. Consequently, the Agency has decided to delay the effective date for the above listed provisions from January 2, 1992, to March 2, 1992. Therefore, §§ 317.20 (a) and (c), 317.21, 381.121c (a) and (c), and 381.121d of the meat and poultry products inspection regulations will not be effective until March 2, 1992. All other provisions of the final rule will be effective January 2, 1992.

Done at Washington, DC, on December 26, 1991.

Marvin A. Norcross,

Acting Administrator, Food Safety & Inspection Service.

Federal Aviation Administration

14 CFR Part 97

[Docket No. 26707; Amdt. No. 1469]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591, or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

Branch (AFS-420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (Air), Standard instrument approaches, Weather.

Issued in Washington, DC on December 6, 1991.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulation (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. App. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, I.S/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

Abatements, Credits, and Refunds—Special Rules for Insolvent Financial Institution That Is or Was Member of Consolidated Group

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations and final regulations.

SUMMARY: This document contains temporary regulations in part 301 providing for the payment of income tax refunds in certain situations to a statutory or court-appointed fiduciary of an insolvent financial institution that was a member of a consolidated group in the year to which the refund claim or application for tentative carryback adjustment relates (instead of payment to the common parent of the consolidated group). These temporary regulations reflect changes to the Internal Revenue Code made by the Technical and Miscellaneous Revenue Act of 1988. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking appearing in the Proposed Rules section of this issue of the **Federal Register**. Technical amendments referencing the temporary regulations are also made to part 1.

EFFECTIVE DATE: These regulations are effective January 30, 1992. These regulations apply to refunds and tentative carryback adjustments paid after December 30, 1991.

FOR FURTHER INFORMATION CONTACT: Rose L. Williams, (202) 566-3231 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document adds temporary regulations to part 301 of title 26 of the Code of Federal Regulations to implement section 6402(i) of the Internal Revenue Code, added by section 6276 of the Technical and Miscellaneous Revenue Act of 1988.

Section 1.1502-77(a) of the Income Tax Regulations provides generally that the common parent is the sole agent for each subsidiary in its consolidated group for all purposes, including the receipt of income tax refunds.

Section 6402(i) authorizes the Secretary of the Treasury to issue regulations providing for the payment of income tax refunds to the statutory or court-appointed fiduciary of an insolvent corporation that was a subsidiary in a consolidated group, to the extent the Secretary determines that the refund is attributable to losses or credits of the insolvent corporation.

The temporary regulations added by this document are limited to payment of refunds and tentative carryback adjustments to certain fiduciaries of insolvent financial institutions. The Internal Revenue Service (Service) has entered into agreements with the Federal Deposit Insurance Corporation and the Resolution Trust Corporation providing for the repayment of refund and tentative carryback amounts determined to be erroneous and for the suspension of any refund and tentative carryback amounts otherwise payable to the Federal Deposit Insurance Corporation or the Resolution Trust Corporation to the extent of any tax liabilities owed by an insolvent financial institution and the consolidated group of which it is a member.

Comments are solicited as to the application of these regulations to other insolvent corporations that may be within the scope of section 6402(i). The comments should address how, under a broadened rule, the Service can protect itself against double payments (or double uses of losses) without entering into an agreement with the representative for each insolvent corporation.

Section 6402(i) provides for payment to a fiduciary of an insolvent corporation of refunds "attributable to losses or credits of such insolvent corporation." The legislative history of this section indicates that access to income tax refunds should be consistent with the purposes of the consolidated return provisions. Therefore, under the temporary regulations, if the institution's loss arises during a taxable year in which it is a member of a consolidated group (whether or not the same group to which the loss is carried), the loss may be carried back to prior years only to the extent that the loss exceeds the income of other members for the year in which the loss arises. The institution's loss for any consolidated return year is determined by applying such rules as

VOL 56 ISS 251 DEC 31 1991 UMI

the deferred intercompany transaction rules of § 1.1502–13 and the rules providing for elimination of intercompany dividends under § 1.1502–14.

Under the temporary regulations, the fiduciary of an insolvent financial institution is made an agent of the relevant consolidated group for purposes of preparing a return for the year in which the loss arises, filing a claim for refund or application for tentative carryback adjustment, and additional matters for which permission is granted by the Service. Because payments under the temporary regulations are made to fiduciaries in their capacity as agent for a group, the payment discharges any liability of the government to the same extent as would payment to the common parent under §§ 1.1502–77 and 1.1502–78. Furthermore, payments under the temporary regulations to fiduciaries are considered payments to all members of the group for all purposes (including administrative or court proceedings relating to the allowability of the refund) and satisfy any responsibility of the Service to make payments to any member.

Under §§ 1.1502–77 and 1.1502–78, the common parent ordinarily makes federal income tax filings on behalf of a consolidated group. The temporary regulations provide that the fiduciary may also make filings on behalf of a consolidated group in connection with the fiduciary's claim for refund or application for tentative carryback adjustment. Because the fiduciary and the common parent may make filings with respect to the same group, the Service must reconcile these filings and, as a consequence, processing of claims and applications may be delayed (even in the case of filings at the close of an extension period).

Because financial institutions frequently conduct business activities through operating subsidiaries, the regulations adopt subgroup principles. For example, the fiduciary may, as an agent, generally claim refunds with respect to the losses of the institution's subsidiaries in addition to the losses of the institution.

The investment adjustment rules under § 1.1502–32 are not amended in connection with these regulations. Under the investment adjustment system, losses of a member absorbed by a consolidated group generally cause a negative adjustment to the basis of (or increase in an excess loss account with respect to) the member's stock. Income tax refunds received by the member as a result of carrying back a loss generally cause a positive adjustment (or reduce an excess loss account). These adjustments generally result in a net after-tax reduction in the basis of the member's stock. The reduction prevents the member's loss from being duplicated if the member's stock is sold by the group.

Assume, for example that P, the common parent of a consolidated group, owns all of the stock of S, an institution. During Years 1 through 5, a $66 excess loss account arises with respect to the S stock from adjustments described in § 1.1502–32(e)(1) as a result of $66 of S's losses being absorbed by income of other members of the P group. During Years 6 through 10, S earns $100 of income, pays $34 as its share of the group's tax liability, and thereby eliminates the excess loss account. During Year 11, S becomes an insolvent financial institution and sustains a $100 loss (not offset by Year 11 income of other members of the P group) that is carried back to Years 6 through 10, and $34 is refunded directly to S's fiduciary under § 301.6402–7T(g).

Because the temporary regulations do not amend the investment adjustment rules, the rules apply to reinstate the $66 excess loss account at the end of Year 11. If the rules did not apply, the P group would not be required to include the $66 excess loss account in income on a subsequent disposition of the S stock. Requiring the excess loss account to be included in income is necessary to recapture the losses of S that were absorbed by the P group in Years 1 through 5.

If instead, P earned the income and paid the taxes that are refunded to S's fiduciary P may argue that P is entitled to the refund. In all such cases, however, the issue of who is entitled to the refund is separate from how the investment adjustment rules should be applied. This issue has always been present when a refund is paid to one member but is attributable to income earned and taxes paid by another member.

Even if the negative investment adjustments to P's basis in S stock were limited to cases where P received the refund, if no negative investment adjustments were made to reflect S's loss in Year 11, additional modifications would be necessary to eliminate certain subsequent investment adjustments that are premised on the existence of the negative adjustment. For example, if the excess loss account is attributable to the loss of borrowed funds, positive adjustments from income that is used to retire the debt should not be made if the excess loss account is not reinstated.

Need for Temporary Regulations

Immediate application of the provisions contained in this Treasury Decision is needed to effectuate the purposes of section 6402(i), that refunds with respect to losses and credits of an insolvent financial institution be paid to a fiduciary for the institution. It is therefore impracticable and contrary to the public interest to issue this Treasury Decision with notice and public procedure under section 553(b) of title 5 of the United States Code or subject to the effective date limitation of section 553(d) of title 5 of the United States Code.

Special Analyses

It has been determined that this document does not constitute a major rule as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

No notice of proposed rulemaking is required by 5 U.S.C. 553 or any other law and the provisions of the Regulatory Flexibility Analysis Act (5 U.S.C. 601 *et seq.* do not apply).

Pursuant to section 7805(f)(1) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these temporary regulations is Rose L. Williams, Office of the Assistant Chief Counsel (Corporate), Internal Revenue Service. Other personnel from the Internal Revenue Service and the Treasury Department participated in their development.

List of Subjects

26 CFR 1.1502–21 through 1.1502–27

Income taxes.

26 CFR 1.1502–75 through 1.1502–100

Income taxes.

26 CFR 1.6411–2 through 1.6425–3

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 301

Administrative practice and procedure, Alimony, Bankruptcy, Child support, Continental shelf, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, and Taxes.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 301 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following citations:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805 * * * Sections 1.1502–21 and 1.1502–77(e) also issued under 26 U.S.C. 1502 and 6402(i). Section 1.1502–78(b) also issued under 26 U.S.C. 1502, 6402(i), and 6411(c) * * * Section 1.6411–4 also issued under 26 U.S.C. 6402(i) and 6411(c) * * *

Par. 2. Section 1.1502–21 is amended by adding paragraph (g) to read as follows:

§ 1.1502–21 Consolidated net operating loss deduction.

* * * * * *

(g) *Groups that include insolvent financial institutions.* For rules applicable to relinquishing the entire carryback period with respect to losses attributable to insolvent financial institutions, see § 301.6402–7T.

Par. 3. Section 1.1502–77(e) is revised to read as follows:

§ 1.1502–77 Common parent agent for subsidiaries.

* * * * * *

(e) *Cross-references*—(1) *Alternative agents.* For rules relating to alternative agents of the group, see § 1.1502–77T.

(2) *Groups that include insolvent financial institutions.* For further rules applicable to groups that include insolvent financial institutions, see § 301.6402–7T.

Par. 4. Section 1.1502–78(b) is amended by adding a new paragraph (b)(3) to read as follows:

§ 1.1502–78 Tentative carryback adjustments.

* * * * * *

(b) * * *

(3) *Groups that include insolvent financial institutions.* For further rules applicable to groups that include insolvent financial institutions, see § 301.6402–7T.

* * * * * *

Par. 5. Section 1.6411–4 is revised to read as follows:

§ 1.6411–4 Consolidated groups.

For further rules applicable to consolidated groups that include insolvent financial institutions, see §§ 1.1502–78 and 301.6402–7T of this chapter.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 6. The authority citation for part 301 is amended by adding the following citation:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. * * * § 301.6402–7T also issued under 26 U.S.C. 6402(i) and 6411(c) * * *

Par. 7. New § 301.6402–7T is added to read as follows:

§ 301.6402–7T Claims for refunds and applications for tentative carryback adjustments involving consolidated groups that include insolvent financial institutions (temporary).

(a) *In general*—(1) *Overview.* Section 6402(i) authorizes the Secretary to issue regulations providing for the payment of a refund directly to the statutory or court-appointed fiduciary of an insolvent corporation that was a subsidiary in a consolidated group, to the extent the Secretary determines that the refund is attributable to losses or credits of the insolvent corporation. This section provides rules for the payment of refunds and tentative carryback adjustments to the fiduciary of an insolvent financial institution that was a subsidiary in a consolidated group.

(2) *Notice.* This section provides notice to the common parent of a consolidated group of which an insolvent financial institution is or was a member that—

(i) The fiduciary for the institution may, in addition to the common parent, act as agent for the group in certain matters relating to the tax liability of the group in the year in which a loss arose and for the year to which a claim for refund or application for tentative carryback adjustment relates; and

(ii) The Internal Revenue Service may deal directly with the common parent or the fiduciary (or both) as agent for the group to the extent provided in this section.

(b) *Definitions.* For purposes of this section, the following terms have the meanings set forth below:

(1) *Carryback year group.* A carryback year group is a consolidated group of which a corporation that is or becomes an insolvent financial institution is a member during a consolidated carryback year.

(2) *Consolidated carryback year.* A consolidated carryback year is a consolidated return year to which a loss arising in a loss year is carried back.

(3) *Fiduciary.* A fiduciary is—

(i) The Federal Deposit Insurance Corporation;

(ii) The Resolution Trust Corporation; or

(iii) Any other entity established by federal law, or a federal agency, that is identified by the Commissioner in a revenue ruling or revenue procedure as a fiduciary for purposes of this section;

in its capacity as an authorized receiver or conservator of an insolvent financial institution.

(4) *Insolvent financial institution.* An insolvent financial institution (an institution) is a bank or domestic building and loan association for which the fiduciary is authorized to act as a receiver or conservator—

(i) On the ground that the institution is insolvent within the meaning of 12 U.S.C. 191, 12 U.S.C. 1821(c)(5)(A), 12 U.S.C. 1464(d)(2)(A)(i), or 12 U.S.C. 1464(d)(2)(C)(i) or any applicable state law (or any successor statute which adopts a substantially similar standard); or

(ii) On grounds other than insolvency, provided that the institution is insolvent within the meaning of paragraph (b)(4)(i) of this section at any time after commencement of the conservatorship or receivership.

A reference to an institution under these regulations includes, as the context requires, a reference to predecessors and successors of the institution.

(5) *Loss year.* A loss year is a taxable year for which any member or former member of the carryback year group claims a loss that may be carried back.

(6) *Loss year group.* A loss year group is a consolidated group of which a corporation that is or becomes an insolvent financial institution is a member during a loss year.

(7) *Procedure effective date.* The procedure effective date is the day on which the Internal Revenue Service has processed the notice described in paragraph (d)(1) of this section to the extent necessary for all Internal Revenue Service Centers to have access to information indicating that—

(i) Appropriate notice to the Internal Revenue Service has been filed; and

(ii) Payments with respect to losses of an institution are to be paid in accordance with the procedures set forth in this section.

(8) *Definitions in § 1.1502–1.* Unless otherwise provided, the definitions contained in § 1.1502–1 of this chapter apply in this section.

(c) *Deemed agency status of fiduciary*—(1) *In general.* Notwithstanding the general treatment of a common parent as the agent of a group under §§ 1.1502–77 and 1.1502–78 of this chapter, if the fiduciary satisfies the notice requirements of paragraph (d)(1) of this section, the fiduciary may

VOL

DE
31
1991
UMI

also be deemed to be an agent under §§ 1.1502–77 and 1.1502–78 of this chapter—

(i) Of the loss year group (if any) for purposes of filing a consolidated return for the loss year;

(ii) Of the carryback year group for purposes of filing a claim for refund or an application for a tentative carryback adjustment for the consolidated carryback year under paragraph (e) of this section and receiving payments of any refund or tentative carryback adjustment under paragraph (g) of this section; and

(iii) Of the carryback year group, the loss year group or any other group of which the institution is a member for any matter pertaining to the determination of the refund or tentative carryback adjustment, but only to the extent provided in paragraph (c)(2) of this section.

(2) *Limitation.* The fiduciary may act as an agent for matters described in paragraph (c)(1)(iii) of this section only to the extent—

(i) Authorized by the district director, in his/her sole discretion, after receiving a written request from the fiduciary; or

(ii) Requested by the Internal Revenue Service under paragraph (f)(3) of this section.

(d) *Notice requirements*—(1) *Notice to the Internal Revenue Service.* To satisfy the notice requirement of this paragraph (d)(1), the fiduciary must file Form 56–F, Notice Concerning Fiduciary Relationship of Financial Institution, with the Internal Revenue Service Center indicated on the form. However, in its sole discretion, the Internal Revenue Service may treat notice to it in any other manner as satisfying the notice requirement under this paragraph (d)(1).

(2) *Notice to the common parent*—(i) *Form 56–F.* The fiduciary must send a copy of the Form 56–F filed with the Internal Revenue Service Center to the common parent of the loss year group (if any) and the common parent of all carryback year groups (if different from the loss year group).

(ii) *Claim for refund and loss year return.* If a claim for refund is filed by the fiduciary in accordance with paragraph (e)(1) of this section, the fiduciary must provide a copy of the claim for refund to the common parent of the carryback year group. If a loss year return is filed by the fiduciary in accordance with paragraph (e)(3) of this section, the fiduciary must provide a copy of the loss year return to the common parent of the loss year group (if any).

(iii) *Additional information.* The fiduciary must provide to the affected common parent a copy of the request for agency status referred to in paragraphs (c)(2) (i) and (ii) of this section, and a copy of any additional information submitted to the Internal Revenue Service as agent under of paragraph (c)(1)(iii) of this section.

(e) *Filing requirements of the fiduciary*—(1) *Claim for refund by the fiduciary.* If the fiduciary accepts a claim for refund of the common parent of the carryback year group for the consolidated carryback year, the fiduciary may claim a refund under this section by filing a copy of the common parent's claim for refund. If no claim for refund is filed by the common parent for the consolidated carryback year or the fiduciary does not accept a claim for refund filed by the common parent, the fiduciary may claim a refund under this section by filing its own claim for refund under section 6402, based on all information pertaining to the institution and all information pertaining to other members of the carryback year group and the loss year group to which the fiduciary has reasonable access. Any claim for refund filed by the fiduciary under this paragraph (e)(1) must contain the title "Claim for refund under section 6402(i) of the Code" at the top of the first page of the claim, and the following must be attached to the claim:

(i) The name and employer identification number of the institution that was a member of the carryback year group;

(ii) The name of the fiduciary;

(iii) A schedule demonstrating that the amount of the refund claimed by the fiduciary is determined in accordance with paragraph (g) of this section;

(iv) A representation that the institution is an insolvent financial institution as defined in paragraph (b)(4) of this section;

(v) A representation that the fiduciary has satisfied the requirements set forth in paragraphs (d)(2)(i) and (ii) of this section; and

(vi) A statement executed by an authorized representative of the fiduciary and any paid preparer utilized by the fiduciary that provides "Under penalties of perjury, I declare that I have examined the items listed in § 301.6402–7T(e)(1)(i) through (v), including accompanying schedules and statements, and to the best of my knowledge and belief, they are true, correct, and complete. Declaration of preparer (other than fiduciary) is based on all information of which the preparer has any knowledge."

(2) *Application for tentative carryback adjustment pursuant to section 6411.* Notwithstanding section 6411 and § 1.1502–78 of this chapter, an application for a tentative carryback adjustment must be signed by both the common parent of the carryback year group and the fiduciary if the payment with respect to the tentative carryback adjustment is not made before the procedure effective date (whether or not the application was filed before the procedure effective date). Any application for a tentative carryback adjustment filed under this paragraph (e)(2) must contain the title "Application for tentative carryback adjustment under section 6402(i) of the Code" at the top of the first page of the application. In addition, the following must be attached to the application:

(i) The name and employer identification number of the institution that was a member of the carryback year group;

(ii) The name of the fiduciary;

(iii) A schedule demonstrating that the amount claimed by the fiduciary is determined in accordance with paragraph (g) of this section;

(iv) A representation that the institution is an insolvent financial institution as defined in paragraph (b)(4) of this section; and

(v) A representation that the fiduciary has satisfied the requirements set forth in paragraph (d)(2)(i) of this section.

(3) *Loss year return by the fiduciary.* If the institution is a member of a loss year group, and either the common parent does not file a loss year return or the fiduciary does not accept the loss year return filed by the common parent, the fiduciary may file a loss year return with respect to the loss year group. The return must be based on all information pertaining to the institution and all information pertaining to other members to which the fiduciary has reasonable access. Any return filed by the fiduciary under this paragraph (e)(3) must contain the title "Loss year return under section 6402(i) of the Code" at the top of the first page of the return, and the following must be attached to the return:

(i) The name and employer identification number of the institution that is a member of the loss year group;

(ii) The name of the fiduciary;

(iii) A representation that the institution is an insolvent financial institution as defined in paragraph (b)(4) of this section; and

(iv) A representation that the fiduciary has satisfied the requirements set forth in paragraphs (d)(2)(i) and (ii) of this section.

(4) *Additional information.* If the fiduciary files additional information under paragraph (c)(1)(iii) of this section, the fiduciary must attach a representation that it has satisfied the

requirements set forth in paragraph (d)(2)(iii) of this section.

(5) *Election to waiver carryback.* Any election filed after December 30, 1991, by the common parent of a loss year group under section 172(b)(3) to relinquish the entire carryback period with respect to a consolidated net operating loss arising in a loss year is not effective with respect to the portion of the consolidated net operating loss attributable to a subsidiary that is an institution. Instead, the fiduciary may make the election under section 172(b)(3) with respect to the portion attributable to the institution after the notice described in paragraph (d)(1) of this section is filed. For purposes of this paragraph (e)(5), the portion attributable to an institution is determined under the principles of paragraph (g)(2)(ii) of this section.

(f) *Processing and reconciliation of information by the Internal Revenue Service*—(1) *Loss year return if the insolvent financial institution is a member of a loss year group.* The Internal Revenue Service may, in its sole discretion, adjust a loss year return filed by the common parent of a loss year group to take into account information filed by the fiduciary in accordance with paragraph (e) of this section, or accept or adjust a loss year return for the loss year group filed by the fiduciary. Nothing in this section relieves the common parent of a loss year group of its duty to file a consolidated return taking into account an institution's items of income, gain, loss, deduction, and credit for any taxable year, or obligates the Internal Revenue Service to accept a return filed by the fiduciary as the return of the loss year group.

(2) *Claim for refund with respect to consolidated carryback year.* The Internal Revenue Service may, in its sole discretion, adjust a claim for refund filed by the common parent of a carryback year group to take into account information filed by the fiduciary in accordance with paragraph (e) of this section, or accept or adjust a claim for refund for the carryback year group filed by the fiduciary. Nothing in this section obligates the Internal Revenue Service to pay a claim for refund, or to accept a claim for refund, filed by the fiduciary as a claim for refund for the carryback year group.

(3) *Additional information.* In determining the amount of any refund that may be paid to the fiduciary under paragraph (g) of this section, the Internal Revenue Service may, in its sole discretion, take into account any information that the Internal Revenue Service deems relevant and may require the fiduciary to file any additional information the Internal Revenue Service deems appropriate.

(g) *Payment of a refund or a tentative carryback adjustment to fiduciary*—(1) *In general.* If a claim for refund or an application for a tentative carryback adjustment is filed for the consolidated carryback year in accordance with paragraph (e) of this section, the Internal Revenue Service may, in its sole discretion, pay to the fiduciary all or any portion of the refund or tentative carryback adjustment that the Internal Revenue Service determines under this section to be attributable to the net operating losses of the institution. Nothing in this section obligates the Internal Revenue Service to pay to the fiduciary all or any portion of a claim for refund or application for tentative carryback adjustment.

(2) *Portion of refund or tentative carryback adjustment attributable to the net operating loss of an insolvent financial institution*—(i) *In general.* The portion of a refund or tentative carryback adjustment attributable to a net operating loss of an institution that is carried to a consolidated carryback year is determined based on the absorption, as described in paragraph (g)(2)(iii) of this section, of the institution's net operating loss carried to the consolidated carryback year.

(ii) *Member's net operating loss.* If the loss year is a consolidated return year, references in this section to the net operating loss of a member of the loss year group is a reference to the portion of the loss year group's consolidated net operating loss attributable to the member. The consolidated net operating loss for a taxable year that is attributable to a member is determined by a fraction, the numerator of which is the separate net operating loss of the member for the year of the loss and the denominator of which is the sum of the separate net operating losses for that year of all members having such losses. For this purpose, the separate net operating loss of a member is determined by computing the consolidated net operating loss by taking into account only the member's items of income, gain, deduction, and loss, including the member's losses and deductions actually absorbed by the group in the taxable year (whether or not absorbed by the member).

(iii) *Absorption of net operating losses.* The absorption of net operating losses generally is determined under applicable principles of the Code and regulations, including the principles of section 172 and § 1.1502–21 (b) of this chapter. Notwithstanding any contrary rule or principle of the Code or regulations, if an institution and another member of the carryback year group have net operating losses that arise in taxable years ending on the same date and are carried to the same consolidated carryback year, the carryback year group's consolidated taxable income for that year is treated as offset first by the loss attributable to the institution to the extent thereof.

(3) *Examples.* For purposes of the examples in this section, all groups file consolidated returns, all corporations have calendar taxable years, the facts set forth the only corporate activity, the fiduciary has met the notice and filing requirements of this section, and the common parent has filed a return for the loss year and a claim for refund. The principles of this paragraph (g) are illustrated by the following examples.

Example 1. Absorption of net operating losses. (a) P owns all the stock of S1, an insolvent financial institution, and S2, a corporation that is not a financial institution. For Year 1, P, S1, and S2 each have $50 of income, and the P group's consolidated taxable income is $150. On May 31 of Year 2, S1 becomes insolvent and is placed in receivership under the supervision of a fiduciary. For Year 2, the P group has a consolidated net operating loss of $200, of which $100 is attributable to S1 and $100 is attributable to S2.

(b) Under paragraph (g)(2)(iii) of this section, the $150 of consolidated taxable income for Year 1 is offset first by the $100 portion of the consolidated net operating loss for Year 2 attributable to S1. The remaining $50 is treated as offset by $50 of the $100 of consolidated net operating loss attributable to S2. Thus, the refund attributable to $100 of the loss may be payable to the fiduciary and the refund attributable to $50 of the loss may be payable to P. The remaining $50 consolidated net operating loss, available to be carried forward, is entirely attributable to S2.

Example 2. Separate return net operating loss. The facts are the same as in *Example 1*, except that S1 left the P group at the end of Year 1 and its $100 of loss in Year 2 is incurred in a separate return limitation year. Under paragraph (g)(2)(iii) of this section, the generally applicable absorption principles of section 172 and § 1.1502–21 of this chapter apply. Although S1 and S2 are carrying back losses to Year 1 from taxable years ending on the same date (Year 2), S1's loss is subject to a $50 limitation under § 1.1502–21 (c) of this chapter and only $50 of S1's loss is absorbed before S2's net operating loss. Therefore, the refund attributable to $50 of the net operating loss of S1 may be payable to the fiduciary, and the refund attributable to $100 of the net operating loss of S2 may be payable to P. The remaining $50 net operating loss of S1 is available to be carried forward.

(4) *Refund or tentative carryback adjustment allocation agreement.* The determination of the portion of any refund or tentative carryback adjustment payable to the fiduciary

VOL
56
ISS
251
DE
31
1991
UMI

under this paragraph (g) shall be made without regard to—

(i) Any agreement among the members of the consolidated group; or

(ii) Whether the fiduciary is otherwise entitled to any portion of the refund or tentative carryback adjustment under applicable law.

(h) *Credits, net capital losses, and subgroups*—(1) *Credits and net capital losses*—(i) *In general.* The principles of this section also apply to credits and net capital losses, with appropriate adjustments to reflect differences between the rules applicable to net operating losses and those applicable to credits and net capital losses.

(ii) *Example.* The principles of this paragraph (h)(1) are illustrated by the following example.

Example. Net capital loss. (a) P owns all the stock of S1, an insolvent financial institution, and S2, a corporation that is not a financial institution. For Year 1, P, S1, and S2 each have $50 of capital gain, and the P group's consolidated capital gain net income is $150. On May 31 of Year 2, S1 becomes insolvent and is placed in receivership under the supervision of a fiduciary. For Year 2, the P group has a consolidated net operating loss of $100 that is attributable to S1, and a consolidated net capital loss of $100 that is attributable to S2.

(b) Under paragraphs (g)(2)(iii) and (h)(1) of this section, the generally applicable absorption principles of sections 172 and 1212 and §§ 1.1502–21(b) and 1.1502–22(b) of this chapter apply. Consequently, S2's capital loss is absorbed before S1's net operating loss. Therefore, the $150 of consolidated capital gain net income is offset first by S2's $100 capital loss and the remaining $50 by S1's net operating loss. The refund attributable to $50 of the net operating loss may be payable to the fiduciary, and the refund attributable to the $100 of capital loss may be payable to P. The remaining $50 consolidated net operating loss available to be carried forward is entirely attributable to S1.

(2) *Insolvent financial institution subgroup*—(i) *In general.* The principles of this section apply to all members included in an insolvent financial institution subgroup with appropriate adjustments to reflect differences resulting from the application to more than one corporation in a group. Unless otherwise determined by the Internal Revenue Service in its sole discretion, an insolvent financial institution subgroup is composed of an insolvent financial institution and those other members of a loss year group that, at any time during the conservatorship or receivership of the institution, bear the same relationship to the institution that the members of a group bear to their common parent under section 1504(a)(1).

(ii) *Examples.* The principles of this paragraph (h)(2) are illustrated by the following examples.

Example 1. Loss of other subgroup members. (a) S1 is a financial institution, and P, S2, and S3 are not financial institutions. P owns all the stock of S1, S1 owns all the stock of S2, and the stock of S3 is owned 20 percent by S2 and 80 percent by P. For Year 1, P, S1, and S2 each have $100 of income, S3 has no income or loss, and the P group's consolidated taxable income is $300. On May 31 of Year 2, S1 becomes insolvent and is placed in receivership under the supervision of a fiduciary. For Year 2, the P group has a consolidated net operating loss of $300, of which $200 is attributable to S1 and $100 is attributable to S2.

(b) S1 and S3 compose a subgroup because S2 bears the same relationship to S1 that the member of a group bears to its common parent under section 1504(a). S3 is not included in the subgroup because it is not connected to S1 through 80 percent stock ownership as described in section 1504(a).

(c) Because S1 and S2 are members of a subgroup, a claim for refund under paragraph (e) of this section must be based on the aggregate consolidated net operating loss of both S1 and S2. Under paragraph (e)(5) of this section, P may not elect under section 172(b)(3) to relinquish the entire carryback period with respect to the $300 of consolidated net operating loss arising in Year 2 that is attributable to S1 and S2. Any refund payable under paragraph (g)(1) of this section with respect to the $300 loss of S1 and S2 may be paid by the Internal Revenue Service directly to the fiduciary.

Example 2. Income of other subgroup members. (a) The facts are the same as in *Example 1*, except that S2 has $100 of income in Year 2 rather than $100 of loss. Any refund payable under paragraph (g) of this section with respect to the loss of S1 in Year 2 must take into account the income of S2, and therefore the refund will be based on a $100 loss of the subgroup.

(b) Although P and S3 are not members included in the subgroup, the loss year return and the claim for refund filed by the fiduciary under paragraph (e) of this section must be completed based on all information to which the fiduciary has reasonable access. Under paragraph (e)(3) of this section, if P does not file a loss year return that is accepted by S1, and S1 has reasonable access to information indicating that P and S3 have income in Year 2, S1 must take that income into account in filing the P group's return for Year 2 and reduce the amount of S1's loss that may be carried to Year 1 accordingly. However, if P or S3 has a loss in Year 2, any refund attributable to that loss will not be paid to the fiduciary.

(i) [Reserved]

(j) *Determination of ownership.* This section determines the party to whom a refund or tentative carryback adjustment will be paid but is not determinative of ownership of any such amount among current or former members of a consolidated group (including the institution).

(k) *Liability of the Government.* Any refund or tentative carryback adjustment paid to the fiduciary discharges any liability of the Government to the same extent as payment to the common parent under § 1.1502–77 or § 1.1502–78 of this chapter. Furthermore, any refund or tentative carryback adjustment paid to the fiduciary is considered a payment to all members of the carryback year group. Any determination made by the Internal Revenue Service under this section to pay a refund or tentative carryback adjustment to a fiduciary or the common parent may not be challenged by the common parent, any member of the group, or the fiduciary.

(l) *Effective dates.* This section applies to refunds and tentative carryback adjustments paid after December 30, 1991.

Michael J. Murphy,

Acting Commissioner of Internal Revenue.

Approved: December 12, 1991.

Michael J. Graetz,

Acting Assistant Secretary of the Treasury.

RIN 1545–AO58

Accuracy-related Penalty

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the accuracy-related penalty for negligence or disregard of rules or regulations, substantial understatement of income tax, and substantial (or gross) valuation misstatement under chapter 1 of the Internal Revenue Code. The applicable tax law was amended by the Omnibus Budget Reconciliation Act of 1989. The regulations affect all taxpayers that file returns of income tax and provide guidance necessary to comply with these changes.

EFFECTIVE DATES: Except for §§ 1.6662–3(c) and 1.6662–4(e) and (f), these final regulations are effective for income tax returns due after December 31, 1989 (determined without regard to extensions of time for filing). Sections 1.6662–3(c) and 1.6662–4(e) and (f) are effective for income tax returns due after December 31, 1991 (determined without regard to extensions of time for filing).

FOR FURTHER INFORMATION CONTACT: Gail M. Winkler of the Office of Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:IT&A:4) or telephone (202) 566–5985 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)) under control number 1545–0889. The estimated average annual burden per respondent is 4.79 hours.

This estimate is an approximation of the average time expected to be necessary for a collection of information. It is based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Office T:FP, Washington, DC 20224, and to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

On March 4, 1991, the **Federal Register** (56 FR 8943) published a notice of proposed rulemaking regarding the accuracy-related penalty under section 6662 of the Internal Revenue Code and definitions and rules for purposes of this penalty (and the fraud penalty under section 6663) under section 6664. A public hearing was held on June 3, 1991. After consideration of the public comments regarding the proposed regulations, the regulations are adopted as revised by this Treasury decision. Descriptions of the revisions to the proposed regulations are included in the discussion of the public comments below.

Explanation of Statutory Provisions

Section 6662(a) provides for an accuracy-related penalty of 20 percent of any portion of an underpayment of tax required to be shown on a return that is attributable to any of the types of misconduct specified in section 6662(b), i.e., (1) Negligence or disregard of rules or regulations; (2) a substantial understatement of income tax; (3) a substantial valuation misstatement under chapter 1; (4) a substantial overstatement of pension liabilities; or (5) a substantial estate or gift tax valuation understatement. The accuracy-related penalty is not imposed on any portion of an underpayment on which the fraud penalty is imposed. These final regulations provide rules only for the first three types of misconduct and, in the case of negligence or disregard of rules or regulations, only in the context of income taxes imposed under subtitle A of the Code.

Section 6662(c) defines "negligence" for purposes of the negligence and disregard component of the accuracy-related penalty to include any failure to make a reasonable attempt to comply with the provisions of the internal revenue laws and "disregard" for purposes of this component to include any careless, reckless or intentional disregard.

Section 6662(d) provides for purposes of the substantial understatement component of the accuracy-related penalty that an understatement of tax is substantial if it exceeds the greater of 10 percent of the tax required to be shown on the return for the taxable year, or $5,000 ($10,000 in the case of a corporation other than an S corporation or personal holding company). The term "understatement" means the excess of (i) The amount of tax required to be shown on the return, over (ii) the amount of tax imposed which is shown on the return, reduced by any rebate. Except in the case of an item attributable to a tax shelter, an understatement is reduced by the portion of the understatement that is attributable to the tax treatment of an item for which there is substantial authority or that was adequately disclosed.

Section 6662(e) provides that there is a substantial valuation misstatement for purposes of the substantial valuation misstatement component of the accuracy-related penalty if the value or adjusted basis of any property claimed on any return of tax imposed by chapter 1 is 200 percent or more of the correct amount. The valuation misstatement is "gross" (and the penalty rate is 40 percent) when the value or adjusted basis of property claimed on the return is 400 percent or more of the correct amount.

This component of the accuracy-related penalty only applies if the portion of an underpayment attributable to substantial (and gross) valuation misstatements under chapter 1 for a year exceeds $5,000 ($10,000 in the case of a corporation other than an S corporation or personal holding company). These final regulations do not address substantial (or gross) valuation misstatements in connection with transactions between persons described in section 482 or net section 482 transfer price adjustments as described in section 6662(e)(1)(B).

Section 6664 provides that an "underpayment" for purposes of the accuracy-related (and fraud) penalty means the amount by which the tax imposed exceeds the excess of (i) The sum of (A) The amount of tax shown on the return, plus (B) amounts not so shown previously assessed (or collected without assessment), over (ii) the amount of rebates made. The accuracy-related penalty applies only where a return is filed (other than a return prepared by the Secretary under section 6020(b)).

Section 6664(c) provides that no accuracy-related penalty will be imposed with respect to any portion of an underpayment if it is shown that there was reasonable cause for such portion and that the taxpayer acted in good faith. Special rules apply for the reasonable cause and good faith exception in the case of any underpayment attributable to a substantial (or gross) valuation misstatement under chapter 1 with respect to charitable deduction property.

Public Comments

In General

The proposed regulations provide that both an accuracy-related penalty and a penalty under section 6651 for failure to timely file a return may be imposed on the same portion of an underpayment if a return is filed, but is filed late. Prop. Reg. § 1.6662–2(a). In response to a comment, the final regulations provide that the fact that a return is filed late will not be taken into account in determining whether an accuracy-related penalty should be imposed.

Negligence or Disregard of Rules or Regulations Meaning of "Negligence"

The proposed regulations provide that the term "negligence" includes any failure to make a reasonable attempt to comply with the provisions of the internal revenue laws or to exercise ordinary and reasonable care in the preparation of a tax return. Under the proposed regulations, negligence is strongly indicated if a taxpayer fails to make a reasonable attempt to ascertain the correctness of a deduction, credit or exclusion on a return which would seem to a reasonable and prudent person to be "too good to be true" under the

VOL
56
ISS
251
DEC
31
1991
UMI

circumstances. Prop. Reg. § 1.6662–3(b)(1).

Several commentators stated that the "too good to be true" formulation is too subjective and should be eliminated from the final regulations. The final regulations retain the "too good to be true" formulation as a strong indicator of negligence because it expresses in understandable terms a typical form of negligent behavior and has been used a number of times by courts in describing negligence. *See*, e.g., *McCrary* v. *Commissioner*, 92 T.C. 827 (1989); *Elliott* v. *Commissioner*, 90 T.C. 960 (1988); and *Starrett* v. *Commissioner*, 59 T.C.M. (CCH) 334 (1990).

The proposed regulations provide that a position is attributable to negligence if it is frivolous, or is not frivolous, but lacks a reasonable basis. Because reasonable basis is a higher standard than frivolous, the final regulations simply provide that a position is attributable to negligence if it lacks a reasonable basis.

Disregard of Rules or Regulations

The disregard prong of the negligence or disregard penalty applies to a careless, reckless or intentional disregard of "rules or regulations." The proposed regulations define "rules" to include revenue rulings issued by the Internal Revenue Service. Prop. Reg. § 1.6662–3(b)(2). One commentator stated that a revenue ruling should not be treated as a "rule" because (1) A revenue ruling does not constitute a rule under the Administrative Procedure Act (5 U.S.C. 500, *et seq.*) and (2) a revenue ruling is only the contention of one party and is not subjected to the give and take of a public comment process.

The legislative history of the Tax Reform Act of 1976 (which enacted section 6694 relating to income tax return preparers) expressly provides that rules and regulations include regulations and "IRS rulings." See S. Rep. No. 938, 94th Cong., 2d Sess. 355 (1976). Moreover, revenue rulings were expressly listed as "rules" under former § 1.6694–1(a)(3) (concerning the understatement of a taxpayer's liability by an income tax return preparer). Therefore, the final accuracy-related penalty regulations, in providing that revenue rulings are "rules," merely reflect a continuation of prior law.

Notices published in the Internal Revenue Bulletin by the Service also contain substantive interpretations of Federal tax law. In addition, these notices generally are subject to a level of review that is the same or higher than that accorded revenue rulings. Accordingly, the final regulations also provide that the term "rules or regulations" includes notices (other than notices of proposed rulemaking) that are issued by the Service and published in the Internal Revenue Bulletin. Revenue procedures are not listed, as they may or may not be treated as "rules or regulations" depending on all facts and circumstances.

The proposed regulations provide that a taxpayer will not be considered to have disregarded a revenue ruling for purposes of the disregard prong of the negligence or disregard penalty if the position that is contrary to the ruling has at least a realistic possibility of being sustained on its merits. Prop. Reg. § 1.6662–3(b)(2). One commentator objected to employing the realistic possibility standard in the accuracy-related penalty context and another commentator stated that a taxpayer should not be considered to have disregarded a revenue ruling if the position contrary to the ruling has at least a reasonable basis.

This provision in the proposed regulations is a taxpayer-favorable rule, as there is no statutory requirement that an exception be made from the general definition of "disregard" for positions contrary to revenue rulings. Framing this exception in terms of a standard that exists in the preparer penalty context helps coordinate the accuracy and preparer penalty regimes. Accordingly, the final regulations retain this "realistic possibility" exception to the disregard prong of the penalty for positions contrary to revenue rulings (as well as notices).

Disclosure of Positions Contrary to a Regulation

The proposed regulations provide that a taxpayer will not be considered to have disregarded a regulation if the position contrary to the regulation is not frivolous and is adequately disclosed. Prop. Reg. § 1.6662–3(c). A commentator stated that the legislative history of OBRA 1989 suggests that disclosure should only be a safe harbor and not the sole means of avoiding a penalty for intentional disregard of a regulation.

There is no indication in the legislative history of OBRA 1989 that Congress intended disclosure to be only a safe harbor. The taking of a position contrary to a regulation is of sufficient importance to the self-assessment nature of the Federal tax system that it is appropriate to require that the Service be notified of such positions. Therefore, the final regulations adopt the rule of the proposed regulations requiring adequate disclosure of a position contrary to a regulation.

In addition, because of the importance to the self-assessment system of disclosing positions contrary to regulations, the final regulations make two changes to the rules concerning positions contrary to regulations. First, the final regulations provide that disclosure of such positions is adequate only if the disclosure is separately made on a Form 8275–R. Until Form 8275–R is available, taxpayers must disclose positions contrary to regulations on a separate Form 8275 with the caption "REGULATIONS" appearing in the upper right corner of the form. (A similar disclosure rule is provided in the final preparer penalty regulations.) Second, because the legislative history of OBRA 1989 provides that the penalty for reckless or intentional disregard of a regulation may be avoided through disclosure only if the position represents a good faith challenge to the validity of the regulation, the final regulations incorporate this standard. See H.R. Rep. No. 247, 101st Cong., 1st Sess. 1393 (1989).

Alternative Methods of Disclosure

A number of commentators also criticized the requirement in the proposed regulations that disclosure be made on a Form 8275 for purposes of the negligence or disregard penalty. Commentators argued that disclosure on a return in accordance with an annual revenue procedure should be adequate.

There is no indication in the legislative history of OBRA 1989 that Congress intended to permit disclosure to be made on the return itself in accordance with an annual revenue procedure for purposes of the negligence or disregard penalty. It is in the interest of both taxpayers and the Service to have a relatively uniform disclosure regime that provides certainty as to whether adequate disclosure has been made. Thus, the final regulations do not relax the requirements for making adequate disclosure for purposes of the negligence or disregard penalty.

Meaning of "Frivolous"

The proposed regulations define a "frivolous" position as one that is "patently improper." Prop. Reg. § 1.6662–3(b)(3). Commentators recommended that this definition be changed, for example, to require that the position be both patently improper and knowingly advanced in bad faith, or that a frivolous position be defined as one that is "not litigable."

The "patently improper" definition was included in the proposed regulations because it represents an objective standard. Thus, neither the good nor the bad intentions of a person taking a position are relevant to a determination of whether that position is frivolous within the meaning of the regulations. The Service continues to believe that an objective standard is appropriate. The recommendation that a frivolous position be defined as one that is not litigable would place taxpayers who are not attorneys (or who are not represented by attorneys) at a disadvantage in assessing the effectiveness of disclosure in relation to taxpayers who are. Accordingly, the final regulations retain the definition of a frivolous position as one that is patently improper.

Failure to Maintain Books and Records

The proposed regulations provide that a taxpayer may not avoid a negligence or disregard penalty by disclosure if the taxpayer fails to maintain adequate books and records or to substantiate items properly. Prop. Reg. § 1.6662–3(c)(1). One commentator stated that a taxpayer should be able to avoid this penalty even if the taxpayer did not maintain adequate books and records, if the taxpayer discloses that he or she did not maintain adequate books and records. Such a rule would be inconsistent with the legislative history of OBRA 1989. *See* H.R. Rep. No. 247, 101st Cong., 1st Sess. 1393 (1989). Thus, the final regulations do not incorporate this rule. In response to another comment, the final regulations substitute the term "adequate books and records" for the term "proper books and records" wherever the latter term was used in the proposed regulations so that the former term is used consistently throughout the regulations.

Substantial Understatement of Income Tax Authorities

The proposed regulations provide that "authorities" for purposes of determining whether substantial authority is present include, among other items, applicable provisions of the Internal Revenue Code and other statutory provisions, Federal court cases interpreting such statutes, private letter rulings and technical advice memoranda issued after October 31, 1976, and actions on decisions and general counsel memoranda issued after March 12, 1981. The proposed regulations further provide that an authority ceases to be an authority once it is overruled or modified, implicitly or explicitly, by an authority of the same or higher source. For example, a district court opinion on an issue is not an authority if overruled or reversed. Similarly, a private letter ruling is not authority if revoked or if inconsistent with a subsequent proposed regulation, revenue ruling or other administrative pronouncement published in the Internal Revenue Bulletin. The proposed regulations provide that in weighing authorities to determine whether substantial authority is present, an older private letter ruling, technical advice memorandum, general counsel memorandum or action on decision generally must be accorded less weight than a more recent one. Any such document that is more than ten years old generally is accorded very little weight. Prop. Reg. § 1.6662–4(d)(3).

Court cases. Several commentators stated that court cases in addition to Federal court cases interpreting the Internal Revenue Code and other statutory provisions should constitute authorities. The final regulations adopt this comment by listing "court cases" as one of the types of authority.

Service rulings and memoranda. Commentators argued that all private letter rulings, technical advice memoranda, actions on decisions, and general counsel memoranda should constitute authorities, not just those issued after a certain date. Private letter rulings and technical advice memoranda first became available to the public after October 31, 1976. Except for certain general counsel memoranda published in the pre-1955 volumes of the Cumulative Bulletin, actions on decisions and general counsel memoranda first became available to the public after March 12, 1981.

The Service believes that treating its private rulings and similar memoranda as authorities for purposes of the substantial understatement penalty is appropriate only to the extent these documents were prepared and internally reveiewed in anticipation of the documents being made available to the public. The 1976 and 1981 cut-off dates in the proposed regulations are also consistent with the legislative history of OBRA 1989. See H.R. Rep. No. 247, 101st Cong., 1st Sess. 1390 n.79 (1989). Accordingly, the final regulations preserve the rule that only private letter rulings and technical advice memoranda issued after October 31, 1976 and only actions on decisions issued after March 12, 1981 are authorities. The proposed regulations are modified, however, to provide that general counsel memoranda published in the pre-1955 volumes of the Cumulative Bulletin are also authorities.

Commentators also contended that the age of a document should not be taken into account in testing for substantial authority and that in no event should the regulations contain a ten-year rule. It was argued that the relevance and persuasiveness of a document are more important than its age.

Older private letter rulings, technical advice memoranda, general counsel memoranda and actions on decisions are less likely to reflect the current state of the law and position of the Service than more recent ones. In view of this and the level of review for these administrative pronouncements, the ten-year rule is appropriate. However, in response to the comments, the final regulations clarify that the persuasiveness and relevance of any of these documents, viewed in light of subsequent developments, should be taken into account as well as the document's age.

Overruled or modified authorities. Several commentators objected to the statement in the proposed regulations that an authority ceases to be an authority once it is overruled or modified, implicitly or explicitly, by an authority of the same or higher source. In particular, there was concern that this language could be read to mean that a district court opinion could lose its status as an authority as a result of a contrary opinion by a United States Court of Appeals not located in the same circuit as the district court. In general, these commentators maintained that any rule attempting to nullify an authority is inconsistent with the notion that all authorities are to be taken into account and weighed in determining whether substantial authority is present.

In response to these comments, the final regulations clarify that an authority ceases to be an authority only to the extent that it is overruled or modified, implicitly or explicitly, by a body with the power to overrule or modify the earlier authority. For example, a district court opinion on an issue is not an authority if overruled, implicitly or explicitly, by the United States Court of Appeals for that district. Similarly, an opinion of the United States Tax Court is not considered to be overruled or modified by a United States Court of Appeals to which the taxpayer does not have a right of appeal, unless the Tax Court adopts the holding of the Court of Appeals.

Commentators also argued that the Service's position in a proposed regulation is too tentative to justify the rule that proposed regulations supersede prior, inconsistent private letter rulings. Proposed regulations are subject to a higher level of review than private letter rulings and, therefore, reflect the current position of the Service more accurately than previously issued private letter rulings. Proposed regulations also reflect intervening changes in the law. It is not

VOL
56
ISS
251
DE
31
1991
UMI

appropriate to retain as an authority a document that does not accurately reflect the current status of the law and position of the Service. Thus, the final regulations retain the rule that a proposed regulation (or a revenue ruling or other administrative pronouncement published in the Internal Revenue Bulletin) supersedes a previously issued private letter ruling.

Nature of Substantial Authority Analysis

One commentator argued that the final regulations should state that the substantial authority analysis is similar to the analysis a court would follow. The final regulations, like the proposed regulations, do not contain this statement because the regulations already provide sufficient guidance as to the nature of the substantial authority analysis and the statement may be confusing to taxpayers who are not attorneys.

Written Determinations

Two commentators requested clarification on the date that a written determination issued to a taxpayer by the Service ceases to constitute substantial authority for the tax treatment of an item on the taxpayer's return. In response to these comments, the final regulations clarify that written determinations (other than those based on inaccurate facts) cease to be authority on the date, and to the extent, that such determinations are modified or revoked by a notice to the taxpayer, the enactment of legislation, or other enumerated events.

Disclosure

Commentators also advocated additional methods of disclosure out of the substantial understatements penalty. For the reasons discussed above concerning methods of disclosure for purposes of the negligence or disregard penalty, the final regulations do not relax the requirements for making adequate disclosure for purposes of the substantial understatement penalty. The final regulations also provide that a position contrary to a regulation must be disclosed on a Form 8275–R for purposes of both penalties. Thus, the final regulations provide that disclosure is adequate for purposes of the substantial understatement penalty if made on a Form 8275 or 8275–R, as appropriate, or in accordance with an annual revenue procedure.

Aggregation of Understatements

The proposed regulations contain special rules in the case of carrybacks and carryovers for determining whether an understatement of income tax is substantial. Prop. Reg. § 1.6662–4(c). Under the aggregation rule of the proposed regulations, the determination of whether an understatement is substantial for a year in which a loss, deduction or credit arises (a "loss or credit year") is to be made by treating any understatement that is attributable to a carryback or carryover item as an understatement with respect to the return of the loss or credit year.

Commentators criticized this approach as being too complicated and inconsistent with the prior regulations. In response to comments, the final regulations do not contain the aggregation rule contained in the proposed regulations. Instead, the final regulations include rules providing that the determination of whether an understatement is substantial is to be made on a year-by-year basis, without aggregation.

Substantial (or Gross) Valuation Misstatements

There is a substantial (or gross) valuation misstatement if the value or adjusted basis of property claimed on a return is 200 percent (400 percent in the case of a gross valuation misstatement) or more of the correct amount. The proposed regulations provide that a valuation misstatement is a gross valuation misstatement if the correct value or adjusted basis of property claimed on a return is zero. Prop. Reg. § 1.6662–5(g).

Some commentators argued that treating all valuation misstatements with respect to zero value or basis property as gross valuation misstatements is too harsh. However, this approach is consistent with the principle inherent in the statute that relatively greater misstatements are subject to penalty at a higher rate, as well as with the statutory language, and is, therefore, retained in the final regulations.

The proposed regulations also provide that the substantial (or gross) valuation misstatement penalty applies to an underpayment with respect to a return due after December 31, 1989 that is attributable to a valuation misstatement (*e.g.*, of the adjusted basis of property for which depreciation is claimed) on that return, even if the original misstatement (*e.g.*, of the adjusted basis of the property in the year it is placed in service) was claimed on a return due before January 1, 1990. Prop. Reg. § 1.6662–5(k). One commentator objected to this rule on the ground that the statute does not apply to misstatements of property first occurring on returns filed before its Janaury 1, 1990 effective date.

There is no indication that Congress intended to exclude an underpayment attributable to a misstatement of value or adjusted basis on a return filed after December 31, 1989 from the ambit of section 6662(e) simply because the initial misstatement was made on a return filed prior to 1990. Such an approach would enable a taxpayer to continue to benefit from past misstatements and would violate the general rule that each tax year stands on its own. Thus, the final regulations adopt the rule contained in the proposed regulations.

The proposed regulations also state that there is no disclosure exception to the valuation misstatement penalty. Prop. Reg. § 1.6662–5(a). Commentators argued that a disclosure exception similar to that provided for the negligence or disregard and substantial understatement penalties should be provided for the valuation misstatement penalty or, alternatively, that a disclosure exception should be provided for valuation misstatements due to legal errors.

Congress did not, by statute or legislative history, provide a disclosure exception from the valuation misstatement penalty and, accordingly, there is no basis for applying such an exception under the regulations. Moreover, the courts have consistently applied the penalty without regard to whether the valuation misstatements were based on legal or factual errors. Accordingly, the final regulations continue to provide that there is no disclosure exception to the valuation misstatement penalty.

Definition of Underpayment

The proposed regulations take overstated prepayment credits, such as overstated withholding credits and estimated tax payments, into account in computing the amount of an underpayment for purposes of the accuracy-related penalty. Prop. Reg. § 1.6664–2(c). Some commentators objected to this rule on the ground that overstated prepayment credits are not taken into account in computing the amount of a deficiency under section 6211.

There are differences in the section 6664 definition of "underpayment" and the section 6211 definition of "deficiency" that warrant taking overstated prepayment credits into account for purposes of the accuracy-related penalty. If a taxpayer's overstatement of withholding credits or estimated tax payments is inadvertent, the taxpayer may qualify for the reasonable cause and good faith exception to the accuracy-related penalty. Accordingly, the final regulations adopt the rule set forth in the proposed regulations.

Ordering Rules

The proposed regulations provide ordering rules for taking adjustments to a return into account in calculating the total amount of accuracy-related and fraud penalties that are imposed by sections 6662 and 6663 with respect to a return for a taxable year. Similar rules are provided for allocating unclaimed prepayment credits to adjustments on a return. Prop. Reg. § 1.6664–3.

One commentator suggested that these ordering rules be replaced by a rule that would allocate portions of an underpayment to adjustments on the basis of each adjustment's contribution to the amount of the underpayment. The suggestion is not dictated by OBRA 1989, is inconsistent with the established practice of the Service, and could raise substantial controversies as to the proper allocations. Accordingly, the final regulations retain the ordering rules of the proposed regulations.

Reasonable Cause and Good Faith Exception

No accuracy-related penalty will be imposed on any portion of an underpayment of tax if the taxpayer demonstrates that there was reasonable cause for such portion and that the taxpayer acted in good faith. The determination of whether a taxpayer acted with reasonable cause and in good faith is to be made on the basis of all facts and circumstances. Prop. Reg. § 1.6664–4.

Some commentators recommended that special reasonable cause and good faith rules be drafted for particular categories of taxpayers and that reasonable cause and good faith be presumed under certain circumstances. In particular, it was suggested that reliance on professional advice limited to the conclusion that there is substantial authority for a position should qualify for the reasonable cause and good faith exception.

A facts and circumstances approach to determining reasonable cause and good faith provides the greatest degree of flexibility in evaluating a taxpayer's situation. Special rules and presumptions, to the extent that they require that certain facts and circumstances be disregarded, are inconsistent with this flexible approach. Thus, the final regulations do not adopt these suggestions.

Special Analyses

It has been determined that these final rules are not major rules as defined in Executive Order 12291. Therefore, a final Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Gail M. Winkler, Office of the Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service. However, personnel from other offices in the Internal Revenue Service and Treasury Department participated in their development.

List of Subjects

26 CFR 1.6654–1 through 1.6709–1T

Income taxes, Penalties, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 continues to read in part:

Authority: Sec. 7805, 68A Stat. 917; sec. 26 U.S.C. 7805, 26 U.S.C. 7805 * * *

Par. 2. The following new §§ 1.6662–0 through 1.6662–5 and 1.6664–0 through 1.6664–4 are added to read as follows:

§ 1.6662–0 Table of Contents.

This section lists the captions that appear in §§ 1.6662–1 through 1.6662–5.

§ 1.6662–1 Overview of the accuracy-related penalty.

§ 1.6662–2 Accuracy-related penalty.

(a) In general.
(b) Amount of penalty.
(1) In general.
(2) Increase in penalty for gross valuation misstatement.
(c) No stacking or accuracy-related penalty components.
(d) Effective date.

§ 1.6662–3 Negligence of disregard or rules or regulations.

(a) In general.
(b) Definitions and rules.
(1) Negligence.
(2) Disregard of rules or regulations.
(3) Frivolous.
(c) Exception for adequate disclosure.
(1) In general.
(2) Method of disclosure.
(d) Special rules in the case of carrybacks and carryovers.
(1) In general.
(2) Transition rule for carrybacks to pre–1990 years.
(3) Example.

§ 1.6662–4 Substantial understatement of income tax.

(a) In general.
(b) Definitions and computational rules.
(1) Substantial.
(2) Understatement.
(3) Amount of the tax required to be shown on the return.
(4) Amount of the tax imposed which is shown on the return.
(5) Rebate.
(6) Examples.
(c) Special rules in the case of carrybacks and carryovers.
(1) In general.
(2) Understatements for carryback years not reduced by amount of carrybacks.
(3) Tainted items defined.
(i) In general.
(ii) Tax shelter items.
(4) Transition rule for carrybacks to pre–1990 years.
(5) Examples.
(d) Substantial authority.
(1) Effect of having substantial authority.
(2) Substantial authority standard.
(3) Determination of whether substantial authority is present.
(i) Evaluation of authorities.
(ii) Nature of analysis.
(iii) Types of authority.
(iv) Special rules.
(A) Written determinations.
(B) Taxpayer's jurisdiction.
(C) When substantial authority determined.
(v) Substantial authority for tax returns due before January 1, 1990.
(e) Disclosure of certain information.
(1) Effect of adequate disclosure.
(2) Circumstances where disclosure will not have an effect.
(f) Method of making adequate disclosure.
(1) Disclosure statement.
(2) Disclosure on return.
(3) Recurring item.
(4) Carrybacks and carryovers.
(5) Pass-through entities.
(g) Items relating to tax shelters.
(1) In general.
(2) Tax shelter.
(i) In general.
(ii) Principal purpose.
(3) Tax shelter item.
(4) Reasonable belief.

§ 1.6662–5 Substantial and gross valuation misstatements under chapter 1.

(a) In general.
(b) Dollar limitation.
(c) Special rules in the case of carrybacks and carryovers.
(1) In general.
(2) Transition rule for carrybacks to pre-1990 years.
(d) Examples.
(e) Definitions.
(1) Substantial valuation misstatement.
(2) Gross valuation misstatement.
(3) Property.
(f) Multiple valuation misstatements on a return.
(1) Determination of whether valuation misstatements are substantial or gross.
(2) Application of dollar limitation.
(g) Property with a value or adjusted basis of zero.
(h) Pass-through entities.
(1) In general.
(2) Example.
(i) [Reserved]
(j) Transactions between persons described in section 482 and net section 482 transfer price adjustments. [Reserved]
(k) Returns affected.

§ 1.6662–1 Overview of the accuracy-related penalty.

Section 6662 imposes an accuracy-related penalty on any portion of an underpayment of tax required to be shown on a return that is attributable to one or more of the following:

(a) Negligence or disregard of rules or regulations;

(b) Any substantial understatement of income tax;

(c) Any substantial valuation misstatement under chapter 1;

(d) Any substantial overstatement of pension liabilities; or

(e) Any substantial estate or gift tax valuation understatement.

Sections 1.6662–1 through 1.6662–5 address only the first three components of the accuracy-related penalty, *i.e.*, the penalties for negligence or disregard of rules or regulations, substantial understatements of income tax, and substantial (or gross) valuation misstatements under chapter 1. The penalties for negligence or disregard of rules or regulations and for a substantial understatement of income tax may be avoided by adequately disclosing certain information as provided in § 1.6662–3(c) and § 1.6662–4 (e) and (f), respectively. The penalty for a substantial (or gross) valuation misstatement under chapter 1 may not be avoided by disclosure. No accuracy-related penalty may be imposed on any portion of an underpayment if there was reasonable cause for, and the taxpayer acted in good faith with respect to, such portion. The reasonable cause and good faith exception to the accuracy-related penalty is set forth in § 1.6664–4.

§ 1.6662–2 Accuracy-related penalty.

(a) *In general.* Section 6662(a) imposes an accuracy-related penalty on any portion of an underpayment of tax (as defined in section 6664(a) and § 1.6664–2) required to be shown on a return if such portion is attributable to one or more of the following types of misconduct:

(1) Negligence or disregard of rules or regulations (see § 1.6662–3);

(2) Any substantial understatement of income tax (see § 1.6662–4); or

(3) Any substantial (or gross) valuation misstatement under chapter 1 ("substantial valuation misstatement" or "gross valuation misstatement"), provided the applicable dollar limitation set forth in section 6662(e)(2) is satisfied (see § 1.6662–5).

The accuracy-related penalty applies only in cases in which a return of tax is filed, except that the penalty does not apply in the case of a return prepared by the Secretary under the authority of section 6020(b). The accuracy-related penalty under section 6662 and the penalty under section 6651 for failure to timely file a return of tax may both be imposed on the same portion of an underpayment if a return is filed, but is filed late. The fact that a return is filed late, however, is not taken into account in determining whether an accuracy-related penalty should be imposed. No accuracy-related penalty may be imposed on any portion of an underpayment of tax on which the fraud penalty set forth in section 6663 is imposed.

(b) *Amount of penalty*—(1) *In general.* The amount of the accuracy-related penalty is 20 percent of the portion of an underpayment of tax required to be shown on a return that is attributable to any of the types of misconduct listed in paragraphs (a)(1) through (a)(3) of this section, except as provided in paragraph (b)(2) of this section.

(2) *Increase in penalty for gross valuation misstatement.* In the case of a gross valuation misstatement, as defined in section 6662(h)(2) and § 1.6662–5(e)(2), the amount of the accuracy-related penalty is 40 percent of the portion of an underpayment of tax required to be shown on a return that is attributable to the gross valuation misstatement, provided the applicable dollar limitation set forth in section 6662(e)(2) is satisfied.

(c) *No stacking of accuracy-related penalty components.* The maximum accuracy-related penalty imposed on a portion of an underpayment may not exceed 20 percent of such portion (40 percent of the portion attributable to a gross valuation misstatement), notwithstanding that such portion is attributable to more than one of the types of misconduct described in paragraph (a) of this section. For example, if a portion of an underpayment of tax required to be shown on a return is attributable both to negligence and a substantial understatement of income tax, the maximum accuracy-related penalty is 20 percent of such portion. Similarly, the maximum accuracy-related penalty imposed on any portion of an underpayment that is attributable both to negligence and a gross valuation misstatement is 40 percent of such portion.

(d) *Effective date.* Section 1.6662–3(c) and § 1.6662–4 (e) and (f) (relating to methods of making adequate disclosure) will apply to returns the due date for which (determined without regard to extensions of time for filing) is after December 31, 1991. Except as provided in the preceding sentence, §§ 1.6662–1 through 1.6662–5 apply to returns the due date for which (determined without regard to extensions of time for filing) is after December 31, 1989. To the extent the provisions of these regulations were not reflected in the statute as amended by the Omnibus Budget Reconciliation Act of 1989 (OBRA 1989), in Notice 90–20, 1990–1 C.B. 328, or in rules and regulations in effect prior to March 4, 1991 (to the extent not inconsistent with the statute as amended by OBRA 1989), these regulations will not be adversely applied to a taxpayer who took a position based upon such prior rules on a return filed before January 1, 1992.

§ 1.6662–3 Negligence or disregard of rules or regulations.

(a) *In general.* If any portion of an underpayment, as defined in section 6664(a) and § 1.6664–2, of any income tax imposed under subtitle A of the Code that is required to be shown on a return is attributable to negligence or disregard of rules or regulations, there is added to the tax an amount equal to 20 percent of such portion. This penalty does not apply, however, if the requirements of § 1.6662–3(c)(1) are satisfied and the position in question is adequately disclosed as provided in § 1.6662–3(c)(2), or to the extent that the reasonable cause and good faith exception to this penalty set forth in § 1.6664–4 applies. In addition, if a position with respect to an item is contrary to a revenue ruling or notice (other than a notice of proposed rulemaking) issued by the Internal Revenue Service and published in the Internal Revenue Bulletin, this penalty does not apply if the position has a realistic possibility of being sustained on its merits. See § 1.6694–2(b) of the preparer penalty regulations for a description of the realistic possibility standard.

(b) *Definitions and rules*—(1) *Negligence.* The term *negligence* includes any failure to make a reasonable attempt to comply with the provisions of the internal revenue laws or to exercise ordinary and reasonable care in the preparation of a tax return. "Negligence" also includes any failure by the taxpayer to keep adequate books and records or to substantiate items properly. A position with respect to an item is attributable to negligence if it lacks a reasonable basis. Negligence is strongly indicated where—

(i) A taxpayer fails to include on an income tax return an amount of income shown on an information return, as defined in section 6724(d)(1);

(ii) A taxpayer fails to make a reasonable attempt to ascertain the correctness of a deduction, credit or exclusion on a return which would seem to a reasonable and prudent person to be "too good to be true" under the circumstances;

(iii) A partner fails to comply with the requirements of section 6222, which requires that a partner treat partnership items on its return in a manner that is consistent with the treatment of such items on the partnership return (or notify the Secretary of the inconsistency); or

(iv) A shareholder fails to comply with the requirements of section 6242, which requires that an S corporation shareholder treat subchapter S items on its return in a manner that is consistent with the treatment of such items on the corporation's return (or notify the Secretary of the inconsistency).

(2) *Disregard of rules or regulations.* The term *disregard* includes any careless, reckless or intentional disregard of rules or regulations. The term "rules or regulations" includes the provisions of the Internal Revenue Code, temporary or final Treasury regulations issued under the Code, and revenue rulings or notices (other than notices of proposed rulemaking) issued by the Internal Revenue Service and published in the Internal Revenue Bulletin. A disregard of rules or regulations is "careless" if the taxpayer does not exercise reasonable diligence to determine the correctness of a return position that is contrary to the rule or regulation. A disregard is "reckless" if the taxpayer makes little or no effort to determine whether a rule or regulation exists, under circumstances which demonstrate a substantial deviation from the standard of conduct that a reasonable person would observe. A disregard is "intentional" if the taxpayer knows of the rule or regulation that is disregarded. Nevertheless, a taxpayer who takes a position contrary to a revenue ruling or a notice has not disregarded the ruling or notice if the contrary position has a realistic possibility of being sustained on its merits.

(3) *Frivolous.* A *frivolous* position with respect to an item is one that is patently improper.

(c) *Exception for adequate disclosure*—(1) *In general.* No penalty under section 6662(b)(1) may be imposed on any portion of an underpayment that is attributable to negligence or a position contrary to a rule or regulation if the position is disclosed in accordance with the rules of paragraph (c)(2) of this section and, in the case of a position contrary to a regulation, the position represents a good faith challenge to the validity of the regulation. This disclosure exception does not apply, however, in the case of a position that is frivolous or where the taxpayer fails to keep adequate books and records or to substantiate items properly.

(2) *Method of disclosure.* Disclosure is adequate for purposes of this section if made in accordance with the provisions of §§ 1.6662–4(f) (1), (3), (4) and (5), which permit disclosure on a properly completed and filed Form 8275 or 8275–R, as appropriate. In the case of a position contrary to a rule or regulation, disclosure is adequate only if the preceding sentence is satisfied and the statutory or regulatory provision or ruling in question is adequately identified on the Form 8275 or 8275–R, as appropriate. The provisions of § 1.6662–4(f)(2), which permit disclosure in accordance with an annual revenue procedure for purposes of the substantial understatement penalty, do not apply for purposes of the penalty for negligence or disregard of rules or regulations.

(d) *Special rules in the case of carrybacks and carryovers*—(1) *In general.* The penalty for negligence or disregard of rules or regulations applies to any portion of an underpayment for a year to which a loss, deduction or credit is carried, which portion is attributable to negligence or disregard of rules or regulations in the year in which the carryback or carryover of the loss, deduction or credit arises (the "loss or credit year").

(2) *Transition rule for carrybacks to pre-1990 years.* A 20 percent penalty under section 6662(b)(1) is imposed on any portion of an underpayment for a carryback year, the return for which is due (without regard to extensions) before January 1, 1990, if—

(i) That portion is attributable to negligence or disregard of rules or regulations in a loss or credit year; and

(ii) The return for the loss or credit year is due (without regard to extensions) after December 31, 1989.

(3) *Example.* The following example illustrates the provisions of paragraph (d) of this section. This example does not take into account the reasonable cause exception under § 1.6664–4.

Example. Corporation M is a C corporation. In 1990, M had a loss of $200,000 before taking into account a deduction of $350,000 that M claimed as an expense in careless disregard of the capitalization requirements of section 263 of the Code. M failed to make adequate disclosure of the item for 1990. M reported a $550,000 loss for 1990 and carried back the loss to 1987 and 1988. M had reported taxable income of $400,000 for 1987 and $200,000 for 1988, before application of the carryback. The carryback eliminated all of M's taxable income for 1987 and $150,000 of taxable income for 1988. After disallowance of the $350,000 expense deduction and allowance of a $35,000 depreciation deduction with respect to the capitalized amount, the correct loss for 1990 was determined to be $235,000. Because there is no underpayment for 1990, the penalty for negligence or disregard of rules or regulations does not apply for 1990. However, as a result of the 1990 adjustments, the loss carried back to 1987 is reduced from $550,000 to $235,000. After application of the $235,000 carryback, M has taxable income of $165,000 for 1987 and $200,000 for 1988. This adjustment results in underpayments for 1987 and 1988 that are attributable to the disregard of rules or regulations on the 1990 return. Therefore, the 20 percent penalty rate applies to the 1987 and 1988 underpayments attributable to the disallowed carryback.

§ 1.6662–4 Substantial understatement of income tax.

(a) *In general.* If any portion of an underpayment, as defined in section 6664(a) and § 1.6664–2, of any income tax imposed under subtitle A of the Code that is required to be shown on a return is attributable to a substantial understatement of such income tax, there is added to the tax an amount equal to 20 percent of such portion. Except in the case of any item attributable to a tax shelter (as defined in paragraph (g)(2) of this section), an understatement is reduced by the portion of the understatement that is attributable to the tax treatment of an item for which there is substantial authority, or with respect to which there is adequate disclosure. General rules for determining the amount of an understatement are set forth in paragraph (b) of this section and more

VOL 56 ISS 251 DEC 31 1991 UMI

specific rules in the case of carrybacks and carryovers are set forth in paragraph (c) of this section. The rules for determining when substantial authority exists are set forth in § 1.6662–4(d). The rules for determining when there is adequate disclosure are set forth in § 1.6662–4 (e) and (f). This penalty does not apply to the extent that the reasonable cause and good faith exception to this penalty set forth in § 1.6664–4 applies.

(b) *Definitions and computational rules*—(1) *Substantial.* An understatement (as defined in paragraph (b)(2) of this section) is "substantial" if it exceeds the greater of—

(i) 10 percent of the tax required to be shown on the return for the taxable year (as defined in paragraph (b)(3) of this section); or

(ii) $5,000 ($10,000 in the case of a corporation other than an S corporation (as defined in section 1361(a)(1)) or a personal holding company (as defined in section 542)).

(2) *Understatement.* Except as provided in paragraph (c)(2) of this section (relating to special rules for carrybacks), the term "understatement" means the excess of—

(i) The amount of the tax required to be shown on the return for the taxable year (as defined in paragraph (b)(3) of this section), over

(ii) The amount of the tax imposed which is shown on the return for the taxable year (as defined in paragraph (b)(4) of this section), reduced by any rebate (as defined in paragraph (b)(5) of this section).

The definition of understatement also may be expressed as—

$$\text{Understatement} = X - (Y - Z)$$

where X = the amount of the tax required to be shown on the return; Y = the amount of the tax imposed which is shown on the return; and Z = any rebate.

(3) *Amount of the tax required to be shown on the return.* The "amount of the tax required to be shown on the return" for the taxable year has the same meaning as the "amount of income tax imposed" as defined in § 1.6664–2(b).

(4) *Amount of the tax imposed which is shown on the return.* The "amount of the tax imposed which is shown on the return" for the taxable year has the same meaning as the "amount shown as the tax by the taxpayer on his return," as defined in § 1.6664–2(c), except that—

(i) There is no reduction for the excess of the amount described in § 1.664–2(c)(1)(i) over the amount described in § 1.6664–2(C)(1)(ii), and

(ii) The tax liability shown by the taxpayer on his return is recomputed as if the following items had been reported properly:

(A) Items (other than tax shelter items as defined in § 1.6662–4(g)(3)) for which there is substantial authority for the treatment claimed (as provided in § 1.6662–4(d)).

(B) Items (other than tax shelter items as defined in § 1.6662–4(g)(3)) with respect to which there is adequate disclosure (as provided in § 1.6662–4 (e) and (f)).

(C) Tax shelter items (as defined in § 1.6662–4(g)(3)) for which there is substantial authority for the treatment claimed (as provided in § 1.6662–4(d)), and with respect to which the taxpayer reasonably believed that the tax treatment of the items was more likely than not the proper tax treatment (as provided in § 1.6662–4(g)(4)).

(5) *Rebate.* The term *rebate* has the meaning set forth in § 1.6664–2(e), except that—

(i) "Amounts not so shown previously assessed (or collected without assessment)" includes only amounts not so shown previously assessed (or collected without assessment) as a deficiency, and

(ii) The amount of the rebate is determined as if any items to which the rebate is attributable that are described in paragraph (b)(4) of this section had received the proper tax treatment.

(6) *Examples.* The following examples illustrate the provisions of paragraph (b) of this section. These examples do not take into account the reasonable cause exception under § 1.664–4:

Example 1. In 1990, Individual A, a calendar year taxpayer, files a return for 1989, which shows taxable income of $18,200 and tax liability of $2,734. Subsequent adjustments on audit for 1989 increase taxable income to $51,500 and tax liability to $12,339. There was substantial authority for an item resulting in an adjustment that increases taxable income by $5,300. The item is not a tax shelter item. In computing the amount of the understatement, the amount of tax shown on A's return is determined as if the item for which there was substantial authority had been given the proper tax treatment. Thus, the amount of tax that is treated as shown on A's return is $4,176, i.e., the tax on $23,500 ($18,200 taxable income actually shown on A's return plus $5,300, the amount of the adjustment for which there was substantial authority). The amount of the understatement is $8,163, i.e., $12,339 (the amount of tax required to be shown) less $4,176 (the amount of tax treated as shown on A's return after adjustment for the item for which there was substantial authority). Because the $8,163 understatement exceeds the greater of 10 percent of the tax required to be shown on the return for the year, i.e., $1,234 ($12,339 × .10) or $5,000, A has a substantial understatement of income tax for the year.

Example 2. Individual B, a calendar year taxpayer, files a return for 1990 that fails to include income reported on an information return, Form 1099, that was furnished to B. The Service detects this omission through its document matching program and assesses $3,000 in unreported tax liability. B's return is later examined and as a result of the examination the Service makes an adjustment to B's return of $4,000 in additional tax liability. Assuming there was neither substantial authority nor adequate disclosure with respect to the items adjusted, there is an understatement of $7,000 with respect to B's return. There is also an underpayment of $7,000. (See § 1.6664–2.) The amount of the understatement is not reduced by imposition of a negligence penalty on the $3,000 portion of the underpayment that is attributable to the unreported income. However, if the Services does impose the negligence penalty on this $3,000 portion, the Service may only impose the substantial understatement penalty on the remaining $4,000 portion of the underpayment. (See § 1.6662–2(c), which prohibits stacking of accuracy-related penalty components.)

(c) *Special rules in the case of carrybacks and carryovers*—(1) *In general.* The penalty for a substantial understatement of income tax applies to any portion of an underpayment for a year to which a loss, deduction or credit is carried that is attributable to a "tainted item" for the year in which the carryback or carryover of the loss, deduction or credit arises (the "loss or credit year"). The determination of whether an understatement is substantial for a carryback or carryover year is made with respect to the return of the carryback or carryover year. "Tainted items" are taken into account with items arising in a carryback or carryover year to determine whether the understatement is substantial for that year.

(2) *Understatements for carryback years not reduced by amount of carrybacks.* The amount of an understatement for a carryback year is not reduced on account of a carryback of a loss, deduction or credit to that year.

(3) *Tainted items defined*—(i) *In general.* Except in the case of a tax shelter item (as defined in paragraph (g)(3) of this section), a "tainted item" is any item for which there is neither substantial authority nor adequate disclosure with respect to the loss or credit year.

(ii) *Tax shelter items.* In the case of a tax shelter item (as defined in paragraph (g)(3) of this section), a "tainted item" is any item for which there is not, with respect to the loss or credit year, both substantial authority and a reasonable belief that the tax treatment is more likely than not the proper treatment.

(4) *Transition rule for carrybacks to pre-1990 years.* A 20 percent penalty under section 6662(b)(2) is imposed on any portion of an underpayment for a carryback year, the return for which is due (without regard to extensions) before January 1, 1990, if—

(i) That portion is attributable to one or more "tainted items" (as defined in paragraph (c)(3) of this section) arising in a loss or credit year; and

(ii) The return for the loss or credit year is due (without regard to extensions) after December 31, 1989.

The preceding sentence applies only if the understatement in the carryback year is substantial. See *Example 2* in paragraph (c)(5) of this section.

(5) *Examples.* The following examples illustrate the rules of paragraph (c) of this section regarding carrybacks and carryovers. These examples do not take into account the reasonable cause exception under § 1.6664–4.

Example 1. (i) Corporation N, a calendar year taxpayer, is a C corporation. N was formed on January 1, 1987, and timely filed the following income tax returns:

[In dollars]

	Tax Year			
	1987	1988	1989	1990 (before NOLCO)
Taxable income	30,000	100,000	[300,000]	50,000
Tax liability	4,757	22,250		7,500

(ii) During 1990, N files Form 1139, Corporation Application for Tentative Refund, to carry back the NOL generated in 1989 (NOLCB). N received refunds of $4,575 for 1987 and $22,250 for 1988.

(iii) For tax year 1990, N carries over $50,000 of the 1989 loss to offset $50,000 of income earned in 1990 and reduce taxable income to zero. N would have reported $7,500 of tax liability for 1990 if it were not for use of the net operating loss carryover (NOLCO). N assumes there is a remaining NOLCO of $120,000 to be applied for tax year 1991.

(iv) In June 1991, the Service completes its examination of the 1989 loss year return and makes the following adjustment:

Taxable income per 1989 return	($300,000)
Adjustment: Unreported income	310,000
Corrected taxable income	10,000
Corrected tax liability	1,500

(v) There was not substantial authority for N's treatment of the items comprising the 1989 adjustment and N did not make adequate disclosure.

(vi) As a result of the adjustment to the 1989 return, N had an understatement of $4,575 for tax year 1987; an understatement of $22,250 for tax year 1988; an understatement of $1,500 for tax year 1989; and an understatement of $7,500 for tax year 1990. Only the $22,250 understatement for 1988 is substantial understatement, i.e., it exceeds the greater of (a) $2,225 (10 percent of tax required to be shown on the return for the taxable year (.10 X $22,250)) or (b) $10,000. The underpayment for 1988 is subject to a penalty rate of 20 percent.

Example 2. The facts are the same as in *Example 1*, except that in addition to examining the 1989 return, the Service also examines the 1987 return and makes an adjustment that results in an understatement. (This adjustment is unrelated to the adjustment on the 1987 return for the disallowance of the NOLCB from 1989.) If the understatement resulting from the adjustment to the 1987 return, when combined with the understatement resulting from the disallowance of the NOLCB from 1989, exceeds the greater of (a) 10 percent of the tax required to be shown on the return for 1987 or (b) $10,000, the underpayment for 1987 will also be subject to a substantial understatement penalty. The portion of the underpayment attributable to the adjustment unrelated to the disallowance of the NOLCB will be subject to a penalty rate of 25 percent under former section 6661. The portion of the underpayment attributable to the disallowance of the NOLCB will be subject to a penalty rate of 20 percent under section 6662.

Example 3. Individual P, a calendar year single taxpayer, files his 1990 return reporting taxable income of $10,000 and a tax liability of $1,504. An examination of the 1990 return results in an adjustment for unreported income of $25,000. There was not substantial authority for P's failure to report the income, and P did not make adequate disclosure with respect to the unreported income. P's correct tax liability for 1990 is determined to be $7,279, resulting in an understatement of $5,775 (the difference between the amount of tax required to be shown on the return ($7,279) and the tax shown on the return ($1,504)). Because the understatement exceeds the greater of (a) $728 (10 percent of the tax required to be shown on the return (.10 × $7,279)) or (b) $5,000, the understatement is substantial. Subsequently, P files his 1993 return showing a net operating loss. The loss is carried back to his 1990 return, reducing his taxable income for 1990 to zero. However, the amount of the understatement for 1990 is not reduced on account of the NOLCB to that year. P is subject to the 20 percent penalty rate under section 6662 on the underpayment attributable to the substantial understatement for 1990, notwithstanding that the tax required to be shown on the return for that year, after application of the NOLCB, is zero.

(d) *Substantial authority*—(1) *Effect of having substantial authority.* If there is substantial authority for the tax treatment of an item, the item is treated as if it were shown properly on the return for the taxable year in computing the amount of the tax shown on the return. Thus, for purposes of section 6662(d), the tax attributable to the item is not included in the understatement for that year. (For special rules relating to tax shelter items see § 1.6662–4(g).)

(2) *Substantial authority standard.* The substantial authority standard is an objective standard involving an analysis of the law and application of the law to relevant facts. The substantial authority standard is less stringent than the "more likely than not" standard (the standard that is met when there is a greater than 50-percent likelihood of the position being upheld), but more stringent than the reasonable basis standard (the standard which, if satisfied, generally will prevent imposition of the penalty under section 6662(b)(1) for negligence). A return position that is arguable, but fairly unlikely to prevail in court, satisfies the reasonable basis standard, but not the substantial authority standard. The possibility that a return will not be audited or, if audited, that an item will not be raised on audit, is not relevant in determining whether the substantial authority standard (or the reasonable basis standard) is satisfied.

(3) *Determination of whether substantial authority is present*—(i) *Evaluation of authorities.* There is substantial authority for the tax treatment of an item only if the weight of the authorities supporting the treatement is substantial in relation to the weight of authorities supporting contrary treatment. All authorities relevant to the tax treatment of an item, including the authorities contrary to the treatment, are taken into account in determining whether substantial authority exists. The weight of authorities is determined in light of the pertinent facts and circumstances in the manner prescribed by paragraph (d)(3)(ii) of this section. There may be substantial authority for more than one position with respect to the same item. Because the substantial authority standard is an objective standard, the taxpayer's belief that there is substantial authority for the tax treatment of an item is not relevant in determining whether there is substantial authority for that treatment.

(ii) *Nature of analysis.* The weight accorded an authority depends on its relevance and persuasiveness, and the type of document providing the authority. For example, a case or revenue ruling having some facts in common with the tax treatment at issue is not particularly relevant if the authority is materially distinguishable on its facts, or is otherwise inapplicable to the tax treatment at issue. An authority that merely states a conclusion ordinarily is less persuasive than one that reaches its conclusion by cogently relating the applicable law to pertinent

VOL

1991
UMI

facts. The weight of an authority from which information has been deleted, such as a private letter ruling, is diminished to the extent that the deleted information may have affected the authority's conclusions. The types of document also must be considered. For example, a revenue ruling is accorded greater weight than a private letter ruling addressing the same issue. An older private letter ruling, technical advice memorandum, general counsel memorandum or action on decision generally must be accorded less weight than a more recent one. Any document described in the preceding sentence that is more than 10 years old generally is accorded very little weight. However, the persuasiveness and relevance of a document, viewed in light of subsequent developments, should be taken into account along with the age of the document. There may be substantial authority for the tax treatment of an item despite the absence of certain types of authority. Thus, a taxpayer may have substantial authority for a position that is supported only by a well-reasoned construction of the applicable statutory provision.

(iii) *Types of authority.* Except in cases described in paragraph (d)(3)(iv) of this section concerning written determinations, only the following are authority for purposes of determining whether there is substantial authority for the tax treatment of an item: Applicable provisions of the Internal Revenue Code and other statutory provisions; proposed, temporary and final regulations construing such statues; revenue rulings and revenue procedures; tax treaties and regulations thereunder, and Treasury Department and other official explanations of such treaties; court cases; congressional intent as reflected in committee reports, joint explanatory statements of managers included in conference committee reports, and floor statements made prior to enactment by one of a bill's managers; General Explanations of tax legislation prepared by the Joint Committee on Taxation (the Blue Book); private letter rulings and technical advice memoranda issued after October 31, 1976; actions on decisions and general counsel memoranda issued after March 12, 1981 (as well as general counsel memoranda published in pre-1955 volumes of the Cumulative Bulletin); Internal Revenue Service information or press releases; and notices, announcements and other administrative pronouncements published by the Service in the Internal Revenue Bulletin. Conclusions reached in treatises, legal periodicals, legal opinions or opinions rendered by tax professionals are not authority. The authorities underlying such expressions of opinion where applicable to the facts of a particular case, however, may give rise to substantial authority for the tax treatment of an item. Notwithstanding the preceding list of authorities, an authority does not continue to be an authority to the extent it is overruled or modified, implicitly or explicitly, by a body with the power to overrule or modify the earlier authority. In the case of court decisions, for example, a district court opinion on an issue is not an authority if overruled or reversed by the United States Court of Appeals for such district. However, a Tax Court opinion is not considered to be overruled or modified by a court of appeals to which a taxpayer does not have a right of appeal, unless the Tax Court adopts the holding of the court of appeals. Similarly, a private letter ruling is not authority if revoked or if inconsistent with a subsequent proposed regulation, revenue ruling or other administrative pronouncement published in the Internal Revenue Bulletin.

(iv) *Special rules*—(A) *Written determinations.* There is substantial authority for the tax treatment of an item by a taxpayer if the treatment is supported by the conclusion of a ruling or a determination letter (as defined in § 301.6110–2 (d) and (e)) issued to the taxpayer, by the conclusion of a technical advice memorandum in which the taxpayer is named, or by an affirmative statement in a revenue agent's report with respect to a prior taxable year of the taxpayer ("written determinations"). The preceding sentence does not apply, however, if—

(*1*) There was a misstatement or omission of a material fact or the facts that subsequently develop are materially different from the facts on which the written determination was based, or

(*2*) The written determination was modified or revoked after the date of issuance by—

(*i*) A notice to the taxpayer to whom the written determination was issued,

(*ii*) The enactment of legislation or ratification of a tax treaty,

(*iii*) A decision of the United States Supreme Court,

(*iv*) The issuance of temporary or final regulations, or

(*v*) The issuance of a revenue ruling, revenue procedure, or other statement published in the Internal Revenue Bulletin.

Except in the case of a written determination that is modified or revoked on account of § 1.6662–4(d)(3)(iv)(A)(*1*), a written determination that is modified or revoked as described in § 1.6662–4(d)(3)(iv)(A)(*2*) ceases to be authority on the date, and to the extent, it is so modified or revoked. See section 6404(f) for rules which require the Secretary to abate a penalty that is attributable to erroneous written advice furnished to a taxpayer by an officer or employee of the Internal Revenue Service.

(B) *Taxpayer's jurisdiction.* The applicability of court cases to the taxpayer by reason of the taxpayer's residence in a particular jurisdiction is not taken into account in determining whether there is substantial authority for the tax treatment of an item. Notwithstanding the preceding sentence, there is substantial authority for the tax treatment of an item if the treatment is supported by controlling precedent of a United States Court of Appeals to which the taxpayer has a right of appeal with respect to the item.

(C) *When substantial authority determined.* There is substantial authority for the tax treatment of an item if there is substantial authority at the time the return containing the item is filed or there was substantial authority on the last day of the taxable year to which the return relates.

(v) *Substantial authority for tax returns due before January 1, 1990.* There is substantial authority for the tax treatment of an item on a return that is due (without regard to extensions) after December 31, 1982 and before January 1, 1990, if there is substantial authority for such treatment under either the provisions of paragraph (d)(3)(iii) of this section (which set forth an expanded list of authorities) or of § 1.6661–3(b)(2) (which set forth a narrower list of authorities). Under either list of authorities, authorities both for and against the position must be taken into account.

(e) *Disclosure of certain information*—(1) *Effect of adequate disclosure.* Items for which there is adequate disclosure as provided in this paragraph (e) and in paragraph (f) of this section are treated as if such items were shown properly on the return for the taxable year in computing the amount of the tax shown on the return. Thus, for purposes of section 6662(d), the tax attributable to such items is not included in the understatement for that year.

(2) *Circumstances where disclosure will not have an effect.* The rules of paragraph (e)(1) of this section do not apply where the item or position on the return is—

(i) Frivolous (as defined in § 1.6662–3(b)(3));

(ii) Attributable to a tax shelter (as defined in section 6662(d)(2)(C)(ii) and paragraph (g)(2) of this section); or

(iii) Not properly substantiated, or the taxpayer failed to keep adequate books and records with respect to the item or position.

(f) *Method of making adequate disclosure*—(1) *Disclosure statement.* Disclosure is adequate with respect to an item (or group of similar items, such as amounts paid or incurred for supplies by a taxpayer engaged in business) or a position on a return if the disclosure is made on a properly completed form attached to the return or to a qualified amended return (as defined in § 1.6664–2(c)(3)) for the taxable year. In the case of an item or position other than one that is contrary to a regulation, disclosure must be made on Form 8275 (Disclosure Statement); in the case of a position contrary to a regulation, disclosure must be made on Form 8275–R (Regulation Disclosure Statement).

(2) *Disclosure on return.* The Commissioner may by annual revenue procedure (or otherwise) prescribe the circumstances under which disclosure of information on a return (or qualified amended return) in accordance with applicable forms and instructions is adequate. If the revenue procedure does not include an item, disclosure is adequate with respect to that item only if made on a properly completed Form 8275 or 8275–R, as appropriate, attached to the return for the year or to a qualified amended return.

(3) *Recurring item.* Disclosure with respect to a recurring item, such as the basis of recovery property, must be made for each taxable year in which the item is taken into account.

(4) *Carrybacks and carryovers.* Disclosure is adequate with respect to an item which is included in any loss, deduction or credit that is carried to another year only if made in connection with the return (or qualified amended return) for the taxable year in which the carryback or carryover arises (the "loss or credit year"). Disclosure is not also required in connection with the return for the taxable year in which the carryback or carryover is taken into account.

(5) *Pass-through entities.* Disclosure in the case of items attributable to a pass-through entity (pass-through items) is made with respect to the return of the entity, except as provided in this paragraph (f)(5). Thus, disclosure in the case of pass-through items must be made on a Form 8275 or 8275–R, as appropriate, attached to the return (or qualified amended return) of the entity, or on the entity's return in accordance with the revenue procedure described in paragraph (f)(2) of this section, if applicable. A taxpayer (i.e., partner, shareholder, beneficiary, or holder of a residual interest in a REMIC) also may make adequate disclosure with respect to a pass-through item, however, if the taxpayer files a properly completed Form 8275 or 8275–R, as appropriate, in duplicate, one copy attached to the taxpayer's return (or qualified amended return) and the other copy filed with the Internal Revenue Service Center with which the return of the entity is required to be filed. Each Form 8275 or 8275–R, as appropriate, filed by the taxpayer should relate to the pass-through items of only one entity. For purposes of this paragraph (f)(5), a pass-through entity is a partnership, S corporation (as defined in section 1361(a)(1)), estate, trust, regulated investment company (as defined in section 851(a)), real estate investment trust (as defined in section 856(a)), or real estate mortgage investment conduit ("REMIC") (as defined in section 860D(a)).

(g) *Items relating to tax shelters*—(1) *In general.* Tax shelter items (as defined in paragraph (g)(3) of this section) are treated as if such items were shown properly on the return for a taxable year in computing the amount of the tax shown on the return, and thus the tax attributable to such items is not included in the understatement for the year, if—

(i) There is substantial authority (as provided in paragraph (d) of this section) for the tax treatment of that item; and

(ii) The taxpayer reasonably believed at the time the return was filed that the tax treatment of that item was more likely than not the proper treatment (see paragraph (g)(4) of this section).

Disclosure made with respect to a tax shelter item does not affect the amount of an understatement.

(2) *Tax shelter*—(i) *In general.* For purposes of section 6662(d), the term "tax shelter" means—

(A) A partnership or other entity (such as a corporation or trust),

(B) An investment plan or arrangement, or

(C) Any other plan or arrangement,

if the principal purpose of the entity, plan or arrangement, based on objective evidence, is to avoid or evade Federal income tax. The principal purpose of an entity, plan or arrangement is to avoid or evade Federal income tax if that purpose exceeds any other purpose. Typical of tax shelters are transactions structured with little or no motive for the realization of economic gain, and transactions that utilize the mismatching of income and deductions, overvalued assets or assets with values subject to substantial uncertainty, certain nonrecourse financing, financing techniques that do not conform to standard commercial business practices, or the mischaracterization of the substance of the transaction. The existence of economic substance does not of itself establish that a transaction is not a tax shelter if the transaction includes other characteristics that indicate it is a tax shelter.

(ii) *Principal purpose.* The principal purpose of an entity, plan or arrangement is not to avoid or evade Federal income tax if the entity, plan or arrangement has as its purpose the claiming of exclusions from income, accelerated deductions or other tax benefits in a manner consistent with the statute and Congressional purpose. For example, an entity, plan or arrangement does not have as its principal purpose the avoidance or evasion of Federal income tax solely as a result of the following uses of tax benefits provided by the Internal Revenue Code: the purchasing or holding of an obligation bearing interest that is excluded from gross income under section 103; taking an accelerated depreciation allowance under section 168; taking the percentage depletion allowance under section 613 or section 613A; deducting intangible drilling and development costs as expenses under section 263(c); establishing a qualified retirement plan under sections 401–409; claiming the possession tax credit under section 936; or claiming tax benefits available by reason of an election under 992 to be taxed as a domestic international sales corporation ("DISC"), under section 927(f)(1) to be taxed as a foreign sales corporation ("FSC"), or under section 1362 to be taxed as an S corporation.

(3) *Tax shelter item.* An item of income, gain, loss, deduction or credit is a "tax shelter item" if the item is directly or indirectly attributable to the principal purpose of a tax shelter to avoid or evade Federal income tax. Thus, if a partnership is established for the principal purpose of avoiding or evading Federal income tax by acquiring and overstating the basis of property for purposes of claiming accelerated depreciation, the depreciation with respect to the property is a tax shelter item. However, a deduction claimed in connection with a separate transaction carried on by the same partnership is not a tax shelter item if the transaction does not constitute a plan or arrangement the principal purpose of which is to avoid or evade tax.

(4) *Reasonable belief.* For purposes of section 6662(d), a taxpayer is considered reasonably to believe that the tax treatment of an item is more likely than not the proper tax treatment if—

(i) The taxpayer analyzes the pertinent facts and authorities in the manner described in paragraph (d)(3)(ii) of this section and, in reliance upon that analysis, reasonably concludes that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service; or

(ii) The taxpayer in good faith relies on the opinion of a professional tax advisor, if the opinion is based on the tax advisor's analysis of the pertinent facts and authorities in the manner described in paragraph (d)(3)(ii) of this section and unambiguously states that the tax advisor concludes that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service.

(5) *Pass-through entities.* In the case of tax shelter items attributable to a pass-through entity, the actions described in paragraphs (g)(4)(i) and (g)(4)(ii) of this section, if taken by the entity, are deemed to have been taken by the taxpayer and are considered in determining whether the taxpayer reasonably believed that the tax treatment of an item was more likely than not the proper tax treatment.

§ 1.6662–5 Substantial and gross valuation misstatements under chapter 1.

(a) *In general.* If any portion of an underpayment, as defined in section 6664(a) and § 1.6664–2, of any income tax imposed under chapter 1 of subtitle A of the Code that is required to be shown on a return is attributable to a substantial valuation misstatement under chapter 1 ("substantial valuation misstatement"), there is added to the tax an amount equal to 20 percent of such portion. Section 6662(h) increases the penalty to 40 percent in the case of a gross valuation misstatement under chapter 1 ("gross valuation misstatement"). No penalty under section 6662(b)(3) is imposed, however, on a portion of an underpayment that is attributable to a substantial or gross valuation misstatement unless the aggregate of all portions of the underpayment attributable to substantial or gross valuation misstatements exceeds the applicable dollar limitation ($5,000 or $10,000), as provided in section 6662(e)(2) and paragraphs (b) and (f)(2) of this section. This penalty also does not apply to the extent that the reasonable cause and good faith exception to this penalty set forth in § 1.6664–4 applies. There is no disclosure exception to this penalty.

(b) *Dollar limitation.* No penalty may be imposed under section 6662(b)(3) for a taxable year unless the portion of the underpayment for that year that is attributable to substantial or gross valuation misstatements exceeds $5,000 $10,000 in the case of a corporation other than an S corporation (as defined in section 1361(a)(1)) or a personal holding company (as defined in section 542)). This limitation is applied separately to each taxable year for which there is a substantial or gross valuation misstatement.

(c) *Special rules in the case of carrybacks and carryovers*—(1) *In general.* The penalty for a substantial or gross valuation misstatement applies to any portion of an underpayment for a year to which a loss, deduction or credit is carried that is attributable to a substantial or gross valuation misstatement for the year in which the carryback or carryover of the loss, deduction or credit arises (the "loss or credit year"), provided that the applicable dollar limitation set forth in section 6662(e)(2) is satisfied in the carryback or carryover year.

(2) *Transition rule for carrybacks to pre-1990 years.* The penalty under section 6662(b)(3) is imposed on any portion of an underpayment for a carryback year, the return for which is due (without regard to extensions) before January 1, 1990, if—

(i) That portion is attributable to a substantial or gross valuation misstatement for a loss or credit year; and

(ii) The return for the loss or credit year is due (without regard to extensions) after December 31, 1989.

The preceding sentence applies only if the underpayment for the carryback year exceeds the applicable dollar limitation ($5,000, or $10,000 for most corporations). See *Example 3* in paragraph (d) of this section.

(d) *Examples.* The following examples illustrate the provisions of paragraphs (b) and (c) of this section. These examples do not take into account the reasonable cause exception under § 1.6664–4.

Example 1. Corporation Q is a C corporation. In 1990, the first year of its existence, Q had taxable income of $200,000 without considering depreciation of a particular asset. On its calendar year 1990 return, Q overstated its basis in this asset by an amount that caused a substantial valuation misstatement. The overstated basis resulted in depreciation claimed of $350,000, which was $250,000 more than the $100,000 allowable. Thus, on its 1990 return, Q showed a loss of $150,000. In 1991, Q had taxable income of $450,000 before application of the loss carryover, and Q claimed a carryover loss deduction under section 172 of $150,000, resulting in taxable income of $300,000 for 1991. Upon audit of the 1990 return, the basis of the asset was corrected, resulting in an adjustment of $250,000. For 1990, the underpayment resulting from the $100,000 taxable income (−$150,000+$250,000) is attributable to the valuation misstatement. Assuming the underpayment resulting from the $100,000 taxable income exceeds the $10,000 limitation, the penalty will be imposed in 1990. For 1991, the elimination of the loss carryover results in additional taxable income of $150,000. The underpayment for 1991 resulting from that adjustment is also attributable to the substantial valuation misstatement on the 1990 return. Assuming the underpayment resulting from the $150,000 additional taxable income for 1991 exceeds the $10,000 limitation, the substantial valuation misstatement penalty also will be imposed for that year.

Example 2. (i) Corporation T is a C corporation. In 1990, the first year of its existence, T had a loss of $3,000,000 without considering depreciation of its major asset. On its calendar year 1990 return, T overstated its basis in this asset in an amount that caused a substantial valuation misstatement. This overstatement resulted in depreciation claimed of $3,500,000, which was $2,500,000 more than the $1,000,000 allowable. Thus, on its 1990 return, T showed a loss of $6,500,000. In 1991, T had taxable income of $4,500,000 before application of the carryover loss, but claimed a carryover loss deduction under section 172 in the amount of $4,500,000, resulting in taxable income of zero for that year and leaving a $2,000,000 carryover available. Upon audit of the 1990 return, the basis of the asset was corrected, resulting in an adjustment of $2,500,000.

(ii) For 1990, the underpayment is still zero (−$6,500,000+$2,500,000=−$4,000,000). Thus, the penalty does not apply in 1990. The loss for 1990 is reduced to $4,000,000.

(iii) For 1991, there is additional taxable income of $500,000 as a result of the reduction of the carryover loss ($4,500,000 reported income before carryover loss minus corrected carryover loss of $4,000,000=$500,000). The underpayment for 1991 resulting from reduction of the carryover loss is attributable to the valuation misstatement on the 1990 return. Assuming the underpayment resulting from the $500,000 additional taxable income exceeds the $10,000 limitation, the substantial valuation misstatement penalty will be imposed in 1991.

Example 3. Corporation V is a C corporation. In 1990, V had a loss of $100,000 without considering depreciation of a particular asset which it had fully depreciated in earlier years. V had a depreciable basis in the asset of zero, but on its 1990 calendar year return erroneously claimed a basis in the asset of $1,250,000 and depreciation of $250,000. V reported a $350,000 loss for the year 1990, and carried back the loss to the 1987 and 1988 tax years. V had reported taxable income of $300,000 in 1987 and $200,000 in 1988, before application of the carryback. The $350,000 carryback eliminated all taxable income for 1987, and $50,000 of the taxable income for 1988. After disallowance of the $250,000 depreciation deduction for 1990, V still had a loss of $100,000. Because there is no underpayment for 1990, no valuation misstatement penalty is imposed for 1990. However, as a result of the 1990 depreciation adjustment, the carryback to 1987 is reduced from $350,000 to $100,000. After absorption of the $100,000 carryback, V has taxable income of $200,000 for 1987. This adjustment results in an underpayment for 1987 that is attributable to the valuation misstatement on the 1990 return. The valuation misstatement for 1990 is a gross valuation misstatement because the correct adjusted basis of the depreciated asset was zero. (See paragraph (e)(2) of this section.) Therefore, the 40 percent penalty rate applies to the 1987 underpayment attributable to the 1990 misstatement, provided that this underpayment exceeds $10,000. The adjustment also results in the elimination of any loss carryback to 1988 resulting in an increase in taxable income for 1988 of $50,000. Assuming the underpayment resulting from this additional $50,000 of income exceeds $10,000, the gross valuation misstatement penalty is imposed on the underpayment for 1988.

(e) *Definitions*—(1) *Substantial valuation misstatement.* There is a substantial valuation misstatement if the value or adjusted basis of any property claimed on a return of tax imposed under chapter 1 is 200 percent or more of the correct amount.

(2) *Gross valuation misstatement.* There is a gross valuation misstatement if the value or adjusted basis of any property claimed on a return of tax imposed under chapter 1 is 400 percent or more of the correct amount.

(3) *Property.* For purposes of this section, the term "property" refers to both tangible and intangible property. Tangible property includes property such as land, buildings, fixtures and inventory. Intangible property includes property such as goodwill, covenants not to compete, leaseholds, patents, contract rights, debts and choses in action.

(f) *Multiple valuation misstatements on a return*—(1) *Determination of whether valuation misstatements are substantial or gross.* The determination of whether there is a substantial or gross valuation misstatement on a return is made on a property-by-property basis. Assume, for example, that property A has a value of 60 but a taxpayer claims a value of 110, and that property B has a value of 40 but the taxpayer claims a value of 100. Because the claimed and correct values are compared on a property-by-property basis, there is a substantial valuation misstatement with respect to property B, but not with respect to property A, even though the claimed values (210) are 200 percent or more of the correct values (100) when compared on an aggregate basis.

(2) *Application of dollar limitation.* For purposes of applying the dollar limitation set forth in section 6662(e)(2), the determination of the portion of an underpayment that is attributable to a substantial or gross valuation misstatement is made by aggregating all portions of the underpayment attributable to substantial or gross valuation misstatements. Assume, for example, that the value claimed for property C on a return is 250 percent of the correct value, and that the value claimed for property D on the return is 400 percent of the correct value. Because the portions of an underpayment that are attributable to a substantial or gross valuation misstatement on a return are aggregated in applying the dollar limitation, the dollar limitation is satisfied if the portion of the underpayment that is attributable to the misstatement of the value of property C, when aggregated with the portion of the underpayment that is attributable to the misstatement of the value of property D, exceeds $5,000 ($10,000 in the case of most corporations).

(g) *Property with a value or adjusted basis of zero.* The value or adjusted basis claimed on a return of any property with a correct value or adjusted basis of zero is considered to be 400 percent or more of the correct amount. There is a gross valuation misstatement with respect to such property, therefore, and the applicable penalty rate is 40 percent.

(h) *Pass-through entities*—(1) *In general.* The determination of whether there is a substantial or gross valuation misstatement in the case of a return of a pass-through entity (as defined in § 1.6662–4(f)(5)) is made at the entity level. However, the dollar limitation ($5,000 or $10,000, as the case may be) is applied at the taxpayer level (*i.e.*, with respect to the return of the shareholder, partner, beneficiary, or holder of a residual interest in a REMIC).

(2) *Example.* The rules of paragraph (h)(1) of this section may be illustrated by the following example.

Example. Partnership P has two partners, individuals A and B. P claims a $40,000 basis in a depreciable asset which, in fact, has a basis of $15,000. The determination that there is a substantial valuation misstatement is made solely with reference to P by comparing the $40,000 basis claimed by P with P's correct basis of $15,000. However, the determination of whether the $5,000 threshold for application of the penalty has been reached is made separately for each partner. With respect to partner A, the penalty will apply if the portion of A's underpayment attributable to the passthrough of the depreciation deduction, when aggregated with any other portions of A's underpayment also attributable to substantial or gross valuation misstatements, exceeds $5,000 (assuming there is not reasonable cause for the misstatements (*see* § 1.6664–4(c)).

(i) [Reserved]

(j) *Transactions between persons described in section 482 and net section 482 transfer price adjustments.* [Reserved]

(k) *Returns affected.* Except in the case of rules relating to transactions between persons described in section 482 and net sections 482 transfer price adjustments, the provisions of section 6662(b)(3) apply to returns due (without regard to extensions of time to file) after December 31, 1989, notwithstanding that the original substantial or gross valuation misstatement occurred on a return that was due (without regard to extensions) before January 1, 1990. Assume, for example, that a calendar year corporation claimed a deduction on its 1990 return for depreciation of an asset with a basis of X. Also assume that it had reported the same basis for computing depreciation on its returns for the preceding 5 years and that the basis shown on the return each year was 200 percent or more of the correct basis. The corporation may be subject to a penalty for substantial valuation misstatements on its 1989 and 1990 returns, even though the original misstatement occurred prior to the effective date of sections 6662(b)(3) and (e).

§ 1.6664–0 Table of contents.

This section lists the captions in §§ 1.6664–1 through 1.6664–4.

§ 1.6664–1 Accuracy-related and fraud penalties; definitions and special rules.

(a) *In general.* Section 6664(a) defines the term "underpayment" for purposes of the accuracy-related penalty under section 6662 and the fraud penalty under section 6663. The definition of "underpayment" of income taxes imposed under subtitle A is set forth in § 1.6664–2. Ordering rules for computing the total amount of accuracy-related and fraud penalties imposed with respect to a return are set forth in § 1.6664–3. Section 6664(c) provides a reasonable cause and good faith exception to the accuracy-related penalty. Rules relating to the reasonable cause and good faith exception are set forth in § 1.6664–4.

(b) *Effective date.* Sections 1.6664–1 through 1.6664–4 apply to returns the due date of which (determined without regard to extensions of time to file) is after December 31, 1989.

§ 1.6664–2 Underpayment.

(a) *Underpayment defined.* In the case of income taxes imposed under subtitle A, an underpayment for purposes of section 6662, relating to the accuracy-related penalty, and section 6663, relating to the fraud penalty, means the amount by which any income tax imposed under this subtitle (as defined in paragraph (b) of the section) exceeds the excess of—

(1) The sum of—

(i) The amount shown as the tax by the taxpayer on his return (as defined in paragraph (c) of this section), plus

(ii) Amounts not so shown previously assessed (or collected without assessment) (as defined in paragraph (d) of this section), over

(2) The amount of rebates made (as defined in paragraph (e) of this section).

The definition of underpayment also may be expressed as—

Underpayment = $W-(X+Y-Z)$,

where W = the amount of income tax imposed; X = the amount shown as the tax by the taxpayer on his return; Y = amounts not so shown previously assessed (or collected without assessment); and Z = the amount of rebates made.

(b) *Amount of income tax imposed.* For purposes of paragraph (a) of this section, the "amount of income tax imposed" is the amount of tax imposed on the taxpayer under subtitle A for the taxable year, determined without regard to—

(1) The credits for tax withheld under sections 31 (relating to tax withheld on wages) and 33 (relating to tax withheld at source on nonresident aliens and foreign corporations);

(2) Payments of tax or estimated tax by the taxpayer;

(3) Any credit resulting from the collection of amounts assessed under section 6851 as the result of a termination assessment, or section 6861 as the result of a jeopardy assessment; and

(4) Any tax that the taxpayer is not required to assess on the return (such as the tax imposed by section 531 on the accumulated taxable income of a corporation).

(c) *Amount shown as the tax by the taxpayer on his return*—(1) *Defined.* For purposes of paragraph (c) of this section, the "amount shown as the tax by the taxpayer on his return" is the tax liability shown by the taxpayer on his return, determined without regard to the items listed in § 1.6664–2(b) (1), (2), and (3), except that it is reduced by the excess of—

(i) The amounts shown by the taxpayer on his return as credits for tax withheld under section 31 (relating to tax withheld on wages) and section 33 (relating to tax withheld at source on nonresident aliens and foreign corporations), as payments of estimated tax, or as any other payments made by the taxpayer with respect to a taxable year before filing the return for such taxable year, over

(ii) The amounts actually withheld, actually paid as estimated tax, or actually paid with respect to a taxable year before the return is filed for such taxable year.

(2) *Effect of qualified amended return.* The "amount shown as the tax by the taxpayer on his return" includes an amount shown as additional tax on a qualified amended return (as defined in paragraph (c)(3) of this section), except that such amount is not included if it relates to a fraudulent position on the original return.

(3) *Qualified amended return defined.* A qualified amended return is an amended return, or a timely request for an administrative adjustment under section 6227, filed after the due date of the return for the taxable year (determined with regard to extensions of time to file) and before the earliest of—

(i) The time the taxpayer is first contacted by the Internal Revenue Service concerning an examination of the return;

(ii) The time any person described in section 6700(a) (relating to the penalty for promoting abusive tax shelters) is first contacted by the Internal Revenue Service concerning an examination of an activity described in section 6700(a) with respect to which the taxpayer claimed any tax benefit on the return directly or indirectly through the entity, plan or arrangement described in section 6700(a)(1)(A); or

(iii) In the case of a pass-through item (as defined in § 1.6662–4(f)(5)), the time the pass-through entity (as defined in § 1.6662–4(f)(5)) is first contacted by the Internal Revenue Service in connection with an examination of the return to which the pass-through item relates.

A qualified amended return includes an amended return that is filed solely to disclose information pursuant to § 1.6662–3(c) or § 1.6662–4 (e) and (f) and that does not report any additional tax liability.

(4) *Special rule for qualified amended returns.* The Commissioner may by revenue procedure prescribe the manner in which the rules of paragraph (c) of this section regarding qualified amended returns apply to particular classes of taxpayers.

(d) *Amounts not so shown previously assessed (or collected without assessment).* For purposes of paragraph (a) of this section, "amounts not so shown previously assessed" means only amounts assessed before the return is filed that were not shown on the return, such as termination assessments under section 6861 and jeopardy assessments under section 6851 made prior to the filing of the return for the taxable year. For purposes of paragraph (a) of this section, the amount "collected without assessment" is the amount by which the total of the credits allowable under section 31 (relating to tax withheld on wages) and section 33 (relating to tax withheld at source on nonresident aliens and foreign corporations), estimated tax payments, and other payments in satisfaction of tax liability made before the return is filed, exceed the tax shown on the return (provided such excess has not been refunded or allowed as a credit to the taxpayer).

(e) *Rebates.* The term "rebate" means so much of an abatement credit, refund or other repayment, as was made on the ground that the tax imposed was less than the excess of—

(1) The sum of—

(i) The amount shown as the tax by the taxpayer on his return, plus

(ii) Amounts not so shown previously assessed (or collected without assessment), over

(2) Rebates previously made.

(f) *Underpayments for certain carryback years not reduced by amount of carrybacks.* The amount of an underpayment for a taxable year that is attributable to conduct proscribed by sections 6662 or 6663 is not reduced on account of a carryback of a loss, deduction or credit to that year. Such conduct includes negligence or disregard of rules or regulations; a substantial understatement of income tax; and a substantial (or gross) valuation misstatement under chapter 1, provided that the applicable dollar limitation is satisfied for the carryback year.

(g) *Examples.* The following examples illustrate this section:

Example 1. Taxpayer's 1990 return showed a tax liability of $18,000. Taxpayer had no amounts previously assessed (or collected without assessment) and received no rebates of tax. Taxpayer claimed a credit in the amount of $23,000 for income tax withheld under section 3402, which resulted in a refund received of $5,000. It is later determined that the taxpayer should have reported additional income and that the correct tax for the taxable year is $25,500. There is an underpayment of $7,500, determined as follows:

Tax imposed under subtitle A		$25,500
Tax shown on return	$18,000	
Tax previously assessed (or collected without assessment)	None	
Amount of rebates made	None	
Balance		18,000
Underpayment		7,500

Example 2. The facts are the same as in *Example 1* except that the taxpayer failed to claim on the return a credit of $1,500 for income tax withheld. This $1,500 constitutes an amount collected without assessment as defined in paragraph (d) of this section. The underpayment is $6,000, determined as follows:

Tax imposed under subtitle A		$25,500
Tax shown on return	$18,000	
Tax previously assessed (or collected without assessment)	1,500	
Amount of rebates made	None	
Balance		19,500
Underpayment		6,000

Example 3. On Form 1040 filed for tax year 1990, taxpayer reported a tax liability of $10,000, estimated tax payments of $15,000, and received a refund of $5,000. Estimated tax payments actually made with respect to tax year 1990 were only $7,000. For purposes of determining the amount of underpayment subject to a penalty under section 6662 or section 6663, the tax shown on the return is $2,000 (reported tax liability of $10,000 reduced by the overstated estimated tax of $8,000 ($15,000–$7,000)). The underpayment is $8,000, determined as follows:

Tax imposed under subtitle A		$10,000
Tax shown on return	$2,000	
Tax previously assessed (or collected without assessment)	None	
Amount of rebates made	None	
Balance		2,000
Underpayment		8,000

§ 1.6664–3 Ordering rules for determining the total amount of penalties imposed.

(a) *In general.* This section provides rules for determining the order in which adjustments to a return are taken into account for the purpose of computing the total amount of penalties imposed under sections 6662 and 6663, where—

(1) There is at least one adjustment with respect to which no penalty has been imposed and at least one with respect to which a penalty has been imposed, or

(2) There are at least two adjustments with respect to which penalties have been imposed and they have been imposed at different rates.

This section also provides rules for allocating unclaimed prepayment credits to adjustments to a return.

(b) *Order in which adjustments are taken into account.* In computing the portions of an underpayment subject to penalties imposed under sections 6662 and 6663, adjustments to a return are considered made in the following order:

(1) Those with respect to which no penalties have been imposed.

(2) Those with respect to which a penalty has been imposed at a 20 percent rate (*i.e.*, a penalty for negligence or disregard of rules or regulations, substantial understatement of income tax, or substantial valuation misstatement, under sections 6662(b)(1) through 6662(b)(3), respectively).

(3) Those with respect to which a penalty has been imposed at a 40 percent rate (*i.e.*, a penalty for a gross valuation misstatement under sections 6662 (b)(3) and (h)).

(4) Those with respect to which a penalty has been imposed at a 75 percent rate (*i.e.*, a penalty for fraud under section 6663).

(c) *Manner in which unclaimed prepayment credits are allocated.* Any income tax withholding or other payment made before a return was filed, that was neither claimed on the return nor previously allowed as a credit against the tax liability for the taxable year (an "unclaimed prepayment credit"), is allocated as follows—

(1) If an unclaimed prepayment credit is allocable to a particular adjustment, such credit is applied in full in determining the amount of the underpayment resulting from such adjustment.

(2) If an unclaimed prepayment credit is not allocable to a particular adjustment, such credit is applied in accordance with the ordering rules set forth in paragraph (b) of this section.

(d) *Examples.* The following examples illustrate the rules of this § 1.6664–3. These examples do not take into account the reasonable cause exception to the accuracy-related penalty under § 1.6664–4.

Example 1. A and B, husband and wife, filed a joint federal income tax return for calendar year 1989, reporting taxable income of $15,800 and a tax liability of $2,374. A and B had no amounts previously assessed (or collected without assessment) and no rebates had been made. Subsequently, the return was examined and the following adjustments and penalties were agreed to:

Adjustment #1 (No penalty imposed)		$1,000
Adjustment #2 (Substantial understatement penalty imposed)		40,000
Adjustment #3 (Civil fraud penalty imposed)		45,000
Total adjustments		86,000
Taxable income shown on return		15,800
Taxable income as corrected		101,800
Computation of underpayment:		
Tax imposed by subtitle A		25,828
Tax shown on return	2,374	
Previous assessments	None	
Rebates	None	
Balance		2,374
Underpayment		$23,454

Computation of the portions of the underpayment on which penalties under

VOL 56 ISS 251 DEC 31 1991 UMI

section 6662(b)(2) and section 6663 are imposed.

Step 1 Determine the portion, if any, of the underpayment on which no accuracy-related or fraud penalty is imposed:

Taxable income shown on return	$15,800
Adjustment #1	1,000
"Adjusted" taxable income	16,800
Tax on "adjusted" taxable income	2,524
Tax shown on return	2,374
Portion of underpayment on which no penalty is imposed	150

Step 2 Determine the portion, if any, of the underpayment on which a penalty of 20 percent is imposed:

"Adjusted" taxable income from step 1	$16,800
Adjustment #2	40,000
"Adjusted" taxable income	56,800
Tax on "adjusted" taxable income	11,880
Tax on "adjusted" taxable income from step 1	2,524
Portion of underpayment on which 20 percent penalty is imposed	9,356

Step 3 Determine the portion, if any, of the underpayment on which a penalty of 75 percent is imposed:

Total underpayment		$23,454
Less the sum of the portions of such underpayment determined in:		
Step 1	$150	
Step 2	9,356	
Total		9,506
Portion of underpayment on which 75 percent penalty is imposed		13,948

Example 2. The facts are the same as in *Example 1* except that the taxpayers failed to claim on their return a credit of $1,500 for income tax withheld on unreported additional income that resulted in Adjustment #2. Because the unclaimed prepayment credit is allocable to Adjustment #2, the portion of the underpayment attributable to that adjustment is $7,856 ($9,356—$1,500). The portions of the underpayment attributable to Adjustments #1 and #3 remain the same.

Example 3. The facts are the same as in *Example 1* except that the taxpayers made a timely estimated tax payment of $1,500 for 1989 which they failed to claim (and which the Service had not previously allowed). This unclaimed prepayment credit is not allocable to any particular adjustment. Therefore, the credit is allocated first to the portion of the underpayment on which no penalty is imposed ($150). The remaining amount ($1,350) is allocated next to the 20 percent penalty portion of the underpayment ($9,356). Thus, the portion of the underpayment that is not penalized is zero ($150—$150), the portion subject to a 20 percent penalty is $8,006 ($9,356—$1,350) and the portion subject to a 75 percent penalty is unchanged at $13,948.

§ 1.6664–4 Reasonable cause and good faith exception to section 6662 penalties.

(a) *In general.* No penalty may be imposed under section 6662 with respect to any portion of an underpayment upon a showing by the taxpayer that there was reasonable cause for, and the taxpayer acted in good faith with respect to, such portion. Rules for determining whether the reasonable cause and good faith exception applies are set forth in paragraphs (b), (c), (d) and (e) of this section.

(b) *Facts and circumstances taken into account*—(1) *In general.* The determination of whether a taxpayer acted with reasonable cause and in good faith is made on a case-by-case basis, taking into account all pertinent facts and circumstances. The most important factor is the extent of the taxpayer's effort to assess the taxpayer's proper tax liability. Circumstances that may indicate reasonable cause and good faith include an honest misunderstanding of fact or law that is reasonable in light of the experience, knowledge and education of the taxpayer. An isolated computational or transcriptional error generally is not inconsistent with reasonble cause and good faith. Reliance on an information return or on the advice of a professional (such as an appraiser, attorney or accountant) does not necessarily demonstrate reasonable cause and good faith. Similarly, reasonable cause and good faith is not necessarily indicated by reliance on facts that, unknown to the taxpayer, are incorrect. Reliance on an information return, professional advice or other facts, however, constitutes reasonable cause and good faith if, under all the circumstances, such reliance was reasonable and the taxpayer acted in good faith. For example, reliance on erroneous information (such as an error relating to the cost or adjusted basis of property, the date property was placed in service, or the amount of opening or closing inventory) inadvertently included in data compiled by the various divisions of a multidivisional corporation or in financial books and records prepared by those divisions generally indicates reasonable cause and good faith, provided the corporation employed internal controls and procedures, reasonable under the circumstances, that were designed to identify such factual errors. Reasonable cause and good faith ordinarily is not indicated by the mere fact that there is an appraisal of the value of property. Other factors to consider include the methodology and assumptions underlying the appraisal, the appraised value, the relationship between appraised value and purchase price, the circumstances under which the appraisal was obtained, and the appraiser's relationship to the taxpayer or to the activity in which the property is used. (See paragraph (e) of this section for special rules relating to appraisals for "charitable deduction property.") A taxpayer's reliance on erroneous information reported on a Form W–2, Form 1099 or other information return indicated reasonable cause and good faith, provided the taxpayer did not know or have reason to know that the information was incorrect. Generally, a taxpayer knows or has reason to know that the information on an information return is incorrect if such information is inconsistent with other information reported or otherwise furnished to the taxpayer, or with the taxpayer's knowledge or the transaction. This knowledge includes, for example, the taxpayer's knowledge of the terms of his employment relationship or of the rate of return on a payor's obligation.

(2) *Examples.* The following examples illustrate the provisions of paragraph (b) of this section:

Example 1. A, an individual calendar year taxpayer, engages B, a tax professional, to give him advice concerning the deductibility of certain state and local taxes. A provides B with full details concerning the taxes at issue. B advises A that the taxes are fully deductible. A, in preparing his own tax return, claims a deduction for the taxes. Under these facts, A is considered to have demonstrated good faith by seeking the advice of a tax professional, and to have shown reasonable cause for any underpayment attributable to the deduction claimed for the taxes. However, if A had sought advice from someone that he knew, or should have known, lacked knowledge in federal taxation, A would not be considered to have shown reasonable cause or to have acted in good faith.

Example 2. C, an individual, sought advice from D, a friend who was not a tax professional, as to how C might reduce his Federal tax obligations. D advised C that, for a nominal investment in Corporation X, D had received certain tax benefits which virtually eliminated D's Federal tax liability. D also named other investors who had received similar benefits. Without further inquiry, C invested in X and claimed the benefits that he had been assured by D were due him. In this case, C did not make any good faith attempt to ascertain the correctness of what D had advised him concerning his tax matters, and is not considered to have reasonable cause for the underpayment attributable to the benefits claimed.

Example 3. E, an individual, worked for Company X doing odd jobs and filling in for other employees when necessary. E worked irregular hours and was paid by the hour. The amount of E's pay check differed from week to week. The Form W–2 furnished to E reflected wages for 1990 in the amount of $29,729. It did not, however, include compensation of $1,467 paid for some hours E worked. Relying on the Form W–2, E filed a return reporting wages of $29,729. E had no reason to know that the amount reported on the Form W–2 was incorrect. Under the circumstances, E is considered to have acted in good faith in relying on the Form W–2 and to have reasonable cause for the underpayment attributable to the unreported wages.

Example 4. H, an individual, did not enjoy preparing his tax returns and procrastinated in doing so until April 15th. On April 15th, H hurriedly gathered together his tax records and materials, prepared a return, and mailed it before midnight. The return contained numerous errors, some of which were in H's favor and some of which were not. The net result of all the adjustments, however, was an underpayment of tax by H. Under these circumstances, H is not considered to have reasonable cause for the underpayment or to have acted in good faith in attempting to file an accurate return.

(c) *Pass-through items.* In the case of an underpayment that is related to an item on the return of a pass-through entity (as defined in § 1.6662–4(f)(5)), reasonable cause and good faith by the entity generally is imputed to the taxpayer that has the underpayment. Reasonable cause and good faith is not imputed from the entity to the taxpayer, however, if there are factors which indicate that the taxpayer did not act with reasonable cause and in good faith. Correspondingly, a lack of reasonable cause or bad faith also may be imputed from the entity to the taxpayer.

(d) *Tranactions between persons described in section 482 and net section 482 transfer price adjustments.* [Reserved]

(e) *Valuation misstatements of charitable deduction property*—(1) *In general.* There may be reasonable cause and good faith with respect to a portion of an underpayment that is attributable to a substantial (or gross) valuation misstatement of charitable deduction property (as defined in paragraph (e)(2)(i) of this section) only if—

(i) The claimed value of the property was based on a qualified appraisal (as defined in paragraph (e)(2)(ii) of this section) by a qualified appraiser (as defined in paragraph (e)(2)(iii) of this section), and

(ii) In addition to obtaining a qualified appraisal, the taxpayer made a good faith investigation of the value of the contributed property.

The rules of this paragraph (e) apply regardless of whether § 1.170A–13 permits a taxpayer to claim a charitable contribution deduction for the property without obtaining a qualified appraisal. The rules of this paragraph (e) apply in addition to the generally applicable rules concerning reasonable cause and good faith.

(2) *Definitions*—(i) *Charitable deduction property.* For purposes of this paragraph (e), the term "charitable deduction property" means any property (other than money or publicly traded securities, as defined in § 1.170A–13(c)(7)(xi)) contributed by the taxpayer in a contribution for which a deduction was claimed under section 170.

(ii) *Qualified appraisal.* For purposes of this paragraph (e), the term "qualified appraisal" means a qualified appraisal as defined in § 1.170A–13(c)(3).

(iii) *Qualified appraiser.* For purposes of this paragraph (e), the term "qualified appraiser" means a qualified appraiser as defined in § 1.170A–13(c)(5).

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 3. The authority for part 602 continues to read as follows:

Authority: (26 U.S.C. 7805).

Par. 4. Section 602.101(c) is amended by adding the following in the table:

§ 1.6662–3(c)	1545–0889
§ 1.6662–4 (e) and (f)	1545–0889

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

RIN 1545–AO62

Penalty on Income Tax Return Preparers Who Understate Taxpayer's Liability on a Federal Income Tax Return or a Claim for Refund

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations concerning a penalty for understatement of a taxpayer's liability and relates to persons who prepare for compensation income tax returns and claims for refund. Changes to the applicable tax law were made by the Omnibus Budget Reconciliation Act of 1989. The regulations provide guidance necessary to comply with these changes.

EFFECTIVE DATE: Except for § 1.6694–3(c)(3), §§ 1.6694–1 through 1.6694–3 are effective for documents prepared and advice given after December 31, 1991. Section 1.6694–3(c)(3) is effective for documents prepared and advice given after December 31, 1989. Section 1.6694–4 is effective as of December 19, 1989. Section 1.6694–0 is effective December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Lisa J. Byun of the Office of Assistant Chief Counsel (Income Tax & Accounting), Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:IT&A:4) or telephone 202–566–5985 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this final regulation has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)) under control number 1545–1231. The estimated annual burden per respondent is .5 hours.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, DC 20224, and to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

On March 4, 1991, the Federal Register (56 FR 8959) published a notice of proposed rulemaking to provide guidance under section 6694 of the Internal Revenue Code as revised by

VOL
56
ISS
251
DEC
31
1991
UMI

sections 7732 and 7737 of the Omnibus Budget Reconciliation Act of 1989, Public Law No. 101–239 (OBRA 1989). The Internal Revenue Service received public comments on the proposed regulations and held a public hearing on June 3, 1991. After consideration of the public comments regarding the proposed regulations, the regulations are adopted as revised by this Treasury decision. Descriptions of the revisions to the proposed regulations are included in the discussion of the public comments below.

Explanation of Statutory Provisions

As amended by OBRA 1989, section 6694(a) provides that a $250 penalty will be imposed on an income tax return preparer ("preparer") who understates a taxpayer's tax liability on an income tax return or claim for refund if the understatement is due to a position for which there was not a realistic possibility of being sustained on its merits and the preparer knew or reasonably should have known of such position. The penalty does not apply, however, if the position is not frivolous and is adequately disclosed, or if there was reasonable cause for the position taken and the preparer acted in good faith.

As amended, section 6694(b) provides that a $1,000 penalty will be imposed on a preparer who understates a taxpayer's tax liability on an income tax return or claim for refund if the understatement is due to the preparer's willful attempt to understate tax liability or the preparer's reckless or intentional disregard of rules or regulations. There is no statutory disclosure exception to this penalty. However, the legislative history indicates that the penalty for disregarding rules or regulations should not be imposed if proper disclosure is made.

OBRA 1989 also amended section 6694(c) to expressly permit the Internal Revenue Service ("Service") to counterclaim in a refund proceeding for any portion of the section 6694 penalty that was not paid by the preparer prior to commencing the proceeding.

Public Comments

General Provisions

1. One-Preparer-Per-Firm Rule

a. *Sole proprietorships.* The proposed regulations provide that no more than one individual associated with a firm (for example, as a partner or employee) is treated as a preparer with respect to the same return or claim for refund. Prop. Reg. § 1.6694–1(b)(1). One commentator commented that this rule would prevent the Service from penalizing a sole proprietorship and an employee of the firm who was not the sole proprietor, on the ground that, in such a case, a preparer penalty would be imposed on two individuals associated with the same firm. The proposed regulations do not prevent the Service from imposing two preparer penalties in this context because the sole proprietor would be penalized in his capacity as the firm, not in his capacity as an individual "associated with" the firm. Nevertheless, to eliminate any confusion, the final regulations note that a firm includes a sole proprietorship.

b. *Signing preparer.* In the case of a signing preparer who is associated with a firm, the proposed regulations provide that only the signing preparer and no other individual associated with the firm is a preparer with respect to the return or claim. Prop. Reg. § 1.6694–1(b)(1). A corollary of this rule is that the signing preparer cannot avoid the penalty under section 6694(a) by relying on the advice of another individual in the same firm. Several commentators stated that a signing preparer should not be subject to a penalty if the signing preparer relied on the advice of another individual within the same firm.

The commentators did not object to the one-preparer-per-firm rule, but argued that the signing preparer should not be required to bear the penalty if he or she relied on advice of another individual in the firm. Such a rule would impose a heavy administrative burden on the Service because it would have to establish which individual within a firm was ultimately responsible for the position for which the penalty was imposed. This would require the imposition of standards for intrafirm advice and disclosure, and would burden practitioners with documenting intrafirm communcations in order to comply with the disclosure requirements of the preparer regulations and to establish justifiable reliance on the advice of others. These were the concerns that influenced the initial formulation of the one-preparer-per-firm rule.

After careful consideration of the comments, the Service has determined that the approach taken in the proposed regulations—limiting the penalty to one individual per firm but designating that individual on the basis of objective criteria—reasonably balances the interests of the Government and practitioners. Accordingly, the final regulations adopt the rule of the proposed regulations without change.

c. *Nonsigning preparer.* In the case of a nonsigning preparer who is associated with a firm, the proposed regulations provide that, ordinarily, the individual who is a preparer for purposes of section 6694 is the individual with direct supervisory responsibility for the matter. Prop. Reg. § 1.6694–1(b)(1). One commentator found this provision confusing, because more than one individual in a firm may have direct supervisory responsibility for matters relating to the same return or claim. The final regulations clarify this point by providing that the nonsigning preparer in such a case ordinarily is the individual with overall supervisory responsibility for the advice given by the firm with respect to the return or claim.

2. Maximum Penalty on Preparer of Partnership Return

Under the definition of an income tax return preparer in Treas. Reg. § 301.7701–15(b)(3), a preparer of a partnership return is considered a preparer of a partner's return if the entries on the partnership return that are reportable on the partner's return constitute a substantial portion of the partner's return. Given the increase in the section 6694 penalty amounts and the large size of some partnerships, one commentator asked that the Service limit the amount (*e.g.*, at $5,000 or $10,000) that a preparer of a partnership return can be penalized for returns of partners in the partnership. Because the Service does not have the authority to set limits on the section 6694 penalty amounts, the final regulations do not adopt the commentator's suggestion.

3. Procedural Matters

One commentator commented that the deficiency procedures available to preparers offer little recourse to small practitioners. Therefore, the commentator asked that additional consideration be given to providing administrative recourse (*e.g.*, a review by Appeals) before a preparer is required to contest the penalty assessment in district court. Another commentator requested clarification as to the office of the Service in which a final administrative determination will ordinarily be made.

The proposed regulations provide that unless the period of limitations may expire without adequate opportunity for assessment, the Service will also send, before assessment of either penalty, a 30-day letter to the preparer notifying him of the proposed penalty or penalties and offering an opportunity to the preparer to request further administrative consideration and a final administrative determination by the Service concerning the assessment. If the preparer then makes a timely request, assessment may not be made until the Service makes a final administrative determination adverse to the preparer. Prop. Reg. § 1.6694–4(a)(1). The final administrative determination is generally made by Appeals. Specific instructions on how and where to administratively appeal the proposed penalty assessment are contained in the letter issued to the preparer. Therefore, the Service believes further clarification or elaboration on the administrative appeals process is not necessary in the final regulations.

4. Effective Dates

The proposed regulations provide that, in the case of a position contrary to a revenue ruling, a preparer will not be considered to have recklessly or intentionally disregarded the ruling if the contrary position has a realistic possibility of being sustained on its merits. Prop. Reg. § 1.6694–3(c)(3). This provision was proposed to be effective with respect to documents prepared and advice given after December 31, 1991. A similar rule for taxpayers under the proposed section 6662 regulations (relating to the penalty for negligence or disregard of rules or regulations) was proposed to be effective with respect to returns due after December 31, 1989.

Several commentators urged that the December 31, 1989 effective date under section 6662 be adopted for the section 6694 provision as well. To respond to this concern, the final preparer penalty regulations adopt the effective date of the accuracy-related penalty regulations on this point. Thus, the provision in the preparer regulations which provides that a preparer is not considered to have recklessly or intentionally disregarded a revenue ruling if the position contrary to the ruling has a realistic possibility of being sustained on its merits is effective for documents prepared and advice given after December 31, 1989. The final preparer regulations contain a similar rule, which is also effective for documents prepared and advice given after December 31, 1989, regarding positions contrary to certain notices issued by the Service.

Section 6694(a) Provisions

1. "One-in-Three" Definition of the Realistic Possibility Standard

The proposed regulations provide that a position will be considered to have satisfied the realistic possibility standard if a reasonable and well-informed analysis by a person knowledgeable in the tax law would lead such a person to conclude that the position has approximately a one in three, or greater, likelihood of being sustained on its merits. Prop. Reg. § 1.6694–2(b)(1). Many commentators asked that the "one-in-three" definition be eliminated because it is difficult to assess the likelihood of a position being sustained on its merits. The final regulations retain the one-in-three definition, however, because a numerical benchmark helps prevent erosion of the standard and because other definitions suggested by commentators would not provide any more meaningful guidance.

2. Authorities

The proposed regulations provide that, in determining whether a position satisfies the realistic possibility standard, only the "authorities" listed in § 1.6662–4(d)(3)(iii) of the proposed regulations (relating to the authorities for determining substantial authority) are to be considered. Prop. Reg. § 1.6694–2(b)(2). Section 1.6662–4(d)(3)(iii) provides that the term "authorities" does not include conclusions reached in treatises, legal periodicals, legal opinions or opinions rendered by other tax professionals but that the authorities underlying such expressions of opinion may give rise to substantial authority. Several commentators argued that "authorities" should include additional sources such as well-reasoned treatises, articles in recognized professional tax publications, and other reference tools and sources of tax analyses commonly used by tax advisers and return preparers.

The commentators' suggestion was not adopted in the final regulations because (1) it would be too difficult to administratively determine which of these secondary sources were well-reasoned or were otherwise accurate expressions of the tax law, and (2) the regulations provide sufficient protection to preparers by allowing them to rely on the authorities underlying the conclusions in the secondary sources.

3. When Realistic Possibility Determined

The proposed regulations provide generally that, in the case of a signing preparer, the relevant date for determining whether a position satisfies the realistic possibility standard is the date the preparer signs and dates the return or claim. In the case of a nonsigning preparer, the relevant date is the date the preparer provides the advice. Prop. Reg. § 1.6694–2(b)(5).

One commentator stated that the dates for determining whether a position satisfies the realistic possibility standard should conform to the dates for determining whether a position satisfies the substantial authority standard. Under this approach, the realistic possibility standard could be satisfied either on the last day of the taxable year covered by a return or on the date the return was signed (or the advice was given). The commentator was concerned that the difference in determination dates creates a potential for conflict between preparers and taxpayers where an adverse technical development occurs after the end of the taxable year but before the return is signed (or the advice is given).

The commentator's suggestion was not adopted in the final regulations because a preparer should not be permitted to ignore developments in the law occurring after the taxable year covered by the return and before the preparer signs the return (or provides the advice).

4. Realistic Possibility Examples (§ 1.6694–2(b)(3))

a. *Example 2.* One commentator suggested expanding this example (which concerns a statutory change that adversely affects a taxpayer) to provide that if the committee reports can be read to provide some evidence or authority to support the taxpayer's position (although the committee reports do not specifically address the situation), the position is not frivolous and, therefore, may be taken if adequately disclosed. The commentator's suggestion was not adopted in the final regulations because the proposed modification to the example does not provide sufficient information to determine whether the position is frivolous.

b. *Example 3.* Several commentators stated that this example (which concerns a conflict between the statutory language and the legislative history) should be revised to conclude that a position consistent with either the statute or the committee reports satisfies the realistic possibility standard. The final regulations adopt this suggestion but add that a position consistent with the committee reports but contrary to the statute constitutes a disregard of a rule or regulation and, therefore, must be adequately disclosed in order to avoid the section 6694(b) penalty.

c. *Example 4.* A commentator asked that this example (which concerns an inconsistency between a regulation and instructions on a tax form) be revised to further provide that a position consistent with the incorrect tax form instructions is frivolous if the preparer knew of the Service's announcement acknowledging the error. The commentator's recommendation was not adopted in the final regulations because "frivolous" in an objective standard and, therefore, the preparer's knowledge of the announcement is not relevant to a determination of whether the position is frivolous. Knowledge of the announcement would, however, be relevant to a determination of whether the preparer intentionally disregarded the regulation.

VOL
56
ISS
251
DE
31
1991
UMI

d. *Example 5.* Several commentators contended that the issuance of proposed regulations which are contrary to previously issued private letter rulings should not cause the earlier private letter rulings to cease being authorities; it should only diminish the weight of the private letter rulings. The commentators' suggestion was not adopted because proposed regulations are subject to a higher level of review than private letter rulings and it is not appropriate to retain as an authority a document that does not accurately reflect the current status of the law and position of the Service.

e. *Example 8.* Two commentators contended that a taxpayer should be treated as having a realistic possibility of success with respect to a position involving a statutory phrase if there is a favorable interpretation of identical language appearing in another place in the Internal Revenue Code. The example provides that interpretations of identical language are relevant, but that the context in which the identical language arises also must be taken into account in applying the realistic possibility standard. Because the context in which the identical language arises is important, the final regulations retain this example without any revisions.

5. Employer/Partnership Liability

The proposed regulations provide that an employer or partnership of a preparer subject to the section 6694(a) penalty is also subject to the penalty if the employer or partnership (or one or more of its principal officers of general partners) also knew or reasonably should have known of the position. Prop. Reg. § 1.6694–2(a). Several commentators expressed concern that the "also knew or reasonably should have known" language could result in automatic assertion of a penalty against a firm if an employee or partner of the firm were penalized. This was not the intent of the proposed regulations.

In response to this concern, the final regulations clarify the circumstances under which a firm will be subject to penalty under section 6694. The final regulations provide that an employer or partnership of a preparer subject to penalty under section 6694(a) is also subject to penalty only if (1) one or more members of the principal management (or principal officers) of the firm or a branch office participated in or knew of the conduct proscribed by section 6694(a), (2) the employer or partnership failed to provide reasonable and appropriate procedures for review of the position for which the penalty is imposed, or (3) such review procedures were disregarded in the formulation of the advice, or the preparation of the return or claim for refund, that included the position for which the penalty is imposed. A mid-level manager is not ordinarily considered a member of principal management for purposes of this provision; however, the principal managers of a branch office are considered members of principal management even if they are not principal managers of the firm as a whole. (Similar rules apply for purposes of section 6694(b).)

6. Definition of "Frivolous"

The proposed regulations define a "frivolous" position as one that is "patently improper." Prop. Reg. § 1.6694–2(c)(2). Commentators recommended that this definition be changed, for example, to require that the position be both patently improper and knowingly advanced in bad faith, or that a frivolous position be defined as one that is "not litigable."

The "patently improper" definition was included in the proposed regulations because it represents an objective standard. Thus, neither the good nor the bad intentions of a person taking a position are relevant to a determination of whether that position is frivolous within the meaning of the regulations. The Service continues to believe that an objective standard is appropriate. The recommendation that a frivolous position be defined as one that is not litigable would place preparers who are not attorneys at a disadvantage in assessing the effectiveness of disclosure in relation to preparers who are. Accordingly, the final regulations retain the definition of a frivolous position as one that is patently improper.

7. Adequate Disclosure

a. *Method of making adequate disclosure.* The proposed regulations provide that disclosure by a signing preparer is adequate for purposes of section 6694(a) if made on a Form 8275 or on the return in accordance with an annual revenue procedure. Prop. Reg. § 1.6694–2(c)(3)(i). Several commentators stated that the method for making adequate disclosure should not be so limited.

It is in the interest of both preparers and the Service to have a relatively uniform disclosure regime that provides certainty as to whether adequate disclosure has been made. Thus, the final regulations do not relax the requirements for making adequate disclosure for purposes of this penalty. The final regulations also add a special disclosure rule for positions contrary to regulations (see the "Adequate Disclosure" section below in the portion of this preamble that discusses the provisions under section 6694(b)).

b. *Tension between accuracy-related penalties and the preparer penalties.* One commentator noted that tension can exist between a taxpayer and a signing preparer with respect to disclosure of a position that (1) results in an understatement that is too small to be considered substantial, and (2) lacks a realistic possibility of being sustained on its merits. In such a case, the signing preparer would have to disclose the position to avoid a preparer penalty, but a taxpayer would not have to disclose to avoid the substantial understatement penalty. The different standards to taxpayers and preparers are established by statute and cannot be changed by regulation. Therefore, the final regulations adopt the position of the proposed regulations without change.

8. "Rare Case" Provision

The proposed regulations provide disclosure rules for nonsigning preparers in the "rare cases" in which a position has substantial authority but does not satisfy the realistic possibility standard. Prop. Reg.§ 1.6694–2(c)(3)(ii)(A)(*2*). Because many commentators criticized this provision as unnecessary and confusing, it has been eliminated.

9. Reasonable Cause and Good Faith

a. *Frequency of errors.* The proposed regulations provide that in determining whether the reasonable cause and good faith exception applies, one factor to consider is whether the understatement is due to an isolated error rather than a number of errors. Although the exception generally applies to an isolated error, the exception does not apply if the error is sufficiently obvious, flagrant or material. Prop. Reg. § 1.6694–2(d)(2). One commentator argued that the materiality of an error should not enter into this determination. The final regulations respond to this suggestion by clarifying that the materiality of an error is relevant to whether the error should have been discovered during a review of the return or claim.

b. *Preparer's normal office practice.* Under the proposed regulations, a preparer's normal office practice is one of the factors considered in making the reasonable cause and good faith determination. The proposed regulations provide that a normal office practice "generally must involve, at a minimum" certain procedures enumerated in the regulations. Prop. Reg. § 1.6694–2(d)(4). One commentator questioned whether the Service should mandate minimum standards for office procedures. In response to this comment, the final regulations eliminate the minimum office procedure requirement, but list these procedures as factors to consider in determining whether a practitioner's normal office practice promotes

accuracy and consistency in the preparation of returns and claims for refund. Stylistic changes were also made to this provision.

c. *Reliance on advice of another preparer.* The proposed regulations generally provide that the reasonable cause and good faith exception applies if the preparer relied in good faith on the advice of another preparer (or a person who would be considered a preparer had the advice constituted preparation of a substantial portion of the return or claim for refund). Prop. Reg. § 1.6694–2(d)(5). One commentator suggested clarifying this provision to expressly provide that the exception only applies if the preparer being relied on is a paid preparer.

The proposed regulations define an "income tax return preparer" as any person who is an income tax return preparer within the meaning of section 7701(a)(36) and the regulations thereunder. Under section 7701(a)(36), a person is not an income tax return preparer unless such person is compensated for preparing a return or claim. Because a preparer, by definition, must have been compensated, no further clarification is necessary.

Another commentator stated that this provision should cover the situation where a preparer, in preparing a taxpayer's return, relies on a Schedule K–1 that has been prepared by another preparer. No change is necessary to permit reliance on a Schedule K–1 prepared by another preparer as the proposed and final regulations both permit a preparer to rely on "the advice of, or schedules prepared by" another preparer (or by a person who would be considered a preparer had the advice or schedules constituted preparation of a substantial portion of the return or claim for refund).

Section 6694(b) Provisions

1. Recklessness

The proposed regulations provide that a preparer is reckless in not knowing of a rule or regulation if the preparer makes little or no effort to determine whether a rule or regulation exists, under circumstances which demonstrate a substantial deviation from the standard of conduct that a reasonable preparer would observe in the situation. Prop. Reg. § 1.6694–3(c)(1). One commentator asked that the term "reasonable preparer" either be defined or changed to "reasonably diligent preparer." This suggestion was not adopted because diligence is implicit in the standard contained in the proposed regulations.

2. Rules or Regulations

The proposed regulations define the term "rules or regulations" to include the provisions of the Internal Revenue Code, temporary or final Treasury regulations, and revenue rulings issued by the Service. Prop. Reg. § 1.6694–3(f). One commentator requested that we clarify the meaning of this term. Another commentator stated that a revenue ruling should not be treated as a "rule" because (1) a revenue ruling does not constitute a rule under the Administrative Procedure Act (5 U.S.C. §§ 500, *et seq.*) and (2) a revenue ruling is only the contention of one party and is not subjected to the give and take of a public comment process.

The legislative history to the Tax Reform Act of 1976 (which enacted section 6694) expressly provides that rules and regulations include regulations and "IRS rulings." See S. Rep. No. 938, 94th Cong., 2d Sess. 355 (1976). Moreover, revenue rulings were expressly listed as "rules" under former § 1.6694–1(a)(3). Therefore, the final preparer penalty regulations, in providing that revenue rulings are "rules," merely reflect a continuation of prior law.

Notices published in the Internal Revenue Bulletin by the Service also contain substantive interpretations of Federal tax law. In addition, these notices generally are subject to a level of review that is the same or higher than that accorded revenue rulings. Accordingly, the final regulations also provide that the term "rules or regulations" includes notices (other than notices of proposed rulemaking) that are issued by the Service and published in the Internal Revenue Bulletin. (Revenue procedures are not listed, as they may or may not be treated as "rules or regulations" depending on all facts and circumstances.) A corresponding provision is contained in the final regulations providing that a preparer is not considered to have recklessly or intentionally disregarded such a notice if the position contrary to the notice has a realistic possibility of being sustained on its merits.

3. Adequate Disclosure

The proposed regulations provide that a preparer will not be considered to have recklessly or intentionally disregarded a regulation if the position contrary to the regulation is not frivolous and is adequately disclosed. Prop. Reg. § 1.6694–3(c)(2). Commentators stated that a preparer should be permitted to take a position contrary to a regulation without disclosure if (1) the position has a realistic possibility of being sustained on its merits, or (2) the regulation was invalidated by a court. Another commentator stated that the legislative history to OBRA 1989 suggests only that disclosure should be a safe harbor and not the sole means of avoiding a penalty for reckless or intentional disregard of a regulation.

There is no indication in the legislative history of OBRA 1989 that Congress intended to permit the taking of positions contrary to regulations without disclosure in the circumstances described above or, more generally, that Congress intended disclosure to be only a safe harbor. The taking of a position contrary to a regulation is of sufficient importance to the self-assessment nature of the Federal tax system that it is appropriate to require that the Service be notified of such positions. Therefore, the final regulations adopt the rule of the proposed regulations requiring adequate disclosure of a position contrary to a regulation.

In addition, because of the importance to the self-assessment system of disclosing positions contrary to regulations, the final regulations make two changes to the rules concerning positions contrary to regulations. First, the final regulations provide that disclosure of such positions is adequate only if the disclosure is separately made on a Form 8275–R. Until Form 8275–R is available, preparers must disclose positions contrary to regulations on a separate Form 8275 with the caption "REGULATIONS" appearing in the upper right corner of the form. (A similar disclosure rule is provided in the final accuracy-related penalty regulations for the penalty for negligence or disregard of rules or regulations.) Second, because the legislative history of OBRA 1989 indicates that the penalty for reckless or intentional disregard of a regulation may be avoided through disclosure only if the position represents a good faith challenge to the validity of the regulation, the final regulations incorporate this standard. See H.R. Rep. No. 247, 101st Cong., 1st Sess. 1393, 1396–97 (1989).

4. Examples (§ 1.6694–3(d))

Example 3. Two commentators argued that the statement in the example that five different courts had arrived at the same position on an issue and that this position satisfies the realistic possibility standard created a negative inference that a position supported by fewer than five courts would not satisfy the standard. No such inference was intended. Accordingly, the inference has been eliminated by replacing "five" with "several" in the final regulations.

5. Burden of Proof

The proposed regulations provide that the Government bears the burden of proof on the issue of whether a preparer willfully attempted to understate tax liability, but that the preparer bears the burden of proof on such other issues as whether the preparer recklessly or intentionally disregarded a rule or regulation or whether disclosure was adequately made. Prop. Reg. § 1.6694–3(h). One commentator stated that the Government should also bear the burden of proof on the issue of whether the preparer recklessly or intentionally disregarded a rule or regulation.

Section 7427 of the Code expressly provides that the burden of proof on the issue of whether a preparer willfully attempted to understate tax liability (within the meaning of section 6694(b)) is on the Government. Although OBRA 1989 added reckless disregard of rules or regulations as a basis for imposing the section 6694(b) penalty and made intentional disregard of rules or regulations subject to section 6694(b) rather than 6694(a), OBRA 1989 did not amend section 7427 to place the burden of proving reckless or intentional disregard on the Government. Furthermore, the regulations under former section 6694(a) (consistent with the legislative history of the Tax Reform Act of 1976) placed the burden of proof on the issue of whether a preparer intentionally disregarded a rule or regulation on the preparer. For these reasons, the commentator's suggestion was not adopted in the final regulations and the burden of proof on the issue of whether a position contrary to a regulation represents a good faith challenge to the validity of the regulation also is placed on the preparer.

Special Analyses

It has been determined that these regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Lisa J. Byun, Office of the Assistant Chief Counsel (Income Tax & Accounting), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in their development.

List of Subjects

26 CFR 1.6654–1 through 1.6709–1T

Income taxes, Penalties, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 continues to read in part:

Authority: Sec. 7805, 68A Stat. 917; sec. 26 U.S.C. 7805, 26 U.S.C. 7805 * * *

Par. 2. Sections 1.6694–1 and 1.6694–2 are revised and new §§ 1.6694–0, –3, and –4 are added to read as follows.

§ 1.6694–0 Table of contents.

This section lists the captions that appear in §§ 1.6694–1 through 1.6694–4.

§ 1.6694–1 Section 6694 penalties applicable to income tax return preparer.

(a) Overview.
(b) Income tax return preparer.
(1) In general.
(2) Signing and nonsigning preparers.
(3) Example.
(c) Understatement of liability.
(d) Abatement of penalty where taxpayer's liability not understated.
(e) Verification of information furnished by taxpayer.
(1) In general.
(2) Example.
(f) Effective date.

§ 1.6694–2 Penalty for understatement due to an unrealistic position.

(a) In general.
(1) Proscribed conduct.
(2) Special rule for employers and partnerships.
(b) Realistic possibility of being sustained on its merits.
(1) In general.
(2) Authorities.
(3) Examples.
(4) Written determinations.
(5) When "realistic possibility" determined.
(i) Signing preparers.
(ii) Nonsigning preparers.
(c) Exception for adequate disclosure of nonfrivolous positions.
(1) In general.
(2) Frivolous.
(3) Adequate disclosure.
(i) Signing preparers.
(ii) Nonsigning preparers.
(A) Advice to taxpayers.
(B) Advice to another preparer.
(d) Exception for reasonable cause and good faith.
(1) Nature of the error causing the understatement.
(2) Frequency of errors.
(3) Materiality of errors.
(4) Preparer's normal office practice.
(5) Reliance on advice of another preparer.
(e) Burden of proof.

§ 1.6694–3 Penalty for understatement due to willful, reckless, or intentional conduct.

(a) In general.
(1) Proscribed conduct.
(2) Special rule for employers and partnerships.
(b) Willful attempt to understate liability.
(c) Reckless or intentional disregard.
(d) Examples.
(e) Adequate disclosure.
(1) Signing preparers.
(2) Nonsigning preparers.
(i) Advice to taxpayers.
(ii) Advice to another preparer.
(f) Rules or regulations.
(g) Section 6694(b) penalty reduced by section 6694(a) penalty.
(h) Burden of proof.

§ 1.6694–4 Extension of period of collection where preparer pays 15 percent of a penalty for understatement of taxpayer's liability and certain other procedural matters.

(a) In general.
(b) Preparer must bring suit in district court to determine liability for penalty.
(c) Suspension of running of period of limitations on collection.
(d) Effective date.

§ 1.6694–1 Section 6694 penalties applicable to income tax return preparer.

(a) *Overview.* Section 6694(a) and section 6694(b) impose penalties on income tax return preparers for certain understatements of liability on a return or claim for refund. The section 6694(a) penalty is imposed for an understatement of liability with respect to tax imposed by subtitle A of the Internal Revenue Code that is due to a position for which there was not a realistic possibility of being sustained on its merits. The section 6694(b) penalty is imposed for an understatement of liability with respect to tax imposed by subtitle A of the Internal Revenue Code that is due to a willful attempt to understate tax liability or that is due to reckless or intentional disregard of rules or regulations. See § 1.6694–2 for rules relating to the penalty under section 6694(a). See § 1.6694–3 for rules relating to the penalty under section 6694(b).

(b) *Income tax return preparer*—(1) *In general.* Solely for purposes of the regulations under section 6694, the term "income tax return preparer" ("preparer") means any person who is an income tax return preparer within the meaning of section 7701(a)(36) and § 301.7701–15 of this Chapter, except that no more than one individual associated with a firm (for example, as a partner or employee) is treated as a preparer with respect to the same return or claim for refund. If a signing preparer is associated with a firm, that individual, and no other individual associated with the firm, is a preparer with respect to the return or claim for purposes of section 6694. If two or more individuals associated with a firm are income tax return preparers with respect to a return or claim for refund, within the meaning of section 7701(a)(36) and § 301.7701–15 of this Chapter, and none of them is the signing preparer, only one of the individuals is a preparer (i.e., nonsigning preparer) with respect to that return or claim for purposes of section 6694. In such a case, ordinarily, the individual who is a preparer for purposes of section 6694 is the individual with overall supervisory responsibility for the advice given by the firm with respect to the return or claim. To the extent provided in § 1.6694–2(a)(2) and § 1.6694–3(a)(2), an individual and the firm with which the individual is associated may both be subject to penalty under section 6694 with respect to the same return or claim for refund. If an individual (other than the sole proprietor) who is associated with a sole proprietorship is subject to penalty under section 6694, the sole proprietorship is considered a "firm" for purposes of this paragraph.

(2) *Signing and nonsigning preparers.* A "signing preparer" is any preparer who signs a return of tax or claim for refund as a preparer. A "nonsigning preparer" is any preparer who is not a signing preparer. Examples of nonsigning preparers are preparers who provide advice (written or oral) to a taxpayer or to a preparer who is not associated with the same firm as the preparer who provides the advice.

(3) *Example.* The provisions of paragraph (b) of this section are illustrated by the following example:

Example. Attorney A provides advice to Client C concerning the proper treatment of a significant item on C's income tax return. The advice constitutes preparation of a substantial portion of the return. In preparation for providing that advice, A discusses the matter with Attorney B, who is associated with the same firm as A, but A is the attorney with overall supervisory responsibility for the advice. Neither Attorney A nor any other attorney associated with A's firm signs C's return as a preparer. For purposes of the regulations under section 6694, A is a preparer with respect to C's return and is subject to penalty under section 6694 with respect to C's return. B is not a preparer with respect to C's return and, therefore, is not subject to penalty under section 6694 with respect to a position taken on C's return. This would be true even if B recommends that A advise C to take an undisclosed position that did not satisfy the realistic possibility standard. In addition, since B is not a preparer for purposes of the regulations under section 6694, A may not avoid a penalty under section 6694 with respect to C's return by claiming he relied on the advice of B. See § 1.6694–2(d)(5).

(c) *Understatement of liability.* For purposes of the regulations under section 6694, an "understatement of liability" exists if, viewing the return or claim for refund as a whole, there is an understatement of the net amount payable with respect to any tax imposed by subtitle A of the Internal Revenue Code, or an overstatement of the net amount creditable or refundable with respect to any tax imposed by subtitle A of the Internal Revenue Code. The net amount payable in a taxable year with respect to the return for which the preparer engaged in conduct proscribed by section 6694 is not reduced by any carryback. Tax imposed by subtitle A of the Internal Revenue Code does not include additions to the tax provided by section 6654 and section 6655 (relating to underpayments of estimated tax). Except as provided in paragraph (d) of this section, the determination of whether an understatement of liability exists may be made in a proceeding involving the preparer apart from any proceeding involving the taxpayer.

(d) *Abatement of penalty where taxpayer's liability not understated.* If a penalty under section 6694(a) or section 6694(b) concerning a return or claim for refund has been assessed against one or more preparers, and if it is established at any time in a final administrative determination or a final judicial decision that there was no understatement of liability relating to the return or claim for refund, then—

(1) The assessment must be abated; and

(2) If any amount of the penalty was paid, that amount must be refunded to the person or persons who so paid, as if the payment were an overpayment of tax, without consideration of any period of limitations.

(e) *Verification of information furnished by taxpayer*—(1) *In general.* For purposes of section 6694(a) and section 6694(b), the preparer generally may rely in good faith without verification upon information furnished by the taxpayer. Thus, the preparer is not required to audit, examine or review books and records, business operations, or documents or other evidence in order to verify independently the taxpayer's information. However, the preparer may not ignore the implications of information furnished to the preparer or actually known by the preparer. The preparer must make reasonable inquiries if the information as furnished appears to be incorrect or incomplete. Additionally, some provisions of the Code or regulations require that specific facts and circumstances exist— for example, that the taxpayer maintain specific documents, before a deduction may be claimed. The preparer must make appropriate inquiries to determine the existence of facts and circumstances required by a Code section or regulation as a condition to the claiming of a deduction.

(2) *Example.* The provisions of paragraph (e) of this section are illustrated by the following example:

Example. A taxpayer, during an interview conducted by the preparer, stated that he had paid $8,500 in doctor bills and $5,000 in deductible travel and entertainment expenses during the tax year, when in fact he had paid smaller amounts. On the basis of this information, the preparer properly calculated deductions for medical expenses and for travel and entertainment expenses which resulted in an understatement of liability for tax. The preparer had not reason to believe that the medical expense and travel and entertainment expense information presented was incorrect or incomplete. The preparer did not ask for underlying documentation of the medical expenses but inquired about the existence of travel and entertainment expense records. The preparer was reasonably satisfied by the taxpayer's representations that the taxpayer had adequate records (or other sufficient corroborative evidence) for the deduction of $5,000 for travel and entertainment expenses. The preparer is not subject to a penalty under section 6694.

(f) *Effective date.* Sections 1.6694–1 through 1.6694–3 are generally effective for documents prepared and advice given after December 31, 1991. However, § 1.6694–3(c)(3) (which provides that a preparer is not considered to have recklessly or intentionally disregarded a revenue ruling or notice if the position contrary to the ruling or notice has a realistic possibility of being sustained on its merits) is effective for documents prepared and advice given after December 31, 1989. Except as provided in the preceding sentence, section 6694 and the existing rules and regulations thereunder (to the extent not

inconsistent with the statute as amended by the Omnibus Budget Reconciliation Act of 1989), and Notice 90–20, 1990–1 C.B. 328, apply to documents prepared and advice given on or before December 31, 1991. For the effective date of § 1.6694–4, see § 1.6694–4(d).

§ 1.6694–2 Penalty for understatement due to an unrealistic position.

(a) *In general*—(1) *Proscribed conduct.* Except as otherwise provided in this section, if any part of an understatement of liability relating to a return of tax under subtitle A of the Internal Revenue Code or claim for refund of tax under subtitle A of the Internal Revenue Code is due to a position for which there was not a realistic possibility of being sustained on its merits, any person who is a preparer with respect to such return or claim for refund who knew or reasonably should have known of such position is subject to a penalty of $250 with respect to such return or claim for refund.

(2) *Special rule for employers and partnerships.* An employer or partnership of a preparer subject to penalty under section 6694(a) is also subject to penalty only if—

(i) One or more members of the principal management (or principal officers) of the firm or a branch office participated in or knew of the conduct proscribed by section 6694(a);

(ii) The employer or partnership failed to provide reasonable and appropriate procedures for review of the position for which the penalty is imposed; or

(iii) Such review procedures were disregarded in the formulation of the advice, or the preparation of the return or claim for refund, that included the position for which the penalty is imposed.

(b) *Realistic possibility of being sustained on its merits*—(1) *In general.* A position is considered to have a realistic possibility of being sustained on its merits if a reasonable and well-informed analysis by a person knowledgeable in the tax law would lead such a person to conclude that the position has approximately a one in three, or greater, likelihood of being sustained on its merits (realistic possibility standard). In making this determination, the possibility that the position will not be challenged by the Internal Revenue Service (e.g., because the taxpayer's return may not be audited or because the issue may not be raised on audit) is not to be taken into account. The analysis prescribed by § 1.6662–4(d)(3)(ii) for purposes of determining whether substantial authority is present applies for purposes of determining whether the realistic possibility standard is satisfied.

(2) *Authorities.* The authorities considered in determining whether a position satisfies the realistic possibility standard are those authorities provided in § 1.6662–4(d)(3)(iii).

(3) *Examples.* The provisions of paragraphs (b)(1) and (b)(2) of this section are illustrated by the following examples:

Example 1. A new statute is unclear as to whether a certain transaction that a taxpayer has engaged in will result in favorable tax treatment. Prior law, however, supported the taxpayer's position. There are no regulations under the new statute and no authority other than the statutory language and committee reports. The committee reports state that the intent was not to adversely affect transactions similar to the taxpayer's transaction. The taxpayer's position satisfies the realistic possibility standard.

Example 2. A taxpayer has engaged in a transaction that is adversely affected by a new statutory provision. Prior law supported a position favorable to the taxpayer. The preparer believes that the new statute is inequitable as applied to the taxpayer's situation. The statutory language is unambiguous as it applies to the transaction (e.g., it applies to all manufacturers and the taxpayer is a manufacturer of widgets). The committee reports do not specifically address the taxpayer's situation. A position contrary to the statute does not satisfy the realistic possibility standard.

Example 3. The facts are the same as in *Example 2*, except the committee reports indicate that Congress did not intend to apply the new statutory provision to the taxpayer's transaction (e.g., to a manufacturer of widgets). Thus, there is a conflict between the general language of the statute, which adversely affects the taxpayer's transaction, and a specific statement in the committee reports that transactions such as the taxpayer's are not adversely affected. A position consistent with either the statute or the committee reports satisfies the realistic possibility standard. However, a position consistent with the committee reports constitutes a disregard of a rule or regulation and, therefore, must be adequately disclosed in order to avoid the section 6694(b) penalty.

Example 4. The instructions to an item on a tax form published by the Internal Revenue Service are incorrect and are clearly contrary to the regulations. Before the return is prepared, the Internal Revenue Service publishes an announcement acknowledging the error and providing the correct instruction. Under these facts, a position taken on a return which is consistent with the regulations satisfies the realistic possibility standard. On the other hand, a position taken on a return which is consistent with the incorrect instructions does not satisfy the realistic possibility standard. However, if the preparer relied on the incorrect instructions and was not aware of the announcement or the regulations, the reasonable cause and good faith exception may apply depending on all facts and circumstances. See § 1.6694–2(d).

Example 5. A statute is silent as to whether a taxpayer may take a certain position on the taxpayer's 1991 Federal income tax return. Three private letter rulings issued to other taxpayers in 1987 and 1988 support the taxpayer's position. However, proposed regulations issued in 1990 are clearly contrary to the taxpayer's position. After the issuance of the proposed regulations, the earlier private letter rulings cease to be authorities and are not taken into account in determining whether the taxpayer's position satisfies the realistic possibility standard. See § 1.6694–2(b)(2) and § 1.6662–4(d)(3)(iii). The taxpayer's position may or may not satisfy the realistic possibility standard, depending on an analysis of all the relevant authorities.

Example 6. In the course of researching whether a particular position has a realistic possibility of being sustained on its merits, a preparer discovers that a taxpayer took the same position on a return several years ago and that the return was audited by the Service. The taxpayer tells the preparer that the revenue agent who conducted the audit was aware of the position and decided that the treatment on the return was correct. The revenue agent's report, however, made no mention of the position. The determination by the revenue agent is not authority for purposes of the realistic possibility standard. However, the preparer's reliance on the revenue agent's determination in the audit may qualify for the reasonable cause and good faith exception depending on all facts and circumstances. See § 1.6694–2(d). Also see § 1.6694–2(b)(4) and § 1.6662–4(d)(3)(iv)(A) regarding affirmative statements in a revenue agent's report.

Example 7. In the course of researching whether an interpretation of a phrase incorporated in the Internal Revenue Code has a realistic possibility of being sustained on its merits, a preparer discovers that identical language in the taxing statute of another jurisdiction (e.g., a state or foreign country) has been authoritatively construed by a court of that jurisdiction in a manner which would be favorable to the taxpayer, if the same interpretation were applied to the phrase applicable to the taxpayer's situation. The construction of the statute of the other jurisdiction is not authority for purposes of determining whether the position satisfies the realistic possibility standard. See § 1.6694–2(b)(2) and § 1.6662–4(d)(3)(iii). However, as in the case of conclusions reached in treatises and legal periodicals, the authorities underlying the court's opinion, if relevant to the taxpayer's situation, may give a position favorable to the taxpayer a realistic possibility of being sustained on its merits. See § 1.6694–2(b)(2) and § 1.6662–4(d)(3)(iii).

Example 8. In the course of researching whether an interpretation of a statutory phrase has a realistic possibility of being sustained on its merits, a preparer discovers that identical language appearing in another place in the Internal Revenue Code has consistently been interpreted by the courts and by the Service in a manner which would be favorable to the taxpayer, if the same interpretation were applied to the phrase

applicable to the taxpayer's situation. No authority has interpreted the phrase applicable to the taxpayer's situation. The interpretations of the identical language are relevant in arriving at a well reasoned construction of the language at issue, but the context in which the language arises also must be taken into account in determining whether the realistic possibility standard is satisfied.

Example 9. A new statutory provision is silent on the tax treatment of an item under the provision. However, the committee reports explaining the provision direct the Treasury to issue regulations interpreting the provision in a specified way. No regulations have been issued at the time the preparer must recommend a position on the tax treatment of the item, and no other authorities exist. The position supported by the committee reports satisfies the realistic possibility standard.

(4) *Written determinations.* To the extent a position has substantial authority with respect to the taxpayer by virtue of a "written determination" as provided in § 1.6662–4(d)(3)(iv)(A), such position will be considered to satisfy the realistic possibility standard with respect to the taxpayer's preparer for purposes of section 6694(a).

(5) *When "realistic possibility" determined.* For purposes of this section, the requirement that a position satisfy the realistic possibility standard must be satisfied on the date prescribed by paragraph (b)(5)(i) or (b)(5)(ii) of this section, whichever is applicable.

(i) *Signing preparers.*—(A) In the case of a signing preparer, the relevant date is the date the preparer signs and dates the return or claim for refund.

(B) If the preparer did not date the return or claim for refund, the relevant date is the date the taxpayer signed and dated the return or claim for refund. If the taxpayer also did not date the return or claim for refund, the relevant date is the date the return or claim for refund was filed.

(ii) *Nonsigning preparers.* In the case of a nonsigning preparer, the relevant date is the date the preparer provides the advice. That date will be determined based on all the facts and circumstances.

(c) *Exception for adequate disclosure of nonfrivolous positions*—(1) *In general.* The section 6694(a) penalty will not be imposed on a preparer if the position taken is not frivolous and is adequately disclosed. For an exception to the section 6694(a) penalty for reasonable cause and good faith, see paragraph (d) of this section.

(2) *Frivolous.* For purposes of this section, a "frivolous" position with respect to an item is one that is patently improper.

(3) *Adequate disclosure*—(i) *Signing preparers.* In the case of a signing preparer, disclosure of a position that does not satisfy the realistic possibility standard is adequate only if the disclosure is made in accordance with § 1.6662–4(f) (which permits disclosure on a properly completed and filed Form 8275 or 8275–R, as appropriate, or on the return in accordance with an annual revenue procedure).

(ii) *Nonsigning preparers.* In the case of a nonsigning preparer, disclosure of a position that does not satisfy the realistic possibility standard is adequate if the position is disclosed in accordance with § 1.6662–4(f) (which permits disclosure on a properly completed and filed Form 8275 or 8275–R, as appropriate, or on the return in accordance with an annual revenue procedure). In addition, disclosure of a position is adequate in the case of a nonsigning preparer if, with respect to that position, the preparer complies with the provisions of paragraph (c)(3)(ii)(A) or (B) of this section, whichever is applicable.

(A) *Advice to taxpayers.* If a nonsigning preparer provides advice to the taxpayer with respect to a position that does not satisfy the realistic possibility standard, disclosure of that position is adequate if the advice includes a statement that the position lacks substantial authority and, therefore, may be subject to penalty under section 6662(d) unless adequately disclosed in the manner provided in § 1.6662–4(f) (or in the case of a tax shelter item, that the position lacks substantial authority and, therefore, may be subject to penalty under section 6662(d) regardless of disclosure). If the advice with respect to the position is in writing, the statement concerning disclosure (or the statement regarding possible penalty under section 6662(d)) also must be in writing. If the advice with respect to the position is oral, advice to the taxpayer concerning the need to disclose (or the advice regarding possible penalty under section 6662(d)) also may be oral. The determination as to whether oral advice as to disclosure (or the oral advice regarding possible penalty under section 6662(d)) was in fact given is based on all facts and circumstances. Contemporaneously prepared documentation of the oral advice regarding disclosure (or the oral advice regarding possible penalty under section 6662(d)) generally is sufficient to establish that the advice was given to the taxpayer.

(B) *Advice to another preparer.* If a nonsigning preparer provides advice to another preparer with respect to a position that does not satisfy the realistic possibility standard, disclosure of that position is adequate if the advice includes a statement that disclosure under section 6694(a) is required. If the advice with respect to the position is in writing, the statement concerning disclosure also must be in writing. If the advice with respect to the position is oral, advice to the preparer concerning the need to disclose also may be oral. The determination as to whether oral advice as to disclosure was in fact given is based on all facts and circumstances. Contemporaneously prepared documentation of the oral advice regarding disclosure generally is sufficient to establish that the advice regarding disclosure was given to the other preparer.

(d) *Exception for reasonable cause and good faith.* The penalty under section 6694(a) will not be imposed if considering all the facts and circumstances, it is determined that the understatement was due to reasonable cause and that the preparer acted in good faith. Factors to consider include:

(1) *Nature of the error causing the understatement.* Whether the error resulted from a provision that was so complex, uncommon, or highly technical that a competent preparer of returns or claims of the type at issue reasonably could have made the error. The reasonable cause and good faith exception does not apply to an error that would have been apparent from a general review of the return or claim for refund by the preparer.

(2) *Frequency of errors.* Whether the understatement was the result of an isolated error (such as an inadvertent mathematical or clerical error) rather than a number of errors. Although the reasonable cause and good faith exception generally applies to an isolated error, it does not apply if the isolated error is so obvious, flagrant or material that it should have been discovered during a review of the return or claim. Furthermore, the reasonable cause and good faith exception does not apply if there is a pattern of errors on a return or claim for refund even though any one error, in isolation, would have qualified for the reasonable cause and good faith exception.

(3) *Materiality of errors.* Whether the understatement was material in relation to the correct tax liability. The reasonable cause and good faith exception generally applies if the understatement is of a relatively immaterial amount. Nevertheless, even an immaterial understatement may not qualify for the reasonable cause and good faith exception if the error or errors creating the understatement are sufficiently obvious or numerous.

VOL 56 ISS 251 DEC 31 1991 UMI

(4) *Preparer's normal office practice.* Whether the preparer's normal office practice, when considered together with other facts and circumstances such as the knowledge of the preparer, indicates that the error in question would rarely occur and the normal office practice was followed in preparing the return or claim in question. Such a normal office practice must be a system for promoting accuracy and consistency in the preparation of returns or claims and generally would include, in the case of a signing preparer, checklists, methods for obtaining necessary information from the taxpayer, a review of the prior year's return, and review procedures. Notwithstanding the above, the reasonable cause and good faith exception does not apply if there is a flagrant error on a return or claim for refund, a pattern or errors on a return or claim for refund, or a repetition of the same or similar errors on numerous returns or claims.

(5) *Reliance on advice of another preparer.* Whether the preparer relied on the advice of or schedules prepared by ("advice") another preparer as defined in § 1.6694–1(b). The reasonable cause and good exception applies if the preparer relied in good faith on the advice of another preparer (or a person who would be considered a preparer under § 1.6694–1(b) had the advice constituted preparation of a substantial portion of the return or claim for refund) who the preparer had reason to believe was competent to render such advice. A preparer is not considered to have relied in good faith if—

(i) The advice is unreasonable on its face;

(ii) The preparer knew or should have known that the other preparer was not aware of all relevant facts; or

(iii) The preparer knew or should have known (given the nature of the preparer's practice), at the time the return or claim for refund was prepared, that the advice was no longer reliable due to developments in the law since the time the advice was given.

The advice may be written or oral, but in either case the burden of establishing that the advice was received is on the preparer.

(e) *Burden of proof.* In any proceeding with respect to the penalty imposed by section 6694(a), the issues on which the preparer bears the burden of proof include whether—

(1) The preparer knew or reasonably should have known that the questioned position was taken on the return;

(2) There is reasonable cause and good faith with respect to such position; and

(3) The position was disclosed adequately in accordance with paragraph (c) of this section.

§ 1.6694–3 Penalty for understatement due to willful, reckless, or intentional conduct.

(a) *In general*—(1) *Proscribed conduct.* If any part of an understatement of liability relating to a return of tax under subtitle A of the Internal Revenue Code or claim for refund of tax under subtitle A of the Internal Revenue Code is due to—

(i) A willful attempt in any manner to understate the liability for tax by a preparer of the return or claim for refund; or

(ii) Any reckless or intentional disregard of rules or regulations by any such person,

such preparer is subject to a penalty of $1,000 with respect to such return or claim for refund.

(2) *Special rule for employers and partnerships.* An employer or partnership of a preparer subject to penalty under section 6694(b) is also subject to penalty only if—

(i) One or more members of the principal management (or principal officers) of the firm or a branch office participated in or knew of the conduct proscribed by section 6694(b);

(ii) The employer or partnership failed to provide reasonable and appropriate procedures for review of the position for which the penalty is imposed; or

(iii) Such review procedures were disregarded in the formulation of the advice, or the preparation of the return or claim for refund, that included the position for which the penalty is imposed.

(b) *Willful attempt to understate liability.* A preparer is considered to have willfully attempted to understate liability if the preparer disregards, in an attempt wrongfully to reduce the tax liability of the taxpayer, information furnished by the taxpayer or other persons. For example, if a preparer disregards information concerning certain items of taxable income furnished by the taxpayer or other persons, the preparer is subject to the penalty. Similarly, if a taxpayer states to a preparer that the taxpayer has only two dependents, and the preparer reports six dependents on the return, the preparer is subject to the penalty.

(c) *Reckless or intentional disregard.* (1) Except as provided in paragraphs (c)(2) and (c)(3) of this section, a preparer is considered to have recklessly or intentionally disregarded a rule or regulation if the preparer takes a position on the return or claim for refund that is contrary to a rule or regulation (as defined in paragraph (f) of this section) and the preparer knows of, or is reckless in not knowing of, the rule or regulation in question. A preparer is reckless in not knowing of a rule or regulation if the preparer makes little or no effort to determine whether a rule or regulation exists, under circumstances which demonstrate a substantial deviation from the standard of conduct that a reasonable preparer would observe in the situation.

(2) A preparer is not considered to have recklessly or intentionally disregarded a rule or regulation if the position contrary to the rule or regulation is not frivolous as defined in § 1.6694–2(c)(2), is adequately disclosed in accordance with paragraph (e) of this section and, in the case of a position contrary to a regulation, the position represents a good faith challenge to the validity of the regulation.

(3) In the case of a position contrary to a revenue ruling or notice (other than a notice of proposed rulemaking) published by the Service in the Internal Revenue Bulletin, a preparer also is not considered to have recklessly or intentionally disregarded the ruling or notice if the position has a realistic possibility of being sustained on its merits.

(d) *Examples.* The provisions of paragraphs (b) and (c) of this section are illustrated by the following examples:

Example 1. A taxpayer provided a preparer with detailed check registers reflecting personal and business expenses. One of the expenses was for domestic help, and this expense was identified as personal on the check register. The preparer knowingly deducted the expenses of the taxpayer's domestic help as wages paid in the taxpayer's business. The preparer is subject to the penalty under section 6694(b).

Example 2. A taxpayer provided a preparer with detailed check registers to compute the taxpayer's expenses. However, the preparer knowingly overstated the expenses on the return. After adjustments by the examiner, the tax liability increased significantly. Because the preparer disregarded information provided in the check registers, the preparer is subject to the penalty under section 6694(b).

Example 3. A revenue ruling holds that certain expenses incurred in the purchase of a business must be capitalized. The Code is silent as to whether these expenses must be capitalized or may be deducted currently, but several cases from different courts hold that these particular expenses may be deducted currently. There is no other authority. Under these facts, a position taken contrary to the revenue ruling on a return or claim for refund is not a reckless or intentional disregard of a rule, since the position contrary to the revenue ruling has a realistic possibility of being sustained on its merits. Therefore, the preparer will not be subject to a penalty under section 6694(b) even though the position is not adequately disclosed.

Example 4. Final regulations provide that certain expenses incurred in the purchase of a business must be capitalized. One Tax Court case has expressly invalidated that portion of the regulations. Under these facts, a position contrary to the regulation will subject the preparer to the section 6694(b) penalty even though the position may have a realistic possibility of being sustained on its merits. However, because the contrary position on these facts represents a good faith challenge to the validity of the regulations, the preparer will not be subject to the section 6694(b) penalty if the position is adequately disclosed in the manner provided in paragraph (e) of this section.

(e) *Adequate disclosure*—(1) *Signing preparers.* In the case of a signing preparer, disclosure of a position that is contrary to a rule or regulation is adequate only if the disclosure is made in accordance with § 1.6662–4(f) (1), (3), (4) and (5) (which permit disclosure on a properly completed and filed Form 8275 or 8275–R, as appropriate). In addition, the disclosure of a position that is contrary to a rule or regulation must adequately identify the rule or regulation being challenged. The provisions of § 1.6662–4(f)(2) (which permit disclosure on the return in accordance with an annual revenue procedure) do not apply for purposes of this section.

(2) *Nonsigning preparers.* In the case of a nonsigning preparer, disclosure of a position that is contrary to a rule or regulation is adequate if the position is disclosed in the manner provided in paragraph (e)(1) of this section. In addition, disclosure of a position is adequate in the case of a nonsigning preparer if, with respect to that position, the preparer complies with the provisions of paragraph (e)(2) (i) or (ii) of this section, whichever is applicable.

(i) *Advice to taxpayers.* In the case of a nonsigning preparer who provides advice to the taxpayer with respect to a position that is contrary to a rule or regulation, disclosure of that position is adequate if the advice includes a statement that—

(A) The position is contrary to a specified rule or regulation and, therefore, is subject to a penalty described in section 6662(c) unless adequately disclosed in the manner provided in § 1.6662–3(c)(2) (which permits disclosure on a properly completed and filed Form 8275 or 8275–R, as appropriate, and which requires adequate identification of any rule or regulation being challenged); and

(B) In the case of a position contrary to a regulation, the position must represent a good faith challenge to the validity of the regulation.

If the advice with respect to the position is in writing, the statement concerning disclosure also must be in writing. If the advice with respect to the position is oral, advice to the taxpayer concerning the need to disclose also may be oral. The determination as to whether oral advice as to disclosure was in fact given is based on all facts and circumstances. Contemporaneously prepared documentation of the oral advice regarding disclosure generally is sufficient to establish that the advice was given to the taxpayer.

(ii) *Advice to another preparer.* If a nonsigning preparer provides advice to another preparer with respect to a position that is contrary to a rule or regulation, disclosure of that position is considered adequate if the advice includes a statement that disclosure under section 6694(b) is required. If the advice with respect to the position is in writing, the statement concerning disclosure also must be in writing. If the advice with respect to the position is oral, advice to the preparer concerning the need to disclose also may be oral. The determination as to whether oral advice as to disclosure was in fact given is based on all facts and circumstances. Contemporaneously prepared documentation of the oral advice regarding disclosure generally is sufficient to establish that the advice was given to the other preparer.

(f) *Rules or regulations.* The term "rules or regulations" includes the provisions of the Internal Revenue Code, temporary or final Treasury regulations issued under the Code, and revenue rulings or notices (other than notices of proposed rulemaking) issued by the Internal Revenue Service and published in the Internal Revenue Bulletin.

(g) *Section 6694(b) penalty reduced by section 6694(a) penalty.* The amount of any penalty to which a preparer may be subject under section 6694(b) for a return or claim for refund is $1,000 reduced by any amount assessed and collected against the preparer under section 6694(a) for the same return or claim.

(h) *Burden of proof.* In any proceeding with respect to the penalty imposed by section 6694(b), the Government bears the burden of proof on the issue of whether the preparer willfully attempted to understate the liability for tax. See section 7427. The preparer bears the burden of proof on such other issues as whether—

(1) The preparer recklessly or intentionally disregarded a rule or regulation;

(2) A position contrary to a regulation represents a good faith challenge to the validity of the regulation; and

(3) Disclosure was adequately made in accordance with paragraph (e) of this section.

§ 1.6694–4 Extension of period of collection where preparer pays 15 percent of a penalty for understatement of taxpayer's liability and certain other procedural matters.

(a) *In general.* (1) The Internal Revenue Service will investigate the preparation by a preparer of a return of tax under subtitle A of the Internal Revenue Code or claim for refund of tax under subtitle A of the Internal Revenue Code and will send a report of the examination to the preparer before the assessment of either—

(i) A penalty for understating tax liability due to a position for which there was not a realistic possibility of being sustained on its merits under section 6694(a); or

(ii) A penalty for willful understatement of liability or reckless or intentional disregard of rules or regulations under section 6694(b).

Unless the period of limitations (if any) under section 6696(d) may expire without adequate opportunity for assessment, the Internal Revenue Service will also send, before assessment of either penalty, a 30-day letter to the preparer notifying him of the proposed penalty or penalties and offering an opportunity to the preparer to request further administrative consideration and a final administrative determination by the Internal Revenue Service concerning the assessment. If the preparer then makes a timely request, assessment may not be made until the Internal Revenue Service makes a final administrative determination adverse to the preparer.

(2) If the Internal Revenue Service assesses either of the two penalties described in section 6694(a) and section 6694(b), it will send to the preparer a statement of notice and demand, separate from any notice of a tax deficiency, for payment of the amount assessed.

(3) Within 30 days after the day on which notice and demand of either of the two penalties described in section 6694(a) and section 6694(b) is made against the preparer, the preparer must either—

(i) Pay the entire amount assessed (and may file a claim for refund of the amount paid at any time not later than 3 years after the date of payment); or

(ii) Pay an amount which is not less than 15 percent of the entire amount assessed with respect to each return or

VOL
56
ISS
251
DE
31
1991
UMI

claim for refund and file a claim for refund of the amount paid.

(4) If the preparer pays an amount and files a claim for refund under paragraph (a)(3)(ii) of this section, the Internal Revenue Service may not make, begin, or prosecute a levy or proceeding in court for collection of the unpaid remainder of the amount assessed until the later of—

(i) A date which is more than 30 days after the earlier of—

(A) The day on which the preparer's claim for refund is denied; or

(B) The expiration of 6 months after the day on which the preparer filed the claim for refund; and

(ii) Final resolution of any proceeding begun as provided in paragraph (b) of this section.

However, the Internal Revenue Service may counterclaim in any proceeding begun as provided in paragraph (b) of this section for the unpaid remainder of the amount asssessed. Final resolution of a proceeding includes any settlement between the Internal Revenue Service and the preparer, any final determination by a court (for which the period for appeal, if any, has expired) and, generally, the types of determinations provided under section 1313(a) (relating to taxpayer deficiencies). Notwithstanding section 7421(a) (relating to suits to restrain asssessment or collection), the beginning of a levy or proceeding in court by the Internal Revenue Service in contravention of this paragraph (a)(4) may be enjoined by a proceeding in the proper court.

(b) *Preparer must bring suit in district court to determine liability for penalty.* If, within 30 days after the earlier of—

(1) The day on which the preparer's claim for refund filed under paragraph (a)(3)(ii) of this section is denied; or

(2) The expiration of 6 months after the day on which the preparer filed the claim for refund, the preparer fails to begin a proceeding for refund in the appropriate United States district court, the Internal Revenue Service may proceed with collection of the amount of the penalty not paid under paragraph (a)(3)(ii) of this section.

(c) *Suspension of running of period of limitations on collection.* The running of the period of limitations provided in section 6502 on the collection by levy or by a proceeding in court of the unpaid amount of a penalty or penalties described in section 6694(a) or section 6694(b) is suspended for the period during which the Internal Revenue Service, under paragraph (a)(4) of this section, may not collect the unpaid amount of the penalty or penalties by levy or a proceeding in court.

(d) *Effective date.* The provisions of this section are effective as of December 19, 1989.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 3. The authority for part 602 contunues to read as follows:

Authority: (26 U.S.C. 7805).

§ 602.101(c) [Amended]

Par. 4. Section 602.101(c) is amended by adding the following in the table:

§ 1.6694–2(c)	1545–1231
§ 1.6694–3(e)	1545–1231

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

Approved:

Kenneth W. Gideon,

Assistant Secretary of the Treasury.

BILLING CODE 1505-01-D

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 931

New Mexico Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of proposed amendment.

SUMMARY: OSM is announcing its decision to approve, with an additional requirement, a proposed amendment to the New Mexico permanent regulatory program (New Mexico program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment pertains to excess spoil, coal processing waste, areas unsuitable for mining, geology, coal exploration, fish and wildlife, prime farmland, the use of explosives, operation plans, experimental practices, permitting, stream buffer zones, revegetation, backfilling and grading, inspection and enforcement, hydrology, and previously mined areas. The amendment revises the New Mexico program to be consistent with the corresponding Federal standards.

EFFECTIVE DATE: December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Robert H. Hagen, Telephone: (505) 776–1486.

SUPPLEMENTARY INFORMATION:

I. Background on the New Mexico Program

On December 31, 1980, the Secretary of the Interior conditionally approved the New Mexico program. General background information on the New Mexico program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the New Mexico program can be found in the December 31, 1980, **Federal Register** (45 FR 86459). Subsequent actions concerning New Mexico's program and program amendments can be found at 30 CFR 931.15, 931.16, and 931.30.

II. Proposed Amendment

By letter dated March 15, 1990 (Administrative Record No. NM–566), New Mexico submitted a proposed amendment to its permanent regulatory program pursuant to SMCRA. New Mexico submitted the proposed amendment in response to the August 14, 1986, and November 3, 1988, letters that OSM sent to New Mexico in accordance with 30 CFR 732.17(c) (Administrative Record Nos. NM–331 and NM–457).

The rules that New Mexico proposed to revise pertain to hydrology at Coal Surface Mining Commission (CSMC) Rules 80–1–1–5, 80–1–8–15, 80–1–8–16, 80–1–9–21, 80–1–13–12, 80–1–20–41 though 44, and 80–1–20–52; excess spoil at CSMC Rules 80–1–1–5, 80–1–20–71, and 80–1–20–102; coal processing waste at CSMC Rules 80–1–1–5, 80–1–20–82, and 80–1–20–91; areas unsuitable for mining at CSMC Rules 80–1–2–11, 80–1–2–12, 80–1–4–15, and 80–1–8–24; geology at CSMC Rule 80–1–8–14; coal exploration at CSMC Rules 80–1–6–10 through 13; fish and wildlife at CSMC Rules 80–1–8–20, 80–1–9–16, and 80–1–20–97; prime farmland at CSMC Rules 80–1–8–27, 80–1–10–17, 80–1–24–11, 80–1–24–12, and 80–1–24–15; the use of explosives at CSMC Rules 80–1–9–13 and 80–1–20–61 through 68; operation plans at CSMC Rule 80–1–9–14; experimental practices at CSMC Rules 80–1–10–13, 80–1–13–11, and 80–1–13–12; permitting at CSMC Rules 80–1–11–11, 80–1–11–15, 80–1–11–27, and 80–1–13–18; stream buffer zones at CSMC Rule 80–1–20–57; revegetation at CSMC Rules 80–1–20–111, 80–1–20–112, and 80–1–20–116; backfilling and grading at CSMC Rules 80–1–20–102 and 80–1–28–12; and inspection and enforcement at CSMC Rules 80–1–30–13, 80–1–31–17, and 80–1–31–18. In addition to these rules, New Mexico proposed a policy statement supplementing CSMC Rule 80–1–29–16(a) for the retention of mining operation records, reports, inspection materials, and other written information.

OSM published a notice in the March 30, 1990, **Federal Register** (55 FR 11959) announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (Administrative Record No. NM–572). The public comment period closed April 30, 1990.

During its review of the amendment, OSM identified concerns pertaining to areas unsuitable for mining at CSMC Rule 80–1–2–12; coal exploration at CSMC Rule 80–1–6–10; fish and wildlife at CSMC Rules 80–1–8–20 and 80–1–9–16; permitting at CSMC Rules 80–1–8–24 and 80–1–11–19; hydrology at CSMC Rule 80–1–20–52; stream buffer zones at CSMC Rule 80–1–20–57; coal processing waste at CSMC Rules 80–1–20–82 and 80–1–20–83; backfilling and grading at CSMC Rule 80–1–20–102; revegetation at CSMC Rules 80–1–20–112, 80–1–20–116, and 80–1–20–117; and the policy statement supplementing CSMC Rule 80–1–29–16(a) for the retention of mining operation records, reports, inspection materials, and other written information. OSM notified New Mexico of the concerns by letter dated June 1, 1990 (Administrative Record No. NM–590).

By letter dated July 11, 1990, New Mexico responded to OSM's concerns by submitting a revised amendment (Administrative Record No. NM–598). New Mexico submitted revisions pertaining to areas unsuitable for mining at CSMC Rule 80–1–2–12; coal exploration at CSMC Rule 80–1–6–10; permitting at CSMC Rules 80–1–8–24 and 80–1–11–19; hydrology at CSMC Rule 80–1–20–52; stream buffer zones at CSMC Rule 80–1–20–57; coal processing waste at CSMC Rule 80–1–20–82; and revegetation at CSMC Rule 80–1–20–112. New Mexico revised the policy statement supplementing CSMC Rule 80–1–29–16(a) for the retention of mining operation records, reports, inspection material, and other written information. New Mexico withdrew revisions relating to fish and wildlife at CSMC Rules 80–1–8–20(a) and 80–1–9–16(a), and revegetation at CSMC Rule 80–1–20–116. In addition to responding to OSM's concerns by revising and withdrawing rules, New Mexico proposed for the first time a definition for "previously mined area" at CSMC Rule 80–1–1–5.

OSM published a notice in the **Federal Register** on August 6, 1990 (55 FR 31842) reopening the comment period on the proposed amendment. OSM did so to provide the public the opportunity to reconsider the adequacy of the proposed amendment. The reopened comment period closed August 21, 1990.

By letter dated August 23, 1990 (Administrative Record No. NM–610), New Mexico withdrew from the amendment the proposed revisions relating to permitting actions and historic properties at CSMC Rule 80–1–11–19(p).

III. Director's Findings

After a thorough review, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17, the Director of OSM finds that the proposed amendment as submitted by New Mexico on March 15, 1990, and subsequently revised on July 11, 1990, and August 23, 1990, is no less stringent than SMCRA and no less effective than the corresponding Federal regulations.

1. Revisions to New Mexico's Rules That Are Substantively Identical to the Corresponding Federal Regulations

New Mexico proposed revisions to the following rules that are substantive in nature and contain language that is substantively identical to the corresponding Federal regulations (listed in parentheses):

CSMC Rule 80–1–1–5 (30 CFR 701.5), definitions of "cumulative impact area," "excess spoil," and "impoundment;"

CSMC Rule 80–1–2–11(f) (30 CFR 761.11(a)), areas where mining is prohibited or limited; CSMC Rule 80–1–2–12(b)(2) (30 CFR 761.12(b)(2)), areas designated as unsuitable for mining;

CSMC Rule 80–1–6–10 (30 CFR 772.12(a)), general requirements for coal exploration; CSMC Rule 80–1–6–11(b)(5) (30 CFR 772.11(b)(5)), coal exploration of less than 250 tons; CSMC Rule 80–1–6–12(b)(7) (30 CFR 772.12(b)(7)), coal exploration of more than 250 tons;

CSMC Rule 80–1–8–14(b)(1)(vi) (30 CFR 780.18(b)(4)), geology description; CSMC Rules 80–1–8–15(c), 80–1–8–16(b)(3), and 80–1–9–21 (b), (c), and (d) (30 CFR 780.21 (a), (i), and (j), and 784.14 (a), (i), and (j)), surface and ground-water information (reclamation plan and monitoring plan); CSMC Rule 80–1–8–27(a) (30 CFR 785.17(b)(1)), prime farmland investigation; CSMC Rule 80–1–9–13(f) (30 CFR 780.13), operation plan for blasting; CSMC Rule 80–1–9–14(c) (30 CFR 780.14(c));

CSMC Rule 80–1–10–13 (30 CFR 785.13(h)), CSMC Rule 80–1–10–13(a) (30 CFR 785.13(b)), and CSMC Rule 80–1–10–13(c) (30 CFR 785.13(c)), experimental mining practices; CSMC Rule 80–1–10–13(e) (30 CFR 785.13(e)), experimental prime farmland practices; CSMC Rule 80–1–10–13(e) (30 CFR 785.13(g)), experimental mining practices (permit requirements);

CSMC Rule 80–1–10–17(a)(1)(i) (30 CFR 785.17(c)(1)(ii)), application contents for prime farmlands; CSMC Rule 80–1–11–15(a) (30 CFR 773.13(d)(3)), permitting; CSMC Rule 80–1–11–19(c) (30 CFR 773.15(c)(5)), criteria for permit approval or denial; CSMC Rule 80–1–11–27(e) (30 CFR 773.17(g)), conditions of a permit; CSMC Rule 80–1–13–11(a) (30 CFR 785.13(g)), director's review of outstanding permits (experimental mining practices); CSMC Rule 80–1–13–12 (d) and (c) (30 CFR 785.13(h), 30 CFR 780.21 (f)(4), (g)(2), 784.14 (e)(4) and (f)(2)), permit revisions; CSMC Rules 80–1–13–18 (c)(3), (d) and (e) (30 CFR 774.17(e) (1) and (2)), notification of transfer, assignment, or sale of permit rights;

CSMC Rule 80–1–20–11(f) (30 CFR 816.11 and 817.11), signs and markers; CSMC Rule 80–1–20–41(a) (30 CFR 816.41 and 817.41(a)), hydrologic balance (general requirements); CSMC Rule 80–1–20–43(a) (30 CFR 816.43 and 817.43(a)), diversions; CSMC Rules 80–1–20–44 (a) and (c) (30 CFR 816.43 (a), (b), and (b)(4), and 817.43 (a), (b), and (b)(4)),

VOL
56

1991
UMI

diversions; CSMC Rules 80-1-20-52 (a) and (b) (30 CFR 780.21 (i) and (j) and 30 CFR 816.41(c)), hydrology; CSMC Rules 80-1-20-57(a) (1) and (2) (30 CFR 816.57(a) (1) and (2) and 817.57(a) (1) and (2)), stream buffer zones;

CSMC Rules 80-1-20-61 through 67(d)(2) and 80-1-20-67(d)(2)(ii) through 68 (30 CFR 816.61 and 817.61 through 68), use of explosives;

CSMC Rule 80-1-20-71(f) (30 CFR 816.71(e)(2)), disposal of excess spoil; CSMC Rule 80-1-20-82(a) (30 CFR 816.83(d)), coal processing waste banks; CSMC Rule 80-1-20-82(a) (30 CFR 816.83(d)), coal processing waste banks (site inspection); CSMC Rule 80-1-20-91(c) (30 CFR 816.84(b)(1)), coal processing waste (dams and embankments);

CSMC Rule 80-1-20-97(d)(10) (30 CFR 816.97(h)), protection of fish, wildlife, and related environmental values; CSMC Rules 80-1-20-102 (a), (f), and (g) (30 CFR 816/817.106), backfilling and grading of previously mined areas; CSMC Rules 80-1-20-102(a) (3), (4), and (5) (30 CFR 816.102 (b), (c), and (d)), backfilling and grading; CSMC Rule 80-1-20-111(c) (30 CFR 816.111(b) and 817.111(b)) revegetation; CSMC Rules 80-1-20-112 (c) and (d) (30 CFR 816.111(b) and 817.111(b)), revegetation; CSMC Rules 80-1-24-15(c) (2), (3), (4), (5), and (6) (30 CFR 823.15(b) (2), (5), (6), (7), and (8)), prime farmlands; CSMC Rule 80-1-24-12(a)(1) (30 CFR 823.12(c)(1)), soil removal on prime farmlands; CSMC Rule 80-1-28-12(c) (30 CFR 816.107(c) and 817.107(c)), steep slope mining;

CSMC Rule 80-1-30-13(d) (30 CFR 843.13(d)), permit suspension and revocation; and CSMC Rules 80-1-31-17(b)(1) and 80-1-31-18(b)(1) (30 CFR 845.17(b)(2) and 845.18(b)(1)), procedures for civil penalty assessments and assessment conferences.

Because the proposed revisions to these New Mexico rules are substantively identical to the corresponding Federal regulations, the Director (1) finds that these New Mexico rules are no less effective than the corresponding Federal regulations, and (2) approves these proposed rules.

2. CSMC Rule 80-1-1-5, Definition of "Previously Mined Area"

New Mexico proposed at CSMC Rule 80-1-1-5 to define "previously mined area" as "land previously mined before the date of enactment of SMCRA, August 3, 1977, which have not been fully and satisfactory reclaimed to the standards of the Act" (the State of New Mexico Surface Mining Act (Sections 69-25A-1 *et seq.* NMSA 1978)).

The Federal definition at 30 CFR 701.5 defines "previously mined area" as "land previously mined on which there were no surface coal mining operations subject to the standards of the Act." In the case of *National Wildlife Fed'n* v. *Lujan*, Nos. 87-1051, 87-1814 and 88-2788 (D.D.C. Feb. 12, 1990; hereinafter referred to as National Wildlife Fed'n), the court addressed two concerns pertaining to the Federal definition.

The first concern was whether "previously mined" means that mining occurred (1) before the date Congress enacted SMCRA (August 3, 1977) or (2) before the various dates that SMCRA's substantive requirements began to apply to specific mining operations or sites. This issue is important, because pursuant to 30 CFR 816.106(b), 817.106(b), and 819.19(b) (which are substantively identical to New Mexico's proposed rules at CSMC Rule 80-1-20-102 (f) and (g)), operators remining previously mined areas do not need to completely eliminate reaffected or enlarged highwalls if there is not enough reasonably available spoil to do so. Rather, in such situations, the operator's responsibility is to eliminate the highwalls only to the "maximum extent technically practical." Given this limited exception to the requirement to completely remove all highwalls, the second related concern was that the current definition might allow an operator to remine an area that had once been fully and satisfactorily reclaimed, and then to leave the area only partially reclaimed by not completely eliminating any remined or reaffected highwalls.

The court found that "a definition using the date of SMCRA's enactment more closely conforms to the Act and the court's previous ruling on the issue" (In re: Litigation II, 21 ERC 1193; National Wildlife Fed'n, mem. op. at 42). Consequently, the court held that the date of enactment of SMCRA (August 3, 1977) "must be the time from which the temporal concepts of 'preexisting' and 'previous' are measured" (*Id.*, mem. op. at 50). With respect to the second issue, the court held that a "definition cannot stand that lets full reclamation be undone for a later partial effort. The definition must be rewritten to make this impossible" (*Id.*, mem. op. at 48). Accordingly, the court remanded "the definition of previously mined area to the Secretary to correct both of the flaws identified above" (*Id.*, mem. op. at 51).

Although OSM has not yet actually suspended the above definition, OSM may not, because of the court's remand, use the existing Federal definition of "previously mined area" at 30 CFR 701.5 in evaluating the sufficiency of New Mexico's proposed definition. Accordingly, OSM evaluated the proposed amendment based upon its consistency with the appropriate provisions of SMCRA as interpreted by the court.

Based on the above discussion and the court's remand of the Federal definition of "previously mined area" to "correct both of the flaws identified" in the decision, the Director finds that New Mexico's proposed definition of "previously mined area" at CSMC Rule 80-1-1-5 satisfies both of the court's concerns because it (1) states that "previously mined" means August 3, 1977 (the date of enactment of SMCRA) and (2) does not allow lands which have once been fully and satisfactorily reclaimed to be reminded and then only partially reclaimed. Therefore, the Director (1) finds that New Mexico's proposed definition of "previously mined area" at CSMC Rule 80-1-1-5 is no less effective than the Federal definition of "previously mined area" at 30 CFR 701.5, as modified by the court, and (2) approves the proposed rule.

3. CSMC Rule 80-1-1-5, Definitions of "Coal Processing Waste" and "Coal Processing Waste Bank"

At CSMC Rule 80-1-1-5, New Mexico proposed definitions of "coal processing waste" and "coal processing waste bank" that are substantively identical to the corresponding Federal definitions of "coal mine waste" and "refuse pile" at 30 CFR 701.5. Although New Mexico uses different terms, the corresponding State and Federal terms have the same meaning. Because the proposed State definitions are substantively identical to the corresponding Federal definitions, the Director (1) finds that New Mexico's proposed definitions of "coal processing waste" and "coal processing waste bank" at CSMC Rule 80-1-1-5 are no less effective than the corresponding Federal definitions of "coal mine waste" and "refuse pile" at 30 CFR 701.5 and (2) approves the proposed definitions.

4. CSMC Rule 80-1-4-15(b), Announcement of Receipt of Petitions To Designate Lands Unsuitable for Mining

New Mexico proposed to add a new subsection (b)(1) to CSMC Rule 80-1-4-15 requiring that "[p]romptly after a petition is received, the Director of Mining and Minerals Division (MMD) shall notify the general public of the receipt of the petition and request submission of relevant information by a newspaper advertisement placed once a week for two consecutive weeks in a newspaper of general circulation in the county or counties in the area covered by the petition."

The corresponding Federal regulation at 30 CFR 764.15(b)(i) requires that promptly after a petition is received the regulatory authority shall notify the general public of the receipt of the petition by a newspaper advertisement placed in the locale of the area covered by the petition, in the newspaper providing broadest circulation in the region of the petitioned area, and in any official State register of public notices.

New Mexico's proposed rule requires the prompt publishing of a newspaper advertisement, and another 1 week later, whereas the corresponding Federal regulations only require the prompt publishing of one newspaper advertisement. The Director finds that this proposed requirement at CSMC Rule 80-1-4-15(b)(1) is no less effective than the corresponding Federal requirement at 30 CFR 764.15(b)(1). The Director approves the proposed change.

New Mexico's proposed rule requires advertisements in a newspaper of general circulation in the county or counties in the area covered by the petition, whereas the corresponding Federal regulation requires an advertisement in the locale of the area covered by the petition and in a newspaper providing broadest circulation in the region of the petitioned area. The Director finds that this proposed requirement at CSMC Rule 80-1-4-15(b)(1) provides newspaper notification to interested parties in the locale and region of the petition area that is no less effective than the corresponding Federal requirement at 30 CFR 764.15(b)(1). The Director approves the proposed change.

New Mexico has a official State register of public notices, but the proposed rule does not require that a notice be published in the State register notifying the general public of New Mexico's receipt of a petition to designate lands unsuitable for mining. Because New Mexico has an official State register and 30 CFR 764.15(b)(1) requires notice in the State register, the Director finds that proposed CSMC Rule 80-1-4-15(b)(1) is less effective than the corresponding Federal regulation at 30 CFR 764.15(b)(1). The Director requires New Mexico to amend CSMC Rule 80-1-4-15(b)(1) to require notification of the general public, through publication of a notice in the New Mexico State register, of New Mexico's receipt of a petition to designate lands unsuitable for mining.

5. CSMC Rule 80-1-8-13(d), Application for Exploration Permit To Remove More Than 250 Tons of Coal

New Mexico proposed to amend CSMC Rule 80-1-8-13(d) to add a clarifying statement that the granting of a written approval to conduct exploration operations removing more than 250 tons of coal shall in no way be construed to ensure the issuance of a permit to conduct surface coal mining and reclamation operations under part 5 of the New Mexico program. Neither sections 506 and 515 of SMCRA nor the Federal regulations at 30 CFR part 772 ensure that the granting of an exploration permit will ensure the issuance of a permit to conduct surface coal mining and reclamation operations. Therefore, the Director (1) finds that the proposed CSMC Rule 80-1-8-13(d) is not inconsistent with sections 506 and 515 of SMCRA and the Federal regulations at 30 CFR part 772 and (2) approves the proposed rule.

6. CSMC Rule 80-1-8-24, Permit Application Maps

Existing CSMC Rule 80-1-8-24(j) requires that maps for surface coal mining and reclamation permit applications show cemeteries located in or within 100 feet of the proposed permit area. New Mexico proposed to revise CSMC Rule 80-1-8-24(j) by adding the requirement that these maps show "known grave sites" and "unmarked burial grounds" in addition to cemeteries. "Unmarked burial ground" is defined by other State statute. The corresponding Federal regulation at 30 CFR 779.24(j) requires that these maps show all cemeteries that are located in or within 100 feet of the proposed permit area.

At 30 CFR 761.5, the Federal regulations define "cemetery" as any area of land where human bodies are interred. New Mexico defines "cemetery" at CSMC Rule 80-1-1-5 as any place dedicated to, used, and maintained for the interment of the human dead. In Finding No. 4(a)(i) of the December 31, 1980, Federal Register (45 FR 86459, 86463), the Secretary of the Interior approved the State's more limited definition of "cemetery" but only because other State statutes provide protection for peviously undiscovered grave sites. At that time, the Secretary also approved existing CSMC Rule 80-1-8-24, which included the term "cemetery."

Because New Mexico's CSMC Rule 80-1-8-24 was already no less effective than the corresponding Federal regulation, New Mexico need not have revised it. However, at its own initiative, New Mexico proposed that the permit maps show each known grave site and unmarked burial grounds in addition to each cemetery.

New Mexico's proposed use at CSMC Rule 80-1-8-24(j) of the terms "known grave sites" and "unmarked burial grounds" in conjunction with the term "cemetery" is not inconsistent with the Federal regulation at 30 CFR 779.24(j), which uses the term "cemetery," and the Federal definition of "cemetery" at 30 CFR 761.5. The Director makes this finding because the combined meaning of the New Mexico terms "cemetery," "known grave sites," and "unmarked burial grounds" is the same as the meaning of the Federal term "cemetery," which is defined as any area of land where human bodies are interred.

For these reasons, the Director (1) finds that proposed CSMC Rule 80-1-8-24(j) is no less effective than the Federal regulation at 30 CFR 779.24(j) and (2) approves the proposed rule.

7. CSMC Rules 80-1-10-17(a)(6), 80-1-24-11(c) and 80-1-24-15(c)(3), Prime Farmlands

New Mexico proposed to delete in their entirety existing CSMC Rules 80-1-24-11(c) and 80-1-24-15(c) (2) and (3), and a part of CSMC Rule 80-1-10-17(a)(6), all of which address prime farmland. These deleted rules required, as the standards for determining restoration success on prime farmland, the use of crop yields at the time of permit application for the prime farmland to be mined. The Federal regulations at 30 CFR 823.15(b)(5) require the use of crop yields at the time of reclaimed prime farmland crop success measurement for similar unmined soils surrounding the mined area that are under management practices equivalent to those employed on the reclaimed prime farmland. The Director finds that the total deletion of CSMC Rules 80-1-24-11(c) and 80-1-24-15(c) (2) and (3) and the partial deletion of CSMC Rule 80-1-10-17(a)(6) are not inconsistent with the Federal regulations at 30 CFR 823.15(b)(5).

New Mexico proposed no revisions at CSMC Rule 80-1-24-11, in addition to the deletion at CSMC Rules 80-1-24-11(c). New Mexico did propose revisions at CSMC Rules 80-1-24-15 and 80-1-10-17 in addition to the total deletion of CSMC Rules 80-1-24-15(c) (2) and (3) and the partial deletion of CSMC Rule 80-1-10-17(a)(6). As discussed in finding No. 1, the Director finds these additional revisions substantively identical to the corresponding Federal regulations at 30 CFR 823.15(b) and 785.17(c).

VOL 56 ISS 251 DEC 31 1991 UMI

Because the proposed deletions are not inconsistent with the corresponding Federal regulations and the additional revisions are substantively identical to the corresponding Federal regulations, the Director (1) finds that proposed CSMC Rules 80–1–24–11, 80–1–24–15, and 80–1–10–17 are no less effective than the Federal regulations at 30 CFR 823.15(b) and 785.17(c) and (2) approves the proposed rules.

8. CSMC Rules 80–1–11–11(a)(3) and 80–1–11–15(b), Public Notices of Filing of Permit Applications.

New Mexico proposed to amend CSMC Rule 80–1–11–15(b) to require that the information requested to be held as confidential under CSMC Rule 80–1–11–15 would not be made publicly available until after notice and opportunity to be heard is afforded both persons seeking and opposing disclosure of the information. New Mexico also proposed to amend CSMC Rule 80–1–11–11(a)(3) to require that the newspaper advertisement announcing receipt of a permit application include a description of the information requested by the applicant to be held in confidence by the director of MMD and the location where a copy of the permit application is available for public inspection.

The Federal regulation at 30 CFR 773.13(d)(3) requires that each State program contain confidentiality procedures which include provisions for notice and opportunity to be heard on confidentiality determinations. The Federal regulation at 30 CFR 773.13(a)(1)(iii) requires that the newspaper notice announcing receipt of a permit application include the location where a copy of the application is available for public inspection.

The Director finds that proposed CSMC Rules 80–1–11–15(b) and 80–1–11–11(a)(3) contain confidentiality procedures that include notice and opportunity to be heard on confidentiality determinations. Therefore, these proposed rules are no less effective than the Federal regulation at 30 CFR 773.13(d)(3). The Director also finds that proposed CSMC Rule 80–1–11–11(a)(3), which includes a requirement to notify the public by newspaper advertisement of the location where a copy of the permit application is available for inspection, is no less effective than the Federal regulation at 30 CFR 773.13(a)(1)(iii). The Director approves the proposed rules.

9. CSMC Rules 80–1–20–67(d)(3)(i), Scaled-Distance Equation for Blasting

New Mexico proposed to add new CSMC Rule 80–1–20–67(d)(3)(i), which pertains to use of explosives. With one exception, New Mexico's proposed rule is substantively identical to the corresponding Federal regulations at 30 CFR 816.67(d)(3)(i) and 817.67(d)(3)(i). The exception is that the proposed scaled-distance equation for blasting contains a typographical error. New Mexico's proposed equation for the scaled-distance is $W=(D/Ds)^{2}$. The correct formula for the scaled-distance is $W=(D/Ds)^{a}$. By letter dated July 11, 1990 (Administrative Record No. NM–598), New Mexico stated that it will correct this typographical error before it promulgates the proposed rule. With the understanding that New Mexico will correct its scaled-distance equation prior to promulgating CSMC Rule 80–1–20–67(d)(3)(i), the Director finds that the proposed rule is no less effective than the Federal regulations at 30 CFR 816.67(d)(3)(i) and 817.67(d)(3)(i). On this basis, the Director approves the proposed rule.

10. CSMC Rule 80–1–20–71 (j) and (k), Disposal of Excess Spoil

New Mexico proposed excess spoil disposal rules at CSMC Rules 80–1–20–71 (j) and (k) that are, with one exception, identical to the corresponding Federal regulations at 30 CFR 816.71(h) (2), (3), and (4), and 817.71(h) (2), (3), and (4). The exception is that New Mexico requires that the qualified registered professional engineer who inspects an excess spoil fill provide the director of MMD a certified report within 2 weeks after each inspection. The Federal regulations require a certified report "promptly" after each inspection. The Director finds that providing the director of MMD a certified report within 2 weeks is prompt. Therefore, the Director finds that New Mexico's proposed CSMC Rules 80–1–20–71(j) and 80–1–20–71(k) are no less effective than the Federal regulations at 30 CFR 816.71(h) (2), (3), and (4), and 817.71(h) (2), (3), and (4). The Director approves the proposed rules.

11. CSMC Rule 80–1–29–16(a), Availability of Records, as Supplemented by the Records Retention Memorandum Dated July 11, 1990

New Mexico's existing CSMC Rule 80–1–29–16(a) requires that copies of all records, reports, inspection materials, or information obtained by the director of MMD shall be made immediately available to the public in the manner provided for by the State statutes providing for inspection of public records, Section 14–2–1 through 14–2–3, New Mexico Surface Mining Act of 1978. New Mexico submitted a policy statement dated July 11, 1990, that addresses records retention as it relates to existing CSMC Rule 80–1–29–16(a) (Administrative Record No. NM–598). This policy statement requires that all nonconfidential records, reports, inspection materials and any other written information pertaining to all mining operations be retained in the office of MMD for public inspection for a period of not less than 5 years after final bond release. The corresponding Federal regulations at 30 CFR 840.14(b) have the same requirements as the proposed policy statement. The Director finds that CSMC Rule 80–1–29–16(a), as supplemented by New Mexico's July 11, 1990, policy statement, is no less effective than the corresponding Federal regulations at 30 CFR 840.14(b). Therefore, the Director approves the July 11, 1990, policy statement as a part of the New Mexico program.

12. 30 CFR 931.12, New Mexico Regulations Affirmatively Disapproved in Accordance With Court Order

In the **Federal Register** notice announcing the Department's approval of New Mexico's original program, the Secretary, at 30 CFR 931.12, affirmatively disapproved several provisions of New Mexico's program that incorporated suspended or remanded Federal regulations (45 FR 86459, 86461; December 31, 1980). The affirmative disapprovals were based upon an order of the U.S. District Court for the District of Columbia that the Secretary "affirmatively disapprove * * * those segments of a State program that incorporate a suspended or remanded regulation" (*In re: Permanent Surface Mining Regulation Litigation*, Civil Action 79–1144, May 16, 1980, Mem. Op. at 49).

On August 15, 1980, however, the court partly stayed its May 16, 1980, order and allowed the Secretary to approve State program provisions similar to remanded or suspended Federal regulations when the State adopted such provisions in a rulemaking or legislative proceeding which occurred before the enactment of SMCRA or after the date of the District Court decision (May 16, 1980), since such State rules clearly were not based solely upon the suspended or remanded Federal regulations. In addition, the court stated that the Secretary need not affirmatively disapprove provisions based upon suspended or remanded Federal regulations if a responsible State official requested the Secretary to approve them.

The Director finds, consistent with the court decisions, that the remaining affirmative disapprovals at 30 CFR 931.12 (a), (c), (d), (f), (g), (h), (i), (j), (k), (l), (m), and (o) are no longer necessary because by letter dated August 31, 1990, the head of the New Mexico regulatory authority specifically requested approval of these rules (Administrative Record No. NM–612). Because the affirmative disapprovals at 30 CFR 931.12 (a), (c), (d), (f), (g), (h), (i), (j), (k), (l), (m), and (o) are no longer necessary, the Director removes them.

IV. Public and Agency Comments

Public Comments

OSM solicited public comments and provided opportunity for a public hearing on the proposed amendment. No comments were received. Because no one requested an opportunity to testify at a public hearing, no hearing was held.

Agency Comments

Pursuant to section 503(b)(1) of SMCRA and 30 CFR 732.17(h)(11)(i), OSM solicited comments from the Administrator of the Environmental Protection Agency (EPA), the Secretary of Agriculture, and various other Federal agencies with an actual or potential interest in the New Mexico program. The Bureau of Land Management (BLM), National Park Service (NPS), EPA, U.S. Forest Service (USFS), Soil Conservation Service (SCS), and Mine Safety and Health Administration (MSHA) responded to OSM's request for comments.

BLM. BLM commented on the proposed amendments at CSMC Rule 80–1–1–5, the definition of "cumulative impact area" and "previously mined area;" CSMC Rules 80–1–20–71(j) and 80–1–20–82(a), disposal of excess spoil and coal processing waste banks; CSMC Rules 80–1–20–102 (f) and (g), remining; and CSMC Rules 80–1–24–12(a) (1), (2), and (3), prime farmland (Administrative Record Nos. NM–579 and NM–609).

BLM commented that the wording "the proposed operation may interact with the impacts of all anticipated mining" as proposed in the definition of "cumulative impact area" at proposed CSMC Rule 80–1–1–5 was confusing. New Mexico's proposed definition of "cumulative impact area" is substantively identical to the Federal definition of "cumulative impact area" at 30 CFR 701.5. Therefore, the Director does not require New Mexico to revise its rule in response to BLM's comment.

BLM commented on New Mexico's proposed definition of "previously mined area" at CSMC Rule 80–1–1–5 that all lands mined before August 3, 1977, regardless of reclamation, would seem to be previously mined areas. New Mexico defines "previously mined area" to mean "land previously mined before the date of enactment of SMCRA, August 3, 1977, which have not been fully and satisfactory reclaimed to the standards of the ACT." New Mexico's proposed rule is consistent with 30 CFR 701.5 as modified by a U.S. district court decision. (See finding No. 2.) Therefore, the Director does not require New Mexico to revise the rule in response to BLM's comment.

BLM's comments on proposed CSMC Rules 80–1–20–71(j) and 80–1–20–82(a) concerned the term "qualified registered professional engineer." BLM commented that the term "qualified registered" was superfluous because only qualified individuals are registered and certified as professional engineers in particular engineering disciplines in accordance with State law. New Mexico's proposed CSMC Rules 80–1–20–71(j) and 80–1–20–82 are substantively identical to the corresponding Federal regulations at 30 CFR 816.71(h)(2) and 816.83(d), which use the term "qualified registered professional engineer." (See finding Nos. 1 and 10.) Therefore, the Director does not require New Mexico to revise its rule in response to BLM's comment.

BLM commented that the word "remaining" in CSMC Rules 80–1–20–102 (j) and (g) was not acceptable terminology. The term "remining" as used in the context of this proposed rule and the State program, pertains to the mining of lands previously affected by coal mining operations. Therefore, this term has a specific meaning as applied to the New Mexico program. The Federal regulations at 30 CFR 816.106 and 817.106 use this term and specify certain criteria for remining operations. New Mexico's proposed CSMC Rules 80–1–20–102 (j) and (g) are substantively identical to the corresponding Federal regulations at 30 CFR 816.106 and 817.106. (See finding No. 1.) Therefore, the Director does not require New Mexico to revise its rules in response to BLM's comment.

BLM commented that proposed CSMC Rules 80–1–24–12(a) (1) (2), and (3), which pertain to soil removal for prime farmlands, appear to inappropriately always require the separate removal of the A, B, and C horizons. BLM reasoned that, depending upon the characteristics and thickness of A, B, and C soil horizons, other combinations and proportions such as A with some B, or A and B, may be the most productive. The Director agrees with BLM that a combination of different soil horizons may have a greater productive capacity. In fact, CSMC Rules 80–1–24–12(a) (1), (2), and (3) require this. CSMC Rule 80–1–24–12(a)(1) requires an operator to separately remove the entire A horizon or other suitable soil material to create a final soil having an equal or greater productive capacity than that which existed prior to mining. CSMC Rule 80–1–24–12(a)(2) requires an operator to separately remove the B horizon, a combination of the B and underlying C horizon, or other suitable soil material that will create a final soil having and equal or greater productive capacity than that which existed prior to mining. CSMC Rule 80–1–24–12(a)(3) requires an operator to remove the underlying C horizons, or other strata, or a combination of horizons or other strata to be used instead of the B horizon. If such combination of soils is used, the combination must be more favorable for plant growth than the B horizon. Because these rules already require these practices, the Director does not require New Mexico to revise its rules in response to BLM's comment.

NPS. NPS commented on New Mexico's March 15, 1990, proposed amendment at CSMC Rule 80–1–6–10, coal exploration; and CSMC Rule 80–1–2–11 and 12, areas unsuitable for mining. NPS commented that CSMC Rule 80–1–6–10 referenced a wrong section; CSMC Rules 80–1–2–11(e) (1), (2), and (3) were misplaced; and CSMC Rule 80–1–2–12(b)(2) contained incorrect references. The Director forward NPS's comments to New Mexico, and New Mexico corrected these inconsistencies in its July 11, 1990, proposed amendment.

EPA. EPA, Region 6, responded that it had no objections to the proposed amendment (Administrative Record No. NM–576).

USFS And SCS. USFS and SCS responded that they had no comments on the proposed amendment (Administrative Record Nos. NM–569 and 575).

MSHA. MSHA responded that New Mexico's proposed rules were acceptable and did not appear to conflict with current MSHA regulations (Administrative Record Nos. NM–584 and NM–608).

EPA Concurrence

Pursuant to 30 CFR 732.17(h)(11)(ii), the Director is required to obtain the written concurrence of the Administrator of EPA with the respect to provisions of a State program amendment which relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*) EPA gave its written concurrence on June 22, 1990 (Administrative Record No. NM–595). In its concurrence letter EPA stated that, with respect to New Mexico's proposed stream channel diversions rule at CSMC

VOL
56
ISS
251
DE
31
1991
UMI

Rule 80-1-20-44(a), ephemeral streams in addition to perennial and intermittent streams are waters of the United States under the Clean Water Act. In addition, EPA stated that, with respect to New Mexico's proposed stream channel diversions rule at CSMC rule 80-1-20-44(a)(2), diversions must comply with local, State, and Federal statutes and regulations. The Director acknowledges EPA's statements and has notified New Mexico of them by their inclusion in the administrative record.

State Historic Preservation Officer (SHPO) and Advisory Council on Historic Preservation (ACHP) Comments

Pursuant to 30 CFR 732.17(h)(4), OSM is required to solicit comments from SHPO and ACHP for all amendments that may have an effect on historic properties. Comments were solicited from these offices. SHPO responded to OSM's solicitation, but ACHP did not.

SHPO commented on proposed CSMC Rule 80-1-8-24(j), which requires applicants for surface coal mining and reclamation permits to show on permit application maps all known grave sites and cemeteries located in or within 100 feet of the proposed area. SHPO recommended that New Mexico substitute "unmarked burial ground" for "known grave site." SHPO recommended this substitution because "unmarked burial ground" is a term defined by State law. The Director forward SHPO's comment to New Mexico (Administrative Record No. NM-574). In response to SHPO's comment, New Mexico incorporated "unmarked burial ground" in its July 11, 1990, proposed amendment. (See finding No. 6.)

SHPO also commented on the July 11, 1990, proposed CSMC Rules 80-1-8-24(j) and 80-1-11-19(p). SHPO agreed with the changes to proposed CSMC Rule 80-1-8-24(j). Also, SHPO commented on proposed CSMC Rule 80-1-11-19(p), which deals with the director of MMD's right to impose conditions on a permit to insure the protection of historic properties. New Mexico proposed to delete this provision. SHPO commented that the requirement should be retained, because it would give the director of MMD discretion to include a specific permit stipulation to protect cultural resources. New Mexico withdrew its proposed changes to CSMC Rule 80-1-11-19(P) on August 23, 1990. Therefore, SHPO's comment on CSMC Rule 80-1-11-19(p) is moot.

V. Director's Decision

Based on the above findings, the Director approves, with an additional requirement, the proposed amendment as submitted by New Mexico on March 15, 1990, and as revised by it on July 20, and August 23, 1990. With one exception, the Director's approval of the proposed amendment is contingent upon New Mexico's promulgation of the proposed revisions in the identical form as submitted for OSM's review. The exception is, as discussed in finding No. 9, that the Director approves New Mexico's proposed scaled distance formula at CSMC Rule 80-1-20-67(d)(3)(i) with the understanding that New Mexico will correct the typographical error in the formula when it promulgates the rule.

As discussed in finding No. 4, the Director requires New Mexico to further amend CSMC Rule 80-1-4-15(b)(1) to require notification of the general public, through the publication of a notice in the New Mexico State register, of New Mexico's receipt of a petition to designate lands unsuitable for mining.

As discussed in finding No. 12, the Director removes the affirmative disapprovals at 30 CFR 931.12 (a), (c), (d), (f), (g), (h), (i), (j), (k), (l), (m), and (o).

To implement this decision, the Director amends the Federal regulations at 30 CFR part 931 that codify all decisions concerning the New Mexico program. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to bring their programs into conformity with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

VI. Procedural Determinations

National Environmental Policy Act

Pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

Executive Order 12291 and the Regulatory Flexibility Act

On July 12, 1984, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Accordingly, for this action OSM is exempt from the requirement to prepare a regulatory impact analysis, and this action does not require regulatory review by OMB. The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal regulations will be met by the State.

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 931

Intergovernmental relations, Surface mining, Underground mining.

Dated: December 20, 1991.

Raymond L. Lowrie,

Assistant Director, Western Support Center.

For the reasons set out in the preamble, title 30, chapter VII, subchapter T, of the Code of Federal Regulations is amended as set forth below:

PART 931—NEW MEXICO

1. The authority citation for part 931 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

§ 931.12 [Removed]

2. Section 931.12 is removed.

3. Section 931.15 is amended by adding a new paragraph (o) to read as follows:

§ 931.15 Approval of amendments to State regulatory program.

* * * * *

(o) The following amendment, as submitted on March 15, 1990, and as revised on July 11, 1990, and August 23, 1990, is approved effective December 31, 1991. Revisions to:

CSMC Rule 80-1-1-5, definitions of "cumulative impact area," "previously mined area," "excess spoil," "impoundment," "coal processing waste," and "coal processing waste bank."
CSMC Rule 80-1-2-11(f), areas where mining is prohibited or limited.
CSMC Rule 80-1-2-12(b)(2), areas designated as unsuitable for mining.
CSMC Rule 80-1-4-15(b), receipt of lands unsuitable petitions.
CSMC Rule 80-1-6-10, general requirements for coal exploration.
CSMC Rule 80-1-6-11(b)(5), coal exploration of less than 250 tons.
CSMC Rule 80-1-6-12(b)(7) and 80-1-6-13(d), coal exploration of more than 250 tons.
CSMC Rule 80-1-6-13(d), application for approval or disapproval of exploration of more than 250 tons.
CSMC Rule 80-1-8-14(b)(1)(vi), geology description.
CSMC Rules 80-1-8-15(c) and 80-1-8-16(b)(3), 80-1-9-21(b), (c), and (d).

surface and ground-water information (reclamation plan and monitoring plan).
CSMC Rule 80-1-8-24, permit application maps.
CSMC Rule 80-1-8-27(a), prime farmland investigations.
CSMC Rule 80-1-9-13(f), blasting operations plan.
CSMC Rule 80-1-9-14(c), operation plans.
CSMC Rules 80-1-10-13 and 13 (a) and (c), experimental mining practices.
CSMC Rule 80-1-10-13(e), mining permit requirements for experimental practices.
CSMC Rule 80-1-10-17(a)(1)(i), application contents for prime farmlands.
CSMC Rules 80-1-10-17(a)(6), 80-1-24-11(c), and 80-1-24-15(c)(3), prime farmlands.
CSMC Rule 80-1-11-11(a)(3), public notices of filing of permit applications.
CSMC Rules 80-1-11-15 (a) and (b), permitting.
CSMC Rule 80-1-11-19(c), criteria for permit approval or denial.
CSMC Rule 80-1-11-27(e), conditions of permits.
CSMC Rule 80-1-13-11(a), director's review of outstanding experimental practice mining permits.
CSMC Rules 80-1-13-12 (c) and (d), permit revisions.
CSMC Rules 80-1-13-18(c)(3), (d), and (e), notification of transfer, assignment, or sale of permit rights.
CSMC Rule 80-1-20-11(f), signs and markers.
CSMC Rule 80-1-20-41(a), general requirements for hydrologic balance.
CSMC Rules 80-1-20-43(a), and 44 (a) and (c), diversions.
CSMC Rules 80-1-20-52 (a) and (b), hydrology.
CSMC Rules 80-1-20-57(a) (1) and (2), stream buffer zones.
CSMC Rules 80-1-20-61 through 68, use of explosives.
CSMC Rules 80-1-20-71 (f), (j), and (k), disposal of excess spoil.
CSMC Rule 80-1-20-82(a), coal processing waste banks.
CSMC Rule 80-1-20-91(c), coal processing waste dams and embankments.
CSMC Rule 80-1-20-97(d)(10), protection of fish, wildlife, and related environmental values.
CSMC Rules 80-1-20-102 (a), (f), and (g), backfilling and grading of previously mined areas.
CSMC Rules 80-1-20-102(a) (3), (4), and (5), backfilling and grading.
CSMC Rules 80-1-20-111(c) and 112 (c) and (d), revegetation.
CSMC Rule 80-1-24-12(a)(1), soil removal on prime farmlands.
CSMC Rules 80-1-24-15(c) (2), (3), (4), (5), and (6), prime farmlands.
CSMC Rule 80-1-26-12(c), steep slope mining.
CSMC Rule 80-1-30-13(d), permit suspension or revocation.
CSMC Rules 80-1-31-17(b)(1) and 80-1-31-18(b)(1), procedures for civil penalty assessments and assessment conferences.
Policy statement for records retention, dated July 11, 1990, as it relates to CSMC Rule 80-1-29-16(a).

4. Section 931.16 is amended by adding new paragraph (c) to read as follows:

§ 931.16 Required program amendments.

* * * * *

(c) By March 2, 1992, New Mexico shall submit for OSM approval a program amendment for CSMC Rule 80-1-4-15(b)(1) requiring publication in the New Mexico State register of a public notice of receipt of a petition to designate lands unsuitable for mining.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD13 91-07]

Drawbridge Operation Regulations; Coalbank Slough, John Day River, Nehalem River, and Skipanon River, OR and Deep River, WA

AGENCY: Coast Guard, DOT.

ACTION: Final rule—revocation.

SUMMARY: This amendment revokes the regulations for the following drawbridges: U.S. 101 highway bridge across Coalbank Slough (mile 0.4), U.S. 30 highway bridge across John Day River (mile 1.2), U.S. 101 highway bridge across the Nehalem River (mile 1.1), Burlington Northern Railroad bridge across the Skipanon River (mile 0.8) in Oregon, and the Washington State Route 4 bridge across Deep River (mile 3.5) in Washington. Notice and public procedure have been omitted from this action due to the removal of the bridges concerned.

EFFECTIVE DATE: This revocation of regulations is effective on December 31, 1991.

FOR FURTHER INFORMATION CONTACT: John E. Mikesell, Chief, Bridge Section, Aids to Navigation and Waterways Management Branch (Telephone: (206) 553-5864).

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this rule amendment are Austin Pratt, project officer, and Lieutenant Deborah K. Schram, project attorney.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this action does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Economic Assessment and Certification

This action has no economic consequences. It merely revokes regulations that are now meaningless because they pertain to drawbridges which no longer exist. Consequently, this action is considered to be nonmajor under Executive Order 12291 and nonsignificant under Department of Transportation regulatory policies and procedures (44 CFR 11034, February 26, 1979). Since there is no economic impact, a full regulatory evaluation is unnecessary. Because no notice of proposed rulemaking is required under 5 U.S.C. 553, this action is exempt from the Regulatory Flexibility Act. This action will not have a significant impact on a substantial number of small entities.

Environmental Impact

This action has been reviewed by the Coast Guard and has been determined to be categorically excluded from further environmental documentation in accordance with paragraph 2.B.2.g.(5) of the NEPA Implementing Procedures COMDINST M16475.1B.

Bridges.

Regulations

In consideration of the foregoing, part 117 of 33, Code of Federal Regulations is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to be read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g).

VOL 56 ISS 251 DEC 31 1991 UMI

§§ 117.867, 117.885, 117.891 and 117.1039 [Removed]

§ 117.881 [Amended]

2. Sections 117.867, paragraph (b) of § 117.881 and §§ 117.885, 117.891, and 117.1039 are removed and reserved.

Dated: December 13, 1991.

J. E. Vorbach,

Rear Admiral, U.S. Coast Guard, Commander, 13th Coast Guard District.

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 111

Curbside Mailboxes; Manufacturing Standard USPS-STD-7

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This notice adopts, with minor revisions, rules which were published with an invitation to comment in the **Federal Register** on June 3, 1991, 56 FR 25059. It provides that mail receptacles designed for installation at the curb or edge of a roadway on city or highway contract routes, like those on rural routes, be approved by the Postal Service. It also revises the minimum requirements and test criteria for these curbside mail receptacles.

EFFECTIVE DATE: March 15, 1992.

FOR FURTHER INFORMATION CONTACT: Roy Preston, Office of Delivery and Retail Management (202) 268-3949.

SUPPLEMENTARY INFORMATION: Pursuant to its statutory responsibilities, including the duty to provide an efficient delivery and collection system, the Postal Service has long provided standards for mail receptacles, including receptacles installed at the curb or edge of a roadway (i.e., curbside boxes) on rural routes. Previously, the Postal Service did not require customers who received city delivery or highway contract delivery service to use approved boxes for curbside delivery. The same reasons which require the use of approved receptacles in rural delivery areas apply equally to city delivery and highway contract delivery. In the **Federal Register** of June 3, 1991, 56 FR 25059, the Postal Service proposed revisions to parts 151, 155, 156, and 157 of the Domestic Mail Manual (DMM) to require customers in all delivery areas to utilize approved boxes for curbside service. This notice also proposed that the same standards would apply to all curbside receptacles, and that the rules concerning these specifications would be set forth in DMM 151, rather than in the section concerning rural delivery service.

The Postal Service also proposed to reissue Manufacturing Standard USPS-STD-7, Mailboxes, City and Rural Curbside, which sets forth the detailed requirements concerning the production of these receptacles, and to revise certain of its provisions. The proposal permitted the use of plastics in the manufacture of receptacles, in view of the recent advances in the durability of these materials. The proposal also revised certain specifications and testing standards for all curbside receptacles in order to ensure efficient and safe delivery and security of the mail.

Evaluation of Comments Received

Comments on the proposal were received from eight parties, with four commenters stating that they agreed with the proposal and urging that the rule be adopted and four commenters suggesting changes to the proposal. These comments have been considered carefully, and a discussion of them follows.

DMM 151.511 (renumbered as DMM 151.512) changed the classification of rural boxes so that it now identifies the sizes as 1, 2, and 3 rather than sizes 1, 1A, and 2. One commenter questioned the new classification citing increased advertising cost and possible confusion between manufacturers, retailers, and customers because of their familiarity with the old classification. We believe the new classification will be much clearer to customers, retailers, and manufacturers because it makes the distinction between contemporary and traditional styles.

The same commenter questioned the need in DMM 151.514 (renumbered as DMM 151.517) for the markings "U.S. Mail" and "Approved by the Postmaster General" on wooden mailboxes if the internal mail receptacle is an approved mailbox. It is not sufficient that the metal receptacle within these boxes has previously been approved because modified boxes must be approved as if the box were a new box. See DMM 151.513, 151.514, 151.515, and 151.516.

The same commenter recommended that we include a statement in Section 3.1 of the USPS-STD-7 to allow the installation of a name, address, and box number placard kit. We believe this suggestion has merit and have revised this section to specify that no attachment will be allowed with the exception of the customer name and address.

The same commenter questioned the strict interpretation of rib centers and width of ribs for the bottom of the mailbox in Section 3.1.2 of USPS-STD-7, because it would require tooling changes. This requirement, which will provide consistency in the rib patterns among all mailbox manufacturers, is necessary to ensure that mail will not adhere to the surface of receptacles.

This commenter also questioned the change in the requirement in section 3.6.1 of USPS-STD-7 that the flag staff centerline be no more than 2 inches from the front of the receptacle instead of the original requirement that it be 4 inches. The 2-inch requirement will be retained because it responds to reports from delivery personnel that it is difficult to reach the flag from a delivery vehicle if it is positioned more than 2 inches from the front of the mailbox.

A second commenter questioned why we are limiting the impact test (dropping a 10-pound weight 3 feet) to plastic boxes in section 3.1 of USPS-STD-7. The impact test is necessary for plastic boxes to ensure they are not prone to shatter or leave unsafe jagged edges if struck.

The same commenter questioned the need to retain the requirement in section 3.6.1 of USPS-STD-7 which states that, with the flag in the raised position, not less than 6 square inches of the signal portion must be visible above the top of the box. While the requirement is necessary to ensure that the flag is visible to the carrier, we believe this suggestion has some merit. Accordingly, we have modified this section and section 3.6.2 to specify that 4 square inches, rather than 6 square inches, of the signal portion of the flag must be visible above the top of the box.

This commenter also questioned the need for the flammability requirement for curbside mailboxes set forth in sections 3.1 and 3.14.6. This requirement is based upon the concern that mail could be burned in wood and plastic boxes because they support combustion while metal does not.

The same commenter questioned the need for watertightness, as required by section 3.14.7, if mailboxes have a slot. Watertightness will still be required due to the need to avoid damage to mail. Accordingly, rain dump shields or flaps are required to prevent water from entering the box.

A third commenter questioned the requirement in section 3.1.2 of USPS-STD-7 that mailboxes must be designed to allow for all mail (incoming and outgoing) to be inserted and retrieved in a horizontal manner. For purposes of carrier safety and to facilitate delivery from a vehicle, mailboxes have to be able to accommodate mail delivery in a horizontal mode. An explanation has been added to the provision to clarify the meaning of "horizontal."

The same commenter also questioned the change in section 3.3 of USPS-STD-7 stating that the carrier service door must not be spring-loaded. This change is necessary because the carrier service door must remain open while the carrier is placing mail in the box. A spring-loaded carrier service door requires the carrier to use two hands to service the mailbox while sitting in their vehicles, creating a potentially unsafe condition for these carriers.

A fourth commenter recommended that we allow manufacturers to make newspaper receptacles part of the mailbox. The Postal Service has a regulation in DMM 151.529 establishing the conditions under which newspaper receptacles may be attached to the box support. Failure to adhere to these provisions, such as by making the receptacle part of the mailbox, would interfere with delivery and collection of mail and adversely affect efficient service.

The Engineering and Development Center will not accept mailboxes for evaluation under the old specification after the effective date of these regulations. Additionally, all currently approved manufacturers must receive approval for their receptacles under the new standards. Manufacturers will be given a grace period of 90 days after the effective date of the new standard to sell boxes approved under the old standard to retailers. Retailers will be given a grace period of 1 year after the effective date of the new standard to sell boxes approved under the old standard. In conjunction with this, customers may install receptacles approved under the old specification for 1 year after the effective date of the new regulation.

Based on the proposed rule, and following careful consideration of the comments received, as described above, the Postal Service adopts the following amendments to parts 151, 155, 156, and 157 of the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations, 39 CFR part 111, and to USPS-STD-7.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001-3011, 3201-3219, 3403-3406, 3621, 5001.

2. Parts 151, 155, 156, and 157 of the Domestic Mail Manual are amended to read as follows:

CHAPTER 1—DOMESTIC MAIL SERVICES

* * * * *

150—Collection and Delivery

151—MAIL RECEPTACLES

* * * * *

151.2 Use for Mail Only

(Revise the first two sentences of 151.2 to read as follows:)

Except as provided in 151.528, the receptacles described in 151.1 may be used only for matter which bears postage. Therefore, other than as permitted in 151.528, no part of a mail receptacle may be used to deliver any matter not bearing postage."

* * * * *

(Add 151.5 after 151.4 as follows:)

151.5 Curbside Mailboxes

151.51 Specifications for Manufacturers

151.511 Policy. Manufacturers of all mailboxes designed and manufactured to be erected at the edge of a roadway or curbside of a street and to be served by a carrier from a vehicle on any city, rural, or highway contract route must obtain approval of their products in accordance with U.S. Postal Service Standard 7 (USPS STD-7), Mailboxes, City and Rural Curbside. Construction standards and drawings (USPS STD-7) for guidance in the manufacture of curbside mailboxes may be obtained by writing to the Delivery Management Division, U.S. Postal Service, 475 L'Enfant Plaza SW., room 7142, Washington, DC 20260-7151.

151.512 Dimensions and Styles

a. Approved Sizes and Styles. Three standard sizes and two styles of mailboxes are approved for use on city, rural, and highway contract routes:

TRADITIONAL (T) AND CONTEMPORARY (C) MAILBOX STYLES *

Size	Length	Width	Height
T1 and C1	19"	6-½"	8-½"
T2 and C2	21"	8"	10-½"
T3 and C3	23-½"	11-½"	13-½"

* Dimensions given in approximate inches.

b. Variances. Curbside mailboxes may be constructed in any size between the maximum and minimum outside dimensions specified on approved drawings, provided that the general shape and the proportions of height, width, and length are maintained.

151.513 Application for Approval. To secure approval of a curbside mailbox, manufacturers must submit the following to the Delivery Equipment Division, Engineering and Development Center, U.S. Postal Service, 8403 Lee Highway, Merrifield, VA 22082-8101. Manufacturers must also notify the Delivery Management Division by letter that mailboxes are being submitted for approval.

a. Sample Mailboxes. No fewer than two complete mailboxes with markings required in paragraph 3.7 of USPS-STD-7 of each style made of exact materials, construction, coating, paint, etc., including the panels required by paragraph 3.14.8 of USPS-STD-7, and otherwise identical in every way with the boxes intended to be marketed.

b. Instructions. A copy of the instructions required by paragraph 3.11 of USPS-STD-7.

c. Color Samples. Color samples showing all color schemes to be used.

d. Proposed Packaging. Boxes or packaging of the type proposed for shipping production units.

e. Documentation. Two complete sets of manufacturing drawings and installation instructions, showing that the units submitted meet the requirements of USPS-STD-7. The drawings must be dated, signed, and certified to represent the production units exactly as submitted. The drawings must include sufficient details to allow the Postal Service to document and inspect all materials, construction methods, processes, coatings, treatments, finishes, control specifications, parts, and assemblies used in the construction of the units. The Postal Service may request individual piece parts to verify drawings.

151.514 Modifications During Application Process. No changes may be made by the manufacturer to its products or drawings without written notification of and approval from the Postal Service. Any changes must be submitted with an explanation of the reasons in writing and also documented in the revision block of the affected drawings. Two units of each type with the changes incorporated must be submitted for testing and approval. All changes are subject to written approval by the Postal Service.

151.515 Application Approval

a. Authorizing Organization. The decision to approve or disapprove mailboxes is issued by the Office of Delivery and Retail Management, U.S. Postal Service (for address, see Address List in Appendices). All correspondence

VOL 56 ISS 251 DEC 31 1991 UMI

and inquiries must be directed to that office.

b. Retention of Drawings and Sample Mailboxes. The Postal Service returns one set of manufacturing drawings to the manufacturer, together with written notification of approval or disapproval, including reasons for disapproval. The drawings are stamped and identified as representing the production unit type if the mailbox is approved. After testing, the Postal Service (1) Retains approved boxes and (2) disposes of disapproved boxes unless the manufacturer requests their return and pays the shipping costs.

151.516 Production Units

a. Construction. Manufacturers must construct production units in accordance with identified (stamped) drawings and USPS–STD–7. These units must be of the exact materials, construction, coating, workmanship, finish, etc., as the approved units. The Postal Service reserves the right at any time to examine and retest production units obtained either in the general marketplace or from the manufacturer, and may require the manufacturer to provide units for examination and testing. Failure of these production units to be manufactured in strict accordance with the approved units, the identified drawings, and the provisions of USPS–STD–7 may result in the rejection of units and the suspension or revocation of the manufacturer's authorization as an approved manufacturer through a decision issued by the Office of Delivery and Retail Management.

b. Packaging. Mailboxes and accessories must be packaged in a manner to ensure arrival at destination in satisfactory condition. Boxes must be shipped fully assembled except that the following parts may be removed if necessary to protect them from damage: Protruding portions, such as door latching hardware, mounting adapters, and mounting posts or stands. Containers and packaging must comply with the National Motor Freight Classification Rule 222, sections 2 and 3. Boxes must be suitably wrapped or protected and packaged in separate containers to prevent damage to painted surfaces by rubbing against other parts or the internal surfaces of the container.

c. Changes. Manufacturers must receive written approval from the Postal Service before making any change to the production unit or the identified design drawings. Approval for changes requires resubmission of units for testing and updated drawings for review.

151.517 Marking. All curbside mailboxes must have the following legible inscriptions on the carrier service door: "U.S. MAIL" and "APPROVED BY THE POSTMASTER GENERAL." Manufacturers must mark these inscriptions by embossing on sheet metal, using raised lettering on plastic, or engraving on wood or other materials not suitable for embossing. The name and address of the manufacturer and the month and year of manufacture must also be marked on the box. Manufacturers must either emboss this marking on the rear wall or affix a permanent decal on the inside near the front opening of the box.

151.518 List of Approved Manufacturers

Following is a list of manufacturers of traditional and contemporary style curbside receptacles whose mailboxes have been approved by the Postal Service:

Approved manufacturers	Type of mailbox
Add On's by Fischer, P.O. Box 746, Huntley, IL 60142–0746.	C1
Armor Plate Mailbox Inc., P.O. Box 1060, Sterling Heights, MI 48311–1060.	C1
Bacova Guild Ltd, Bacova, VA 24122–9999.	C1
Mr. Jerry Ballinger, 5119 West U Avenue, Schoolcraft, MI 49087–9769.	C1
Beacon Products Inc., 6065A 17th Street East, Bradenton, FL 34203–5002.	T2, C1, C2, C3
Carmel Wood Products, 24723 Upper Trail, Carmel, CA 93923–9043.	C1
Chicago Heights Furnace Supply Co. Inc., 94–104 East 22nd Street, Chicago Heights, IL 60411–4263.	T1, T2, T3
Decor House, P.O. Box 1108, Temple, TX 76503–1108.	C1
EZ Mail Corporation, 62 Carroll Avenue, P.O. Box 4038, Bridgeport, CT 06607–4038.	T1, C1

1—Curbside Box Size No. 1.
2—Curbside Box Size No. 2.
3—Curbside Box Size No. 3.
T—Traditional Curbside Box Style.
C—Contemporary Curbside Box Style.

151.52 Installation and Use

151.521 Custom-Built Curbside Mailboxes. Postmasters are authorized to approve curbside mailboxes constructed by individuals who, for aesthetic or other reasons, do not wish to use an approved manufactured box. The custom-built box must conform generally to the same requirements as approved manufactured boxes relative to the flag, size, strength, and quality of construction.

151.522 Painting and Identification. The Postal Service prefers that curbside mailboxes and posts or supports be painted white, although other colors may be used if desired. Where box numbers are used, the numbers must be inscribed in contrasting color in neat letters and numerals not less than 1 inch high on the side of the box visible to the carrier's regular approach, or on the door if boxes are grouped. Where street names and house numbers have been assigned by local authorities, and the postmaster has authorized use of a street name and house number as a postal address, the house number must be shown on the box. If the box is located on a different street from the customer's residence, the street name and house number must be inscribed on the box. Placement of the owner's name on the box is optional. Advertising on boxes or supports is prohibited.

151.523 Posts and Supports. Posts or other supports for curbside mailboxes must be neat and of adequate strength and size. They may not be designed to represent effigies or caricatures that tend to disparage or ridicule any person. The box may be attached to a fixed or movable arm.

151.524 Location. Curbside mailboxes must be placed so that they may be safely and conveniently served by carriers without leaving their conveyances, and must be located on the right-hand side of the road in the direction of travel of the carriers in all cases where traffic conditions are such that it would be dangerous for the carriers to drive to the left to reach the boxes, or where their doing so would constitute a violation of traffic laws and regulations. (For exception, see 156.312). On new rural or highway contract routes, all boxes must be located on the right side of the road in the direction of travel by the carrier. Boxes must be placed to conform to state laws and highway regulations. Carriers are subject to the same traffic laws and regulations as are other motorists. Customers must remove obstructions, including vehicles, trash cans, and snow, which make delivery difficult. Generally, customers should install boxes with the bottom of the box at a vertical height of between 3½ and 4 feet from the road surface, However, because of varying road and curb conditions and other factors, the Postal Service recommends that customers contact the postmaster or carrier before erecting or replacing their mailboxes and supports.

151.525 Grouping. Boxes should be grouped wherever possible, especially at or near crossroads, at service turnouts, or at other places where a considerable number of boxes are presently located.

151.526 More Than One Family. More than one family, but not more than five families, on rural or highway contract routes, may use the same box, provided a written notice of agreement, signed by the heads of the families, or by the individuals who desire to join in the use of such box, is filed with the postmaster at the distributing office.

151.527 Locks. The use of locks on mailboxes on rural and highway contract routes is not required. If, however, a box is equipped with a lock, the box must have a slot large enough to accommodate the customer's normal daily mail volume. The Postal Service does not open locked boxes and does not accept keys for this purpose.

151.528 Unstamped Newspapers. Curbside mailboxes are to be used for mail only, except that publishers of newspapers regularly mailed as second-class mail may, on Sundays and national holidays only, place copies of the Sunday or holiday issues in the rural and highway contract route boxes of subscribers, with the understanding that copies are removed from the boxes before the next day on which mail deliveries are scheduled.

151.529 Newspaper Receptacles. A receptacle for the delivery of newspapers may be attached to the post of a curbside mailbox used by the Postal Service, provided: no part of the receptacle touches or is attached to or is supported by any part of the mailbox, interferes with the delivery of mail, obstructs the view of the flag, or presents a hazard to the carrier or his vehicle. The receptacle must not extend beyond the front of the box when the box door is closed. No advertising may be displayed on the outside of the receptacle, except the name of the publication.

151.53 Nonconforming Mailboxes. Carriers must report to the postmaster any mailboxes not conforming to postal regulations. The postmaster sends Form 4056 to the owners of these boxes, requesting that they remedy the irregularities or defects.

155—CITY DELIVERY

* * * * *

155.41 Obligation of Customer

(Revise the first sentence in 155.41a as follows:)

a. Customers of the carrier delivery service must provide authorized receptacles (see 151.5) or door slots, except for mail receptacles authorized by the Postal Service to be owned and maintained by the Postal Service.

* * * * *

156—RURAL SERVICE

* * * * *

(Revise 156.26 and replace 156.5 as follows:)

156.26 Highway Contract Delivery. Persons residing on roads traveled by both rural and highway contract carriers may qualify as customers of either or both routes. If one curbside mailbox is used for both routes, it must be an approved receptacle (see 151.5).

* * * * *

156.5 Rural Mailboxes. Rules setting specifications for rural mailboxes, and other provisions concerning the installation, location, and use of boxes are set forth in 151.5.

* * * * *

157—HIGHWAY CONTRACT SERVICE

(Revise 157.32c and 157.4 as follows:)

157.32 Availability.

* * * * *

(c) Either erect a curbside mailbox approved under 151.5 on the highway contract route carrier's existing line of travel or are authorized to receive delivery through neighborhood delivery and collection box units and parcel lockers owned and maintained by the Postal Service.

* * * * *

157.4 Location of Receptacles. Approved curbside mailboxes (see 151.5) must be placed where they protect mail and may be conveniently served by carriers without leaving their vehicles. These receptacles must be located on the right side of the road in the direction of travel, when required by traffic conditions, or when driving to the left to reach the boxes would constitute a violation of traffic laws by the carrier.

3. USPS–STD–7, *Mailboxes, City and Rural Curbside*, is revised to read as follows:

U.S. Postal Service Standard Mailboxes, City and Rural Curbside

USPS–STD–7
July 31, 1991
Supersedes USPS–STD–7
Dated October 1985
Doc. 1088BLIB

1. SCOPE AND CLASSIFICATION

1.1 *Scope*—This standard covers all city and rural curbside mailboxes.

1.2 *Classification*—Curbside mailboxes must be of the following types and sizes:

Type I—Box, Traditional, Curbside Mail
Size T1—See Drawing 3730–0310, RD–4
Size T2—See Drawing 3730–0310, RD–5
Size T3—See Drawing 3730–0310, RD–6
Type II—Box, Contemporary, Curbside Mail
Size C1—18⅛" × 5" × 6"
Size C2—19⅛" × 6" × 7"
Size C3—22⅛" × 8" × 11⅛"
Minimum Parcel Size Acceptable (Applicable to both Types I and II).

1.3 *Approved Manufacturers.*

1.3.1 *Approved Manufacturers*—Manufacturers whose boxes have been approved by the United States Postal Service (USPS) will be listed in the Domestic Mail Manual (DMM).

1.3.2 *Interested Manufacturers*—Manufacturing standards and drawings concerning the manufacture of curbside mailboxes may be obtained by writing to:

Delivery Management Division, U.S. Postal Service, 475 L'Enfant Plaza, SW., room 7142, Washington, DC 20260–7151.
Telephone: (202) 268–3606

2. APPLICABLE DOCUMENTS

2.1 *Government Documents*—The following documents of the latest issue are incorporated by reference as part of this standard.

Specifications	
MIL-T-704	Treatment and Painting of Material.
MIL-A-8625	Anodic Coatings, for Aluminum and Aluminum Alloys.

VOL 56 ISS 251 DEC 31 1991 UMI

Specifications	
MIL-W-4858	Welding, Resistance: Spot and Seam.
Standards	
Military	
MIL-STD-171	Finishing of Metal and Wood Surfaces.
Federal	
FED-STD-406	Flammability of Plastic over 0.050 Inch in Thickness.
FED-STD-595	Colors Used in Government Procurement.

Copies of federal specifications and standards may be obtained from the General Services Administration, Specification Section, room 6654, 7th and D Streets, SW., Washington, DC 20407–9999.

Copies of military specifications and standards may be obtained from the Standardization Documents Order Desk, 700 Robbins Ave., Building 4, Section D, Philadelphia, PA 19111–5094.

2.2 *Non-Government Documents*—The following documents of the latest issue are incorporated by reference as part of this standard.

AMERICAN STANDARDS FOR TESTING MATERIALS (ASTM)

ASTM B117	Standard Test Methods of Salt Spray (Fog) Testing.
ASTM D968	Standard Test Methods for Abrasion Resistance of Organic Coatings by Falling Abrasive.
ASTM E308	Method for Computing the Colors of Objects by Using the CIE System.
ASTM E313	Standard Test Method for Indexes of Whiteness and Yellowness of Near-White, Opaque Materials.
ASTM G26	Standard Practice for Operating Light-Exposure Apparatus (Xenon-Arc Type) with and without Water for Exposure of Nonmetallic Materials.

Copies of the preceding documents may be obtained from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103–1108.

Other documents	
AWS C1.1	Recommended Practices for Resistance Welding.
ANSI/AWS A2.4	Standard Symbols for Welding, Brazing and Nondestructive Examination.
ANSI/AWS D9.1	Specification for Welding of Sheet Metal.
AWS WHB–4 Ch 8	Aluminum Alloys-Welding Handbook.

Copies of the preceding documents may be obtained from the American Welding Society, 2501 NW. 7th St., Miami, FL 33125–3136.

National Motor Freight Classification Rules

Copies of the preceding documents may be obtained from the National Motor Freight Traffic Association, 2200 Mill Rd., Alexandria, VA 22314–4887.

2.3 Except where specifically noted, the specifications set forth herein shall apply to both Type I and Type II boxes.

3. *REQUIREMENTS*

3.1 *General Design*—All mailboxes must be capable of passing the load tests specified in table 1 and Figure 1. All plastic mailboxes must withstand an impact of a 10-pound weight being dropped 3 feet. Mailboxes made of plastic, wood, or other material that normally sustains a flame must be self-extinguishing. The mailbox must not contain any transparent material. No attachments with the exception of the customer name and/or residence number are permitted on any mailbox. No shapes or protrusions are permitted on the mailbox except as approved and do not interfere with mail delivery nor present a safety hazard. The box must be free from harmful projections, burrs, sharp edges, or other features that may be hazardous to carriers or customers or interfere with delivery, and must positively protect mail from all types of weather. All seams and joints must be tight to prevent loss of or damage to any mail placed in the box.

3.1.1 *Type I. Traditional Design*—The general configuration of the box must conform to USPS Drawings RD–4, RD–5, and RD–6. Minor design and construction changes may be considered for approval, provided they are equal to or better than the features they replace, and provided the operation of the box is unchanged.

3.1.2 *Type II. Contemporary Design*—The general configuration of the box must conform to USPS collection and delivery operations and requirements. Designs of the contemporary rural mailboxes are not restricted to shape, material, finish, or style; however, boxes must be designed and constructed so that they may be serviced in the same manner as the traditional curbside mailbox. The mailbox must be designed to allow for all mail (outgoing and incoming) to be inserted and retrieved in a horizontal manner, i.e., the longest axis of the mail must be horizontal. The bottom of the mailbox must contain no lip or protrusion that could restrict the mail from being pulled straight out of the box. The mailbox may contain only a front door or it may contain front and rear doors to enable the customer to remove mail without standing in the street.

The bottom of the box must be corrugated, ribbed, or otherwise formed similar to the bottom of the Type I boxes (with ribs .08 ±.015 inch wide and .10 ±.015 inch high on 1 ±.015 inch centers) to prevent mail from adhering to it as a result of moisture, rain or snow entering through an open door. Provisions must be incorporated to prevent damage or destruction of finishes by moving parts of the box.

3.2 *Materials*—Ferrous or nonferrous metals, wood, plastics, or other materials may be used, as long as their thickness, form, mechanical properties, and chemical properties adequately meet the operational, structural, and performance requirements set forth in this standard. Materials used must be compatible with each other and must be nontoxic and nonirritating to humans.

3.3 *Carrier Service Door*—The carrier service door must operate freely by pulling outward and downward with a convenient handle or knob at the top of the door. The handle or knob must have adequate clearance to permit grabbing and pulling it with one hand (with or without gloves) to open the door. No protrusions other than the handle, knob, door catch and markings are permitted on the carrier service door. The design of the door hinges, handles, etc. must provide the maximum protection against wind, rain, sleet, or snow. Door latches must hold the door closed but allow easy opening and closing. The doors must be capable of operating 7,500 normal operating cycles without breakage or failure to operate correctly. Action of the latch must be a positive mechanical one not relying solely on friction of the parts. The door must not be spring loaded. Magnetic latches are acceptable provided adequate closure power is obtained and maintained. The door, once opened, must remain in the open position until the carrier pushes it closed. Doors or door attachments that reduce the usable volume within the box or protrude into the opening of the box are not acceptable.

3.4 *Auxiliary Doors*—Doors other than the carrier service door must not interfere with the normal servicing of the box by the carrier or require the carrier to perform any unusual operations. The auxiliary door must not open as a result of newspapers, parcels, or other mail items being inserted through the carrier door.

3.5 *Locks*—The box may be provided with an effective means of locking, but the use of locks is not required. If the box is equipped with a lock, the box must have a slot large enough to accommodate the customer's normal daily mail volume. The Postal Service will not open boxes that are locked, accept keys for this purpose, or lock boxes after delivery of the mail.

3.6 *Carrier Signal Flag.*

3.6.1 *Type I. Traditional Design*—The carrier signal flag must be as shown on the drawings. The flag must be on the right side when facing the box from the front. The flag staff centerline must be no farther back from the foremost projection of the box (excluding protruding catch hardware) than 2 inches. When the flag is in the raised position, not less than 4 square inches of the signal portion must be visible above the top of the box and the flag may project not less than 2 inches above the top of the box. The signal portion of the flag must be in a plane perpendicular to the road or street on which the box is located. No portion of the flag must extend beyond the top outline of the box when the flag is in the lowered position. The flag operating mechanism must operate properly and positively, without binding or excessive free play, must not require lubrication, and must be resistant to freeze-up at temperatures specified under ambient conditions (3.13). The flag must be capable of operating 7,500 normal operating cycles without breakage or failure to operate correctly. The flag must not be free to rotate more than 100 degrees and must remain in a locked point in either the vertical or horizontal position until repositioned by the customer or carrier.

3.6.2 *Type II Contemporary Design*—The carrier signal flag may be of a contemporary design or similar to that used on the Type I

box and must operate freely. The flag may incorporate a self-lowering feature that automatically drops to the lowered position when the carrier door is opened. The flag must be located on the right side when facing the box from the front. The flag staff centerline must be no farther back from the foremost projection of the box (excluding protruding catch hardware) than 2 inches. When the flag is in the raised position, not less than 4 square inches of the signal portion must be visible above the top of the box and the flag must project not less than 2 inches above the top of the box. The signal portion of the flag may be in a plane perpendicular to the road or street on which the box is located. No portion of the flag must extend beyond the top outline of the box when the flag is in the lowered position. The flag operating mechanism must operate properly and positively, without binding or excessive free play. The operating mechanism must not require lubrication, and must be resistant to freeze-up at temperatures specified under ambient conditions (3.13). The flag must be capable of operating 7,500 normal operating cycles without breakage or failure to operate correctly. The flag must be free to rotate more than 100 degrees and must remain in a locked point in either the vertical or horizontal position until repositioned by the customer or carrier.

3.7 *Marking*—The box must bear two inscriptions on the carrier service door: "U.S. MAIL" in 1.0 ±.2 inch high letters and "Approved By The Postmaster General" in .25 ±.06 inch high letters. The markings must be accomplished by embossing on sheet metal, raised lettering on plastic or engraving on wood or other materials not suitable for embossing. All markings must be raised or incised enough to be easily read. The name and address of the manufacturer and the month and year of manufacture must also be noted on the box on the rear or on an inside wall of the box. This marking must be accomplished by embossing on the rear wall or placing a permanent decal on the inside of the box near the front opening.

3.8 *Coatings and Finishes*—Choice of materials for coatings and finishes is optional, provided all requirements of this standard are met. All finish coatings must be free from flaking, peeling, cracking, crazing, blushing, as well as orange peel and powdery surfaces. Finishes must be compatible with the box materials, and must be prepared by primers or other protective procedures. All painted mailboxes must be coated with a minimum of 3 mils of paint. Mirror-like finishes and coatings on large flat areas, which might cause reflected glare in motorists' eyes from the sun or vehicle lights will not be approved. No part of the coating or finish may show corrosion, blistering, peeling or other destructive reaction after 200 hours of the salt fog environment. The coating or finish is considered to fail the sand abrasion test if less than 15 liters of sand is required to penetrate a coating or if less than 75 liters of sand is required to penetrate any plating.

3.9 *Color*—Color intensity and yellowness indexes must not lose or gain more than 10 percent of their original values.

3.9.1 *Boxes*—The box may be any color. Colors and color schemes may be of a hue, saturation, and brilliance that provide sufficient contrast with normal surroundings to ensure visibility to carriers and persons using the road or street.

3.9.2 *Carrier Signal Flags*—The carrier signal flag must be any contrasting color with the exception of any shade of green, brown, or white and must be painted with high gloss paint. The flag color must not be used on any other portion of the box.

3.10 *Mounting*—The box must be provided with means for convenient and secure mounting. Types of mounting such as a metal post or stand may be offered by the manufacturer as an accessory. No part of the box mounting apparatus must project beyond the front or rear of the mounted box or interfere with the door(s). Mounting must not require the use of tools other than a hammer, screwdriver or common wrench unless such special tools are furnished with the box or accessory.

3.11 *Instructions*—A complete set of instructions for assembling and mounting the box must be furnished with each box. The instructions must include the following message in bold print:

CUSTOMERS ARE REQUESTED TO CONTACT THE LOCAL POST OFFICE BEFORE ERECTING THE BOX TO ENSURE ITS CORRECT PLACEMENT AND HEIGHT AT THE STREET.

3.12 *Workmanship*—Workmanship must be of the highest quality throughout. Highest quality is defined as the following: All parts and assemblies must be clean, straight, accurately formed and assembled, properly fitted, and uniform in size and shape. Parts must be free from delaminations, cracks, warpage, bulges, kinks, dents, porosity, voids, peelings, lumps, foreign matter, or other defects. All plastic parts must be free from flashing, injection header or mold marks, undercuts, voids, surface defects, or visual stresses. Plastic units must be free from releasing agents and any outgassing condition. Finished or coated surfaces must be smooth and uniform, and free from soft areas, stains, chips, color variations, runs, sags, peeling, bubbling, crazing and cracks. Seams and connections must be tight. Rivets must be installed in the rivet manufacturer's recommended hole diameter, be tight, have uniformly formed heads, and must not contain sharp burrs. Welding must be uniform, clean, and positioned properly, must use the correct amperage, and must be inspected as specified by AWS D9.1. The units must be free from sharp edges or corners, burrs, protruding rivets or screws, and design features or details including outside edging, doors, and underside that might injure or hamper carriers or customers using the box.

3.13 *Ambient Conditions*—The box must protect mail placed inside and must operate properly when subjected to the following ambient conditions: temperatures of −65 degrees Fahrenheit to +140 degrees Fahrenheit; relative humidities of 0 to 100 percent (limited by 35 degrees Fahrenheit dewpoint temperature); full solar radiation; snow and freezing rain; heavy rainstorms during which the rain strikes the box at any angle from 0 degrees (vertically downward) to 90 degrees (horizontal); wind velocities up to 100 miles per hour; water and slush thrown upwards by vehicles.

3.14 *Testing Requirements*—Two mailboxes/units of each type must be submitted for testing as specified herein. Test mailboxes must be submitted in packaging identical to that of the production units. Units which fail to pass any test will be rejected and failure of one type of unit can be cause for rejection of all of the units submitted by the manufacturer.

3.14.1 *Operational Requirements*—Carrier service doors, auxiliary doors, door catches and mechanisms, carrier signal flags, and accessory devices must be capable of operating 7,500 normal operating cycles at room temperature without breakage of parts while continuing to operate correctly and positively.

3.14.2 *Structural and Performance Requirements*—Refer to Figure 1 for an explanation of load positions, method of application and bolster plates to be used. At positions 1 through 4 and at position 7, the box must be supported on a horizontal board in a normal fashion. At positions 5 and 6, the load must be applied with the unmounted (without board or adapters) box lying on its opposite side (flag side up). The door(s) is in a closed position for loads in positions 1 through 6. For position 7, the door must be placed in its maximum open position and a load applied normal to the door surface. If the door is free to rotate greater than 120 degrees from the closed position, this part of the structural test is not required. Immediately after release of the slowly applied load in each position, permanent deformation of the box in the load direction must not exceed the permanent deformation indicated from the loads shown on Table I. Cracks in the material must not develop as a result of the load or cause the door to become inoperable. At position 6, the flag must be capable of withstanding an 8-pound load applied at the top of the flag without exceeding permanent deformation specified in Table I.

TABLE I.—PERMANENT DEFORMATION LIMITS

Position	Deformation (inches)	Load (pounds)
1	⅛	200
2	⅛	200
3	⅛	50
4	⅛	50
5	⅛	100
6	⅛	8
7	⅛	8

3.14.3 *Impact Test*—Refer to the Figure 1 for load position. Precondition the box for 4 hours at −20 degrees Fahrenheit. At position 3, with the unmounted box (without board or adaptors) lying on its side (flag side up), apply an impact load equivalent to a 10-pound weight dropped from a distance of 3 feet above the box surface onto a bolster plate having a surface not larger than 2 inches by 2 inches. The door(s) is in a closed position for this test. Repeat the impact load at position 4. No perforation, occurrence of sharp edges, or cracking of the material,

VOL 56 ISS 251 DEC 31 1991 UMI

either inside or outside the box, may develop as a result of the impact, nor may the door become inoperable or fail to close normally.

3.14.4 *Coating and Abrasion Resistance*—The coating of all painted units must meet the abrasive test specified herein. The test must be conducted in accordance with ASTM D–968, Method A for Abrasion Resistance of Coatings of Paint, Lacquer, and Related Products by the Falling Sand Method, rate of flow of 2 liters of sand in 22±3 seconds. The box is considered to fail this test if less than 15 liters of sand is required to penetrate painted coatings, or if less than 75 liters of sand is required to penetrate plating or protective coatings.

3.14.5 *Salt Spray Resistance*—A salt spray test must be conducted in accordance with ASTM B–117, Standard Method of Salt Spray (Fog) Testing. A 5 percent salt solution at 95 degrees Fahrenheit will be used. The salt test must be operated for 200 continuous hours. Units must be tested in a finished condition, including all protective coating, paint, and mounting hardware but must be thoroughly washed when submitted to remove all oil, grease, and other nonpermanent coatings. No part of the units may show finish corrosion, blistering or peeling, or other destructive reaction after 200 hours of continuous exposure. Corrosion is defined as any form of property change such as rust, oxidation, color changes, perforation, accelerated erosion, or disintegration. The build-up of salt deposits upon the surface must not be cause for rejection. However, any corrosion, paint blistering, or paint peeling is cause for rejection. The plastic units must be similarly exposed to test any metal hardware used in the construction or mounting of the units.

3.14.6 *Flammability*—Testing is performed in accordance with FED–STD–406, Method 2021. Cut a specimen 5 inches long by ½ inch wide. Scribe the specimen ½ inch from the end and three more times at 1-inch intervals. The specimen support fixture should hold the flammability sample with its longitudinal axis horizontal and its transverse axis inclined at 45 degrees to the horizontal. Apply a flame at the end of the sample for 30 seconds or until the flame reaches the first scribe mark. When the flame reaches this point, start a stopwatch and stop the stopwatch when the flame reaches the final scribe mark. If the flame goes out prior to this point, the sample is considered "self-extinguishing." If the burning rate exceeds 3 inches in 3 minutes, the unit is rejected.

3.14.7 *Watertightness*—Each mailbox is subjected to a heavy spray of water, equivalent to 3 to 5 inches per hour, for a period of 15 minutes for each side. The spray is directed downward at an angle of 0 to 90 degrees from the vertical. At the conclusion of the test, the outside of the unit is wiped dry and all doors are opened. The inside of the compartment must contain no water other than that produced by high moisture condensation.

3.14.8 *Solar Exposure/Weathering*—Twelve 3-inch by 6-inch panels of the material(s) used in the boxes must be submitted with the mailboxes for solar exposure/weathering testing. Panel thickness must be the same thickness as that of the submitted mailbox walls and door. All metal panels must be finished in the same manner as the mailbox. Plastic panels must be submitted in a natural state (without paint). The test is conducted in accordance with ASTM G–26 using a spectral irradiance level of 0.35 watts per meter squared per nanometer band at 340 nanometers, a black panel temperature of 145±5 degrees Fahrenheit and a relative humidity of 50±5 percent. Both Method 1 for weathering painted panels and Method 3 for UV degradation testing of painted panels and plastic panels must be conducted. The test is conducted for 336 hours. Any blistering, peeling or cracking of the paint is cause for rejection. Any blistering, cracking, disintegration or embrittlement of the plastic is cause for rejection. The test required by 3.14.10 will be performed before and after this test. The color intensity must not lose more than 10 percent of its original value when measured in 3.14.10.

3.14.9 *Capacity*—Conformance to 1.2 of this standard must be tested by insertion and removal of a test gauge for each size mailbox as follows:

Size	Test gauge (inches)				
	Length	×	Width	×	Height
T1 and C1	18½		5		6
T2 and C2	19½		6		7
T3 and C3	22½		8		11½

The test gauge for each size mailbox must be easily inserted and removed from each size mailbox and allow for the door(s) to be completely closed without interference.

3.14.10 *Color Intensity*—Color intensity must be measured in accordance with ASTM E–308 using the CIE method. A yellowness index must be measured using ASTM E–313. Color intensity and yellowness indexes must not lose or gain more than 10 percent of their original values when subjected to environmental conditions in 3.14.8.

3.14.11 *Flag*—The flag size conforms to the requirements of 3.6.1 and 3.6.2.

4. APPROVAL

4.1 *Application Requirements*—All correspondence and inquiries must be directed through the Delivery Management Division, U.S. Postal Service, 475 L'Enfant Plaza, SW., Washington, DC 20260–7151. The manufacturer must notify the Delivery Management Division that mailboxes are being submitted for approval. To secure approval of a box, manufacturers must submit the following to the Engineering & Development Center, Delivery Equipment Division, U.S. Postal Service, 8403 Lee Highway, Merrifield, VA 22082–8101:

4.1.1 not less than two complete boxes, including markings required in 3.7, of each style made of the exact materials, construction, coatings, paint, etc., including the panels required by 3.14.8 and otherwise identical in every way with the boxes intended to be marketed.

4.1.2 a copy of the instructions required by 3.11.

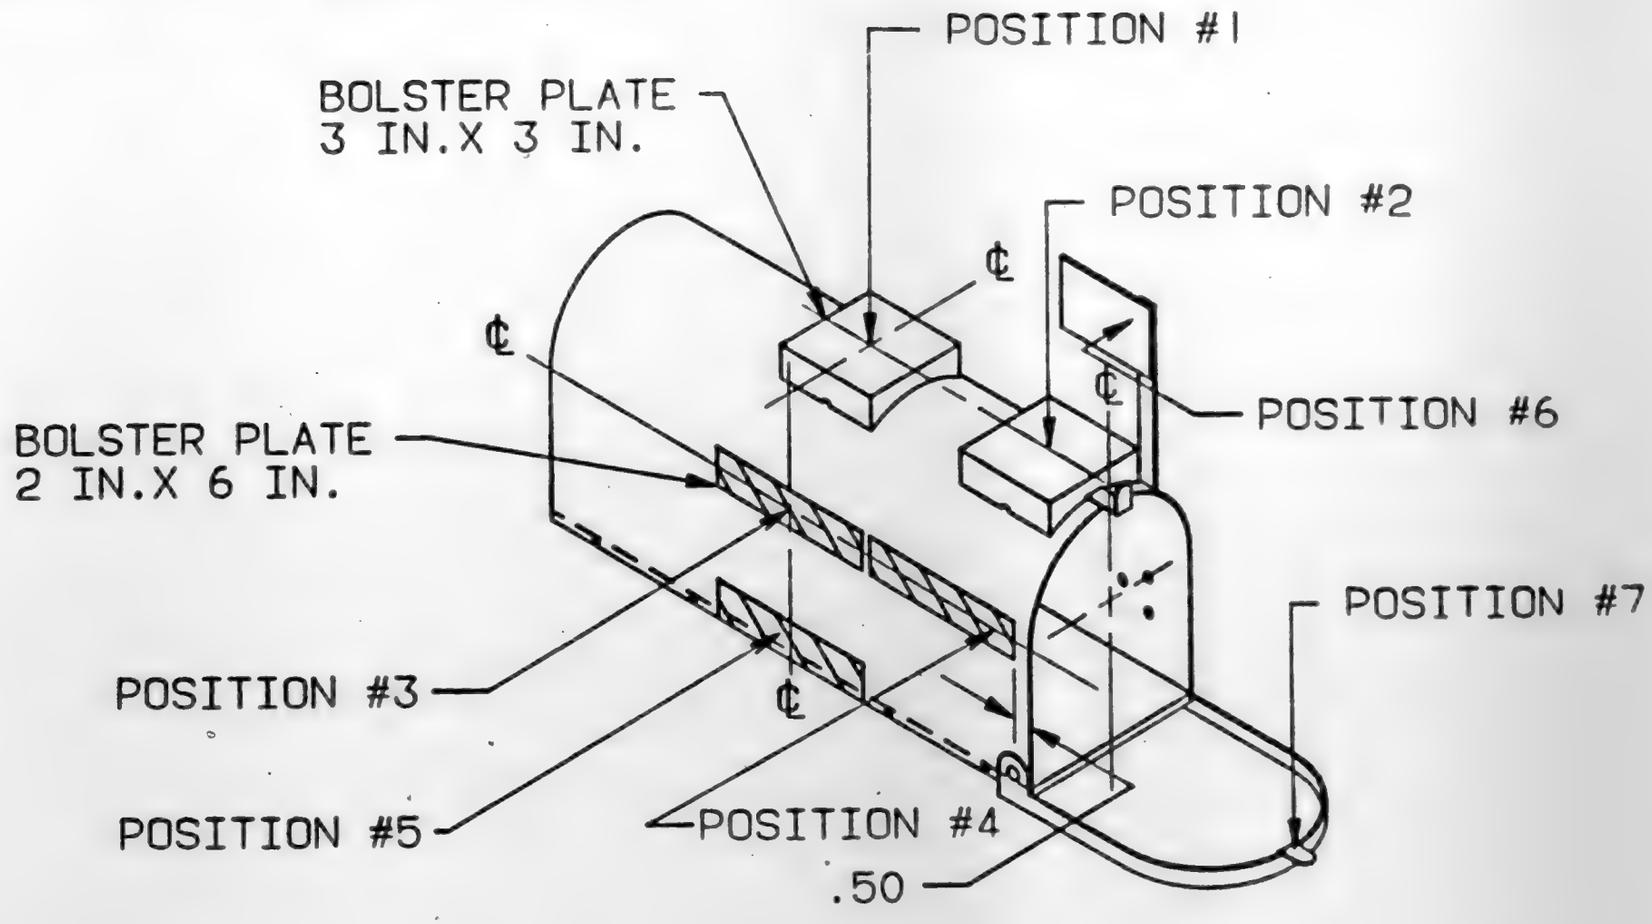
4.1.3 color samples showing all color schemes expected to be used.

4.1.4 the boxes in the packaging proposed for shipping production units.

4.1.5 Documentation—The units submitted for approval must be accompanied by two complete sets of manufacturing drawings and installation instructions consisting of black on white prints (blueprints or sepia are unacceptable) showing that the units supplied meet the requirements of this standard. The drawings must be dated, signed, and certified to represent the production units exactly as submitted. The drawings must include sufficient details to allow the USPS to document and inspect all materials, construction methods, processes, coatings, treatments, finishes, control specifications, parts and assemblies used in the construction of the units. The USPS may request individual piece parts to verify drawings. No changes may be made by the manufacturer to its products or drawings without written notification of and approval from the USPS. Any changes must be submitted with an explanation of the reasons written in a letter and also documented in the revision block of the affected drawing(s). Two units of each type with the changes incorporated must be submitted for testing and approval. All changes are subject to USPS written approval.

4.1.6 Boxes that are approved will be retained after testing by the USPS. Boxes disapproved may be disposed of or returned to the manufacturer, if requested, provided the manufacturer pays shipping costs.

4.2 Approval or Disapproval—One set of manufacturing drawings, together with written notification of approval or disapproval, including reasons for disapproval, will be returned to the manufacturer. The drawings will be stamped and identified as representing the production unit type if approval notification is used. The USPS Office of Delivery and Retail Management will issue the written notification of approval or disapproval of the mailboxes. All correspondence and inquiries must be directed through that office at the address listed in 1.3.2.



4.3 Production Units—Manufacturer's production units must be constructed in accordance with the identified (stamped) drawings and provisions of this specification, and be of the exact materials, construction, coating, workmanship, finish, etc. as the approved units. Manufacturers must receive written approval from the USPS before making any change to the unit or the identified design drawings. Approval for changes requires resubmission of units for testing and updated drawings for review. The USPS reserves the right at any time to examine and retest production units either obtained in the general marketplace or from the manufacturer. Failure of these production units to be manufactured in strict accordance with the approved units, the identified drawings, and the provisions of this specification may result in the rejection of units and the suspension or revocation of the manufacturer's authorization as an approved manufacturer and may require the manufacturer to provide units for

examination and testing. Suspension or revocation of the manufacturer's authorization of an approved manufacturer will be issued by the USPS Office of Delivery and Retail Management.

5. PREPARATION FOR DELIVERY

5.1 *Packaging*—The packaged mailbox and accessories must be packaged in a manner that will ensure arrival at destination in satisfactory condition. The box must be shipped fully assembled except that the following parts may be removed if necessary to protect them from damage: protruding portions, such as door latching hardware, mounting adapters, and mounting posts or stands. Containers and packing must comply with the National Motor Freight Classification Rule 222, Sections 2 and 3. The boxes must be suitably wrapped or protected and packaged in separate containers to prevent damage to painted surfaces by rubbing against the internal surfaces of the container or against other parts.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL-4087-6]

National Emission Standards for Hazardous Air Pollutants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is today issuing a final rule to stay the effectiveness of 40 CFR part 61, subpart T (subpart T), as it applies to owners and operators of uranium mill tailings disposal sites that are licensed by the Nuclear Regulatory Commission (NRC) or an affected NRC Agreement State (collectively NRC-licensees). Today's rule does not concern Subpart T sites that are under the control of the Department of Energy (DOE). This final rule stays the effectiveness of Subpart T as applied to NRC-licensed uranium mill tailings disposal sites until EPA concludes related rulemakings under section 112(d)(9) of the Clean Air Act, as amended, and the Atomic Energy Act, as amended, as described in a Memorandum of Understanding (MOU) between EPA, NRC and the affected NRC Agreement States, as signed by EPA on October 18, 1991, or June 30, 1994, whichever first occurs. Published elsewhere in today's **Federal Register** are two related rulemakings: a Notice of Proposed Rulemaking in which EPA is proposing a rule to rescind Subpart T as it applies to NRC-licensees and an Advanced Notice of Proposed Rulemaking (ANPR) in which EPA is announcing its intention to enter into a future rulemaking which would amend 40 CFR part 192, Subpart D, which was enacted pursuant to the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978.

DATES: Effective December 19, 1991, EPA is staying the effectiveness of subpart T of 40 CFR part 61 as applied to NRC-licensees that are owners and operators of uranium mill tailings disposal sites. This stay will remain in effect until such time as EPA takes final action on its related proposal to rescind subpart T for NRC-licensees pursuant to CAA sections 301(a) and 112(d)(9), as amended, or June 30, 1994, whichever first occurs.

ADDRESSES: Questions should be addressed to: Central Docket Section LE-131, Environmental Protection Agency, Attn: Docket No. A-91-67, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Jamie Burnett, Environmental Standards Branch, Criteria and Standards Division, (ANR-460W), Office of Radiation Programs, Environmental Protection Agency, Washington, DC 20460 (703) 308-8787.

SUPPLEMENTARY INFORMATION:

A. Background

1. Regulatory History

On December 15, 1989, EPA promulgated national standards regulating radionuclide emissions to the ambient air from several source categories, including from non-operational sites used for the disposal of uranium mill tailings (54 FR 51654). These sites are either under the control of the DOE pursuant to Title I of the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978, or the sites are under the control of NRC-licensees pursuant to Title II of UMTRCA. These standards—40 CFR part 61, subpart T (subpart T)—were promulgated pursuant to the authority of Clean Air Act (CAA or Act) section 112 as it existed in 1989, and were part of a larger promulgation of National Emission Standards for Hazardous Air Pollutants (NESHAPs) for Radionuclides.

Subpart T requires compliance by owners and operators of uranium mill tailings disposal sites within two years of becoming non-operational (40 CFR 61.222(b)). Pursuant to its authority under then-existing CAA section 112(C)(1)(B)(ii), EPA waived compliance for two years for sites that were non-operational at the time of promulgation. *Id.* Thus, the earliest date by which sites must comply with the subpart T standard is December 15, 1991. Even so, EPA recognized at the time of promulgation that many sources subject to Subpart T might not be able to achieve compliance by December 15, 1991. Because EPA felt constrained by the CAA as it existed at that time, EPA stated that for those sites the Agency would negotiate expeditious compliance schedules pursuant to its enforcement authority under CAA section 113. *See* 54 FR 51683.

Subpart T requires that radon-222 emissions not exceed a flux of 20 pCi/m^2—s. By so doing, it in effect mandates that emplacement of an earthen cover to meet that emissions level occur as expeditiously as practicable. In its 1989 action, EPA recognized that even though NRC implements general EPA standards (promulgated under UMTRCA) which also regulate these sites and call for compliance with 20 pCi/m^2—s flux standard (see 40 CFR part 192), the UMTRCA regulatory program does not answer the critical timing concern addressed by subpart T:

> The existing UMTRCA regulations set no time limits for disposal of the piles. Some piles have remained uncovered for decades emitting radon. Although recent action has been taken to move toward disposal of these piles, some of them may still remain uncovered for years.

54 FR at 51683.

In addition to regulating radon emissions, Subpart T also requires specific testing and record keeping. *See* 40 CFR 61.223 and 61.224. The UMTRCA regulations as currently implemented by NRC, while ultimately limiting emissions to the same level as Subpart T, are supported by a variety of design-based substantive and procedural requirements that speak to UMTRCA's unique concern that final site closure occur in a manner that will last up to 1,000 years. See generally 10 CFR part 40, appendix A.

Together, these programs complement, duplicate and complicate each other. They complement each other to the extent subpart T ensures that sites will proceed expeditiously towards closure. They duplicate to the extent they create dual regulatory oversight, including independent procedural requirements, seeking to ensure compliance with the 20 pCi/m^2—s flux standard. And they complicate to the extent that reporting is to different federal agencies, and compliance schedules under the two regulatory schemes vary, with subpart T requiring the impossible of some sites—compliance by December 15, 1991.

Concern over the above-described duplication and complication created by the dual regulations inspired several petitions for reconsideration, most notably from NRC and the American Mining Congress (AMC). While these petitions remain pending before EPA, today's final rule to stay subpart T and the companion proposed rulemakings to rescind subpart T pursuant to section 112(d)(9) of the CAA, as amended, and the ANPR to amend the 40 CFR part 192,

VOL 56 ISS 251 DEC 31 1991 UMI

subpart D mark EPA's steps towards addressing the issues they raise.

2. Clean Air Act Amendments of 1990

After promulgation of subpart T (and receipt of reconsideration petitions), in November 1990, the Clean Air Act was substantially amended. Included in this overhaul was an amendment that speaks directly to the duplication issue. Newly enacted section 112(d)(9) of the amendments provides:

> No standard for radionuclide emissions from any category or subcategory of facilities licensed by the Nuclear Regulatory Commission (or an Agreement State) is required to be promulgated under this section if the Administrator determines, by rule, and after consultation with the Nuclear Regulatory Commission, that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act for such category or subcategory provides an ample margin of safety to protect the public health.

This provision strives to eliminate duplication of effort between EPA and NRC, so long as public health is adequately protected.

Moreover, Congress expressed sensitivity to the special compliance problems of uranium mill tailings sites through new section 112(i)(3). This provision provides an additional 3-year extension to mining waste operations (e.g., uranium mill tailings) if the 4 years allowed (including a one year extension) for compliance with standards promulgated under the amended section 112 is insufficient to dry and cover mining waste to control emissions.

In light of these provisions, and given the express authority of section 112(d)(9), as amended, EPA, NRC and the affected Agreement States, have been meeting to discuss the dual regulatory programs under UMTRCA and the CAA. As part of this effort, EPA has carefully reviewed NRC's program implementing EPA's UMTRCA standards as applied to uranium mill tailings disposal sites.

3. Memorandum of Understanding (MOU) Between EPA, NRC and the Affected Agreement States

The result of this inter-agency consultation and review has been the execution of a Memorandum of Understanding (MOU), a copy of which is printed at 56 FR 55434. The purpose of this MOU is to ensure that owners and operators of existing uranium mill tailings piles licensed by NRC or an affected Agreement State, or those that will in the future become non-operational, effect final radon site closure—emplacement of an earthen cover to permanently limit radon emissions to a flux of no more than 20 pCi/m^2-s—as expeditiously as practicable considering technological feasibility. This phrase means as quickly as possible considering: (1) The physical characteristics of the tailings and the site; (2) the limits of available technology; (3) the need for consistency with mandatory requirements of other regulatory programs; and (4) delays beyond the control of the licensee (e.g., inclement weather). While this phrase does not preclude economic considerations, it also does not contemplate utilization of a cost-benefit analysis in setting compliance schedules. In other words, the compliance schedules are to be developed consistent with the target set forth in the MOU as reasonably applied to the specific circumstances of each site.

A guiding objective is that this occur as to all current disposal sites by the end of 1997, or within seven years of when the existing operating and standby sites enter disposal status. This objective comports with Congress' concern over timing as reflected in CAA section 112(i)(3), as amended. Specific compliance dates for individual piles are listed in the MOU.

EPA has tentatively concluded that implementation of the MOU, including appropriate modifications to the general UMTRCA regulations (at 40 CFR part 192) to ensure specific, enforceable closure deadlines and monitoring requirements, and the performance by NRC and the affected Agreement States of their other commitments contained in the MOU, would render the NRC's regulatory program for nonoperational uranium mill tailings piles protective of public health with an ample margin of safety. This is because while both programs (subpart T and 40 CFR part 192) impose a 20 pCi/m^2-s flux standard, the timing issue was the principle reason justifying promulgation of subpart T under the CAA. The changes to UMTRCA and other actions contemplated by the MOU would alleviate this concern by committing NRC and the affected Agreement States to a course of action that ensures that all sites expeditiously comply with the 20 pCi/m^2-s standard.

The MOU sets forth a series of actions and rulemakings by NRC, EPA, and the affected Agreement States that will ensure expeditious compliance, eliminate duplication of regulation, and avoid having any site in violation. In skeletal form, the MOU contains the agreement by NRC and the affected Agreement States to immediately solicit from their licensees reclamation plans and final closure schedules, for incorporation into enforceable licenses. NRC and the affected Agreement States also agree to utilize their authority to order the necessary license amendments (to effect expeditious closure and compliance with the 20 pCi/m^2-s flux standard) to the extent not agreed to by the licensee, and defend against any challenge to those orders.

For its part, EPA today issues a final rule to stay subpart T. EPA also simultaneously issues a Notice of Proposed Rulemaking, published elsewhere in this issue of the **Federal Register**, to rescind subpart T as it applies to NRC-licensees. That proposed rulemaking is being issued pursuant to CAA sections 301(a), and 112(d)(9), as amended. Also elsewhere in today's **Federal Register**, EPA today issues an Advanced Notice of Proposed Rulemaking to amend 40 CFR part 192, subpart D, Standards for Management of Uranium Byproduct Materials, pursuant to its authority under UMTRCA.

The MOU marked the first step in a comprehensive scheme to ensure that all uranium mill tailings disposal piles are finally closed and in compliance with the 20 pCi/m^2-s flux standard as expeditiously as practicable, thereby protecting public health with an ample margin of safety. At the same time, the MOU responded to other important concerns. The MOU responded to Congress' goals of minimizing the burdens created by regulatory duplication and assuring that the regulated sites have the time they need to comply without jeopardizing public health. The MOU addressed the related concern that this occur without holding a site owner or operator in violation for failing to meet what may be an impossible deadline, while also ensuring that compliance will occur as quickly as technologically feasible. This latter provision is essential in that it responded to the timing concern that was the basis for EPA's 1989 decision to promulgate subpart T. In total, the MOU represents a commitment by EPA, NRC and the affected Agreement States to a course of conduct designed to finally, efficiently and comprehensively resolve the public health threats presented by the disposal of uranium mill tailings.

B. Final Stay of Subpart T for Non-Operational NRC-Licensed Uranium Mill Tailings Disposal Sites

EPA is today issuing a final rule to stay subpart T as it applies to NRC-licensees that are owners or operators of nonoperational uranium mill tailings disposal sites. The stay will remain in place pending the related rulemaking, pursuant to the authority of CAA section 112(d)(9), as amended, to rescind subpart T as it pertains to NRC-licensees. The stay will expire at the conclusion of this related rulemaking or on June 30, 1994, whichever first occurs. The rulemaking which proposes to rescind subpart T is published elsewhere in today's **Federal Register**. The authority for this proposal is provided by the general rulemaking provision at CAA section 301(a), as well as by section 112(d)(9), as amended. This entire action is being conducted in the context of, and pursuant to the agreements and commitments contained in the MOU entered into by EPA, NRC and the affected Agreement States. The MOU is designed to comprehensively and finally ensure that all non-operational uranium mill tailings disposal sites achieve final closure, including compliance with the 20 pCi/m^2-s flux standard, as expeditiously as practicable considering technological feasibility. This phrase means as quickly as possible considering: (1) The physical characteristics of the tailings and the site; (2) the limits of available technology; (3) the need for consistency with mandatory requirements of other regulatory programs; and (4) delays beyond the control of the licensee (e.g., inclement weather). While this phrase does not preclude economic considerations, it also does not contemplate utilization of a cost benefit analysis in setting compliance schedules. In other words, the compliance schedules are to be developed consistent with the target set forth in the MOU as reasonably applied to the specific circumstances of each site.

In section 112(d)(9), Congress authorized EPA to decline to regulate NRC licensees under section 112 in those instances where, after EPA, in consultation with the NRC, makes a finding that NRC regulation is sufficient to provide an ample margin of safety. Congress clearly intended to give EPA the discretion to relieve affected facilities from the burdens associated with parallel regulation when this would not adversely affect public health. Since EPA has concluded that a rulemaking under section 112(d)(9) to rescind subpart T for NRC-licensed sites is warranted, it would frustrate the clear purpose of section 112(d)(9) for EPA to permit subpart T to take effect for this subcategory during the pendency of the rulemaking concerning rescission. Accordingly, EPA is issuing a final rule to stay the effectiveness of subpart T for NRC-licensed sites while the rulemaking concerning rescission of subpart T for this category is pending, or until June 30, 1994, whichever occurs first.

C. Discussion of Comments and Response to Comment

Although no public hearing was requested, two sets of written comments were submitted in response to the proposal to stay subpart T as applied to nonoperational uranium mill tailings disposal sites licensed by NRC or an affected NRC agreement State (collectively NRC-licensees). These comments—one in support and one in opposition to the proposed stay—have been evaluated by the Agency, and a summary and response is set forth below. However, there are aspects to these comments that are not directed at the proposed stay but instead go to the related proposal to rescind subpart T, published elsewhere in today's **Federal Register**. Those comments are not fully addressed here, although the proposal to rescind subpart T does provide some initial response which will be further addressed in the course of that rulemaking, which includes an opportunity for a public hearing and submission of additional comments. Still other comments, which are also not addressed here, seem directed to EPA's earlier promulgation of subpart T, a rulemaking decision that is not being revisited by either this final stay or the proposed rescission. Indeed, those comments were made and responded to at the time the Agency promulgated subpart T, and have also been repeated in subsequent petitions to reconsider that action, which are pending before the Agency, but might become moot should subpart T ultimately be rescinded.

Comment: EPA improperly relies on CAA section 112(d)(9) (enacted as part of the Clean Air Act Amendments of 1990 (CAAA)) as authority to stay subpart T for NRC-licensees because section 112(d)(9) applies prospectively to future promulgations under the CAAA, not to such pre-existing NESHAPs as subpart T.

Response: EPA disagrees with this comment, and instead believes that section 112(d)(9) applies to all CAA section 112 NESHAPs regulating NRC-licensees. The only language arguably supportive of the commenter's interpretation of section 112(d)(9) is that the provision that instructs EPA that "no standard [i.e., NESHAP] for radionuclide emissions from any category or subcategory of facilities licensed by the Nuclear Regulatory Commission (or Agreement State) is required *to be promulgated under this section*" (emphasis added). The commenter reads the clause "to be promulgated under this section" as limiting the provision to only NESHAPs promulgated under CAA section 112 as revised by the CAAA, as opposed to any NESHAP under CAA section 112 before enactment of the CAAA. As such, the commenter posits, the authority does not apply to such pre-existing NESHAPs as subpart T. We find this reading unpersuasive because it not mandated by the plain language of section 112(d)(9), and the context in which it was enacted as well as its legislative history argue for a contrary interpretation.

By its plain terms, the phrase "under this section" applies to section 112 both as it existed before the CAAA and as it is now, not only, as the commenter would have it, to section 112 as amended by the CAAA. If Congress intended the narrow reading advocated, it logically would have referred only to the "Section 112 as amended" or to the CAAA generally. Moreover, although the sentence does refer to regulations "to be" promulgated, ordinarily a reference to future action, it is implicit that EPA is not required to regulate sources already adequately regulated by NRC, and therefore EPA should not have to implement and enforce existing regulations that are duplicative.

In addition, the context in which section 112(d)(9) was enacted argues against the commenter's prospective-only interpretation. At the time of the CAAA, the radionuclide NESHAPs that could be affected by this provision had already been promulgated (although some, including subpart T, had not yet taken effect) under the pre-existing version of CAA Section 112. An interpretation rendering section 112(d)(9) inapplicable to those provisions would render section 112(d)(9) meaningless at the time enacted. This is so even though EPA is authorized by the CAAA to repromulgate some (but not all) of the radionuclide NESHAPs under the amended version of section 112. Thus, under the commenter's scheme, EPA could conceivably repromulgate under section 112 of the CAAA in order to afford itself of the authority of section 112(d)(9) to not promulgate a NESHAP at all. However, we do not believe Congress intended this sort of elaborate rulemaking—repromulgation in order to authorize rescission—when it enacted section 112(d)(9), and in fact such a process ill serves the purpose of section 112(d)(9) to avoid needless regulation.

Finally, the legislative history of section 112(d)(9) also supports EPA's view that the provision applies to radionuclide NESHAPs regulating NRC-

VOL 56 ISS 251 DEC 31 1991 UMI

licensees no matter when promulgated. Section 112(d)(9) was crafted by Senator Simpson after an earlier provision was rejected. The rejected provision would have rescinded by operation of law all existing radionuclide NESHAPs as they apply to NRC-licensees, and prohibited any such future promulgations under section 112 as amended. Senator Simpson's alternative amendment—section 112(d)(9)—replaced automatic rescission and future prohibition by granting EPA the authority to find by rule that the NRC regulatory program protects public health with an ample margin of safety and, thus, EPA regulation is unnecessary. In enacting this alternative, there is no reason whatsoever to believe that Congress abandoned the initial concern over existing NESHAPs; rather, there is nothing in the legislative history to suggest that Congress intended that the amendments apply only to future NESHAPS. Section 112(d)(9) remained primarily directed to existing NESHAPs as they were the ones generating the immediate concern over duplicative regulation.

For these reasons, EPA believes that section 112(d)(9) authorizes EPA to make the finding necessary to rescind NESHAPs promulgated under the authority of CAA section 112 as it existed prior to the CAAA.

Comment: Because EPA has not made a finding that the regulatory program administered by NRC protects public health with an ample margin of safety, EPA should allow subpart T to remain "in effect" and not finalize the stay for NRC-licensees.

Response: As a preliminary matter, it should be noted that subpart T is not currently, and has not yet been, functionally "in effect" for NRC-licensees. This is because at the time it promulgated subpart T, EPA recognized that immediate compliance was impossible, and acted pursuant to its authority under then-existing CAA section 112 to waive compliance until December 15, 1991, which is two years from the statutory effective date for existing sites. Thus, this stay maintains the status quo pending related rulemaking to rescind subpart T as the NRC-licensees.

EPA believes this stay is authorized by CAA sections 301(a) and 112(d)(9), as amended, as it is a logical component to the implementation of the Congressional policy embodied in section 112(d)(9). Although the CAAA do not clearly establish all of the procedures to be followed by EPA in implementing section 112(d)(9) for previously promulgated NESHAPs, CAA section 301(a), which was retained by the CAAA, does provide the Agency with general rulemaking authority to implement the provisions of the statute. Moreover, EPA is unwilling to attribute to Congress an intention that EPA proceed with implementation of subpart T on an interim basis even though EPA believes that the NRC regulatory program will protect public health with an ample margin of safety, and is commencing rulemaking to rescind subpart T as to NRC-licensees simultaneous with today's action on this stay.

Given EPA's tentative determination that the NRC regulatory program will protect public health with an ample margin of safety (which assumes the MOU is implemented as intended), an interpretation of section 112(d)(9) to prohibit such an interim stay would undermine the purpose of that provision to avoid needlessly duplicative regulation. Indeed, such an interpretation would force all facilities affected by a previously promulgated NESHAP to make all of the expenditures necessary to demonstrate compliance, or negotiate a compliance schedule in the context of a judicial or administrative enforcement action, at the same time EPA is conducting rulemaking designed to provide relief from just that duplicative regulation. EPA is not prepared to presume that Congress intended this potential waste of administrative and judicial resources, or that it intended that section 112(d)(9) would provide meaningful regulatory relief only in the case of future NESHAPs.

Comment: Even if section 112(d)(9) authorizes a stay in certain circumstances, that authority may not be exercised here because EPA has not even tentatively found the existing NRC regulatory program protective of public health with an ample margin of safety.

Response: EPA believes the commenter misreads EPA's proposal and the authority provided by section 112(d)(9). Section 112(d)(9) authorizes rescission if EPA finds, by rule, that the NRC's "regulatory program" will protect public health with an ample margin of safety. The commenter narrowly construes that term to argue that because the actions contemplated by the MOU between EPA, NRC and the affected Agreement States have not yet concluded (e.g., license amendments to incorporate closure schedules), NRC's regulatory program is currently deficient.

EPA takes a broader view, however, determining instead that the MOU itself provides a basis for finding NRC's regulatory program protective of public health with an ample margin of safety, although the ongoing validity of that determination assumes that the MOU will be implemented as contemplated. In contrast to the commenter's characterization, EPA does tentatively find that the current NRC "regulatory program" as supplemented by the MOU satisfies section 112(d)(9), although it conditions its final determination upon the MOU's full implementation. In this way, subpart T will not be finally rescinded until the changes called for by the MOU are binding on and enforceable against the licensees.

This stay is an inextricable part of the MOU. The complication and needless duplication that would result should subpart T be allowed to go into effect (e.g., administrative, judicial and citizen enforcement actions) could unduly interfere with NRC's implementation of the other aspects of its regulatory program as modified by the remainder of the MOU. In contrast, EPA does not believe the stay will in any way interfere with the requirement that public health be protected with an ample margin of safety. Thus, while EPA believes it prudent to withhold final rescission of subpart T as to NRC-licensees until the MOU is implemented, this stay pending implementation is a reasonable exercise of the Agency's authority under section 112(d)(9).

Alternatively, even if the commenter is correct that EPA may not find that the NRC program protects public health with an ample margin until the MOU is fully implemented, EPA believes it is still authorized by section 112(d)(9) to stay Subpart T in the interim. In EPA's view, the fact that NRC is committed under the MOU to expeditiously implement a regulatory program that protects public health with an ample margin justifies EPA staying Subpart T as to NRC-licensees pending this process. Of course, should EPA become persuaded that NRC has abandoned the objectives and commitments set forth in the MOU, then EPA should take action to assure that subpart T is effective as to NRC-licensees. This may occur during the period of the stay, which expires by its own terms in two-and-a-half years (June 30, 1994), or even after rescission of subpart T through proceedings to reconsider the section 112(d)(9) finding. As to this latter course, EPA has included in its proposal to rescind subpart T a variety of procedural and substantive mechanisms designed to assure that if the MOU is not effectively implemented, subpart T will be reinstated.

Comment: This stay is inappropriate because the NRC regulatory program does not resolve the timing concern that led EPA to promulgate subpart T in the first place. This timing problem is also not addressed by the MOU because (1) the MOU affects only existing nonoperational disposal sites, not those that will become nonoperational in the future, and (2) the MOU allows NRC to retain the authority to waive timely compliance with the 20 pCi/m^2—s flux standard for economic reasons, which would not be allowed under the CAA.

Response: It is true that EPA initially promulgated Subpart T because the existing NRC regulatory program did not require that uranium mill tailings disposal sites expeditiously comply with the 20 pCi/m^2—s flux standard. However, EPA believes that the MOU fully addresses this concern. The MOU calls for NRC to assure that compliance with the 20 pCi/m^2—s standard occur as "expeditiously as practicable considering technological feasibility." The MOU states an overriding objective that existing sites achieve compliance by December 31, 1997, and that sites that become nonoperational in the future comply within seven years of becoming nonoperational. To this end, the MOU directs that NRC immediately commence soliciting reclamation plans for incorporation into licenses to set forth enforceable compliance schedules. This process has already begun.

Because the MOU fully addresses the timing concern, EPA believes it has the authority to stay subpart T as the MOU is implemented. The commenter's concern that the MOU does not speak to sites that become nonoperational in the future is unfounded. In fact, the MOU is explicit that newly nonoperational sites will also have to comply with the 20 pCi/m^2—s standard as expeditiously as practicable considering technological feasibility. Although this requirement can not be the immediate subject of reclamation plans or licenses for those sites since by definition, they are not yet nonoperational, the MOU does call for EPA to modify its existing general UMTRCA regulations to codify this requirement. Once this occurs NRC will, in all probability, have to amend its implementing criteria to reflect the regulatory change.

As to its final point, the commenter is correct that the NRC has authority under the AEA to waive for economic reasons strict compliance with the dual requirement that sites meet the 20 pCi/m^2-s standard as expeditiously as practicable considering technological feasibility. However, the full exercise of this authority is not contemplated by the MOU, and thus if this authority is used in a manner inconsistent with purposes and objectives of the MOU, EPA will not rescind subpart T, and this stay will expire. Also, if the waiver authority is used after subpart T is rescinded, the proposal includes procedural and substantive provisions designed to facilitate reconsideration of the rescission and possible reinstatement of subpart T. These results flow from the meaning of "expeditiously as practicable considering technological feasibility," as defined in today's simultaneous proposal to rescind subpart T as to NRC-licensees, which is consistent with the CAA: Costs play a very limited role, and utilization of a cost-benefit analysis in setting compliance schedules is not contemplated.

Comment: This stay, coupled with the compliance waiver, means that subpart T sites have had four-and-a-half years to comply with the section 112 requirement, a schedule that is inconsistent with the CAA.

Response: EPA agrees that the existing uranium mill tailings disposal sites have had more time to comply with the 20 pCi/m^2-s standard than was contemplated by CAA section 112 as it existed prior to the CAAA. This is a function not of regulatory leniency, however, but instead of the physical reality of these sites. Unlike the typical source regulated under CAA section 112, where a regulatory option includes downsizing or shut-down, these sites are already shut down and a variety of time-consuming physical changes must occur (e.g., drying of the tailings) before compliance may be achieved. Indeed, these realities were addressed by Congress in enacting the CAAA, and special provisions were inserted at section 112(i)(3) that would allow these sites up to seven years to achieve compliance if EPA determined to repromulgate (or, perhaps, retain) subpart T. Moreover, in the context of negotiating compliance agreements with EPA, which is what would occur if subpart T went into effect for NRC-licensees, EPA would negotiate compliance schedules consistent with the "expeditiously as practicable considering technological feasibility" schedule committed to by NRC. However, in so doing and unlike NRC, EPA would be in the disadvantageous position of not being the regulatory agency involved in all other aspects of final closure of these sites. For these reasons, EPA believes the compliance schedules and regulatory requirements contemplated by the MOU reflect of physical reality and are consistent with what would result under subpart T, and as such are authorized by section 112(d)(9).

Comment: One commenter favored and one opposed EPA's authority to stay subpart T as to NRC-licensees for ninety days under CAA section 307(d)(7)(B). The commenter that opposed EPA's authority also argued that EPA lacks stay authority under section 301(a). The commenter that favored section 307(d)(7)(B) authority also argued that EPA has additional authority under APA section 10(d) (5 U.S.C. 705(d)).

Response: EPA believes this stay is authorized by section 112(d)(9) and 301(a), and does not rely upon the authority of section 307(d)(7)(B) or APA section 10(d). Nevertheless, upon initial reflection, the Agency does not find any statutory bar to its ability to utilize these alternative authorities. In this regard, EPA does not find persuasive the comment that EPA lacks authority because the referenced provisions are of a "general" nature, and more specific savings and statutory stay provisions exist to bar their application in this context. Thus, should litigation regarding this stay result, EPA reserves the right to present these authorities as alternatives. Finally, as to section 301(a), the Agency likewise does not find persuasive the argument that its general applicability is excluded from this context because of the allegedly more specific savings and statutory stay provisions. In EPA's view, those provisions either serve a separate purpose or function to do by operation of law what EPA is here doing by rulemaking. As such, they do not preclude EPA's utilization of section 301(a), in conjunction with section 112(d)(9), in this context.

Comment: The proposed stay of subpart T for NRC-licensees should be finalized because subpart T should not have been promulgated in the first place given (1) the impossibility of compliance, and (2) the regulatory scheme under UMTRCA.

Response: While EPA is today finalizing the subpart T stay for NRC-licensed uranium mill tailing disposal sites, it is not revisiting its earlier decision to promulgate subpart T.

Comment: EPA is slightly mistaken in stating, alternatively, that "many" or "some" existing uranium mill tailings disposal sites could not meet the December 15, 1991, compliance deadline under subpart T. In fact, no sites could meet that date. In addition, EPA misspeaks when it states that "some piles have remained uncovered for decades emitting radon." The commenter states "In fact, virtually all of the sites * * * were conducting operations until the early or mid-1980s". Thus it is true only of operational piles

VOL
56
ISS
251
DE
31
1991
UMI

and is not evidence of any failure of NRC's regulatory program.

Response: EPA is not revisiting its decision to promulgate subpart T in regard to either of these points. As to the first point, in claiming that no sites can come into compliance with subpart T, the commenter fails to mention two NRC-licensed piles, Edgemont and Ray Point, have already come into compliance. In addition, many piles designated as Title I piles have achieved closure under the DOE program.

As to the second point relating to decades of radon emission, EPA reaffirms its observation that in fact some currently nonoperational disposal sites have emitted radon for decades. The commenter's statement that virtually all sites were conducting operations until the early or mid-1980s acknowledges that "some" were not. Furthermore many of the DOE Title I piles have emitted radon for decades.

It is worth noting, however, that whether the currently nonoperational sites were operational during some or most of that period is not of consequence to the health risk identified by EPA in promulgating Subpart T, which is not being revisited here. This point is emphasized by EPA's promulgation of Subpart W at the same time it promulgated subpart T. Subpart W regulates operational disposal sites to ensure that their emissions also will not exceed 20 pCi/m^2–s; this stay does not affect Subpart W.

Comment: The discussion of the MOU in the preamble to the proposed stay may create confusion. By referring to "final closure" it suggests total site closure (e.g., groundwater restoration), when in fact radon control is all that is addressed by the MOU.

Response: EPA agrees that the MOU is directed only to compliance with the 20 pCi/m^2–s flux standard.

Comment: EPA should take steps to amend the MOU in certain respects.

Response: EPA believes the MOU is sufficient as executed and does not currently intend any revisions. The concerns underlying the changes requested, however, are being addressed to the extent appropriate in the rulemaking proposing to rescind subpart T.

List of subjects in 40 CFR Part 61

Air pollution control, Hazardous materials, Asbestos, Beryllium, Mercury, Vinyl Chloride, Benzene, Arsenic, and Radionuclides.

Dated: December 19, 1991.

William K. Reilly,

Administrator.

For all of the reasons given in the preamble, part 61 of title 40 of the Code of Federal Regulations is amended to read as follows:

PART 61 [AMENDED]

1. The authority citation for part 61 continues to read as follows:

Authority: 42 U.S.C. 7401,7412, 7414, 7416, 7601.

2. Section 61.220 of subpart T of part 61 is amended by designating the current text as paragraph (a) and by adding paragraph (b) to read as follows:

§ 61.220 Designation of facilities.

* * * * *

(b) The effective date for subpart T is stayed for owners and operators of all sites that are used for the disposal of tailings, commonly referred to as uranium mills and their associated tailings, that are regulated under Title II of the Uranium Mill Tailings Control Act of 1978, until the date on which EPA takes final action concerning its proposal to rescind subpart T for owners and operators of all sites that are used for the disposal of tailings that are regulated under title II of the Uranium Mill Tailings Control Act of 1978, pursuant to section 112(d)(9) of the Clean Air Act, as amended, as published on (date of this publication), or June 30, 1994, whichever first occurs. EPA will publish any such final action in the **Federal Register**.

BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 173

[Docket No. HM–198A; Amdt. No. 173–227]

RIN 2137–AB31

Elevated Temperature Materials

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule; delay of compliance dates.

SUMMARY: RSPA is delaying the compliance dates for certain provisions of a final rule concerning elevated temperature materials and clarifying the effective date of this final rule in conjunction with the final rule published December 21, 1990, under Docket HM–181. This action is in response to numerous petitions asking RSPA to delay the compliance dates contained in the rule to allow affected entities sufficient time to come into compliance with the new requirements and to provide RSPA additional time to review petitions for reconsideration received in response to the final rule. RSPA will respond to other petitions for reconsideration in a separate document.

DATES: *Effective date:* These amendments are effective March 30, 1992. However, compliance with the regulations as amended herein is authorized as of October 30, 1991.

FOR FURTHER INFORMATION CONTACT: Beth Romo, Office of Hazardous Materials Standards, (202) 366–4488, or James K. O'Steen, Office of Hazardous Materials Technology, (202) 366–4545, U.S. Department of Transportation, 400 Seventh Street SW, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION: On October 2, 1991, RSPA published a final rule (Docket HM–198A; 56 FR 49980) amending the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) to regulate materials which pose a hazard due to their being offered for transportation or transported at elevated temperatures. The final rule established requirements to communicate the hazards of these elevated temperature materials by means of marking, shipping papers and placarding, and to prescribe packaging requirements for these materials. Based on the petitions received, RSPA finds it impracticable to take action and respond to certain substantive issues discussed in the petitions within the 90-day period prescribed by 49 CFR 106.37(b). In addition, RSPA has received requests from six petitioners, representing cargo tank manufacturers and shippers, to delay the effective date of the final rule. The petitioners stated that additional time is needed for newly-regulated entities to come into compliance with the new requirements. Delaying certain compliance dates allows RSPA an opportunity to more thoroughly study issues raised in the petitions for reconsideration and to prepare an appropriate response.

Clarification of Effective Date

This final rule is effective March 30, 1992. However, under the transition provisions of the Docket HM–181 final rule, as revised on December 20, 1991 (56 FR 66124), in § 171.14 (b)(3) and (b)(4), classification and hazard communication requirements may be delayed until October 1, 1993, except for placarding requirements which may be delayed until October 1, 1994.

Summary of Compliance Dates

October 30, 1991: Compliance with the regulations is authorized.

October 1, 1993: Authorized packagings in service prior to October 1, 1993, and not in full compliance with § 173.247(b), may continue to be used for up to 20 years from their date of manufacture. All packagings manufactured after this date must be in compliance with the packaging standards contained in § 173.247(b).

March 30, 1995: All authorized packagings must conform to closure requirements contained in § 173.247(b)(2). Packagings used for transportation of asphalt or bitumen also must be in conformance with § 173.247 (b)(5) and (b)(6).

Administrative Notices

A. Executive Order 12291

This final rule has been reviewed under the criteria specified in § 1(b) of Executive Order 12291 and (1) is determined not to be a major rule; (2) is determined not to be a significant rule under the regulatory procedures of the Department of Transportation (44 FR 11034); and (3) does not require a Regulatory Impact Analysis, or an environmental impact statement under the National Environmental Policy Act (42 U.S.C., 4321 *et seq.*) This final rule does not impose additional requirements and has the net result of reducing costs imposed under the final rule published in the **Federal Register** on October 2, 1991, without reducing safety (56 FR 49980). The original regulatory evaluation of the final rule was not modified because this final rule does not impose additional requirements and does not make substantive changes to the final rule. That document is available for review in the docket.

B. Executive Order 12612

This action has been analyzed in accordance with Executive Order 12612 ("Federalism"). It has no substantial direct effect on the States, on the current Federal-State relationship, or the current distribution of power and responsibilities among levels of government. Thus this final rule contains no policies that have Federalism implications, as defined in Executive Order 12612, and no Federalism Assessment is required.

C. Impact on Small Entities

Based on available information, I certify that the changes in this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A regulatory flexibility analysis prepared for the October 2, 1991 final rule is available for review in the docket.

D. Paperwork Reduction Act

This amendment imposes no changes to the information collection and recordkeeping requirements contained in the October 2, 1991 final rule, which was approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. chapter 35 under OMB control number 2137–0034 (expiration date: June 30, 1992).

E. Regulatory Information Number (RIN)

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements, Uranium.

In consideration of the foregoing, 49 CFR part 173, as amended in the final rule published October 2, 1991 (56 FR 49980), is further amended as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

1. The authority citation for part 173 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1807, 1808, 1817; 49 CFR part 1, unless otherwise noted.

§ 173.247 [Amended]

2. In § 173.247, as added on page 49989, the following changes are made:

a. In paragraph (c)(5), the date "March 30, 1993" is revised to read "October 1, 1993".

b. In paragraph (d)(2), the date "March 30, 1993" is revised to read "March 30, 1995".

c. In paragraphs (d)(3) and (d)(4), the date "March 30, 1993" is revised to read "October 1, 1993" both places it appears.

Issued in Washington, DC on December 24, 1991, under authority delegated in 49 CFR part 1.

Douglas B. Ham,

Deputy Administrator, Research and Special Programs Administration.

Proposed Rules

Federal Register
Vol. 56, No. 251
Tuesday, December 31, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[No. LS-91-007]

7 CFR Parts 53 and 54

Standards for Grades of Lamb, Yearling Mutton, and Mutton Carcasses and Standards for Grades of Slaughter Lambs, Yearlings, and Sheep

AGENCY: Agricultural Marketing Service (AMS), USDA.

ACTION: Proposed Rule; extension of comment period.

SUMMARY: On November 20, 1991, the Agricultural Marketing Service (AMS) published a proposed rule (56 FR 58518) to amend the official U.S. standards for grades of lamb, yearling mutton, and mutton carcasses and the related standards for grades of slaughter ovines. At the request of sheep producers, the Department developed a proposal to revise the yield grade standards for ovine carcasses in recognition that many of the lambs being produced today are too fat to meet the desires of consumers for lean meat products. Therefore, AMS proposed to revise the official U.S. standards for grades of lamb, yearling mutton, and mutton carcasses (and the related standards for grades of slaughter lambs, yearlings, and sheep) to: (1) Require that ovine carcasses be identified for both quality and yield grade when officially graded; (2) require that most of the kidney and pelvic fat be removed from ovine carcasses prior to grading; (3) shift and narrow that fat thickness range in each yield grade; and (4) eliminate consideration of leg conformation score in determining the yield grade. AMS is extending the comment period to January 21, 1992, because the Western States Meat Association requested additional time to evaluate the proposal and file comments.

DATES: Comments must be received by January 21, 1992.

ADDRESSES: Comments must be submitted in duplicate, signed, include the address of the sender, and should bear reference to page number 58518 of the November 20, 1991, issue of the **Federal Register**. The comments should include definitive information which explains and supports the sender's views. Send comments to: Herbert C. Abraham; Livestock and Meat Standardization Branch; Livestock and Seed Division; AMS-USDA; Room 2603-South Building; P.O. Box 96456, Washington, DC 20090-6456.

Comments will be available for public inspection during regular business hours in room 2603-South Building; 14th Street and Independence Avenue, SW.; Washington, DC.

FOR FURTHER INFORMATION CONTACT: Herbert C. Abraham, Livestock and Meat Standardization Branch—202/720-4486.

SUPPLEMENTARY INFORMATION: On November 20, 1991, AMS published a proposed rule in the **Federal Register** (56 FR 58518-58526) to amend the official U.S. standards for grades of lamb, yearling mutton, and mutton carcasses (7 CFR part 54) and the related standards for grades of slaughter ovines (7 CFR part 53). The Department was requested by sheep producers to revise the yield grade standards for ovine carcasses in recognition that many of the lambs being produced today are too fat to meet the desires of consumers for lean meat products. Their feeling was that a revised yield grading system, which would be widely used by the lamb industry, is essential to ensure the efficient production and marketing of the type of lamb products consumers want. The Department agreed to propose such revisions. Therefore, AMS proposed to revise the official U.S. standards for grades of lamb, yearling mutton, and mutton carcasses (and the related standards for grades of slaughter lambs, yearlings, and sheep) to: (1) Require that ovine carcasses be identified for both quality and yield grade when officially graded; (2) require that most of the kidney and pelvic fat be removed from ovine carcasses prior to grading; (3) shift and narrow the fat thickness range in each yield grade; and (4) eliminate consideration of leg conformation score in determining the yield grade.

The orginal comment period was scheduled to close on December 20, 1991. However, the Western States Meat Association requested addtional time to evaluate the proposal and file comments. AMS has reviewed the matter and determined that there is sufficient justification for extending the comment period until January 21, 1992.

Done at Washington, DC, on December 24, 1991.

Daniel Haley,
Administrator.

[FV-91-439PR]

Spearmint Oil Produced in the Far West; Salable Quantities and Allotment Percentages for the 1992-93 Marketing Year, and Amendment of the Administrative Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule invites comments on changes to the administrative rules and regulations of the Far West spearmint oil marketing order. This action would: (1) Establish the quantity of spearmint oil produced in the Far West, by class, that may be purchased from or handled for producers by handlers during the 1992-93 marketing year, which begins on June 1, 1992; and (2) amend the order's regulations, for the 1992-93 and 1993-94 seasons, to provide that the one half of one percent of the additional allotment base available each year for distribution to existing producers be issued first to growers who apply and who have under 3,000 pounds of base. The first part of this action is taken in order to avoid extreme fluctuations in supplies and prices and thus help to maintain stability in the spearmint oil market. The second part of this action is proposed because an allotment level of 3,000 pounds is considered to be a better measure of the minimum economic enterprise level required for spearmint oil production. These changes were recommended by the Spearmint Oil Administrative Committee (Committee), the agency responsible for local administration of the order.

DATES: Comments must be received by January 30, 1992.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, room 2525, South Building, P.O. Box 96456, Washington, DC 20090-6456. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Christian Nissen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, room 2525-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 720-1754.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Order No. 985 (7 CFR part 985), regulating the handling of spearmint oil produced in the Far West. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This proposed rule has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512-1 and the criteria contained in the Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

The Far West spearmint oil industry is characterized by primarily small producers whose farming operations generally involve more than one commodity and whose income from farming operations is not exclusively dependent on the production of spearmint oil. The production of spearmint oil is concentrated in the Far West, primarily Washington, Idaho, and Oregon (part of the area covered under the marketing order). Spearmint oil is also produced in the Midwest. The production area covered by the marketing order normally accounts for more than 75 percent of U.S. production of spearmint oil annually.

The Committee reports that there are approximately 9 handlers and 253 producers of spearmint oil under the marketing order for spearmint oil produced in the Far West. Of the 253 producers, 160 producers hold "Class I" (Scotch) oil allotment base, and 136 producers hold "Class III" (Native) oil allotment base.

Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of Far West spearmint oil producers and handlers may be classified as small entities.

This proposed rule invites comments on changes to the administrative rules and regulations of the Far West spearmint oil marketing order.

The salable quantities and allotment percentages were unanimously recommended by the Committee at its October 9, 1991, meeting.

The first part of this proposed rule would establish salable quantities of 934,523 pounds and 1,033,161 pounds, respectively, for Scotch and Native spearmint oils produced in the Far West and an allotment percentage of 54 percent for both Scotch and Native spearmint oils produced in the Far West. This action would limit the amount of spearmint oil that may be purchased from or handled for producers by handlers, during the 1992-93 marketing year, which begins on June 1, 1992. Salable quantities and allotment percentages have been placed into effect each season since the order's inception in 1980.

The amounts recommended for sale reflect moderate and steady increases in trade demand for both Scotch and Native spearmint oil over the past four years. Based on available information, the Committee indicates that trade demand is likely to be near the average of the last three years for the 1992-93 marketing year.

The proposed salable quantities are not expected to cause a shortage of spearmint oil supplies. Any unanticipated or additional market needs which may develop for spearmint oil can be satisfied by an increase in the salable quantity which producers can fill with reserve stocks. The estimated reserve pools for Class I and Class III spearmint oil stand at 176,479 pounds and 232,625 pounds, respectively. Both Scotch and Native spearmint oil producers who produce more than their annual allotments during the 1992-93 season may transfer such excess spearmint oil to a producer with spearmint oil production less than his or her annual allotment.

This proposed regulation, if adopted, would be similar to those which have been issued in prior seasons. Costs to producers and handlers resulting from this proposed action are expected to be offset by the benefits derived from improved returns.

The proposed salable quantity and allotment percentage for each class of spearmint oil for the 1992-93 marketing year, which begins on June 1, 1992, is based upon recommendations of the Committee and the following data and estimates:

(1) "Class I" (Scotch) Spearmint Oil

(A) Estimated carryin on June 1, 1992—105,978 pounds.

(B) Estimated trade demand (domestic and export) for the 1992-93 marketing year—1,000,000 pounds.

(C) Recommended desirable carryout on May 31, 1993—0 pounds.

(D) Salable quantity required from 1992 regulated production—894,022 pounds.

(E) Total allotment bases for Scotch oil for the 1992-93 marketing year—1,730,598 pounds.

(F) Computed allotment percentage—51.7 percent.

(G) Recommended allotment percentage—54 percent.

(H) The Committee's recommended salable quantity—934,523 pounds.

(2) "Class III" (Native) Spearmint Oil

(A) Estimated carryin on June 1, 1992—49,066 pounds.

(B) Estimated trade demand (domestic and export) for the 1992-93 marketing year—1,075,000 pounds.

(C) Recommended desirable carryout on May 31, 1993—0 pounds.

(D) Salable quantity required from 1992 production—1,025,934 pounds.

(E) Total allotment bases for Native oil—1,913,262 pounds.

(F) Computed allotment percentage—53.6 pounds.

(G) Recommended allotment percentage—54 percent.

(H) The Committee's recommended salable quantity—1,033,161 pounds.

The salable quantity is the total quantity of each class of oil which handlers may purchase from or handle on behalf of producers during a marketing year. Each producer is

VOL
56
ISS
251
DE
31
1991
UMI

allotted a share of the salable quantity by applying the allotment percentage to the producer's allotment base for the applicable class of spearmint oil.

The establishment of these salable quantities and allotment percentages would allow for anticipated market needs based on historical sales, changes and trends in production and demand, and information available to the Committee. Adoption of this proposed rule would provide spearmint oil producers with information on the amount of oil which should be produced for next season.

The second change recommended by the Committee and included in this proposed rule would amend § 985.153(c)(2) of the order's Administrative Rules and Regulations by revising the procedures for issuing additional allotment base to existing producers. The authority for this action is contained in § 985.53(d)(3) of the order which prescribes that the Committee may, with the approval of the Secretary, establish rules and regulations to be used for determining the distribution of additional allotment base. In establishing such rules, the Committee is required to take into account the minimum economic enterprise requirements for spearmint oil production, the applicant's ability to produce spearmint oil, the area where the spearmint oil will be produced, and other economic and marketing factors.

This amendment of the procedures for issuing additional allotment base would provide that, for a period of two years for Class I oil and Class III oil, existing small producers would be given priority when applying for additional allotment base. This amendment is intended to help small producers increase their supply of spearmint oil to a level which will approximate the minimum economic enterprise level required for spearmint oil production. Additionally, this rule would provide that such additional allotment cannot be used to replace allotment which a producer has transferred.

Section 985.53(d)(1) of the order provides for an amount equal to no more than 1 percent of the total allotment base for each class of oil to be issued annually and distributed equally as additional allotment base to both new and existing producers. This rule would provide that the ½ percent of the additional allotment base, available to existing producers for the 1992–93 and 1993–94 seasons, would be issued first to small producers who apply. Existing producers applying for additional Class I or Class III allotment base with less than 3,000 pounds of base as of June 7, 1990, would be issued sufficient additional allotment base over a two year period (1992–93 and 1993–94) to bring them up to a level not to exceed 3,000 pounds.

This action is similar to a previous rule which provided that for the 1987–88 and 1988–89 seasons, additional allotment base would be issued to existing producers applying for additional spearmint oil allotment base with less than 2,000 pounds of Class I base or 2,200 pounds of Class III oil. In the 1989–90 and 1990–91 seasons, additional allotment bases were distributed equally to those existing producers requesting additional base who could demonstrate the ability to produce additional oil.

The Committee has recommended this action because an allotment level of 3,000 pounds is considered to be a better measure of the minimum economic enterprise level required for spearmint oil production. The Committee believes increasing the minimum allotment base of small producers would allow more of them to remain producers and would assure that there will continue to be a broad base of production.

The Committee has estimated that 55 producers of Class I oil, and 30 producers of Class III oil would be eligible for additional allotment base under the amendment. If there is any additional allotment available for either class during the 1992–93 or 1993–94 seasons, such amounts would be distributed equally among the other existing producers who apply.

Based on available information, the Administrator of the AMS has determined that the issuance of this proposed rule would not have a significant economic impact on a substantial number of small entities.

The information collection requirements contained in the regulations that would be amended by this proposed action have been previously approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0065.

A 30-day comment period is provided to allow interested persons to respond to this proposal. All written comments received within the comment period will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 985

Marketing agreements, Oils and fats, Reporting and recordkeeping requirements, and Spearmint oil.

For the reasons set forth in the preamble, 7 CFR part 985 is proposed to be amended as follows:

PART 985—MARKETING ORDER REGULATING THE HANDLING OF SPEARMINT OIL PRODUCED IN THE FAR WEST

1. The authority citation for 7 CFR part 985 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 985.211 is added to read as follows:

Note.—This section, if adopted, will not appear in the Code of Federal Regulations.

Subpart—Salable Quantities and Allotment Percentages

§ 985.211 Salable quantities and allotment percentages—1992–93 marketing year.

The salable quantity and allotment percentage for each class of spearmint oil during the marketing year which begins on June 1, 1992, shall be as follows:

(a) "Class 1" (Scotch) oil—a salable quantity of 934,523 pounds and an allotment percentage of 54 percent.

(b) "Class 3" (Native) oil—a salable quantity of 1,033,161 pounds and an allotment percentage of 54 percent.

3. Section 985.153 is amended by revising paragraph (c)(2)(i) and the first sentence of paragraph (c)(2)(ii) to read as follows:

Subpart—Administrative Rules and Regulation

§ 985.153 Issuance of additional allotment base to new and existing producers.

* * * * *

(c) * * *

(2) *Existing producers.* (i) The Committee shall review all requests from existing producers for additional allotment base. With respect to the additional Class I or Class III allotment base for existing producers for the 1992–93 and 1993–94 marketing years, existing producers with less than 3,000 pounds of allotment base as of June 7, 1990, who apply and who have the ability to produce additional quantities of spearmint oil, shall be issued additional allotment base sufficient to bring them up to a level not to exceed 3,000 pounds: *Provided,* That additional allotment base shall not be issued to any person that would replace all or part of allotment base such person has transferred. Additional allotment base in excess of the amount needed to bring eligible producers up to 3,000 pounds of allotment base for Class I or Class III oil shall be distributed equally among all existing producers who apply and who have the ability to produce additional quantities of spearmint oil, and;

(ii) For each marketing year after 1993–94, each existing producer of a class of spearmint oil who requests additional allotment base and who has the ability to produce additional quantities of that class of spearmint oil, shall be eligible to receive a share of the additional allotment base for that class of oil. * * *

BILLING CODE 3410–02–M

Commodity Credit Corporation

7 CFR Part 1427

Upland Cotton Adjusted World Price

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The purpose of this proposed rule is to amend the regulations found at 7 CFR part 1427 to change the time of announcement by the Commodity Credit Corporation ("CCC") of the adjusted world price ("AWP") and coarse count adjustment ("CCA") for upland cotton from 4 p.m. to 8 p.m. Eastern time each Thursday and to provide that the AWP and CCA will be effective at the time of announcement. These actions are initiated in accordance with section 103B(a)(5)(C) of the Agricultural Act of 1949, as amended. Implementation of the changes made by this proposed rule will improve the effectiveness of the marketing loan and loan deficiency payment programs for upland cotton and eliminate an inequity permitted under current regulations.

DATES: Comments must be received by January 15, 1992, in order to be assured of consideration.

ADDRESSES: Submit comments to: Deputy Administrator, Program Planning and Development, USDA-ASCS, room 3090–S, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Charles V. Cunningham, Leader, Fibers Group, Commodity Analysis Division, USDA-ASCS, room 3756–S, P.O. Box 2415, Washington, DC 20013 or call 202–720–7954.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under USDA procedures implementing Executive Order 12291 and Departmental Regulation 1512–1 and has been designated as "nonmajor". It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, State or local governments or geographical regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The titles and numbers of the federal assistance programs, as found in the catalogue of Federal Domestic Assistance, to which this notice applies are:

Titles	Numbers
Commodity Loans and Purchases	10.051
Cotton Production Stabilization	10.052

It has been determined that the Regulatory Flexibility Act is not applicable since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of these determinations.

It has been determined by environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This provision is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

This amendment will not result in any change in the public reporting burden. Therefore, the information collection requirements of the Paperwork Reduction Act are not applicable to this amendment.

Background

The AWP and CCA for upland cotton are currently announced by CCC as soon as possible after 4 p.m. Eastern time each Thursday and are in effect from 12:01 a.m. Friday through midnight the following Thursday. During periods when the AWP is below the loan level but above 70 percent of the loan level, a producer or agent or subsequent agent authorized on CCC Form 605 may (1) repay the loan amount for one or more bales of cotton pledged as collateral for a loan at the AWP in effect on the day the repayment is received by the county office or authorized Loan Servicing Agent that disbursed the loan, or (2) a producer may agree to forgo loan eligibility on one or more bales of cotton and file an application for a loan deficiency payment on such bales at a payment rate equal to the amount that the AWP is below the loan level.

Under this procedure, a loan may be repaid or an application for a loan deficiency payment may be filed on Thursday afternoon after the loan repayment rate or loan deficiency payment rate for the following week is known but before such rates become effective. If the AWP is increasing for the following week, having this knowledge in advance of the effective time of the new rates permits transactions to be conducted that afternoon that might not otherwise have been conducted thereby providing an advantage to those persons having this knowledge. On the other hand, if the AWP is decreasing for the following week, transactions may be delayed until the following day to obtain additional program benefits. Making the AWP effective at the time of announcement would eliminate these advantages and make the program more effective.

Furthermore, under the current procedures, producers in time zones west of the Eastern time zone have an additional one, two or three hours in which to repay their loans or file an application for a loan deficiency payment. This creates inequities between producers in different time zones, particularly during periods when the additional discretionary AWP adjustment under § 1427.25(c)(4) is applicable. Delaying the announcement of the AWP until 8 p.m. Eastern time each Thursday, after all ASCS county offices are closed throughout the United States, and making the AWP effective upon announcement would alleviate this inequity.

Discussion of Changes

This proposed rule would amend § 1427.25(e) to change the time of announcement of the AWP and CCA to 8 p.m. Eastern time each Thursday and would provide that the AWP and CCA shall be effective from 8 p.m. Thursday through 7:59 p.m. the following Thursday.

Interested persons are invited to submit written comments on the proposed rule changes. Comments must be received by January 15, 1992, in order to be assured of consideration. The comment period is being limited to 15 days so that the provisions of this proposed rule can become effective as soon as possible in order to eliminate the inequities of the current provisions.

VOL 56 ISS 251 DEC 31 1991 UMI

List of Subjects in 7 CFR Part 1427

Cotton, Loan programs (agriculture), Price support programs, Warehouses, Marketing certificate programs.

Proposed Rule

Accordingly, 7 CFR part 1427 is proposed to be amended as follows:

PART 1427—COTTON

1. The authority citation for 7 CFR part 1427 continues to read as follows:

Authority: 7 U.S.C. 1421, 1423, 1425, 1444, and 1444–2; 15 U.S.C. 714b and 714c.

2. Section 1427.25(e) is revised to read as follows:

§ 1427.25 Determination of the prevailing world market price and the adjusted world price for upland cotton.

* * * * *

(e) The adjusted world price for upland cotton as determined in accordance with paragraph (c) of this section and the amount of the additional adjustment, as determined in accordance with paragraph (f) of this section, shall be determined weekly by CCC and shall be announced at 8 p.m. Eastern time each Thursday and shall be effective from 8 p.m. Eastern time Thursday through 7:59 p.m. Eastern time the following Thursday. In the event that Thursday is a nonworkday, the determination will be announced the next workday but shall still be effective from 8 p.m. Eastern time Thursday through 7:59 p.m. Eastern time the following Thursday.

* * * * *

Signed at Washington, DC, on December 26, 1991.

Keith D. Bjerke,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

12 CFR Part 564

[No. 91–644]

RIN 1550–AA39

Appraisals

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of Thrift Supervision ("OTS") is proposing to amend its appraisal regulations, 12 CFR part 564, to exempt additional transactions from certain requirements of those regulations. The OTS's current appraisal regulations implement title XI of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 ("FIRREA"), Public Law No. 101–73, 103 Stat. 183, 511 (1989), and are intended to protect federal financial and public policy interests in real estate-related financial transactions requiring the services of an appraiser. The proposed amendments to the appraisal regulations would, if adopted: (1) eliminate the requirements for regulated institutions to obtain appraisals by certified or licensed appraisers for real estate related financial transactions having a value, as defined in the rule, of $100,000 or less; and (2) define "real estate" and "real property" to clarify that the appraisal regulation does not apply to mineral rights, timber rights, or growing crops.

DATES: Comments must be received by January 30, 1992.

ADDRESSES: Comment should be directed to Director, Information Services Division, Office of Communications, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552. Comments will be available for inspection at 1776 G Street NW., Street Level.

FOR FURTHER INFORMATION CONTACT: Diana Garmus, Deputy Assistant Director, Supervisory Operations, (202) 906–5683; Linda Matthias, Program Analyst, (202) 906–5747, Supervision Policy; Ellen J. Sazzman, Counsel (Banking and Finance), (202) 906–7133, Regulations and Legislation Division, Chief Counsel's Office, Office of Thrift Supervision, 1700 G Street NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION:

A. Background

Title XI of the FIRREA directed the OTS, and the other federal financial institutions regulatory agencies ("agencies"), to publish appraisal rules for federally related transactions within the jurisdiction of each agency.[1] 12 U.S.C. 3332, 3336. In accordance with statutory requirements and in coordination with the other agencies, the OTS's final rule sets minimum standards for appraisals used in connection with federally related transactions and identifies those federally related transactions that require appraisals performed by State licensed or certified appraisers as appropriate. 12 CFR 564.3, 564.4. The OTS's final rule, along with those of the OCC, the FDIC, the NCUA, and the RTC, establishes a threshold level of $50,000 at or below which appraisals are not required for federally related transactions. 12 CFR 564.3(a) (OTS); 12 CFR 34.43 (OCC); 12 CFR 323.3 (FDIC); 12 CFR 722.3 (NCUA); 12 CFR 1608.3 (RTC).[2] However, transactions below the threshold are expected to have an evaluation pursuant to guidelines to be issued by the OTS and the other agencies. *Id.*

The OTS is proposing these amendments to evaluate whether raising the threshold level at or below which appraisals are not required would reduce an institution's costs of complying with the appraisal regulation without posing significant systemic risks to the safety and soundness of the thrift industry. If adopted, this proposal would potentially decrease the number of real estate related financial transactions requiring an appraisal prepared by a certified or licensed appraiser, thereby reducing costs associated with those transactions. Other financial institutions regulatory agencies, including the Office of the Comptroller of the Currency ("OCC") and the Federal Deposit Insurance Corporation ("FDIC"), and the Resolution Trust Corporation ("RTC") are proposing similar amendments to their appraisal regulations. See 56 FR 42546 (August 28, 1991) (OCC); 56 FR 47035 (September 17, 1991) (FDIC); and 56 FR 47184 (September 18, 1991) (RTC).

The OTS is soliciting comments regarding all aspects of the proposed rule and is requesting that comments include specific information regarding real estate-related loans held by savings associations where the transaction value is: $50,000 or below; $50,001 to $100,000; and above $100,000.

B. De Minimis Threshold Level

The OTS originally proposed not to require the services of a State certified or licensed appraiser for federally related transactions at or below a $15,000 threshold. 55 FR 5464 (Feb. 15, 1990). Instead, analyses for such transactions would be completed on Federal Home Loan Mortgage Corporation ("Freddie Mac") Form 704 or a similar form. The OTS explicitly solicited comment on "whether a *de minimis* level below which a state certified or licensed appraiser is not required would be appropriate * * *." 55 FR at 5465.

During the comment period, seven commenters suggested raising the transaction value at or below which appraisals would not be required. Ten others urged uniformity of appraisal regulation by all the financial institutions regulatory agencies, including the threshold level, so that all regulated institutions would be subject to the same requirements. Two commenters opposed any *de minimis* level. Two commenters suggested varying the threshold level depending on the size of the institution. After the close of the comment period, OTS received additional comment letters focusing on the threshold issue.

As explained in its notice of final rulemaking, after evaluating those comments and consulting with the other agencies, the OTS determined to establish a $50,000 threshold level. 55 FR 34533, 34536 (Aug. 23, 1990). The OTS believed that a threshold figure higher than originally proposed was appropriate for several reasons. First, no substantial evidence showed that transactions at or below the level selected have posed significant systemic risks to the safety and soundness of the thrift industry. Second, transactions at or below the level selected would still be subject to federal supervision and would be supported by an appropriate evaluation of real property collateral consistent with guidelines to be issued by the OTS. Finally, the OTS believed that a threshold at this level might also reduce the cost to the public and regulated institutions of complying with the appraisal rule.

In adopting a $50,000 threshold level at or below which appraisals would not be required, the OTS stated that it would consider adopting "a revised *de minimis* level should additional experience with the rule indicate that a different *de minimis* is appropriate." 55 FR 34536. Today, the OTS is proposing these amendments to evaluate whether raising the threshold level could potentially reduce an institution's costs of complying with the appraisal regulation without posing significant systemic risks to the safety and soundness of the thrift industry. Moreover, the OTS, along with the other agencies, expects to issue interagency guidelines addressing requirements to be followed for evaluations which must be performed in connection with, *inter alia*, real estate-related transactions at or under the threshold level. These interagency guidelines should address certain safety and soundness concerns that might otherwise arise in the context of raising the threshold level of the appraisal regulation.

As discussed in section E, Public Comment, the OTS solicits comments on whether savings associations have experienced substantial losses from real estate related financial transactions below $100,000. The OTS is also soliciting comment on whether savings associations have experienced increased costs and substantial delays in obtaining appraisals that conform with the regulation because of the increased demand for appraisers meeting state certification and licensing requirements. *Id.*

The OTS is also proposing this amendment in an effort to maintain uniformity of regulation among all the agencies. Title XI of FIRREA encouraged uniform appraisal rules among the agencies. The OTS also believes that such uniformity enhances regulated institutions' ability to compete on an equal basis, because all institutions are subject to the same appraisal requirements and do not suffer any competitive disadvantage. The OCC, the FDIC, and the RTC are proposing to raise the threshold level at or below which appraisals are not required to $100,000, and the Board's current regulation contains an $100,000 threshold level. Because the OTS believes that all regulated institutions should be subject to uniform appraisal requirements, it is also proposing to raise to $100,000 the threshold level at or below which appraisals are not required.[3]

The OTS has received a petition from the American Institute of Real Estate Appraisers ("AIREA"), the Society of Real Estate Appraisers, and the International Right of Way Association (hereinafter "petitioners"), requesting that the OTS reopen its earlier rulemaking to amend the appraisal regulation by, *inter alia*, reducing or eliminating the *de minimis* threshold and recognizing two classes of appraiser certification.[4] The petitioners argue that Title XI does not authorize the OTS to establish a *de minimis* provision and that the $50,000 threshold established in the final rule is too high and cannot be supported in the record. As discussed below, the OTS disagrees with the petitioners' assertions, including their challenge to its statutory authority. Nonetheless, today's rulemaking is responsive to the petition, because it does reopen the rulemaking on the very issue the petitioners have taken up.[5]

Title XI explicitly authorizes the OTS to "prescribe appropriate standards for the performance of real estate appraisals" only "in connection with federally related transactions * * *" See 12 U.S.C. 3339. A federally related transaction is defined as "any real estate-related financial transaction which—(A) a federal financial institutions regulatory agency or the Resolution Trust Corporation engages in, contracts for, or regulates; and (B) *requires the services of an appraiser.*" 12 U.S.C. 3350(4) (emphasis added). Title XI does not define the phrase "requires the services of an appraiser", but rather leaves the OTS with the discretion to determine which transactions require the services of an appraiser.

Had Congress wanted every transaction to have an appraisal no matter what the size or circumstances of the transaction, there would have been no reason to include the clause "requires the services of an appraiser" as one of the elements of the definition of "federally related transaction." To give effect to the clause "requires the services of an appraiser," agencies must necessarily have the discretion to determine that not all transactions require such services and therefore do not fail within the definition of "federally related transaction." Sutherland on Statutory Construction (4th Ed.) § 46.06.

Moreover, even before the passage of title XI, the Federal Home Loan Bank

---

[1] Section 1121(6) of FIRREA defines the term "Federal financial institutions regulatory agencies" to mean the Board of Governors of the Federal Reserve System ("Board"), the Federal Deposit Insurance Corporation ("FDIC"), the National Credit Union Administration ("NCUA"), the Office of the Comptroller of the Currenty ("OCC"), and the OTS.

[2] In its final appraisal rule, published on July 5, 1990, 55 FR 27762, the Board established a threshold level of $100,000, at or below which an appraisal would not be required. 12 CFR 225.63. On November 26, 1990, the Board proposed amending its appraisal regulation to change its threshold level to $50,000. 55 FR 49057 (Nov. 26, 1990). The Board has not yet issued any final response to this notice of proposed rulemaking.

[3] The OCC and the FDIC are also proposing an amendment to their appraisal regulations to permit the use of appraisals prepared for loans insured or guaranteed by an agency of the federal government if the appraisal conforms to the requirements of the federal insurer or guarantor. OTS regulations already provide for the use of valuations prepared for loans made pursuant to certain federally insured and guaranteed loan programs. See 12 CFR 541.13, 541.17, 545.32, 563.170.

[4] A copy of this petition is on file with the Information Services Division for public review. The Petitioners also raised certain other concerns regarding notice and the adequacy of the rulemaking record which the OTS disputes, but which the reopening of the rulemaking has rendered moot. The petitioners also questioned whether State licensed appraisers should perform appraisals of nonresidential properties and complex residential properties having a transaction value of $250,000 or less. As explained in its notice of final rulemaking, the OTS believes that an experienced licensed appraiser may well be qualified to perform such appraisals. 55 FR 34537, 34539. Moreover, an appraiser must be competent to perform the appraisal in question, regardless of the individual's title or designation. *Id.*, 12 CFR 564.6.

[5] The OCC and the FDIC also received similar petitions from the AIREA and have responded in a similar fashion in their respective notices of proposed rulemaking to amend the appraisal regulation. See 56 FR 42547 (August 28, 1991) (OCC); 56 FR 47038 (September 17, 1991) (FDIC).

VOL 56 ISS 251 DEC 31 1991 UMI

Board ("FHLBB"), the predecessor agency to the OTS, had authority to define and prohibit unsafe and unsound practices by savings associations, including the authority to determine when appraisals were required. The FHLBB exercised that authority by promulgating appraisal standards and policies for savings associations. See 12 CFR 563.171, 571.27 (1988)). There is no indication that Congress, in enacting title XI, had any intent to limit the agency's power to regulate real estate lending and appraisal practices under its safety and soundness authority.

Accordingly, the OTS has inherent authority under title XI and its enabling statute to determine when the services of an appraiser will be required, including the authority to set a *de minimus* threshold.

The petitioners also request that the OTS recognize two classifications of certification. The final OTS appraisal regulation uses the same designation terms as title XI, i.e., "State Certified" and State Licensed" appraisers. However, the OTS final rule does not preclude recognition of two classifications within the "State Certified" designation. Indeed the Appraisal Subcommittee, which is charged with monitoring State certification and licensing requirements pursuant to Title XI, recently stated in its Revised Guidelines that a State could adopt a second certification classification called "Certified residential appraiser" as long as the State developed appropriate procedures to distinguish among the various certifications. See Revised Guidelines, 56 FR 26090 (June 6, 1991), incorporating Advisory 91–1 "Guidelines Regarding Two Classes of Certification," dated January 25, 1991.

C. Definition of "Real Estate" and "Real Property"

Finally, the OTS is proposing a technical amendment that adds a definition of "real estate or real property" to its appraisal rule. This change is being proposed in response to questions from several institutions concerning the application of the appraisal rule to interests in real property such as mineral rights, standing timber, and growing crops.

Title XI of FIRREA does not define "real estate" or "real property", nor does the context in which these terms are used unambiguously suggest that the terms are intended to have different technical meanings. For instance, 12 U.S.C. 3350 defines "real estate-related financial transaction" as: any transaction involving (A) the sale, lease, purchase, investment in or exchange of real property, including interests in property, or the financing thereof; (B) the refinancing of real property or interests in real property; and the use of real property or interests in real property as security for a loan or investment, including mortgage-backed securities.

Title XI of FIRREA also directs the OTS to issue regulations requiring "that *real estate appraisals* be performed in accordance with generally accepted appraisal standards promulgated by the Appraisal Standards Board of the Appraisal Foundation." (Emphasis supplied.) The Appraisal Foundation's standards, the Uniform Standards of Professional Appraisal Practice ("USPAP"), have separate definitions for real property ("the interest, benefits, and rights inherent in the ownership of real estate") and real estate ("an identified parcel or tract of land, including improvements, if any"). USPAP also recognizes that the terms are used interchangeably in some jurisdictions.

In its appraisal rule, the OTS used "real property" and "real estate" interchangeably to mean interests in an identified parcel or tract of land and improvements. However, the OTS did not intend these terms to include mineral rights, timber rights, or growing crops, since valuation of such interests generally requires the services of a professional other than an appraiser. The proposed amendment makes the OTS's intent clear by defining "real property" and "real estate" for purposes of the appraisal regulation as "an identified parcel or tract of land and any improvements, and includes easements, rights of way, undivided or future interests and similar rights in a tract of land, but excludes mineral rights, timber rights, or growing crops."

D. Public Comment

Public comment is solicited on all aspects of this proposed rule. In conjunction with the comments on the proposal to increase the *de minimis* threshold to $100,000, the OTS also requests financial institutions commenting on the regulation to determine or estimate:

(I) The total assets of the institution;

(II) The number and total dollar amount of real estate related loans held by the institution and losses experienced within the last 12-month period for all real estate secured loans, for real estate secured loans above $100,000, for all real estate secured loans of $50,001 to $100,000, and all real estate secured loans of $50,000 or below; and

(III) The cost and time necessary to obtain a residential and/or commercial appraisal (A) before August 23, 1990, (B) on or after August 23, 1990, and (C) after regulated institutions are required to use either licensed or certified appraisers for all federally related transactions.

All commenters are advised that, pursuant to the Administrative Procedure Act, all information provided to the OTS will be available for public inspection. To assist the OTS in compiling and analyzing the comments, the OTS requests that commenters supply the above described information in the format set forth above. All comments, however, are voluntary and no individual or institution is required to provide any of the information requested above, nor must the information be provided in the format outlined above.

All comments provided to the OTS regarding this proposed rule will be available to the public as part of the public file of the rulemaking.

Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, the OTS certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

The Director of OTS has determined that this proposal does not constitute a "major rule" within the meaning of Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required.

Paperwork Reduction Act

When this regulation was adopted in August 1990, the information collection requirements in 12 CFR part 564 were approved by the Office of Management and Budget under control number 1550–0054 in accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. 3504(h). At that time, the annual reporting burden for part 564 was estimated at 298,091 hours.

The changes proposed in this notice of proposed rulemaking, would, if adopted as a final rule, reduce this burden by approximately 126,491 hours to a total of 171,600 burden hours.[6] The OTS estimates that 2200 thrifts would maintain records, with an estimated average annual recordkeeping burden of 78 hours.

The average burden will be approximately 21 minutes per federally related transaction. Depending on the type of property appraised, the actual burden per transaction is estimated to range from approximately two hours for a large, complex commercial real estate loan appraisal to approximately fifteen minutes or less for an appraisal of a loan secured by a single family residence. Large thrifts, by their nature, will make more large commercial loans.

The information collection requirements in part 564 are intended to protect federal financial and public policy interests in real estate-related financial transactions requiring the services of an appraiser. Thrifts will use this information in determining whether and on what terms to enter into federally related transactions, such as making loans secured by real estate or selling foreclosed real estate collateral. The OTS will use this information in its examination of thrifts to ensure that thrifts undertake real estate related financial transactions in accordance with principles of safety and soundness. The likely recordkeepers are for-profit institutions.

Comments on the collections of information contained in this notice of proposed rulemaking should be directed to the Office of Management and Budget, Paperwork Reduction Project (1550), Washington, DC 20503 with copies to the Office of Thrift Supervision, 1700 G Street NW., Washington, DC 20552.

Total Burden if the Rule is Adopted as Proposed

2200 recordkeepers × 78 hours = 171,600 total burden hours.

List of Subjects in 12 CFR Part 564

Appraisals, Real estate appraisal, Reporting and recordkeeping requirements, Savings associations.

Authority and Issuance

For the reasons set forth in the preamble, The Office of Thrift Supervision hereby proposes to amend part 564, subchapter D, Chapter V, title 12 of the Code of Federal Regulations, as follows:

PART 564—APPRAISALS

1. The authority citation for part 564 continues to read as follows:

Authority: Title XI, Pub. L. No. 101–73, 103 Stat. 511 (1989) (12 U.S.C. 3301 *et seq.*); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 3 as added by sec. 301, 103 Stat. 278 (12 U.S.C. 1462a); sec. 4, as added by sec. 301, 103 Stat. 280 (12 U.S.C. 1463); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 18(m), 64 Stat. 873, as added by sec. 221, 103 Stat. 267 (12 U.S.C. 1828(m)).

2. Section 564.2 is amended by redesignating paragraphs (g) through (k) as paragraphs (h) through (l),

[6] The decrease in the number of savings associations also contributed to this reduction in burden hours.

respectively, and by adding a new paragraph (g) to read as follows:

§ 564.2 Definitions.

* * * * *

(g) *Real estate* or *real property* means an identified parcel or tract of land and improvements, and includes easements, rights of way, undivided or future interests and similar rights in a tract of land, but excludes mineral rights, timber rights, and growing crops.

* * * * *

3. Section 564.3 is amended by republishing the introductory text to paragraph (a) and revising paragraph (a)(1) to read as follows:

§ 564.3 Appraisals not required; transactions requiring a State certified or licensed appraiser.

(a) *Appraisals not required.* While supervisory guidelines, general financial institution operating practices, or other prudent standards require an appropriate valuation of real property collateral, an appraisal performed in accordance with this part is not required for any real estate-related financial transaction in which:

(1) The transaction value is $100,000 or less;

* * * * *

Dated: October 18, 1991.

By the Office of Thrift Supervision.

Timothy Ryan,

Director.

12 CFR Part 567

[No. 91–721]

RIN 1550–AA40

Regulatory Capital: Residential Bridge Loans

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of Thrift Supervision ("OTS") proposes to amend its risk-based capital regulation to include in the 50 percent risk-weight category certain construction loans made in accordance with sound lending principles to builders to construct pre-sold homes. The homes must be sold under firm contracts to purchasers who have obtained firm commitments for permanent qualifying mortgages and have made substantial earnest money deposits. This regulatory amendment will help to ensure that credit is available for credit-worthy builders to construct homes for individuals who have made substantial financial commitments to such projects.

DATES: Comments must be received on or before January 30, 1992.

ADDRESSES: Send comments to Director, Information Services, Communications, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552. Comments will be available for public inspection at 1776 G Street, NW., Street Level.

FOR FURTHER INFORMATION CONTACT: John F. Connolly, Program Manager, Capital Policy, (202) 906–6465, Supervision Policy, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: The Office of Thrift Supervision ("OTS") is today proposing to amend its capital rule, 12 CFR part 567, by placing certain conservatively underwritten residential construction in the 50 percent risk-weight category. To qualify for the 50 percent risk-weight category, the loans must satisfy designated prudential criteria in addition to generally applicable conservative underwriting standards. These loans must be made in accordance with sound lending principles to builders with substantial project equity for the construction of pre-sold homes. The homes must be sold under firm contracts to purchasers who have obtained firm commitments for permanent qualifying mortgages and have made substantial earnest money deposits ("residential bridge loans").

These loans would be placed in the 50 percent risk-weight category for use in computing associations' risk-based capital requirements. Such loans are currently in the 100 percent risk-weight category. The risk characteristics of loans satisfying these criteria warrant their placement in the 50 percent category.

Qualifying loans by national banks and savings associations to individuals to fund construction of their own homes are already included in the 50 percent category under the risk-based capital rules of the Office of the Comptroller of the Currency ("OCC") and the OTS. The proposed amendment would give parallel treatment to qualifying residential bridge loans made directly to builders for the construction of individuals' homes. The other federal banking agencies are considering adoption of similar capital treatment for these types of loans.

The development of this OTS regulatory proposal preceded, is independent of, and would not implement the statutory provisions relating to certain pre-sold, single-family

VOL 56 ISS 251 DEC 31 1991 UMI

construction loans and multifamily housing loans set forth in Section 618 of the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991. H.R. 3435, 102nd Cong., 1st Sess., 137 Cong. Rec. H11851–52.

Supervisory Experience

In general, supervisory experience and available data suggest that single-family residential construction loans result in significantly less losses than either acquisition and development loans for residential property or construction loans for multifamily and commercial real estate. Furthermore, our supervisory experience generally indicates that most losses incurred on residential construction would be avoided by compliance with the criteria for residential bridge loans set forth in this proposal.

The charge-off data for residential construction lending from the Thrift Financial Reports for the six quarters ended March 1990 through June 1991 shows that thrifts involved in 1–4 family residential construction lending suffered charge-offs on such lending of 0.60 percent of their holdings. This compares with charge-offs for multifamily construction lending of 1.62% and non-residential construction lending of 2.7%.

In addition, single-family construction lending that has experienced the 0.60% charge-off rate is a much broader category of lending than we propose to make eligible for the lower risk-weight category. In addition to qualifying residential bridge loans, 1–4 family residential construction loans include much riskier types of lending—large tract construction, speculative construction, and some land development loans. As a result, although we do not collect data in sufficient detail to distinguish between these categories, we expect the charge-off rates for residential bridge loans to be significantly below the 0.60% rate for the broader category.

Our supervisory experience also indicates, as a general matter, that residential construction lending entails significantly lower risk than commercial lending. Furthermore, genuinely pre-sold residential construction is safer than speculative and tract development lending. Residential construction loans meeting strict underwriting criteria, as being proposed, are the safest type of residential construction lending.

Our experience also reflects that the building of tract developments under the pre-sold arrangements common in the industry (small amount of earnest money held by the builders; many contract contingencies) does not provide any loss protection over other types of residential construction loans. The criteria that would be imposed on residential bridge loans under this proposal are designed to ensure that purchasers have entered into firm contracts for the purchase of their homes and made substantial earnest money deposits.

Accordingly, based on our experience and available loss, data, we believe that imposing a 4 percent risk-based capital requirement on residential bridge loans meeting the criteria below would create an ample capital cushion to protect associations from losses on these loans.

Residential Bridge Loan Proposal

Amend the OTS capital regulation to permit associations to place residential bridge loans in the 50 percent risk-weight category if such loans meet the following criteria:

- The builder has significant equity in the construction project before any drawdown is to be made under the construction loan.
- The home buyer has entered into a firm contract to purchase the home;
- The home buyer has made a substantial "earnest money" deposit that would be lost if the buyer caused the contract not to be consummated;
- The home buyer has obtained a firm commitment for a permanent qualifying mortgage loan; and
- The loans are made in accordance with other more broadly applicable sound lending principles.

Under these standards, both the builder and home purchaser would have substantial equity at risk that would be lost by failing to fulfill their obligations. We currently are contemplating defining significant builder equity to require builders to have project equity (e.g., the market value of builder-owned property on which the residence will be constructed, the incurred cost of improvements and other expenditures not funded from the loan) of at least 25 percent of the projected value of the residence. We also are planning to define the requirement for a "substantial earnest money deposit" by a purchaser as requiring earnest money of at least 5 percent of the approved loan. In addition to requesting comment on the entire proposal, we specifically solicit comment on these builder equity and purchaser earnest money standards. One of the points on which we specifically seek comment is the most appropriate way to define and compute a builder's project equity.

We believe that compliance with the specific criteria above, along with requiring sound underwriting practices, will ensure that qualifying residential bridge loans pose significantly less risk to thrifts than other types of construction loans and, therefore, warrant inclusion in the 50 percent risk-weight category.

Broader Prudential Principles Applicable to Residential Construction Lending

The rule's requirement that residential bridge loans be made "in accordance with sound lending principles" encompasses the requirement that such associations comply with the following principles. Moreover, associations will be responsible for demonstrating compliance with these lending principles to the OTS examination staff. Failure to do so will cause the loans involved to be placed into the 100 percent risk-weight category.

Those additional criteria for compliance are:

- The underlying lot is validly platted and bonded by the appropriate municipal regulatory authorities based on a determination that the development is permissible and that necessary infrastructure improvements (appropriate for a given project stage) have been substantially completed;
- The lot, the house under construction and other improvements on the lot must serve as collateral for the construction loan; and
- Disbursement of loan funds under the construction loan by the thrift is to be made to the builder in accordance with a reasonable construction budget and reasonable percentage-of-completion schedule.

Associations must also incorporate other fundamental lending principles into their loan underwriting decisions. Associations must be able to demonstrate compliance with the associations' concentration/exposure limits, market area knowledge, satisfactory payment and performance records of the builders, and sufficient reserves and cashflow available to the builders.

Regulatory Flexibility Act

Pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 605(b), it is hereby certified that this proposal will not have a significant or disproportionate economic impact on a substantial number of small savings associations. Furthermore, this proposed rule would not impose any new recordkeeping or other requirements on any associations and would lower the current risk-weighting of residential bridge loans from 100 percent to 500 percent. Accordingly, a Regulatory Flexibility Act analysis is not required.

Executive Order 12291

The Director of the OTS has determined that this proposed regulation does not meet any of the conditions set forth in Executive Order 12291 for designation as a major rule. This proposed rule does not impose any new or increased requirements and solely reduces the capital required to be held against residential bridge loans in computing associations' risk-based capital requirements. Consequently, a Regulatory Impact Analysis has not been prepared.

List of Subjects in 12 CFR Part 567

Capital, Reporting and recordkeeping requirements, Savings associations.

Accordingly, the Office of Thrift Supervision hereby proposes to amend part 567, chapter V, title 12, Code of Federal Regulations, as set forth below.

Subchapter D—Regulations Applicable to All Savings Associations

1. The authority for part 567 continues to read as follows:

Authority: Sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 3, as added by sec. 301, 103 Stat. 278 (12 U.S.C. 1462a); sec. 4, as added by sec. 301, 103 Stat. 280 (12 U.S.C. 1463); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 10, as added by sec. 301, 103 Stat. 318 (12 U.S.C. 1467a).

2. Section 567.6 is amended by adding a new paragraph (a)(1)(iii)(D) to read as follows:

§ 567.6 Risk-based capital credit risk weight categories.

(a) *Risk-weighted Assets.* * * *

(1) *On-Balance Sheet Assets.* * * *

(iii) *50 percent Risk Weight (Category 3).* * * *

* * * * *

(D) Loans made in accordance with sound lending principles to builders with substantial project equity for the construction of single family residences that have been pre-sold under firm contracts to purchasers who have obtained firm commitments for permanent qualifying mortgage loans and have made substantial "earnest money" deposits.

* * * * *

Dated: December 17, 1991.
By the Office of Thrift Supervision.

David Kelso,

Associate Director for RTC Operations.

Abatements, Credits, and Refunds—Special Rules for Insolvent Financial Institution That Is or Was Member of Consolidated Group

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: The Internal Revenue Service is issuing temporary regulations in the Rules and Regulations section of this issue of the **Federal Register** to implement amendments to the Internal Revenue Code made by the Technical and Miscellaneous Revenue Act of 1988. These temporary regulations provide for the payment of income tax refunds in certain situations to a statutory or court-appointed fiduciary of an insolvent financial institution that was a member of the consolidated group in the year to which the refund claim relates (instead of payment to the common parent of the consolidated group). The text of the temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments must be received by March 2, 1992. Requests to speak (with outlines of oral comments) at a public hearing scheduled on March 24, 1992, beginning at 10 a.m., must be received by March 10, 1992. See notice of hearing on these proposed regulations published elsewhere in this issue of the **Federal Register**.

ADDRESSES: Send comments and requests to speak (with outlines of oral comments) at the public hearing to: Internal Revenue Service, ATTN: CC:CORP:T:R [CO–98–88], room 5228, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Concerning the hearing, Carol Savage, Regulations Unit, at (202) 377–9236 (not a toll-free number); concerning regulations, Rose L. Williams at (202) 566–3231 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The regulations published in the Rules and Regulations section of this issue of the **Federal Register** add new § 301.6402–7T to part 301 of title 26 of the Code of Federal Regulations ("CFR") and make amendments to §§ 1.1502–77(e), 1.1502–78(b), and 1.6411–4. The final regulations that are proposed to be based on the temporary regulations would be added to part 301 of title 26 of the CFR. The final regulations would provide guidance for determining when a statutory or court-appointed fiduciary can receive payment of a refund from the Internal Revenue Service. For the text of the new temporary regulations, see T.D. 8387, published in the Rules and Regulations section of this issue of the **Federal Register**. The preamble to the temporary regulations explains the proposed regulations.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

It is hereby certified that these rules will not have a significant economic impact on a substantial number of small entities. The rules will primarily affect affiliated groups of corporations filing (or required to file) consolidated returns, which tend not to be small businesses. The rules will not significantly alter the reporting or recordkeeping duties of small entities. An initial Regulatory Flexibility Analysis is not required.

Pursuant to section 7805(f)(1) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests to Appear at the Public Hearing

Before adopting these proposed regulations as final regulations, consideration will be given to any written comments that are timely submitted (preferably a signed original and nine copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be held on March 24, 1992, beginning at 10 a.m., in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Ave., NW., Washington, DC. Comments must be received by March 2, 1992. Requests to speak (with outlines of oral comments) at the public hearing must be received by March 10, 1992. See notice of hearing published elsewhere in this issue of the **Federal Register**.

Drafting Information

The principal author of these regulations is Rose L. Williams, Office of the Assistant Chief Counsel (Corporate), Internal Revenue Service. Other

personnel from the Internal Revenue Service and the Treasury Department participated in their development.

Proposal of Regulations

The temporary regulations (T.D. 8367), published in the Rules and Regulations section of this issue of the Federal Register, are hereby also proposed as final regulations under section 6402(i) of the Internal Revenue Code of 1986

Michael J. Murphy,

Acting Commissioner of Internal Revenue.

Abatements, Credits, and Refunds—Special Rules for an Insolvent Financial Institution That Is or Was a Member of a Consolidated Group; Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of public hearing on proposed regulations relating to the payment of income tax refunds in certain situations to a statutory or court-appointed fiduciary of an insolvent financial institution that was a member of a consolidated group in the year to which the refund claim relates (instead of payment to the common parent of the consolidated group).

DATES: The public hearing will be held on Tuesday, March 24, 1992, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Tuesday, March 10, 1992.

ADDRESSES: The public hearing will be held in the Internal Revenue Service Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Service Building, 1111 Constitution Avenue, NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC: CORP:T:R, (CO-98-88), room 5228, Washington, D 20044.

FOR FURTHER INFORMATION CONTACT: Carol Savage of the Regulations Unit, Assistant Chief Counsel (Corporate), 202-377-9236 or (202) 566-3935 (not toll-free numbers).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 1502, 6402(i) and 6411(c) of the Internal Revenue Code. The proposed regulations appear elsewhere in this issue of the Federal Register.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Tuesday, March 10, 1992, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be permitted beyond the lobby of the Internal Revenue Service Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

RIN 1545-AN92

Certain Publicly Traded Partnerships Treated as Corporations—Transition Provisions

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document sets out a notice of proposed rulemaking describing when a publicly traded partnership adds a "substantial new line of business," thus forfeiting the partnership status preserved for "existing partnerships" by the transition rule applicable to section 7704 of the Internal Revenue Code of 1986. Section 10211 of the Revenue Act of 1987 added section 7704 of the Internal Revenue Code. These regulations would provide the public with guidance needed to comply with the transition rules of section 7704.

DATES: Comments and requests to speak at the public hearing scheduled for February 24, 1992, and outlines of oral comments must be received by February 10, 1992. See notice of hearing published elsewhere in this issue of the Federal Register.

ADDRESSES: Send comments, requests to speak, and outlines of oral comments to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044 (Attention: CC:CORP:T:R; (PS-56-89), room 5228).

FOR FURTHER INFORMATION CONTACT: Ann Veninga at 202-566-4751 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Section 10211 of the Revenue Act of 1987, Pub. L. No. 100-203, 101 Stat. 1330-382, 1330-403 *et seq.* (the 1987 Act), added section 7704 to the Internal Revenue Code. Section 7704 generally treats publicly traded partnerships as corporations for Federal tax purposes and is generally effective for taxable years beginning after December 31, 1987. Section 10211(c)(2) of the 1987 Act, however, exempts "existing partnerships" from the effect of section 7704 until partnership taxable years beginning after December 31, 1997.

Under section 10211(c)(2)(B) of the 1987 Act, a partnership otherwise qualifying as an existing partnership will cease to be an existing partnership as of the first day after December 17, 1987, on which there has been an addition of a "substantial new line of business" with respect to the partnership. Notice 88-75, 1988-2 C.B. 386, addressed this provision in part. These proposed regulations define "existing partnership," "substantial," and "new line of business." The Internal Revenue Service invites requests for rulings on the question of when a new activity is a "new line of business."

Section 7704 and the rules under Notice 88-75 generally apply to taxable years beginning after December 31, 1987. The regulations are proposed to be effective for taxable years beginning after December 31, 1991, and no inference is intended concerning the interpretation of section 10211(c)(2) prior to the effective date of these regulations. However, taxpayers may rely on these regulations prior to the effective date.

Special Analyses

These proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests To Appear at the Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are timely submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing is scheduled for February 24, 1992. See notice of public hearing published elsewhere in this issue of the Federal Register.

Drafting Information

The principal author of these proposed regulations is Ann Veninga, Office of the Assistant Chief Counsel (Passthroughs and Special Industries), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

List of Subjects

Administrative practice and procedure, Alimony, Bankruptcy, Child support, Continental shelf, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, Taxes.

Proposed Amendments to the Regulations

Accordingly, title 26, chapter 1, parts 1 and 301 are proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 continues to read in part:

Authority: Sec. 7805, 68A Stat. 917; sec. 26 U.S.C. 7805 * * *

Par. 2. A new § 1.7704-2 is added to read as follows:

§ 1.7704-2 Transition provisions.

(a) *Transition rule*—(1) *Statutory dates.* Section 7704 generally applies to taxable years beginning after December 31, 1987. In the case of an existing partnership, however, section 7704 and the regulations thereunder apply to taxable years beginning after December 31, 1997.

(2) *Effective date of regulations.* These regulations apply to taxable years beginning after December 31, 1991.

(b) *Existing partnership*—(1) *In general.*—For purposes of § 1.7704-2, the term "existing partnership" means any partnership if—

(i) The partnership was a publicly traded partnership (within the meaning of section 7704(b)) on December 17, 1987;

(ii) A registration statement indicating that the partnership was to be a publicly traded partnership was filed with the Securities and Exchange Commission (SEC) with respect to the partnership on or before December 17, 1987; or

(iii) With respect to the partnership, an application was filed with a state regulatory commission on or before December 17, 1987, seeking permission to restructure a portion of a corporation as a publicly traded partnership.

(2) *Changed status of an existing partnership.* A partnership will not qualify as an existing partnership after a new line of business is substantial.

(c) *Substantial.* A new line of business is substantial as of the earlier of—

(1) The taxable year in which the partnership derives more than 15 percent of its gross income from that line of business; or

(2) The taxable year in which the partnership directly uses in that line of business more than 15 percent (by value) of its total assets.

If a substantial new line of business is added during the taxable year (*e.g.*, by acquisition), the line of business is treated as substantial as of the date it is added; otherwise a substantial new line of business is treated as substantial as of the first day of the taxable year in which it becomes substantial.

(d) *New Line of Business*—(1) *In general.* A new line of business is any business activity of the partnership not closely related to a pre-existing business of the partnership to the extent that the activity generates income other than "qualifying income" within the meaning of section 7704 of the regulations thereunder.

(2) *Pre-existing business.* A business activity is a pre-existing business of the partnership if—

(i) The partnership was actively engaged in the activity on or before December 17, 1987; or

(ii) The partnership is actively engaged in the business activity that was specifically described as a proposed business activity of the partnership in a registration statement or amendment thereto filed on behalf of the partnership with the SEC on or before December 17, 1987. For this purpose, a specific description does not include a general grant of authority to conduct any business.

(3) *Closely related.* All of the facts and circumstances will determine whether a new business activity is closely related to a pre-existing business of the partnership. The following factors, among others, will help to establish that a new business activity is closely related to a pre-existing business of the partnership and therefore is not a new line of business:

(i) The activity provides products or services very similar to the products or services provided by the pre-existing business.

(ii) The activity markets products and services to the same class of customers as that of the pre-existing business.

(iii) The activity is of a type that is normally conducted in the same business location as the pre-existing business.

(iv) The activity requires the use of similar operating assets as those used in the pre-existing business.

(v) The activity's economic success depends on the success of the pre-existing business.

(vi) The activity is of a type that would normally be treated as a unit with the pre-existing business in the business' accounting records.

(vii) If the activity and the pre-existing business are regulated or licensed, they are regulated or licensed by the same or similar governmental authority.

(viii) The United States Bureau of the Census assigns the activity the same

VOL
56
ISS
251
DE
31
1991
UMI

four-digit Industry Number Standard Identification Code ("Industry SIC Code") as the pre-existing business. Such Codes are set forth in the Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, prepared, and from time to time revised, by the Statistical Policy Division of the United States Office of Management and Budget. For example, if a partnership's pre-existing business is manufacturing steam turbines and then the partnership begins an activity manufacturing hydraulic turbines, both activities would be assigned the same Industry SIC Code, 3511—Steam, Gas, and Hydraulic Turbines, and Turbine Generator Set Units. In the case of a pre-existing business or activity that is listed under the Industry SIC Code, 9999—Nonclassifiable Establishments—or under a miscellaneous category (e.g., most Industry SIC Codes ending in a "9" are miscellaneous categories), the similarity of the SIC Codes is ignored as a factor in determining whether the activity is closely related to the pre-existing business. The dissimilarity of the SIC Codes is considered in determining whether the business activity is closely related to the pre-existing line of business.

(e) *Activities conducted through other entities*—(1) *Controlled corporations*—(i) *In general.* An activity conducted by a corporation controlled by an existing partnership is not deemed to be an activity of the partnership for purposes of paragraph (d) of this section (determination of whether an existing partnership has added a new line of business) if no more than 10% of the gross income that the partnership derives from the corporation during the taxable year is section 7704(d) qualifying income that is recharacterized as nonqualifying income under paragraph (e)(1)(iii) of this section.

(ii) *Control.* Control of a corporation is determined under the rules of section 304(c).

(iii) *Recharacterization of qualifying income*—(A) *In general.* Gross income received by a partnership from a controlled corporation that would be qualifying income under section 7704(d) is subject to recharacterization as nonqualifying income if the amount is deductible in computing the income of the controlled corporation.

(B) *Extent of recharacterization.* The amount of income described in paragraph (e)(1)(iii)(A) of this section that is recharacterized as nonqualifying income is:

(*1*) The amount described in paragraph (e)(1)(iii) of this section, multiplied by

(*2*) The controlled corporation's taxable income that would not be qualifying income within the meaning of section 7704(d) if earned directly by the partnership, divided by

(*3*) The controlled corporation's taxable income.

For purposes of paragraph (e)(1)(iii)(B)(*2*) and (*3*) of this section, a corporation's taxable income is determined without regard to deductions for amounts paid to the partnership.

(2) *Tiered partnerships.* An activity conducted by a partnership in which an existing partnership holds an interest (directly or through another partnership) will be considered an activity of the existing partnership.

(3) *Example.* The following example illustrates the application of this paragraph (e):

Example. (i) PTP, an existing partnership, acquired all the stock of X corporation on January 1, 1993. During PTP's 1993 taxable year it received $185,000 of dividends and $15,000 of interest from X. Determined without regard to interest paid to PTP, X's taxable income during that period was $500,000 none of which was "qualifying income" within the meaning of section 7704 and the regulations thereunder. In computing the income of X, the $15,000 of interest paid to PTP is deductible.

(ii) Under paragraph (e)(1)(iii) of this section, all $15,000 of PTP's interest income was nonqualifying income ($15,000 × 500,000/500,000). Under paragraph (e)(1)(i) of this section, however, the activities of X will not be considered to be activities of PTP for the 1993 taxable year because no more than 10 percent of the gross income that PTP derived from X would be treated as other than qualifying income (15,000/200,000=7.5%).

(f) *Exceptions*—(1) *Coordination with gross income requirements of section 7704(c)(2).* A partnership that is either an existing partnership as of December 31, 1997, or an existing partnership that ceases to qualify as an existing partnership is subject to section 7704 and the regulations thereunder. Section 7704(a) does not apply to these partnerships, however, if these partnerships meet the gross income requirements of paragraphs (c) (1) and (2) of section 7704. For purposes of applying section 7704(c) (1) and (2) to these partnerships, the only taxable years that must be tested are those beginning on and after the earlier of—

(i) January 1, 1998; or

(ii) The day on which the partnership ceases to qualify as an existing partnership because of the addition of a new line of business; or

(iii) The first day of the first taxable year in which a new line of business becomes substantial (if the new line of business becomes substantial after the year in which it is added).

(2) *Specific exceptions.* In determining whether a partnership is an existing partnership for purposes of section 7704, the following events do not in themselves terminate the status of existing partnerships—

(i) Termination of the partnership under section 708(b)(1)(B) due to the sale or exchange of 50 percent or more of the total interests in partnership capital and profits;

(ii) Issuance of additional partnership units; and

(iii) Dropping a line of business. This event, however, could affect an existing partnership's status indirectly. For example, dropping one line of business could change the composition of the partnership's gross income. The change in composition could make a new line of business "substantial," under paragraph (c) of this section, and terminate the partnership's status. See paragraph (b)(2) of this section.

(g) *Examples.* The following examples illustrate the application of this section:

Example 1. (i) On December 17, 1987, PTP, a calendar-year publicly traded partnership, owned and operated citrus groves. On March 1, 1993, PTP purchased a processing business involving frozen citrus products. In the partnership's 1993 taxable year, the partnerships directly used in the processing business more than 15 percent (by value) of its total assets.

(ii) The citrus grove activities provide different products from the processing activities, are marketed to customers different from the customers of the processing activities, require different types of operating assets, are not commonly conducted at the same location, are not commonly treated as a unit in accounting records, do not depend upon one another for economic success, and do not have the same Industry SIC Code. Under the facts and circumstances, the processing business is not closely related to the citrus grove operation and is a new line of business under paragraph (d)(1) of this section.

(iii) The assets of the partnership used in the new line of business are substantial under paragraph (c)(2). Because PTP added a substantial new line of business after December 17, 1987, paragraph (b)(2) of this section terminates PTP's status as an existing partnership on March 1, 1993.

Example 2. (i) On December 17, 1987, PTP, a calendar-year publicly traded partnership, owned and operated retirement centers that serve the elderly. Each center contains three sections:

(1) a residential section, which includes suites of rooms, dining facilities, lounges, and gamerooms;

(2) an assisted-living section, which provides laundry and housekeeping services, health monitoring, and emergency care; and

(3) a nursing section, which provides private and semiprivate rooms, dining facilities, examination and treatment rooms, drugs, medical equipment, and physical, speech, and occupational therapy.

The business activities of each section constitute preexisting businesses of PTP under paragraph (d)(2) of this section, because PTP was actively engaged in the activities on or before December 17, 1987.

(ii) The nursing sections primarily furnish health care. They employ nurses and therapists, are subject to federal, state, and local licensing requirements, and may charge certain costs to government programs like Medicare and Medicaid.

(iii) In 1993, PTP acquired new nursing homes that treat inpatient adults of all ages. The nursing homes provide private and semiprivate rooms, dining facilities, examination and treatment rooms, drugs, medical equipment, and physical, speech, and occupational therapy. The nursing homes primarily furnish health care. They employ nurses and therapists, are subject to federal, state, and local licensing requirements, and may charge certain costs to government programs like Medicare and Medicaid.

(iv) PTP's new nursing homes and old nursing sections provide very similar services, market to very similar customers, use similar types of property and personnel, and are licensed by the same regulatory agencies. The nursing homes and old nursing sections have the same Industry SIC Code. Under these facts and circumstances, the new nursing homes are closely related to a pre-existing business of the partnership. Accordingly, under paragraph (d)(1) of this section, the acquisition of the new nursing homes is not the addition of a new line of business.

(v) PTP was a publicly traded partnership on December 17, 1987, and was an existing partnership under paragraph (b)(1)(i) of this section. Because PTP has added no substantial new line of business after December 17, 1987, paragraph (b)(2) of this section does not terminate PTP's status as an existing partnership.

Example 3. (i) On December 17, 1987, PTP, a calendar-year publicly traded partnership, owned and operated cable television systems in the northeastern United States. PTP's registration statement described as its proposed business activities the ownership and operation of cable television systems, any ancillary operations, and any business permitted by the laws of the state in which PTP was formed.

(ii) PTP's cable systems include cables strung along telephone lines, converter boxes in subscribers' homes, other types of cable equipment, satellite dishes that receive programs broadcast by various television networks, and channels that carry public service announcements of local interest. Subscribers pay the systems a fee for the right to receive both the local announcements and the network signals relayed through the cables. Those fees constitute PTP's primary revenue. The systems operate under franchise agreements negotiated with each municipality in which they do business.

(iii) On September 1, 1993, PTP purchased a television station in the northwestern United States. The station owns broadcasting facilities, satellite dishes that receive programs broadcast by the station's network, and a studio that produces programs of interest to the area that receives the station's broadcasts. Fees from advertisers constitute the station's primary revenue. The station operates under a license from the Federal Communications Commission.

(iv) In the partnership's 1993 taxable year, the station generated less than 15 percent of PTP's gross income and constituted less than 15 percent of its total assets (by value). In PTP's 1994 taxable year, the station generated more than 15 percent of PTP's gross income.

(v) The cable systems relay signals through cables to subscribers and earn revenue from subscriber fees; the station broadcasts signals to the general public and earns revenue by selling air time for commercials. Despite certain similarities, the two types of activities generally require different operating assets and earn income from different sources. They are regulated by different agencies. They are not commonly conducted at the same location and do not generally depend upon one another for their economic success. They have different Industry SIC Codes. Under the facts and circumstances, the television station activities are not closely related to PTP's pre-existing business, the cable system activities.

(vi) As of December 17, 1987, PTP did not own and operate any television station. PTP's registration statement specifically described as its proposed business activities only the ownership and operation of cable television systems and any ancillary operations. For purposes of paragraph (d)(2) of this section, a specific description does not include PTP's general authority to carry on any business permitted by the state of its formation. Therefore, the television station line of business was not specifically described as a proposed business activity of PTP in its registration statement. PTP's acquisition of the television station business activity constitutes a new line of business under paragraph (d)(1) of this section.

(vii) PTP was a publicly traded partnership on December 17, 1987, and was an existing partnership under paragraph (b)(1)(i) of this section. PTP added a new line of business in 1993, but that line of business was not substantial under paragraph (c) of this section, and thus PTP remained an existing partnership for its 1993 taxable year. In 1994, the new line of business became substantial because it generated more than 15 percent of PTP's gross income. Paragraph (b)(2) of this section therefore terminates PTP's existing partnership status as of January 1, 1994, the first day of the first taxable year beginning after December 17, 1987, in which PTP's new line of business became substantial.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 3. The authority for part 301 continues to read in part:

Authority: Sec. 7805, I.R.C. 1954; 68A Stat. 917; 26 U.S.C. 7805 * * *

Par. 4. A new § 301.7704–2 is added under the heading "Definitions" to read as follows:

§ 301.7704–2 Transition provisions.

See the regulations under section 7704 contained in part 1 of this chapter for a definition of the "substantial new line of business" that an "existing" publicly traded partnership cannot enter without forfeiting its partnership status under the transition provisions applicable to section 7704.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

[PS–56–89]

RIN 1545–AN92

Certain Publicly Traded Partnerships Treated as Corporations—Transaction Provisions; Public Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing relating to a description of when a publicly traded partnership adds a "substantial new line of business," thus forfeiting the partnership stats preserved for "existing partnerships" by the transaction rule applicable to section 7704 of the Internal Revenue Code of 1986.

DATES: The public hearing will be held on Monday, February 24, 1991, beginning at 10 a.m. Outlines of oral comments must be received by Monday, February 10, 1991.

ADDRESSES: The public hearing will be held in the Commissioner's Conference Room, room 3313, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Requests to speak and outline of oral comments should be submitted to the Commissioner of Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (PS–56–89), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Felicia A. Daniels of the Regulations Unit, Assistant Chief Counsel (Corporate), 202–566–3935, (not a toll-free number).

VOL
56

1991
UMI

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 7704 of the Internal Revenue Code. The proposed regulations appear in the proposed rules section of this issue of the **Federal Register**.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Monday, February 10, 1991, an outline of oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be permitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By the direction of the Commissioner of the Internal Revenue.

Dale D. Goode

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

Kentucky Permanent Regulatory Program; Kentucky's Small Operator Assistance Program (SOAP) and Assistance Application

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; reopening and extension of comment period on proposed amendment.

SUMMARY: OSM is announcing the receipt of revisions to a previously proposed program amendment to the Kentucky permanent regulatory program (hereinafter referred to as the Kentucky program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). By a letter dated December 5, 1991 (Administrative Record No. KY-1085), Kentucky submitted additional information to both support and modify its proposed amendment dated June 28, 1991 (Administrative Record No. KY-1059) which was published in the **Federal Register** of July 22, 1991, as it relates to Kentucky Administrative Regulations (KAR) at 405 KAR 7:080 Small Operator Assistance.

This notice sets forth the times and locations that the Kentucky program and the proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will be followed regarding a public hearing, if one is requested.

DATES: Written comments must be received on or before 4 p.m. on January 15, 1992. If requested, a public hearing on the proposed amendment will be held at 10 a.m. on January 10, 1992. Requests to present oral testimony at the hearing must be received on or before 4 p.m. on January 6, 1992.

ADDRESSES: Written comments and requests for a hearing should be mailed or hand delivered to: William J. Kovacic, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 340 Legion Drive, suite 28, Lexington, Kentucky 40504. Copies of the Kentucky program, the proposed amendment, and all written comments received in response to this notice will be available for review at the addresses listed below, Monday through Friday, 9 a.m. to 4 p.m., excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendment by contacting OSM's Lexington Field Office.

Office of Surface Mining Reclamation and Enforcement, Lexington Field Office, 340 Legion Drive, suite 28, Lexington, Kentucky 40504, Telephone: (606) 233-2896.

Office of Surface Mining Reclamation and Enforcement, Eastern Support Center, Ten Parkway Center, Pittsburgh, Pennsylvania 15220, Telephone: (412) 937-2828.

Department for Surface Mining Reclamation and Enforcement, No. 2 Hudson Hollow Complex, Frankfort, Kentucky 40601, Telephone: (502) 564-6940.

If a public hearing is held, its location will be: The Harley Hotel, 2143 North Broadway, Lexington, Kentucky 40505.

FOR FURTHER INFORMATION CONTACT: William J. Kovacic, Director, Lexington Field Office, Telephone (606) 233-2896.

SUPPLEMENTARY INFORMATION:

I. Background

On May 18, 1982, the Secretary of the Interior conditionally approved the Kentucky program. Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval can be found in the May 18, 1982, **Federal Register** (47 FR 21404-21435). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 917.11, 917.15, 917.16, and 917.17.

II. Discussion of Amendment

By letter dated December 5, 1991, (Administrative Record No. KY-1085), Kentucky resubmitted a proposed program amendment which was part of a larger proposed program amendment originally submitted June 28, 1991 (Administrative Record No. KY-1059) (56 FR 33398, July 22, 1991). This resubmission identifies and incorporates Kentucky's Small Operator application forms that have been revised to capture information required by the State's recently proposed small operator assistance regulation modifications. In addition, Kentucky's Statement of Consideration relating to the proposed regulation 405 KAR 7:080 is included in the submission. Additionally, the resubmission contains some grammatical corrections for clarity and proper citation.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is now seeking comment on whether the amendment proposed by Kentucky on December 5, 1991, satisfies the applicable program approval criteria of 30 CFR 732.15. If the revised amendment is deemed adequate, it will become part of the Kentucky program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking as set forth in Kentucky's submission dated December 5, 1991, and include explanations in support of the commentor's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Lexington Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "**FOR FURTHER INFORMATION CONTACT**" by 4 p.m. on January 6, 1992. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment, and who wish to do so, will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendments may request a meeting at the OSM, Lexington Field Office listed under "**ADDRESSES**" by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings will be open to the public and, if possible, notices of meetings will be posted in advance at the locations listed under "**ADDRESSES.**" A written summary of each meeting will be made a part of the Administrative Record.

BILLING CODE 4310-05-M

30 CFR Part 935

Ohio Permanent Regulatory Program; Revision of Administrative Rule

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing the receipt of proposed Program Amendment Number 55 to the Ohio permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment was initiated by Ohio and is intended to revise one rule in the Ohio Administrative Code to authorize reclamation agreements between Ohio and coal mine operators who are in danger of bond forfeiture. The amendment would also delete a redundant provision concerning delinquent reclamation and would delete a provision terminating the rights of the permittee to reclaim all or part of a forfeited permit upon issuance of the bond forfeiture order.

This notice sets forth the times and locations that the Ohio program and proposed amendments to that program will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received on or before 4 p.m. on January 30, 1992. If requested, a public hearing on the proposed amendments will be held at 1:00 p.m. on January 27, 1992. Requests to present oral testimony at the hearing must be received on or before 4 p.m. on January 15, 1992.

ADDRESSES: Written comments and requests to testify at the hearing should be mailed or hand-delivered to Mr. Richard J. Seibel, Director, Columbus Field Office, at the address listed below. Copies of the Ohio program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requesters may receive, free of charge, one copy of the proposed amendments by contacting OSM's Columbus Field Office.

Office of Surface Mining Reclamation and Enforcement Columbus Field Office, 2242 South Hamilton Road, room 202, Columbus, Ohio 43232. Telephone: (614) 866-0578.

Ohio Department of Natural Resources, Division of Reclamation, 1855 Fountain Square Court, Building H-3 Columbus, Ohio 43224. Telephone: (614) 265-6675

FOR FURTHER INFORMATION CONTACT: Mr. Richard J. Seibel, Director, Columbus Field Office, (614) 866-0578.

SUPPLEMENTARY INFORMATION:

I. Background

On August 16, 1982, the Secretary of the Interior conditionally approved the Ohio program. Information on the general background of the Ohio program submission, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program, can be found in the August 10, 1982 **Federal Register** (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11, 935.12, 935.15, and 935.16.

II. Discussion of the Proposed Amendments

By letter dated December 11, 1991, (Administrative Record No. OH-1612), Ohio submitted proposed Program Amendment Number 55. The substantive changes proposed by Ohio in this amendment are discussed briefly below:

1. Delinquent Reclamation

Ohio Administrative Code (OAC) 1501:13-7-06 paragraphs (A) and (B)(1): Ohio is deleting paragraph (A) and is incorporating some of the deleted language in paragraph (B)(1). Revised paragraph (B)(1) would provide that a permittee will forfeit performance bond whenever the Chief of the Ohio Department of Natural Resources, Division of Reclamation (the Chief) determines that "the permittee failed to comply with a notice of violation issued for failure to complete any phase of reclamation within the time required by the mining and reclamation plan and any time extensions given for good cause."

2. Conditions Under Which Forfeiture May Be Avoided

OAC 1501:13-7-06 paragraphs (C)(1) and (2): Ohio is adding these new paragraphs to specify that performance bond forfeiture may be avoided if the permittee enters into an agreement with the Chief to perform reclamation operations in accordance with a compliance schedule which meets the conditions of the permit, the reclamation plan, and the Ohio program. The proposed amendment would allow that the permittee and the Chief may enter into such an agreement prior to the Chief's issuance of a cessation order if the reason for the forfeiture is the permittee's failure to comply with a notice of violation for noncontemporaneous reclamation.

VOL 56 ISS 251 DEC 31 1991 UMI

3. Terminating the Rights of the Permittee to Reclaim

OAC 1501:13–7–06 paragraph (D)(2)(d): Ohio is deleting this existing paragraph which provides that bond forfeiture orders issued by the Chief shall declare that the rights of the permittee to perform reclamation on the entire permit area or the incremental area, when applicable, are terminated.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is now seeking comment on whether the amendments proposed by Ohio satisfy the applicable program approval criteria of 30 CFR 732.15. If the amendments are deemed adequate, they will become part of the Ohio program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **"DATES"** or at locations other than the Columbus Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under **"FOR FURTHER INFORMATION CONTACT"** by 4 p.m. on January 15, 1992. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendments may request a meeting at the Columbus Field Office by contacting the person listed under **"FOR FURTHER INFORMATION CONTACT."** All such meeting shall be open to the public and, if possible, notices of the meetings will be posted at the locations listed under **"ADDRESSES."** A written summary of each public meeting will be made a part of the Administrative Record.

BILLING CODE 4310–05–M

30 CFR Part 950

Wyoming Abandoned Mine Land Reclamation Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed Rule; Public Comment Period and Opportunity for Public Hearing on Proposed Amendment.

SUMMARY: OSM is announcing receipt of a proposed amendment to the Wyoming Abandoned Mine Land Reclamation Program (hereinafter, the "State Reclamation Plan") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), 30 U.S.C. 1231 *et seq.* The proposed amendment is intended to change the State Reclamation Plan to conform with the new provisions of the Abandoned Mine Reclamation Act of 1990 (Pub. L. 101–508; AMRA). The proposed amendment includes: A plan narrative; program administration; legal basis for the amended program; project eligibility; public participation; analysis of program authority and policy; and the State's administrative record.

This notice sets forth the times and locations that the State Reclamation Plan and the proposed amendment to that plan are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received by 4 p.m., m.s.t. January 30, 1992. If requested, a public hearing on the proposed amendment will be held on January 27, 1992. Requests to present oral testimony at the hearing must be received by 4 p.m., m.s.t. on January 15, 1992.

ADDRESSES: Written comments should be mailed or hand delivered to Guy Padgett at the address listed below.

Copies of the State Reclamation Plan, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Casper Field Office.

Guy Padgett, Director, Casper Field Office; Office of Surface Mining Reclamation and Enforcement; 100 East B Street, room 2128; Casper, WY 82601–1918. Telephone (307) 261–5776.

Gary Beach, Program Administrator; Abandoned Mine Lands Division, Department of Environmental Quality; Herschler Building, Third Floor West; 122 West 25th Street; Cheyenne, WY 82002. Telephone (307) 777–6145.

FOR FURTHER INFORMATION CONTACT: Guy Padgett; Telephone (307) 261–5776.

SUPPLEMENTARY INFORMATION:

I. Background on the State Reclamation Plan

On February 14, 1983, the Secretary of the Interior approved the State Reclamation Plan. General background information, including the Secretary's findings, the disposition of comments, and the conditions of approval of the State Reclamation Plan can be found in the February 14, 1983 **Federal Register** (48 FR 6538).

II. Proposed Amendment

By letter dated December 16, 1991 (Administrative Record No. WY 17–1), Wyoming submitted a proposed amendment to its State Reclamation Plan pursuant to SMCRA. Wyoming submitted the proposed amendment on its own initiative. Wyoming proposes to modify its State Reclamation Plan to implement and accomplish the objectives of AMRA. The proposed amendment consists of changes to both the Wyoming Statutes (W.S. 35–11–1202 through 1304) and chapters I through VIII of the rules of the Abandoned Mine Lands Program.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 884.14, OSM is seeking comment on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 884.15. If the amendment is deemed adequate, it will become part of the State Reclamation Plan.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **"DATES"** or at locations other than the Casper Field Office will not necessarily be considered in the final rulemaking or included in the administrative record.

Public Hearing

Persons wishing to testify at the public hearing should contact the person listed under **"FOR FURTHER INFORMATION CONTACT"** by 4 p.m., m.s.t. January 15, 1992. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to testify at the public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested, as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to testify have been heard. Persons in the audience who have not been scheduled to testify, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to testify and persons present in the audience who wish to testify have been heard.

Public Meeting

If only one person requests an opportunity to testify at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting by contacting the person listed under **"FOR FURTHER INFORMATION CONTACT."** All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under **"ADDRESSES."** A written summary of each meeting will be made a part of the administrative record.

BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL 4067–5]

National Emission Standards for Hazardous Air Pollutants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is today proposing to rescind 40 CFR part 61, subpart T (subpart T) as it applies to owners and operators of uranium mill tailings disposal sites that are licensed by the Nuclear Regulatory Commission (NRC) or an affected NRC Agreement State (affected Agreement States). Today's proposal does not concern subpart T sites that are under the control of the Department of Energy (DOE). Subpart T, which regulates radon emissions into ambient air, is one of the Agency's National Emissions Standards for Hazardous Air Pollutants (NESHAPs) for radionuclides, which were promulgated on December 15, 1989 (54 FR 51654) pursuant to Clean Air Act (CAA) Section 112, as it existed prior to the 1990 amendments. EPA is establishing a 60 day period for receipt of comments on this issue. Published elsewhere in today's **Federal Register** are two related rulemakings: a Notice of a Final Rule which stays the effectiveness of subpart T as it applies to non-operational uranium mill tailings disposal sites that are licensed by the NRC or an affected Agreement State pending completion of this rulemaking, or June 30, 1994, whichever first occurs, and an Advanced Notice of Proposed Rulemaking (ANPR) in which EPA is announcing its intention to enter into a future rulemaking which would amend 40 CFR part 192, subpart D, which was enacted pursuant to the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978.

DATES: Comments concerning this proposed rule must be received by EPA on or before February 24, 1992. Public hearings will be held on January 15, 1992 in Washington, DC, and in Sante Fe, New Mexico on January 21 and 22, 1992.

ADDRESSES: Comments should be submitted (in duplicate if possible) to: Central Docket Section LE–131, Environmental Protection Agency, Attn: Docket No. A–91–67, Washington, DC 20460. Requests to participate in the hearing should be made in writing to the Director, Criteria and Standards Division, ANR–460W, Office of Radiation Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Comments and requests to participate in the hearings may also be faxed to EPA at (703) 306–8763.

Public hearings will be held on January 15, 1992 at 11 Dupont Circle, 8th Floor, Washington, DC 20036, and on January 21 and 22 at the Inn at Loretto, 211 Old Santa Fe Trail, Sante Fe, New Mexico 87501. Comments concerning this proposed rule must be received by EPA on or before February 24, 1991.

FOR FURTHER INFORMATION CONTACT: Jamie Burnett, Air Standards and Economics Branch, Criteria and Standards Division, ANR–460W, Office of Radiation Programs, Environmental Protection Agency, Washington, DC 20460 (703) 306–8787.

SUPPLEMENTARY INFORMATION:

A. Background

1. Regulatory History

On December 15, 1989, EPA promulgated national standards regulating radionuclide emissions to the ambient air from several source categories, including from non-operational sites used for the disposal of uranium mill tailings. 54 FR 51654. These sites are either under the control of the DOE pursuant to title I of the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978, 42 U.S.C. 7901 *et. seq.*, or the sites are under the control of NRC or Agreement State-licensees pursuant to title II of UMTRCA. These standards—subpart T of 40 CFR part 61 (subpart T)—were promulgated pursuant to the authority of Clean Air Act (CAA or Act) section 112 as it existed in 1989, and were part of a larger promulgation of National Emission Standards for Hazardous Air Pollutants (NESHAPs) for Radionuclides.

Subpart T requires compliance by owners and operators of uranium mill tailings disposal sites within two years of becoming non-operational (40 CFR 61.22(b)). Pursuant to its authority under then-existing CAA section 112(c)(1)(B)(ii) EPA waived compliance for two years for sites that were non-operational at the time of promulgation. *Id.* Thus, the earliest date by which sites must comply with the subpart T standards is December 15, 1991. Even so, EPA recognized at the time of

VOL 56 ISS 251 DEC 31 1991 UMI

promulgation that many sources subject to subpart T might not be able to achieve compliance by December 15, 1991. Because EPA felt constrained by the CAA as it existed at that time, EPA stated that for those sites the Agency would negotiate expeditious compliance schedules pursuant to its enforcement authority under CAA section 113. See 54 FR 51683. By so doing, subpart T in effect mandates that the earthen cover to meet that emissions level be installed as expeditiously as practicable considering technological feasibility.

The primary subpart T standard is the requirement that radon–222 emissions not exceed a flux of 20 pCi/m²-s. 40 CFR 61.222(a). In its 1989 action, EPA recognized that even though NRC implements general EPA standards (promulgated under UMTRCA) which also regulate these sites and call for compliance with a 20 pCi/m²-s flux standard (see 40 CFR part 192, subpart D), the UMTRCA regulatory program does not answer the critical timing concern addressed by subpart T.

The existing UMTRCA regulations set no time limits for disposal of the piles. Some piles have remained uncovered for decades emitting radon. Although recent action has been taken to move toward disposal of these piles, some of them may still remain uncovered for years.

54 FR at 51683

In addition to regulating radon emissions, subpart T also requires specific testing and record keeping. See 40 CFR 61.223 and 61.224. The UMTRCA regulations, as currently promulgated by EPA and implemented by NRC, while ultimately limiting emissions to the same level as subpart T, are supported by a variety of design-based substantive and procedural requirements that speak to UMTRCA's unique concern that final site closure occur in a manner that will last at least 1,000 years, but do not require monitoring of emissions to confirm the performance of the earthen cover. See generally 10 CFR part 40, appendix A and 40 CFR part 192.

These CAA and UMTRCA programs duplicate each other by creating dual regulatory oversight, including independent procedural requirements, while seeking to ensure compliance with the identical 20 pC1/m²-s flux standard. Concern over this duplication inspired several petitions for reconsideration, most notably from NRC and the American Mining Congress (AMC). While these petitions remain pending before EPA, today's proposal to rescind subpart T, as well as the companion actions (1) An Advance Notice of Proposed Rulemaking (ANPR) to amend 40 CFR part 192 (UMTRCA regulations) and (2) a Notice of Final Rule to stay subpart T pending the conclusion of today's proposed rescission, comprises EPA's efforts towards addressing the issues they raise. As discussed further below, underlying these actions is a Memorandum of Understanding (MOU) which has been entered into by EPA, NRC, and the affected Agreement States (the MOU is published at the end of this notice, as it was at the end of the notice proposing to stay subpart T (see 56 FR at 55434)).

2. Clean Air Act Amendments of 1990

After promulgation of subpart T (and receipt of reconsideration petitions), in November 1990, the Clean Air Act was substantially amended. Included in the new Act was an amendment that speaks directly to the duplication issue. Newly enacted section 112(d)(9) of the amendments provides:

> No standard for radionuclide emissions from any category or subcategory of facilities licensed by the Nuclear Regulatory Commission (or an Agreement State) is required to be promulgated under this section if the Administrator determines, by rule, and after consultation with the Nuclear Regulatory Commission, that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act for such category or subcategory provides an ample margin of safety to protect the public health.

This provision strives to eliminate duplication of effort between EPA and NRC, so long as public health is protected with an ample margin of safety.

Moreover, Congress expressed sensitivity to the special compliance problems of uranium mill tailings sites through new section 112(i)(3). This provision provides an additional 3-year extension to mining waste operations (e.g., uranium mill tailings) if the 4 years allowed (including a one-year extension) for compliance with standards promulgated under the amended section 112 is insufficient to dry and cover the mining waste (thereby controlling emissions).

3. Memorandum of Understanding (MOU) between EPA, NRC and the Affected Agreement States

In light of these provisions, and given the express authority of section 112(d)(9), as amended, EPA, NRC and the affected Agreement States, have been meeting to discuss the dual regulatory programs under UMTRCA and the CAA. The result of this intensive inter-agency consultation has been the execution of a Memorandum of Understanding (MOU), a copy of which is attached to this proposal and was also attached to the proposed stay published in the **Federal Register** on October 25, 1991 (56 FR 55434). The purpose of the MOU is to ensure that owners and operators of existing non-operational uranium mill tailings piles licensed by NRC or an affected Agreement State, or owners and operators of piles that will in the future become non-operational, effect site closure—emplacement of an earthen cover to permanently limit radon emissions to a flux of no more than 20 pCi/m²-s—as expeditiously as practicable considering technological feasibility. The goal is that all current and future disposal sites achieve compliance by the end of 1997, or within seven years of when the currently operating and standby sites become non-operational.

B. Discussion of Existing EPA Standard 40 CFR Part 61, Subpart T

As described in section A(1) above, subpart T (of 40 CFR part 61) limits radon-222 emissions to the ambient air from non-operational uranium mill tailings disposal sites licensed by the NRC or an affected Agreement State. Subpart T requires that these sites, which consist of large (i.e., numerous acre) impoundments or piles, comply with a radon flux standard of 20 pCi/m²-s (40 CFR 61.222(a)). Moreover, compliance must be achieved within two years of when the site becomes non-operational, 40 CFR 61.222(b), which for piles which had ceased operation prior to the time of promulgation is December 15, 1991. While at the time of promulgation EPA recognized that many sources might not be able to achieve this date, EPA was constrained by existing CAA section 112(c)(1)(B)(ii)) which allows a maximum of two years for facilities to come into compliance. EPA stated that for those sites which could not meet the two-year date, the Agency would negotiate expeditious compliance schedules pursuant to its enforcement authority under CAA section 113. See 54 FR 51683. Subpart T also calls for monitoring and record keeping to establish and demonstrate compliance. See 40 CFR 61.223 and 61.224.

Subpart T is part of a larger promulgation of radionuclide NESHAPs that represent the Agency's application of the policy for regulating CAA section 112 pollutants which was first announced in the benzene NESHAP (54 FR 38044 (Sept. 14, 1989)). The NESHAP policy utilized a two-step approach. In the first step, EPA considered the lifetime risk to the maximally exposed individual, and found that it is presumptively acceptable if it is no higher than approximately one in ten

thousand. This presumptive level provides a benchmark for judging the acceptability of a category of emissions. This first step also considers other health and risk factors such as projected incidence of cancer, the estimated number of persons exposed within each individual lifetime risk range, the weight of evidence presented in the risk assessment, and the estimated incidence of non-fatal cancer and other health effects. After considering all of this information, a final decision on acceptable risk is made. This becomes the starting point for the second step, determining the ample margin of safety.

In the second step, EPA strives to provide protection for the greatest number of persons possible to an individual lifetime risk level no higher than approximately one in one million. In this ample margin decision, the Agency again considers all of the health risk and other health information considered in the first step, as well as additional factors such as costs and economic impacts of controls, technological feasibility, uncertainties, and any other relevant factors.

As part of the risk assessment associated with the promulgation of subpart T, EPA examined the doses to the maximally exposed individuals (MEI) from uranium mill tailings disposal sites. In so doing, EPA noted that standards it had already promulgated pursuant to the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978 would eventually limit radon emissions from those sites to a flux of 20 pCi/m²-s (see 40 CFR part 192, subpart D), and thus EPA referred to that level as "baseline." EPA's risk assessment revealed that compliance with the 20 pCi/m²-s baseline would result in an MEI of approximately 1×10^{-4}, a level EPA determined to be safe under the first step of the analysis. EPA further concluded in the second step, which considers additional factors such as cost and technological feasibility, that the baseline level also provided an ample margin of safety.

Even though EPA determined that the baseline was protective of public health with an ample margin of safety, EPA still found it was necessary to promulgate subpart T. This was because the baseline assumed compliance with the UMTRCA regulations even though those regulations did not require that compliance occur in the foreseeable future and, in fact, many sites were not proceeding towards the baseline level at the time subpart T was promulgated. In other words, EPA promulgated subpart T to address the timing issue, which was not addressed in the UMTRCA regulations. However, due to then-existing CAA section 112(c)(1)(B)(ii), EPA was constrained to requiring compliance with the 20 pCi/m²-s baseline within two years, a date the Agency recognized many sites might find impossible to meet. EPA announced that those situations could be dealt with through site-specific enforcement agreements under CAA section 113.

C. Rationale for Proposed Rule to Rescind 40 CFR Part 61 Subpart T for NRC Licensees

In light of the new statutory authority provided EPA by CAA section 112(d)(9) of the Clean Air Amendments of 1990, EPA has been meeting with NRC and the affected Agreement States to determine whether, with certain modifications to its regulatory program under UMTRCA, the NRC regulatory program might provide an ample margin of safety. If so, subpart T would be rendered superfluous and, therefore, needlessly duplicative and burdensome such that rescission pursuant to CAA section 112(d)(9) would be appropriate.

In applying the risk methodology for CAA section 112 to the risk assessment for subpart T, EPA has already determined that the baseline that would result once the 20 pCi/m²-s UMTRCA standard is met protects public health with an ample margin of safety. Thus, if the regulatory program implemented by NRC assures that sites will achieve the baseline as soon as practicable considering technological feasibility, then subpart T would not be necessary. More specifically, appropriate modifications to the UMTRCA regulatory scheme as implemented by NRC and the affected Agreement States to ensure specific, enforceable closure deadlines and monitoring requirements such that compliance with the baseline will occur as expeditiously as practicable considering technological feasibility, would protect public health with an ample margin of safety. In so concluding, EPA relies wholly upon the risk analysis it conducted in promulgating subpart T. EPA is neither revisiting that analysis here, nor does the Agency seek comment on that analysis.

1. The Regulatory Scheme Under UMTRCA

As a supplement to the Atomic Energy Act of 1954, as amended, the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978 (42 U.S.C. 2022, 7901–7942) was enacted to comprehensively address the dangers presented by uranium mill tailings, including their disposal:

> uranium mill tailings located at active and inactive mill operations may pose a potential and significant radiation health hazard to the public, and * * * the protection of the public health, safety, and welfare * * * require[s] that every reasonable effort be made to provide for the stabilization, disposal, and control in a safe and environmentally sound manner of such tailings in order to prevent or minimize radon diffusion into the environment * * *."

42 U.S.C. 7901(a); *see American Mining Congress* v. *Thomas*, 772 F.2d 617 (10th Cir. 1985), *cert. denied*, 428 U.S. 1158 (1986). As to uranium mill tailings disposal sites in particular, UMTRCA gives the Department of Energy (DOE) the responsibility to clean up and dispose of certain (i.e., title I) sites, and gives NRC the responsibility for those (i.e., title II) sites that are owned and operated by its licensees. EPA is responsible for promulgating the generally applicable environmental standards to be implemented by both NRC and DOE. 42 U.S.C. 2022(a), 7911–7924; AMC, 724 F.2d at 621. EPA promulgated its final UMTRCA regulations on December 15, 1982 for title I sites and on September 30, 1983 for title II sites. 48 FR 590 and 48 FR 45926 (codified at 40 CFR part 192).

Parts of EPA's final UMTRCA regulations are directed to the permanent disposal of uranium mill tailings. See 40 CFR part 192, subpart D (subpart D). Among the requirements of Subpart D is the mandate that radon releases from the disposal sites not exceed a flux of 20 pCi/m²-s. 40 CFR 192.32 (a) and (b). Other aspects of subpart D pertain to ground water, monitoring, design, and duration of closure. See 40 CFR 192.32 and 192.33. With the exception of the ground water provisions at 40 CFR 192.20(a) (2)–(3), all of subpart D was upheld by the Tenth Circuit in *AMC* v. *Thomas*, 772 F.2d at 640. EPA is currently engaged in rulemaking to address the ground water remand.

Because NRC implements EPA's general UMTRCA standards for its licensees (as do its Agreement States), it has promulgated its own implementing regulations in the form of "criteria." See generally 10 CFR part 40, appendix A. While these criteria set forth a variety of specific requirements—financial, technical, and administrative—to govern the final reclamation (i.e., closure) design for each disposal site, they also provide for "site-specific" flexibility by authorizing alternatives that are at least as stringent as EPA's general standards and NRC's criteria, "to the extent practicable" as provided in Section 84c

VOL
56
ISS
251
DEC
31
1991
UMI

of the Atomic Energy Act of 1954, as amended. *Id.* at Introduction.

Overall, NRC's implementation criteria set forth a rigorous program governing the reclamation of the disposal sites so that closure will (1) Last for 1,000 years to the extent reasonable, but in any event at least 200 years, and (2) limit radon release to 20 pCi/m^2-s throughout that period. The design must be able to withstand extreme weather and other natural forces. Upon review, EPA believes the NRC criteria comprise a comprehensive response to EPA's general standards at 40 CFR part 192, subpart D. However, as noted above, nothing in either EPA's general standards or NRC's implementing criteria compel sites to proceed toward final closure by a certain date. This was the reason for EPA's decision in 1989 to promulgate the subpart T NESHAP under the CAA. Moreover, neither EPA's general UMTRCA regulations, nor NRC's implementing criteria require appropriate monitoring to ensure compliance with the 20 Pci/m^2-s standard. Nevertheless, as discussed below, the CAA was subsequently amended to allow the EPA not to regulate NRC licensees if it concludes that the NRC regulatory scheme provides an ample margin of safety to protect the public health.

2. Clean Air Act Amendments of 1990: Section 112(d)(9)

As set forth and discussed above in section A(2), the CAA was substantially amended in 1990. As part of that enactment, section 112(d)(9) was added to the statute. The purpose of this provision is to preserve governmental resources and avoid needless, burdensome, and potentially contradictory CAA regulations. Specifically, section 112(d)(9) makes explicit that EPA need not regulate under the CAA, radionuclide sources that are sufficiently regulated by NRC or its Agreement States (under the Atomic Energy Act or its component acts, such as UMTRCA). More particularly, section 112(d)(9) allows EPA to not regulate under section 112 if the Administrator determines "by rule, and after consultation with the [NRC]," that NRC's regulatory program for a particular source "category or subcategory provides an ample margin of safety to protect the public health."

As EPA interprets section 112(d)(9), the Agency may rescind the Subpart T NESHAP as it applies to non-operational uranium mill tailings disposal facilities licensed by NRC or an affected Agreement State if the Agency (1) Consults with NRC, (2) engages in public notice and comment rulemaking, and (3) finds that the separate NRC regulatory program provides an equivalent level of public health protection (i.e., an ample margin of safety) as would implementation of subpart T. While this rulemaking may commence prior to final development of NRC's regulatory program, that program must fully satisfy the statute at the time EPA takes final action. In so doing, EPA must find that the NRC regulatory program satisfies the CAA standard, not that full and final implementation of that program has already successfully occurred.

3. The Memorandum of Understanding (MOU)

EPA has had intensive discussions about these matters with NRC and the affected Agreement States. The result of this interagency consultation and review has been the execution of a Memorandum of Understanding (MOU), a copy of which is printed at the end of this notice. The primary purpose of the MOU is to ensure that non-operational uranium mill tailings piles licensed by NRC or an affected Agreement State achieve compliance (through installation of an earthen cover) with the 20 pCi/m^2-s flux standard from EPA's UMTRCA standards (40 CFR 192.32(b)(1) as expeditiously as practicable considering technological feasibility. A guiding objective is that this occur as to all current disposal sites by the end of 1997, or within seven years of when the existing operating and standby sites enter disposal status. This objective comports with Congress's concern over timing as reflected in CAA section 112(i)(3), as amended.

The MOU calls for EPA to modify its UMTRCA regulations (at 40 CFR part 192, subpart D) to address the timing concern that resulted in EPA's 1989 decision to promulgate subpart T. Moreover, EPA understands that NRC staff will recommend to the Commission to modify its implementing regulations at 10 CFR part 40, appendix A, as appropriate. The MOU also calls for NRC and the affected Agreement States to immediately commence efforts to amend the licenses of the non-operational mill tailings disposal site owners and operators to include reclamation plans that require compliance with the 20 pCi/m^2-s standard as expeditiously as practicable considering technological feasibility. This will be done either through voluntary cooperation with the licensees, or through administratively enforceable orders. These actions, coupled with NRC's commitment to enforce the amended licenses, are intended to provide the basis for EPA to make the requisite findings under CAA section 112(d)(9) necessary for rescission of subpart T.

4. Evaporation Ponds

This proposal is directed to a finding that the UMTRCA regulatory program as implemented by NRC and the affected Agreement States protects public health with an ample margin of safety from the risks associated with releases into ambient air of radon-222. The regulations contemplated by this notice seek to control the emission of radon-222 by requiring the installation of an earthen cover over the disposal piles as expeditiously as practicable considering technological feasibility. However, there are other aspects to the UMTRCA regulatory scheme, including the long-term maintenance of the piles (once controlled) against erosion, and the reclamation and maintenance of ground water. To these other ends, remedial actions have already commenced, under the regulatory program of the NRC and the affected Agreement States, that have the dual purpose of both readying the piles for installation of the earthen cover that will control radon and reclaiming and maintaining ground water. These actions entail the use of evaporation ponds that in some instances, for varying reasons, have been placed directly upon the disposal site. In seeking to modify the UMTRCA regulations to require the expeditious installation of an earthen cover to control radon, the question has arisen whether the requirement extends to the evaporation pond thereby jeopardizing the other remedial aspects of the UMTRCA program.

EPA does not intend that the expeditious radon cover requirement extend to the areas where evaporation ponds are located, even if on the pile itself, to the extent that such evaporation pond is deemed by the implementing agency (NRC or an affected Agreement State) to be an appropriate aspect to the overall remedial program for the particular site involved. Rather, the evaporation pond area may be covered to control radon after it is no longer in use and ready for covering. EPA believes the overall public health interest in comprehensively resolving the problems associated with each site is best served by requiring that the radon cover be expeditously installed in a manner that does not require interruption of this other aspect of remediation. Moreover, the ponds themselves serve as an effective radon barrier, thus this decision is bolstered by the absence of any evidence that there is a significant public health risk presented by the radon emissions from these evaporation ponds during the period they are employed as part of the overall remediation of the site. Rather, EPA believes that provided all other parts of the pile are covered with the earthen cover, compliance with the 20 pCi/m^2-s standard will result, and this will be maintained by covering the evaporation pond area when it is no longer in use.

D. Proposed Rule to Rescind 40 CFR Part 61, Subpart T for NRC and Agreement State Licensees

EPA today proposes to rescind subpart T as it applies to non-operational uranium mill tailings disposal sites licensed by NRC or an affected Agreement State. The Agency makes this proposal pursuant to its authority under CAA section 112(d)(9), as amended. The proposal is supported by the MOU, which both reflects consultation with NRC and sets forth a course of conduct that will bolster NRC's regulatory program under UMTRCA so that it is protective of public health with an ample margin of safety. As part of this action, EPA has reviewed the regulatory program implemented by NRC under UMTRCA (as contained at 10 CFR part 40, appendix A) and determined that, once the timing and monitoring concerns are fully addressed, consistent with and including the other actions (e.g., license amendment) contemplated by the MOU, the NRC criteria will result in reclamation designs and schedules fully adequate to ensure compliance with the 20 pCi/m^2-s flux standard as expeditiously as practicable considering technological feasibility.

40 CFR part 61, subpart T requires owners or operators of uranium mill tailings piles to conduct a one-time measurement of their radon emissions using monitoring methods specified in appendix B, Method 115, or other procedures which have EPA approval. This measurement must be performed 60 days following the closure of the pile but prior to long term stabilization under UMTRCA standards found in 40 CFR 192.02(a) or 192.32(b)(i). The UMTRCA standards have no such monitoring requirements associated with them since radon control is achieved through design of the cover.

Under the MOU, EPA will engage in rulemaking to modify its UMTRCA regulations to require compliance with the 20 pCi/m^2-s flux standard as expeditiously as practicable considering technological feasibility, and to require appropriate monitoring to verify compliance. The goal of this revision will be that compliance will occur no later than the end of 1997 for all existing non-operational disposal sites, or within seven years of when operating or standby sites become non-operational. Moreover, all NRC and affected Agreement State licenses will be modified to incorporate a reclamation schedule that assures compliance with the 20 pCi/m^2-s flux standard under UMTRCA as expeditiously as practicable considering technological feasibility.

As intended by EPA, the phrase "expeditiously as practicable considering technological feasibility," means as quickly as possible considering: (1) The physical characteristics of the tailings or the site; (2) the limits of available technology; (3) the need for consistency with mandatory requirements of other regulatory programs; and (4) delays beyond the control of the licensee (e.g., inclement weather). While this phrase does not preclude economic considerations, it also does not contemplate utilization of a cost-benefit analysis in setting compliance schedules. In other words, the compliance schedules are to be developed consistent with the target set forth in the MOU as reasonably applied to the specific circumstances of each site. By definition, no more rapid compliance can, as a practical matter occur, because this schedule represents the earliest that the sites could be closed. EPA has already made a determination in promulgating subpart T that compliance with the 20 pCi/m^2-s standard protects public health with an ample margin of safety. Thus, once these actions are taken, including requiring appropriate monitoring to verify compliance, EPA believes the basis will exist for a finding that the NRC regulatory program protects public health with an ample margin of safety.

EPA does not intend to take final action on this proposal until after (1) It effectively promulgates the above-discussed revision to its UMTRCA regulations at 40 CFR part 192, subpart D, (2) NRC's regulations at 10 CFR part 40, appendix A, are effectively revised, as necessary and appropriate to implement the revisions to EPA's regulations, and (3) the other conditions of the MOU occur, including the revision of the NRC and affected Agreement State licenses to reflect these new requirements. In determining whether the above regulatory changes have been effectively promulgated, EPA will assess whether any judicial challenge to these regulations is pending and, if so, whether such challenge presents a significant risk of interference with the purposes and objectives of the MOU, as reflected in the regulatory changes.

E. Reconsideration

EPA will take final action on this proposal only after it revises the UMTRCA regulations to require compliance with the 20 pCi/m^2-s flux standard as expeditiously as practicable, NRC revises its implementing regulations, as appropriate, to reflect EPA's changes, and NRC and the affected Agreement States have amended the applicable licenses to reflect these requirements. However, EPA does intend to take final action on this proposal prior to when actual compliance with the 20 pCi/m^2-s flux standard is achieved at all sites. In addition, under the Atomic Energy Act, NRC has the authority to waive, for reasons of practicability, the dual requirement of the MOU that compliance with the 20 pCi/m^2-s flux standard occur as expeditiously as practicable considering technological feasibility. As currently understood and defined by NRC, the term "practicability" includes certain economic considerations which are not contemplated by the requirement of the MOU which requires that compliance occur as expeditiously as practicable considering technological feasibility. Thus, as a theoretical matter, this waiver authority may be exercised even in a manner not addressed in the MOU even after the UMTRCA regulations are promulgated and each license is amended, although EPA has no reason to believe such relaxation of restriction will actually occur. Nevertheless, EPA does recognize that this authority would not exist under the CAA and subpart T and, thus, there is some concern over the potential for deviation from the agreements contained in the MOU.

In response to the concern over the waiver authority in the Atomic Energy Act, and in order to ensure that authority is not utilized to defeat the finding that the NRC regulatory program protects public health with an ample margin of safety, EPA is in advance proposing that certain conditions and grounds for reconsideration be included in any final decision to rescind subpart T. In this way, EPA may base its rescission finding upon its view of the NRC regulatory program contemplated by the MOU at the time of taking final action, while also providing some assurance that EPA will revisit that finding should NRC or the affected Agreement States substantially deviate from that program. Thus, the following conditions and grounds for

VOL
56
ISS
251
DE
31
1991
UMI

reconsideration are proposed by EPA to provide assurance that any finding by EPA that the NRC program is sufficient to justify rescission of subpart T under CAA section 112(d)(9) will be revisited if the NRC program is actually implemented in a manner inconsistent with that finding:

1. Because any decision to rescind subpart T will be based upon EPA finding, as called for by the MOU, that the UMTRCA regulatory program implemented by NRC and the affected Agreement States requires (1) compliance with the 20 pCi/m^2—s flux standard (2) as expeditiously as practicable considering technological feasibility, it is important that any alleged failure of those findings be addressed in a timely manner. Thus, EPA is proposing that it establish a non-discretionary duty that it propose to grant or deny the petition within 90 days, and to take final action granting or denying the petition for reconsideration within 90 days of the proposal (180 days total). Failure to meet that deadline may be subject to an unreasonable delay action in District Court under CAA section 304 to order that EPA propose and take final action on the petition. Review of that final response would be in the Court of Appeals under CAA section 307(b).

2. As noted above, any finding to rescind Subpart T will be based on the dual purpose of the MOU to require (1) Compliance with the 20 pCi/m^2—s flux standard (under EPA's general UMTRCA regulations at 40 CFR part 192, subpart D) (2) as expeditiously as practicable considering technological feasibility. The first part of the finding derives from the risk analysis conducted by EPA in promulgating Subpart T in 1989. At that time, EPA determined that the 20 pCi/m^2—s flux standard was a "baseline" that was provided by EPA's general UMTRCA standards at 40 CFR part 192, subpart D. EPA further determined that compliance with that baseline would be protective of public health with an ample margin of safety. EPA promulgated subpart T to ensure that all sites comply with that standard as expeditiously as practicable. In so doing, the CAA did not permit, and EPA did not consider, site-specific waivers from ultimate compliance with that standard. In conducting this rescission rulemaking, EPA is *not* revisiting the risk analysis or decision methodology that supported the promulgation of subpart T; rather, EPA is only visiting whether NRC's regulatory program under UMTRCA will meet the 20 pCi/m^2—s standard in a timely manner thereby rendering Subpart T unnecessarily duplicative. With this in mind, EPA is setting the following grounds for examining the recision finding once finalized:

(a) The 20 pCi/m^2—s flux standard must be strictly met by all sites, and once met the obligation is ongoing. Below are two options for implementing that requirement in the context of reconsideration of the rescission. Note that under either option, EPA does not intend to reconsider the rescission for any site that is in fact meeting the 20 pCi/m^2—s standard, and has not sought or received permission from NRC or an affected Agreement State to exceed that standard in the future.

Option 1

If the weight of the evidence shows that either (1) NRC or an affected Agreement State is authorizing that one or more sites exceed the 20 pCi/m^2—s flux standard (pursuant to a waiver, license revision, reclamation plan modification, or other means), or (2) that monitoring reveals the standard is not being met and the source, NRC or the affected Agreement State decides not to take or require corrective action within a reasonable period of time, even though such has been requested of them in writing (as contemplated by the MOU), EPA will revoke its rescission of subpart T as to that source. However, should it ultimately be determined that EPA lacks the authority to reinstate subpart T on a site-specific basis, subpart T shall instead be reinstated in its entirety.

Option 2

The same as Option 1, above, except that EPA must further find that the failure(s) to meet the standard is of such a nature as indicates a "programmatic failure" on the part of NRC or an affected Agreement State. Programmatic failure is demonstrated when the weight of the evidence indicates an intent by the implementing agency to depart from its obligation (and commitment under the MOU) to ensure compliance with the 20 pCi/m^2—s standard. This is in contrast to excusable inadvertence, aberration, or a benign exercise of prosecutorial discretion. The intent is that the rescission be revoked only if NRC or the affected Agreement States, for legal or policy reasons, appear not to be keeping the commitments contained in the MOU. Under this option, revocation of the recision would be as to all licensees under the control of NRC or the affected Agreement State, or both.

(b) The requirement that compliance with the 20 pCi/m^2—s flux standard occur as expeditiously as practicable considering technological feasibility must also be met by all sites. Below are two options for implementing that requirement in the context of reconsideration of the rescission.

Option 1

If the substantial weight of the evidence shows that schedule slippages or delays from the requirement that compliance occur as expeditiously as practicable considering technological feasibility are occurring, EPA will revoke its rescission of subpart T as to that site. The phrase "expeditiously as practicable considering technological feasibility" means as quickly as possible considering: (1) The physical characteristics of the tailings and the site; (2) the limits of available technology; (3) the need for consistency with mandatory requirements of other regulatory programs; and (4) delays beyond the control of the licensee. While this phrase does not preclude economic considerations, it also does not contemplate utilization of a cost benefit analysis in setting compliance schedules. In other words, the compliance schedules are to be developed consistent with the target set forth in the MOU as reasonable applied to the specific circumstances of each site. However, should it ultimately be determined that EPA lacks the authority to re-institute subpart T on a site-specific basis, subpart T shall instead be reinstated in its entirety.

Option 2

The same as Option 1, above, except that EPA must further find that the failure(s) to achieve compliance as expeditiously as practicable considering technological feasibility is (are) of such a nature as to indicate a "programmatic failure" on the part of NRC or the affected Agreement State. Programmatic failure is defined when the weight of the evidence indicates an intent by the implementing agency to depart from its obligation (and commitment under the MOU) to ensure that this requirement is met. It is contrasted to excusable inadvertence, aberration, or a benign exercise of prosecutorial discretion. The intent is that the rescission be revoked only if NRC or the affected Agreement States, for legal or policy reasons, appear not to be keeping the commitments contained in the MOU. Under this option, revocation of the rescission would be as to all licensees under the control of NRC or an affected Agreement State, or both.

3. Any decision to revoke the rescission of subpart T will be done pursuant to notice and comment rulemaking. This means that EPA will subject any finding under 2(a) or 2(b) above to public comment. However, in so doing, EPA will neither consider novel arguments such as whether public health was significantly threatened by the alleged failure, nor revisit the findings that underlie subpart T. Rather, because the health risk analyses necessary for the original promulgation of subpart T are not being revisited in conducting the rulemaking to rescind subpart T as to NRC or affected Agreement State licensees, such analysis will likewise not be a part of any decision to reconsider or ultimately revoke the recision. All that is at issue is whether the 20 pCi/m^2—s flux standard is being met as expeditiously as practicable considering technological feasibility under the UMTRCA regulatory scheme, thereby supporting the finding that subpart T was unnecessarily duplicative.

F. Miscellaneous

1. Paperwork Reduction Act

There are no information collection requirements in this proposed rule.

2. Executive Order 12291

Under Executive Order 12291, EPA is required to judge whether this regulation, if promulgated, would be a "major rule" and therefore subject to certain requirements of the Order. The EPA has determined that rescinding subpart T as it applies to owners and operators of uranium mill tailings disposal sites that are licensed by the NRC would not result in one of the adverse economic effects set forth in section I of the Order as grounds for finding a regulation to be a "major rule." This regulation would not be major because the nationwide compliance costs would not meet the $100 million threshold, the regulation would not significantly increase prices or production costs, and the regulation would not cause significant adverse effects on domestic competition, employment, investment, productivity, innovation or competition in foreign markets.

The Agency has not conducted a Regulatory Impact Analysis (RIA) of this purposed regulation because this action does not constitute a major rule. This regulation has been reviewed by the Office of Management and Budget and their written comments (if any) are available in the public docket.

3. Regulatory Flexibility Analysis

Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, requires EPA to prepare and make available for comment an "initial regulatory flexibility analysis" which describes the effect of the proposed rule on small business entities. However, section 604(b) of the Act provides that an analysis not be required when the head of an Agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

This proposed rule to rescind 40 CFR part 61, subpart T, if promulgated as a final rule, will have the effect of easing the burdens associated with the provisions of subpart T and for those reasons, I certify that this rule will not have significant economic impact on a substantial number of small entities.

List of Subjects in 40 CFR Part 61

Air pollution control, Arsenic, Asbestos, Benzene, Beryllium, Hazardous substances, Mercury, Radionuclides, Radon, Reporting and Recordkeeping requirements, Uranium, Vinyl chloride.

Dated: December 19, 1991.

William K. Reilly,

Administrator.

Part 61 of chapter I of title 40 of the Code of Federal Regulations is proposed to be amended as follows:

PART 61—[AMENDED]

1. The authority citation for part 61 continues to read as follows:

Authority: 42 U.S.C. 7401, 7412, 7414, 7416, 7601.

2. Section 61.220 is amended by revising paragraph (a) to read as follows:

§ 61.220 Designation of facilities.

(a) The provisions of this subpart apply to owners and operators of all sites that are used for the disposal of tailings, and that managed residual radioactive material during and following the processing of uranium ores, commonly referred to as uranium mills and their associated tailings, that are listed in, or designated by the Secretary of Energy under title I of the Uranium Mill Tailings Control Act of 1978.

* * * * *

3. Section 61.221 is revised to read as follows:

§ 61.221 Definitions.

As used in this subpart, all terms not defined here have the meanings given them in the Clean Air Act or subpart A of part 61. The following terms shall have the following specific meanings:

(a) *Long term stabilization* means the addition of material on a uranium mill tailings pile for purpose of ensuring compliance with the requirements of 40 CFR 192.02(a). These actions shall be considered complete when the Nuclear Regulatory Commission determines that the requirements of 40 CFR 192.02(a) have been met.

(b) *Operational* means a uranium mill tailings pile that is licensed to accept additional tailings, and those tailings can be added without violating subpart W or any other Federal, state or local rule or law. A pile cannot be considered operational if it is filled to capacity or the mill it accepts tailings from has been dismantled or otherwise decommissioned.

(c) *Residual radioactive materials* means:

(1) Waste (which the Secretary determines to be radioactive) in the form of tailings resulting from the processing of ores for the extraction of uranium and other valuable constituents of the ores; and

(2) Other waste (which the Secretary determines to be radioactive) at a processing site which relate to such processing, including any residual stock of unprocessed ores or low grade materials.

(d) *Tailings* means the remaining portion of a metal-bearing ore after some or all of such metal, such as uranium, has been extracted.

4. Section 61.222 is amended by revising paragraph (b) to read as follows:

§ 61.222 Standard.

* * * * *

(b) Once a uranium mill tailings pile or impoundment ceases to be operational it must be disposed of and brought into compliance with this standard within two years of the effective date of the standard. If it is not physically possible for DOE to complete disposal within that time, EPA shall, after consultation with DOE, establish a compliance agreement which will assure that disposal will be completed as quickly as possible.

5. Section 61.223 is amended by revising paragraph (b)(5) to read as follows:

§ 61.223 Compliance procedures.

* * * * *

(b) * * *

(5) Each report shall be signed and dated by a public official in charge of the facility and contain the following declaration immediately above the signature line:

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein and based on my inquiry of those individuals immediately responsible for obtaining the

information, I believe that the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment. See, 18 U.S.C. 1001.

* * * * *

Memorandum of Understanding Between EPA, NRC and The State of Colorado, Texas, and Washington Concerning Clean Air Act Standards for Radon Releases from Uranium Mill Tailings, Subparts T and W, 40 CFR Part 61

In accordance with section 112(d)(9) and 122(c)(2) of the Clean Air Act, as amended in 1990, and in order to minimize regulatory duplication and conserve resources in the control of radionuclide emission to air from uranium mill tailings sites licensed by the Nuclear Regulatory Commission (NRC) or its Agreement States under the Atomic Energy Act of 1954, as amended, NRC, the Environmental Protection Agency (EPA), and the States of Colorado, Texas, and Washington (the affected Agreement States) agree as follows:

General Goal of Agreement

EPA, NRC and affected Agreement States are entering into this MOU to ensure that owners and operators of existing uranium mill tailings disposal sites licensed by the NRC, or the affected Agreement States, who have ceased operations and those owners and operators that will in the future cease operation, effect emplacement of a final earthen cover to limit radon emissions to a flux of no more than 20 $pCi/m^2/s$, as expeditiously as practicable considering technological feasibility. A guiding objective is that this occur to all current disposal sites (see Attachment A) by the end of 1997, and within seven years of when the existing operating and standby sites cease operation. The final closure requirement shall be enforceable by NRC or the affected Agreement States.

NRC and Affected State Lead Actions

1. NRC or the affected Agreement States will complete review and approval of detailed reclamation (i.e., final closure) plans, including schedules for emplacement of earthen covers on non-operational tailing impoundments such that radon emissions will not exceed a flux of 20 $pCi/m^2/s$, as soon as practicable but in any event not later than September of 1993. NRC or the affected Agreement States will immediately solicit voluntary requests by uranium mill tailings disposal site licensees to amend their licenses to set forth, or incorporate by reference, the schedule for reclamation schedules will be enforceable. If any licensee fails to voluntarily have a firm reclamation schedule (consistent with this MOU) incorporated into its license, NRC or the Agreement States will impose the appropriate license amendments by order (in accordance with applicable regulatory procedures).

NRC or the affected Agreement States will ensure that the schedules and conditions for effecting final closure are flexible enough to contemplate technological feasibility and that cover emplacement on the tailings impoundments occurs as expeditiously as practicable considering both short-term reductions in radon releases and long-term stability of the uranium tailings.

2. NRC agrees to provide for public notice and comment by publishing in the **Federal Register** receipt of requests, intent to issue amendments, or intent to issue orders which (1) Incorporate reclamation plans or other schedules for effecting final closure into licenses, and (2) amend reclamation schedules as necessary for reasons of technological feasibility (including inclement weather, litigation which compels delays to emplacement, or other factors beyond control of the licensee) after the reclamation plans have been incorporated into the licenses. The affected Agreement States agree to provide comparable public notice and comment.

3. NRC will conduct enforcement actions in accordance with 10 CFR part 2, appendix C, to compel licensee adherence to reclamation schedules, except when the licensee both demonstrates that compliance was not technologically feasible and has made written application to NRC for a license amendment to reflect that concern. The affected Agreement States shall act pursuant to their authority to similarly enforce. NRC and the affected Agreement States will consider and act within a reasonable time period upon requests from EPA or other interested parties to institute a proceeding to modify, suspend, or revoke a license or other enforcement action as may be proper. NRC will consider such requests in accordance with the procedures in 10 CFR 2.206; the affected Agreement States will consider such requests in accordance with State law and existing State procedures.

EPA Lead Actions

4. In or about October 1991, EPA will develop and publish in the **Federal Register** a Notice of Proposed Rulemaking to stay existing 40 CFR part 61, subpart T pending implementation of this agreement, including the rulemaking initiatives described in paragraphs 5 and 6, below, and the license amendments described in paragraphs 1 and 2, above. Final action will be taken on or about December 15, 1991.

5. On or about December 15, 1991, EPA will develop and publish in the **Federal Register** a Notice of Proposed Rulemaking or an Advance Notice of Proposed Rulemaking, pursuant to its authority under Atomic Energy Act Section 275, to make specific amendments to 40 CFR part 192 that would require emplacement of a final earthen cover on non-operational tailing impoundments such that radon emissions will not exceed a flux of 20 $pCi/m^2/s$, as expeditiously as practicable, but with a goal that such occur no later than December 31, 1997 or seven years after the date on which the impoundment ceased operations, whichever is later. This proposal will include generic performance obligations towards closure. NRC and the affected Agreement States will assist EPA in developing the technical basis to support this rulemaking. Final action will be taken as soon as practicable.

6. On or about December 15, 1991, EPA will develop and publish in the **Federal Register** a Notice of Proposed Rulemaking, pursuant to its authority under Clean Air Act Action section 112(d)(9), to rescind its existing uranium mill tailings disposal regulations at 40 CFR part 61, subpart T. This proposal, which will occur only if the purposes and provisions of this MOU are proceeding expeditiously, requires that the Administrator find that the regulatory program implemented by NRC and the affected Agreement States will protect public health with an ample margin of safety. It is expected, subject to public notice and comment, that the basis for this finding will ultimately be provided through compliance by NRC, the affected Agreement States, and EPA with all aspects of this agreement, including finalized, enforceable reclamation plans and expeditious closure schedules for all affected facilities. Final action will be taken as soon as practicable after completion of the rulemaking described in paragraph 5 and the licensing described in paragraphs 1 and 2.

7. During or after performance of the actions described in paragraphs 1, 4, 5 and 6, EPA, NRC and the affected Agreement States will cooperate in addressing pursuant to CAA section 112 (d)(9) duplication of regulation presented by 40 CFR part 61, subpart W, which relates to radionuclide emissions from uranium mill tailings piles that are operational or in standby status.

Effective Date, Revision, and Termination

This memorandum shall be effective immediately and shall continue in effect until revised by mutual agreement, unless terminated by any party after 120 days notice in writing.

Nuclear Regulatory Commission.

Dated: October 17, 1991.

BILLING CODE 6560-50-M

40 CFR Part 192

[FRL-4087-4]

Health and Environmental Standards for Uranium and Thorium Mill Tailings

AGENCY: Environmental Protection Agency.

ACTION: Advanced notice of proposed rulemaking.

SUMMARY: EPA is today announcing its intention to enter into a future rulemaking pursuant to the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978 (42 U.S.C. 2022, 7901-7942) to amend its general environmental regulations pertaining to uranium mill tailings disposal sites at 40 CFR part 192, subpart D (subpart D). The anticipated amendments will supplement subpart D by requiring enforceable closure deadlines and appropriate monitoring for uranium mill tailing disposal sites that are licensed by the Nuclear Regulatory Commission (NRC) or one of its Agreement States (affected Agreement States). EPA intends to issue a proposed rule by April 30, 1992 and will at that time further delineate the scope and rationale for the amendments to subpart D, as well as solicit additional comments. Published elsewhere in today's **Federal Register** are two related rulemakings: A Notice of a Final Rule which stays the effectiveness of subpart T as it applies to nonoperational uranium mill tailings disposal sites that are licensed by the NRC or an affected Agreement State pending completion of this rulemaking, or June 30, 1994, whichever first occurs, and a Notice of Proposed Rulemaking in which EPA is proposing a rule to reacind subpart T as it applies to NRC-licensees.

DATES: Comments concerning this ANPR must be received by EPA on or before February 24, 1992. Public hearings will be held on January 15, 1992 in Washington, DC, and in Santa Fe, New Mexico on January 21 and 22, 1992.

ADDRESSES: Comments should be submitted (in duplicate if possible) to: Central Docket Section LE-131, Environmental Protection Agency, Attn: Air Docket No. A-91-67, Washington, DC 20460. Requests to participate in the hearing should be made in writing to the Director, Criteria and Standards Division, ANR-460W, Office of Radiation Programs, Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460. Comments and requests to participate in a hearing may be faxed to EPA at (703) 308-8763.

Public hearings will be held on January 15, 1992 at 11 Dupont Circle, 8th Floor, Washington, DC 20036, and on January 21 and 22 at the Inn at Loretto, 211 Old Santa Fe Trail, Santa Fe, New Mexico 87501. Comments concerning this ANPR must be received by EPA on or before February 24, 1991.

FOR FURTHER INFORMATION CONTACT: Jamie Burnett, Air Standards and Economics Branch, Criteria and Standards Division, ANR-460W, Office of Radiation Programs, Environmental Protection Agency, Washington, DC 20460, (703) 308-8787.

SUPPLEMENTARY INFORMATION:

A. Background

1. Description of Uranium Mill Tailings Piles

Uranium mill tailings are sand-like wastes that result from the processing of uranium ore to remove the uranium. Tailings are stored in large surface impoundments, called piles, in amounts from less than 1 million tons to over 30 million tons, over an area that may be as large as hundreds of acres. The majority of the piles are located in the Western United States.

To deal specifically with the risks associated with these piles, Congress passed the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978 (42 U.S.C. 2022, 7901-7942). In enacting UMTRCA, Congress found that uranium mill tailings" * * * may pose a potential and significant radiation health hazard to the public, * * * and * * * that every reasonable effort be made to provide for the stabilization, disposal, and control in a safe and environmentally sound manner of such tailings in order to prevent or minimize radon diffusion into the environment and to prevent or minimize other environmental hazards from such tailings." 42 U.S.C. 7901(a). Under UMTRCA, two programs were established to protect public health and the environment from the hazards associated with uranium mill tailings. One program (title I) required the Department of Energy (DOE) to conduct the necessary remedial actions at designated inactive uranium mill tailing sites to achieve compliance with the general environmental standards to be promulgated by EPA. These sites were generally abandoned uranium processing sites for which a license issued by the NRC or its predecessor, the Atomic Energy Commission (AEC), was not in effect on January 1, 1978.

The other program (title II) was for active sites: Those licensed by the NRC or an affected Agreement State. Requirements for licensed sites include the final disposal of tailings, including the control of radon after milling operations cease. UMTRCA also requires that EPA promulgate standards for these licensed sites, including standards that protect human health and the environment in a manner consistent with standards established under subtitle C of the Solid Waste Disposal Act, as amended. The NRC, or the licensing Agreement State, is responsible for assuring compliance with EPA standards at licensed uranium milling sites.

2. UMTRCA Rulemaking—EPA

UMTRCA required that EPA promulgate standards for title I sites within one year of enactment (1978) and for title II sites within 18 months of enactment. UMTRCA was amended in January 1983 (Pub. L. 97-415) to include a provision to strip EPA of standard setting authority if EPA failed to establish standards by September 30, 1983 for title II sites.

VOL 56 ISS 251 DEC 31 1991 UMI

On April 22, 1980 EPA proposed cleanup standards for inactive uranium processing sites (to be codified at 40 CFR part 192, subpart A), which were made immediately effective as interim standards pending public review and promulgation of final standards (45 FR 27370). These standards were for the cleanup of open lands and buildings contaminated with residual radioactive materials from inactive uranium processing sites. On January 9, 1981 EPA proposed (40 CFR 192, subpart B) disposal standards for inactive uranium processing sites (46 FR 2556). On January 5, 1983 EPA promulgated final rules for the disposal and cleanup of the inactive uranium mill tailings sites under UMTRCA Title I (48 FR 605).

On April 29, 1983 EPA proposed general environmental standards for title II uranium and thorium mill tailings sites. 48 FR 19584. These rules were promulgated on September 30, 1983. 48 FR 45925 (codified at 40 CFR part 192, subparts D and E).

Both the UMTRCA title I and title II standards were challenged in the Tenth Circuit Court of Appeals by several parties (Case Nos. 83–1014, 83–1041, 83–1206, and 83–1300) (Case Nos. 83–2226, 83–2227, 83–2277, 83–2504, 83–2524, 84–1349, 84–1352, 84–1482, and 84–1909). On September 3, 1985, the court upheld all aspects of EPA's standards except the ground water provisions of the title I regulations at 40 CFR 192.20(a)(2)–(3). *American Mining Congress* v. *Thomas*, 772 F.2d 617 (10th Cir. 1985), *cert. denied* 426 U.S. 1158 (1986). On September 24, 1987, EPA proposed new regulations to replace those set aside (40 CFR 192, subpart C, 52 FR 36000). The final rulemaking action is currently under review by the Office of Management and Budget.

As of this date, only two sorts of radon emissions are not governed by EPA's general environmental standards under UMTRCA: (1) Radon emissions during uranium mill operations, and (2) radon emissions after operations but prior to completion of final earthen cover. However, these two areas are addressed by EPA's Clean Air Act rules, as discussed below.

3. UMTRCA Rulemaking—NRC

On August 24, 1979, NRC proposed rules under UMTRCA title II for criteria relating to uranium mill tailings and construction of major plants to 10 CFR 30, 40, 70, 150, and 170 (44 FR 50015). Also on August 24, 1979, NRC promulgated final regulations with request for public comment for uranium mill tailings licensing at 10 CFR 40, appendix A. 44 FR 50012. On October 3, 1980, NRC promulgated final rules to specify licensing requirements for uranium and thorium milling activities. 45 FR 65521 (codified at 10 CFR parts 30, 40, 70, and 150).

As required by Congress, on May 28, 1983, NRC proposed to suspend portions of their 10 CFR part 40, appendix A (appendix A) rules as they would be affected by EPA's recently proposed general UMTRCA standards for uranium mill tailings disposal. 48 FR 23649 (to be codified at 40 CFR part 192, subpart D, 48 CFR 35350). NRC placed in abeyance its 10 CFR part 40 regulations since they could have a significant cost impact on its licensees if NRC regulations were implemented before modification to conform to EPA standards, as required by the 1983 Amendments to UMTRCA (Pub. L. 97–415).

On November 26, 1984, NRC proposed rules at 10 CFR Part 40 that would conform NRC requirements to EPA standards for uranium mill tailings piles (49 FR 46418). Since these proposed rules excluded EPA ground water protection requirements, NRC also issued an ANPR on November 26, 1984 announcing their intention to incorporate ground water protection provisions and other requirements established by EPA (40 CFR part 192, subpart D) for similar wastes into NRC regulations (49 FR 46425). On October 1, 1985, NRC promulgated rules to conform their appendix A regulations to the provisions of EPA's general UMTRCA standards at 40 CFR part 192, as affecting matters other than ground water protection (50 FR 41852). On July 8, 1986, NRC proposed rules for ground water protection and other issues at uranium mill tailings sites (10 CFR part 40, 51 FR 2497). On November 13, 1987, NRC promulgated final rules for ground water protection at uranium mill tailings sites that conformed to provisions of EPA's standards for ground water protection at 40 CFR part 192, subparts D and E (52 FR 43553).

4. Clean Air Act Rulemaking

EPA listed radionuclides as a hazardous air pollutant under section 112 of the CAA on December 27, 1979 (44 FR 76738). Once listed, radionuclides became subject to the requirements of section 112(b)(1)(B) that EPA establish National Emission Standards for Hazardous Air Pollutants (NESHAPs) "at a level which (in the judgment of the Administrator) provides an ample margin of safety to protect the public health from such hazardous air pollutant," or find that they are not hazardous and delist them.

EPA promulgated NESHAPs for emissions of radionuclides on October 31, 1989 for the following source categories: DOE Facilities, Licensees of the NRC and Non-DOE Federal Facilities, Uranium Fuel Cycle Facilities, Elemental Phosphorus Plants, Phosphogypsum Stacks, Underground Uranium Mines, and the operation and disposal of Uranium Mill Tailings Piles. These NESHAPs were published on December 15, 1989. (54 FR 51654).

The NESHAP for the disposal of uranium mill tailings is codified at 40 CFR part 61, subpart T, and it applies to both sites operated by DOE (UMTRCA title I) and sites licensed by NRC and Agreement States (UMTRCA title II). The standard has three primary requirements. First, it imposes an emission limit of 20 pCi/m²-s to radon-222 emissions from a disposed pile. Second, it requires that, once a uranium mill tailings pile or impoundment ceases to be operational, it must be disposed of and brought into compliance with this emission limit within two years of the effective date of the standard (by December 15, 1991) or within two years of the day it ceases to be operational, whichever is later. If it is not physically possible for a mill owner or operator to complete disposal within that time, EPA shall, after consultation with the mill owner or operator, establish a compliance agreement pursuant to EPA's enforcement authority under CAA section 113 to assure that disposal will be completed as quickly as possible. Third, it requires monitoring of the disposed pile to demonstrate compliance with the radon emission limit.

The two year disposal requirement and the radon monitoring requirement are unique to Subpart T as they are not a part of the requirements of the UMTRCA, AEA, or the Clean Water Act (CWA) standards (contained at 40 CFR parts 190, 192, and 440). The numerical radon emission limit, however, is the same as the UMTRCA standard at 40 CFR part 192, subpart D (subpart D).

B. Challenge to Subpart T

The overlap between EPA's Subpart D of the UMTRCA standard and its subpart T of the CAA NESHAP has generated concern that the regulations are unnecessarily burdensome and duplicative. As a result, several petitions for reconsideration have been filed, most notably from NRC and the American Mining Congress (AMC). While these petitions remain pending before EPA, this ANPR is part of EPA's effort to address the issues they raise. Another part of the effort has been a number of meetings between EPA, NRC and affected Agreement States to discuss the dual regulatory programs.

The result of this intensive inter-agency consultation has been the execution of a Memorandum of Understanding (MOU) between EPA, NRC and the affected Agreement States. The MOU was published on October 25, 1991 at 56 FR 55434. The purpose of the MOU is to ensure that owners and operators of existing uranium mill tailings piles licensed by NRC or an affected Agreement State, or owners and operators of piles that will in the future become non-operational, effect final site closure—emplacement of an earthen cover to permanently limit radon emissions to a flux of no more than 20 pCi/m²-s—as expeditiously as practicable considering technological feasibility. This should occur at all current disposal sites by the end of 1997, or within seven years of when the existing operating and standby sites enter disposal status. This objective comports with Congress' concern over timing as reflected in CAA section 112(i)(3), as amended.

EPA has tentatively concluded that with appropriate modifications to the general UMTRCA regulations to ensure specific, enforceable closure deadlines and monitoring requirements, and with the performance by NRC and the affected Agreement States of their other commitments contained in the MOU, the NRC's regulatory program for non-operational uranium mill tailings piles would protect public health with an ample margin of safety.

In a related action published elsewhere in today's FR, and also in accordance with the MOU and with this amendment to UMTRCA 40 CFR part 192, EPA is today also proposing to rescind its Subpart T CAA NESHAP as it applies to non-operational uranium mill tailings disposal sites that are licensed by NRC or an affected Agreement State. This proposal does not concern Subpart T sites that are under the control of the Department of Energy (DOE). These sites are proceeding to closure according to a separate schedule.

In another related action also published elsewhere in today's **Federal Register**, EPA is issuing a final stay of subpart T pending the rescission rulemaking. The stay was proposed on October 25, 1991 (56 FR 55432). All three actions—this ANPR to modify EPA's general subpart D UMTRCA regulations, the proposal to rescind the subpart T NESHAP, and the final stay of subpart T pending these rulemakings—are contemplated by the MOU recently entered into by EPA, NRC, and the affected Agreement States. The MOU, which is published at the end of the proposed rescission of subpart T (as it was for the proposed stay (see 56 FR at 55434)), delineates a course of action designed to achieve the result that the regulatory programs administered by NRC and its affected Agreement States will control radionuclide emissions to ambient air so that public health is protected with an ample margin of safety.

C. Future Rulemaking to Amend 40 CFR Part 192, Subpart D

As envisioned by the MOU and announced by this ANPR, the modifications EPA intends to make through rulemaking to its general UMTRCA regulations for non-operational uranium mill tailings disposal sites at 40 CFR Part 192, (subpart D) are meant to fill a specific regulatory gap that currently exists in subpart D. While subpart D, as currently written, does require eventual compliance with the 20 pCi/m²-s flux standard, it does not mandate that such occur by a specific date. Rather, as promulgated by EPA under subpart D and implemented by NRC (pursuant to its regulations at 10 CFR part 40, appendix A), a title II site licensed by NRC, or an affected Agreement State, could indefinitely continue to emit radon at levels which present risks higher than those allowed under the CAA for emission of hazardous air pollutants. It was this possibility which compelled EPA to promulgate subpart T under CAA section 112. If, however, this gap is filled by appropriate revisions to subpart D to mandate compliance with the 20 pCi/m²-s flux standard in a timely manner, and these changes are implemented by NRC and its regulatory program, EPA may then have the basis for rescinding subpart T pursuant to CAA section 112(d)(9), thereby avoiding unnecessarily duplicative and burdensome regulation.

With these purposes in mind, the specific modifications to subpart D currently being contemplated by EPA would lead to each non-operational uranium mill tailings disposal site receiving (either voluntarily or by administrative order) an amended license from NRC or an affected Agreement State that incorporates an enforceable reclamation plan designed to ensure compliance with the 20 pCi/m²-s flux standard as expeditiously as practicable considering technological feasibility. EPA also intends to propose modifications to include appropriate monitoring provisions designed to verify that the flux standard is achieved and ensure that compliance will be ongoing.

Once these anticipated proposals are promulgated by EPA and implemented by NRC, subpart D should comprehensively address the hazards associated with the process of disposing of uranium mill tailings in a manner that adequately protects public health. EPA believes since it has the authority for the anticipated modifications to subpart D, these actions are consistent with what Congress envisioned when it enacted UMTRCA. EPA's current plan is to propose modifications of subpart D at 40 CFR 192.31(k), 192.31(l), and 192.32(a). These actions also fulfill the intent of Congress of section 112(d)(9) of the Clean Air Act, as amended in 1990, to avoid duplication of effort between government agencies.

D. Request for Comments

EPA is soliciting public comments on today's advanced notice of proposed rulemaking. Send comments to the Docket listed above on or before February 22, 1992. EPA is especially interested in receiving information related to current radon emissions and installed radon emission control methods currently in use, and what generally applicable timing requirements EPA should impose to achieve compliance as expeditiously as practicable considering technological feasibility.

List of Subjects in 40 CFR Part 192

Air pollution control, Radiation protection, Hazardous materials, Uranium, Environmental protection, Hazardous constituents, Groundwater protection, Radon, Radium, and Thorium.

Dated: December 19, 1991.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 641

[Docket No. 911221–1321]

RIN 0648–AE25

Reef Fish Fishery of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: NMFS issues this proposed rule to implement Amendment 4 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). This proposed rule would: (1)

VOL
56
ISS
251
DE
31
1991
UMI

Add almaco jack and banded rudderfish to the management unit; (2) specify that scamp would be counted against the shallow-water grouper quota until that quota is reached, after which scamp would be counted against the deep-water grouper quota; (3) establish a moratorium for a maximum of 3 years on additional commercial permits in the fishery, with allowances for permit transfers and sales of permitted vessels, while a more comprehensive limited access system is developed; (4) commencing with commercial permits for 1993, allow the earned income requirement to be met in either of the 2 years preceding the permit application; (5) revise the definitions of "Charter vessel" and "Headboat"; (6) clarify what constitutes having trawl gear or a longline on board a fishing vessel; and (7) make other minor changes for consistency and clarity. In addition, Amendment 4 would modify the timing and requirements of the framework procedure for implementing or changing certain management measures. The intended effects of Amendment 4 and this rule are to protect the reef fish stocks, some species of which are overfished, to ensure the continued economic viability of the reef fish fishery, to provide the Gulf of Mexico Fishery Management Council (Council) with necessary flexibility in the rebuilding program for reef fish, and to conform the regulations with current usage.

DATES: Written comments must be received on or before February 10, 1992.

ADDRESSES: Comments on the proposed rule should be sent to Robert A. Sadler, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702.

Requests for copies of Amendment 4, which includes a regulatory impact review/environmental assessment (RIR/EA), and the minority report, should be sent to the Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Suite 881, Tampa, FL 33609.

FOR FURTHER INFORMATION CONTACT: Robert A. Sadler, 813-893-3722.

SUPPLEMENTARY INFORMATION: The reef fish fishery of the Gulf of Mexico is managed under the FMP, prepared by the Council, and its implementing regulations at 50 CFR part 641, under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act), 16 U.S.C. 1801 *et seq.*

Amendment 4 to the FMP would: (1) Modify the framework procedure for establishing or modifying certain management measures to provide for receipt of NMFS stock and socioeconomic assessments prior to August each year, and to require the Regional Director to notify the Council within 15 days of receipt of the Council's proposal under the framework procedure, if he decides not to accept it; (2) add almaco jack and banded rudderfish to the reef fish management unit; (3) retain scamp in the shallow-water grouper category until the quota is met and the shallow-water grouper fishery is closed, after which, scamp landings would be counted under the deep-water grouper quota for the remainder of the fishing year; (4) establish a moratorium, for a maximum of 3 years, on the acceptance of new applications for commercial vessel permits, with allowances for certain permit transfers and sales of permitted vessels (and retirement of permits not renewed); and (5) commencing with commercial permits for 1993, allow the earned income requirement to be met in either of the 2 years preceding the permit application.

A minority report was submitted on Amendment 4 that objects to the 3-year moratorium on the issuance of commercial vessel permits and development of a more comprehensive limited access system. A response to that minority report will be included in the preamble to the final rule on Amendment 4. The availability of Amendment 4 and the minority report was announced in the **Federal Register** on November 26, 1991 (56 FR 59922).

Changes to the Framework Procedure

The current framework procedure for implementing or modifying certain management measures provides for receipt by the Council from NMFS of stock and socioeconomic assessment information in April of each year. Landings data for the previous fishing year, which form a significant component of the assessment information, are typically not available by April. Consequently, data approximately 2 years old must be relied upon for adjusting management measures. Amendment 4 proposes that stock and socioeconomic assessments be provided prior to August, thus allowing the assessments to include more timely landings data.

Amendment 4 proposes to require the Regional Director, Southeast Region, NMFS (Regional Director), to notify the Council within 15 days of receipt of the Council's recommended changes under the framework procedure when he decides not to publish as a proposed rule, or otherwise holds in abeyance, the recommended changes. Notification to the Council would include the reasons for NMFS's concerns, suggested changes to the proposed management measures, and the Regional Director's intended action. The notification would specify: (1) The applicable law with which the recommended changes are inconsistent; (2) the nature of such inconsistencies; and (3) recommendations to conform the recommended changes with applicable law. This action would ensure timely additional guidance to the Council regarding framework adjustments that the Regional Director initially determines to be inconsistent with applicable law. This requirement is similar to that required by the Magnuson Act for disapproval of amendments to a fishery management plan.

It is expected that these changes to the framework procedures would provide a more stable condition for Council determinations on specific management issues and may reduce management costs.

Additions to the Management Unit

The addition of almaco jack and banded rudderfish to the management unit would have little or no immediate impact on the fishery or impact on the resource, but will allow management measures to be implemented on these species by framework procedure, if required, when stock assessment information becomes available. The anticipated impacts of such future action would be analyzed and discussed at that time.

Scamp

Amendment 4 proposes to allow scamp to be harvested throughout the year until both the shallow-water grouper and deep-water grouper quotas are met. Scamp would be counted under the shallow-water grouper quota until that quota is reached and, thereafter, under the deep-water grouper quota. Scamp are currently classified as a shallow-water species of grouper but are caught in both shallow-water and deep-water fishing operations. When the shallow-water grouper fishery is closed, the continued catch of scamp in deep-water fishing operations results in waste of the resource because they are usually dead from embolism when brought up from deeper water. The proposed action will reduce such waste. Because scamp are an incidental, minor component of the grouper fishery that cannot be targeted, it is not likely that catches will significantly affect the timing of a closure of either component of the grouper fishery or that an illegal shallow-water fishery for scamp will develop after closure of the shallow-water grouper fishery.

Permit Moratorium

Amendment 4 proposes to cap the number of participants in the commercial reef fish fishery for a maximum of 3 years, pending Council development and consideration of a more comprehensive limited access program. The reef fish fishery has over 1,700 permitted vessels competing for a limited reef fish population. The gear used is not highly selective, and single-species fishery closures are hampered by the multi-species nature of the catch. Accordingly, several of the major species, already overfished, have continued to decline in abundance despite the comprehensive management regime. The fishing capacity in the fishery is considered to be excessive compared to the available resource. The proposed moratorium is a first step towards solving these problems by stabilizing fishing effort.

The moratorium would be effective on the effective date of the final rule that implements Amendment 4. Thereafter, with two exceptions, no applications for new vessel permits would be accepted, and a permit holder would have to maintain permit eligibility, i.e., demonstrate that more than 50 percent of his or her earned income was derived from commercial, charter, or headboat fishing, in order to renew a permit. A permit that is not renewed, or is revoked, would not be reissued. During the moratorium, only those vessels that were permitted in 1991, or vessels for which the applicant qualifies on the basis of earned income in 1991 and applies before the effective date of the moratorium, would be permitted in the fishery. Two exceptions to the moratorium on new permits, in cases of vessel transference, are described below.

As one exception, an owner would be allowed to substitute another vessel owned by him for one currently permitted. Such substitution would alleviate problems caused by loss of vessels through sinking or permanent structural damage.

As the second exception, a permitted vessel would be entitled to a permit upon its sale. Transfer of a permit upon sale would alleviate possible reduction of a vessel's value to a potential buyer who does not meet the earned income requirement. If the purchaser does not meet the earned income requirement for the vessel permit, he or she would have to meet that requirement during a calendar year not later than the first calendar year after the purchase. This temporary exemption from the earned income requirement could not be used by a purchaser when the seller has not met the earned income requirement. Limiting the temporary exemption from the earned income requirement would prevent speculative gains by a person who has no intention of entering the fishery.

The proposed moratorium is expected to enhance stability while both the fishing industry and the management agencies collect the necessary information for a more comprehensive limited access system for the fishery. Stability in the fishery, the collection of necessary information, and, ultimately, a comprehensive limited access system are expected to result in positive benefits.

Earned Income Requirement

Under the current earned income requirement for a vessel permit, an applicant must demonstrate that more than 50 percent of his or her earned income was derived from commercial, charter, or headboat fishing during the calendar year preceding the application. The current income requirement has no hardship allowance, i.e., it does not recognize that sickness of the owner/operator, prolonged vessel repairs, or other temporary problems could preclude a person from meeting the income requirement for a single year. To address this problem, Amendment 4 proposes that, commencing with vessel permits for 1993, the earned income requirement may be met during either of the 2 years preceding the permit renewal. Implementation of this change is expected to have a positive economic impact on participants in the fishery.

Additional information on these proposed changes is contained in Amendment 4.

Additional Changes Proposed by NMFS

This rule would modify the definitions of "Charter vessel" and "Headboat" to conform them to current usage, and would correct inconsistent language regarding when the bag limits apply to charter vessels and headboats.

Among other things, the reef fish regulations specify that the bag and possession limits for certain reef fish apply to a person who fishes from a vessel: (1) With trawl gear on board; or (2) with a longline on board, when such vessel is fishing or has fished on its present trip in the specified longline restricted area (50 CFR 641.24(a)(2) (ii) and (iii)). This rule would add specifications of what constitutes having trawl gear or a longline on board a fishing vessel. Removal of all trawl doors or nets would constitute removal of trawl gear. Removal of the longline hauler, the longline cable, or all gangions would constitute removal of a longline. NMFS expects that removal from a vessel of all gangions would be the least cumbersome and most frequently used means to remove a longline. NMFS believes the specified gear removals are the least burdensome of the practicable methods of rendering a trawl or a longline inoperable. Other methods could be readily changed while at sea and, thus, would pose significant difficulties for enforcement.

Finally, a new section would be added to describe the types of management measures that could be established or modified by means of the framework procedure specified in the FMP, as amended. The procedure, with Amendment 4's proposed changes, is summarized below to provide the public appropriate information.

The framework procedure for establishing an annual total allowable catch (TAC) and adjusting management measures provides for the Southeast Science and Research Director, NMFS, to prepare or update the stock assessment for each species or stock complex annually. The Council is required to appoint a scientific stock assessment panel to review the information and prepare a report specifying a range of acceptable biological catch (ABC) for each stock or stock complex in need of catch restrictions for attaining or maintaining optimum yield. The panel should include in the report a risk analysis, economic and social impacts, and recommendations for management measures to attain the ABC. The Council, after holding a public hearing(s) and reviewing comments on the report, is required to specify a TAC from within or below the range of ABC or a series of TACs to attain the selected level of ABC by 1994.

The Council must subdivide the TACs into commercial and recreational allocations. The Council then provides the Regional Director its recommendations for TACs for each species or species group, proposed regulations revising quotas and management measures necessary to attain each TAC, the Council's rationale, and analyses of impacts (EA and RIR) of the proposed regulations. A proposed rule containing the recommended TACs, quotas, and harvest restrictions is published in the **Federal Register** for public comment up to 30 days. If the Regional Director does not agree with the recommendation, the Regional Director must notify the Council, within 15 days, of his reasons for disagreement and recommendations for conforming the Council's proposed measures with the requirements of applicable law. If

VOL
56
ISS
251
DE
31
1991
UMI

the Regional Director concludes after review of public comment that the proposed regulations are consistent with the FMP objectives and other applicable law, he implements them by final rule published in the **Federal Register**. The FMP, as amended, may be consulted for additional detail on this procedure. The framework procedure was instituted by Amendment 1, modified by Amendment 3, and would be further modified by Amendment 4. The types of management measures that may be established or modified by this procedure are set forth in § 641.28 of this proposed rulemaking.

Classification

At this time, the Secretary has not determined that Amendment 4, which this proposed rule would implement, is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making that determination, will take into account the data, views, and comments received during the comment period.

This proposed rule is exempt from the procedures of E.O. 12291 under section 8(a)(2) of that order. It is being reported to the Director, Office of Management and Budget, with an explanation of why it is not possible to follow the procedures of that order.

The Assistant Administrator for Fisheries, NOAA, has initially determined that this proposed rule is not a "major rule" requiring the preparation of a regulatory impact analysis under E.O. 12291. This proposed rule, if adopted, is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions; or a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Council prepared a regulatory impact review (RIR) as part of Amendment 4, which concludes that this rule, if adopted, would have net positive benefits. A summary of the regulatory impacts of individual management measures was included above in the discussion of each measure. Additional analysis and discussion is contained in the RIR.

In addition, the RIR concludes that this rule, if adopted, would not have a significant economic impact on a substantial number of participants in the reef fish fishery, most of whom are small business entities. Accordingly, the General Counsel of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that the proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities, and a regulatory flexibility analysis was not prepared.

The Council prepared an environmental assessment (EA) that discusses the impact on the environment as a result of this rule. The EA, which is contained in Amendment 4, may be obtained at the address listed above, and comments on it are requested.

The Council has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management programs of Alabama, Florida, Louisiana, and Mississippi. Texas does not participate in the coastal zone management program. These determinations have been submitted for review by the responsible state agencies under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

List of Subjects in 50 CFR Part 641

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: December 24, 1991.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR part 641 is proposed to be amended as follows:

PART 641—REEF FISH FISHERY OF THE GULF OF MEXICO

1. The authority citation for part 641 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 641.2, the definitions for *Charter vessel* and *Headboat* are revised, and in the definition for *Reef fish*, in paragraph (a) under "Jacks—Carangidae Family", two new species are added after "Lesser amberjack" to read as follows:

§ 641.2 Definitions.

* * * * *

Charter vessel means a vessel less than 100 gross tons (90.8 metric tons) that meets the requirements of the Coast Guard to carry six or fewer passengers for hire and that carries a passenger for hire at any time during the calendar year. A charter vessel with a permit issued under § 641.4 is considered to be operating as a charter vessel when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew.

* * * * *

Headboat means a vessel that holds a valid Certificate of Inspection issued by the Coast Guard to carry passengers for hire. A headboat with a permit issued under § 641.4 is considered to be operating as a headboat when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew.

* * * * *

Reef fish * * *

(a) * * *

Jacks—Carangidae Family

* * * * *

Almaco jack, *Seriola rivoliana*

Banded rudderfish, *Seriola zonata*

* * * * *

3. In § 641.4, paragraphs (a)(2), (b)(2)(xi), and the first sentence of paragraph (g) are revised, and a new paragraph (l) is added to read as follows:

§ 641.4 Permits and fees.

(a) * * *

(2) A qualifying owner or operator of a charter vessel or headboat may obtain a permit. However, a charter vessel or headboat must adhere to the bag limits when operating as a charter vessel or headboat.

* * * * *

(b) * * *

(2) * * *

(xi) A sworn statement by the applicant certifying that more than 50 percent of his or her earned income was derived from commercial, charter, or headboat fishing during the calendar year preceding the application, except that, for renewal of permits for 1993 and ensuing years, the earned income requirement may be met in either of the two calendar years preceding the application;

* * * * *

(g) *Transfer.* Except as provided for under paragraph (l) of this section, a permit issued under this section is not transferable or assignable. * * *

* * * * *

(l) *Moratorium on permits.* The provisions of this paragraph (l) are effective for 3 years commencing on the effective date of this rule.

(1) An application for a vessel permit under this section that is postmarked or hand-delivered after the effective date of this rule will not be accepted, except for an application for renewal of an existing vessel permit or as provided in paragraphs (l), (2) and (3) of this section.

(2) An owner of a permitted vessel may transfer the vessel permit to another vessel owned by him or her by returning the existing permit with an application for a vessel permit for the replacement vessel.

(3) A person purchasing a vessel with a permit issued under this section may obtain a permit for that vessel, and renew the permit for that vessel for the first calendar year after the purchase, without meeting the earned income requirement of paragraph (b)(2)(xi) of this section, provided that the seller met the earned income requirement. However, to renew the vessel permit for the second calendar year after the purchase, the new owner must meet that earned income requirement not later than the first calendar year after the purchase takes place.

(4) A permit that is not renewed or is revoked will not be reissued.

4. In § 641.24, paragraph (a)(2)(iv) is revised and new paragraphs (a)(4) and (a)(5) are added to read as follows:

§ 641.24 Bag and possession limits.

(a) * * *

(2) * * *

(iv) That is operating as a charter vessel or headboat; or

* * * * *

(4) For the purpose of paragraph (a)(2)(ii) of this section, a vessel is considered to have trawl gear on board when trawl doors and a net are on board. Removal from the vessel of all trawl doors or all nets constitutes removal of trawl gear.

(5) For the purpose of paragraph (a)(2)(iii) of this section, a vessel is considered to have a longline on board when a power-operated longline hauler, a cable of diameter and length suitable for use in the longline fishery, and gangions are on board. Removal of any one of these three elements, in its entirety, constitutes removal of a longline.

* * * * *

5. In § 641.25, paragraphs (b) and (c) are revised to read as follows:

§ 641.25 Commercial quotas.

* * * * *

(b) Deep-water groupers, i.e., yellowedge grouper, misty grouper, warsaw grouper, snowy grouper, speckled hind, and, after the commercial quota for shallow-water grouper is reached, scamp, combined—1.8 million pounds.

(c) Shallow-water groupers, i.e., all other groupers, including scamp before the commercial quota for shallow-water groupers is reached, but excluding jewfish, combined—9.2 million pounds.

* * * * *

§ 641.28 [Redesignated as § 641.29]

6. Section 641.28 is redesignated as § 641.29 and a new § 641.28 is added to read as follows:

§ 641.28 Adjustment of Management Measures.

In accordance with the procedures and limitations of the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico, the Regional Director may establish or modify for species or species groups in the reef fish fishery the following: Target dates for rebuilding overfished species, total allowable catch, bag limits, size limits, vessel trip limits, closed seasons or areas, gear restrictions, and quotas.

ACTION

Compliance With Privacy Act of 1974

AGENCY: ACTION.

ACTION: Notice of systems of records.

SUMMARY: Notice is hereby given that in accordance with the Privacy Act of 1974, 5 U.S.C. 552a(e)(4), ("the Act"), ACTION proposes to publish a new notice of systems of records as set forth below.

Special note should be taken of the Preliminary Statement to the systems of records containing an indication of general routine uses, general regulations as to notification, access and contest, and other material applicable to ACTION record systems generally. The Agency desires to avoid unnecessary repetition and duplication in the publication of each system of records which might make it difficult for the public to review and locate a system in which a record might be available. The publication of general routine uses and exemptions does not serve as an indication that each system will be normally used or usable for such purposes or subject to such exemptions, but that the use of any system for such routine use shall be permitted upon request of a designated routine user.

This notice does not include specific identification of certain Office of Personnel Management (OPM) systems of records in the custody of the Agency because OPM has assumed responsibility for publishing government-wide notices. OPM's systems of records pertain primarily to Federal employee personnel records.

EFFECTIVE DATE: January 30, 1992.

ADDRESS: Comments may be mailed or delivered to the Director, Administrative and Management Services Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

FOR FURTHER INFORMATION CONTACT: Edward F. Carey, Privacy Act Officer, 202–606–5242 or Stewart Davis, Deputy General Counsel, 202–606–4833. Copies of these Systems may be obtained in an alternate format: TDD, 202–606–5256 or Management Services Branch, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

SUPPLEMENTARY INFORMATION: Peace Corps was an autonomous part of the ACTION agency, and was covered by ACTION's Privacy Act regulations (45 CFR part 1224). This notice being published by ACTION officially excludes Peace Corps from its systems of records because it is now an independent agency.

Dated in Washington, DC on December 19, 1991.

Jane A. Kenny

Director, ACTION.

The Agency proposes to publish the following notice of systems of records:

Notice of Systems of Records—Preliminary Statement

The term *Agency* when used in this notice refers to ACTION.

Operating Units—The names of the operating units within the Agency to which a particular system or records pertains are listed under the system manager and address section of each system notice.

Official Personnel Files—Official personnel files of Federal employees in the General Schedule in the custody of the Agency are considered the property of the Office of Personnel Management. Access to such files shall be in accordance with such notices published by OPM. Access to such files in the custody of the Agency will be granted to individuals to whom such files pertain upon request to the Director, Personnel Management Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

Various offices in the Agency maintain files which contain copies of miscellaneous personnel material affecting ACTION employees. These include copies of standard personnel forms, evaluation forms, etc. These files are kept only for immediate office reference and are considered by the Agency to be part of the personnel file system. The Agency's internal regulations provide that such information is a part of the general personnel files and can be disclosed only through the Director, ACTION Personnel Management Division, in order that he or she may insure that any material to be disclosed is relevant, current, and fair to the individual employee. Also, it is the policy of the Agency to limit the use of such files and to encourage the destruction of as many as possible.

Statement of General Routine Uses—The following general routine uses are incorporated by this reference into each system of records set forth herein, unless specifically limited in the system description.

1. In the event that a record in a system of records maintained by the Agency, indicates, either by itself or in combination with other information in the Agency's possession, a violation or potential violation of the law (whether civil, criminal, or regulatory in nature, and whether arising by statute or by regulation, rule or order issued pursuant thereto), that record may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation, or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto. Such referral shall include, and be deemed to authorize (1) any and all appropriate and necessary uses of such records in a court of law or before an administrative board or hearing, and (2) such other interagency referrals as may be necessary to carry out the receiving agencies' assigned law enforcement duties.

2. A record may be disclosed as a routine use to designated officers and employees of other agencies and departments of the Federal government having an interest in the individual for employment purposes including the hiring or retention of any employee, the issuance of a security clearance, the letting of a contract or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter involved, provided, however, that other than information furnished for the issuance of authorized security clearances, information divulged hereunder as to full-time volunteers under Title I of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4951) shall be limited to the provision of dates of service and a standard description of service as heretofore provided by the Agency.

3. A record may be disclosed as a routine use in the course of presenting evidence to a court, magistrate or administrative tribunal of appropriate jurisdiction and such disclosure shall include disclosures to opposing counsel in the course of settlement negotiations.

4. A record may be disclosed as a routine use to a member of Congress submitting a request involving an individual who is a constituent of such member who has requested assistance from the member with respect to the subject matter of the record.

5. Information from certain systems of records, especially those relating to applicants for Federal employment or volunteer service, may be disclosed as a routine use to designated officers and employees of other agencies of the Federal government for the purpose of obtaining information as to suitability qualifications and loyalty to the United States Government.

6. Information from records systems may be disclosed to any source from which information is requested in the course of an investigation to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation, and to identify the type of information requested.

7. Information in any system may be used as a data source, for management information, for the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies. Information may also be disclosed to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act.

8. A record from any system of records may be disclosed as a routine use of the National Archives and Records Administration in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

9. A record may be disclosed to a Federal or state grand jury agent pursuant to a Federal or state grand jury subpoena or prosecution request that such record be released for the purpose of its introduction to a grand jury.

10. A record may be referred to suspension/debarment authorities, internal to the Agency, when the record released is germane to a determination of the propriety of, or necessity for, a suspension or debarment action.

11. A record may be disclosed to a contractor, grantee or other recipient of Federal funds when the record to be released reflects serious inadequacies with the recipient's personnel, and disclosure of the record is for the purpose of permitting the recipient to effect corrective action in the Government's best interests.

12. A record may be disclosed to a contractor, grantee or other recipient of Federal funds when the recipient has incurred an indebtedness to the Government through its receipt of Government funds, and release of the record is for the purpose of allowing the debtor to effect a collection against a third party.

Location of Regional Offices—The Agency maintains nine (9) Regional Offices with State Offices under their jurisdiction. The Regional Offices, their addresses, and the States within their respective jurisdictions are listed below. In the event of any doubt as to whether a record is maintained in a Regional Office, a query should be directed to the Director, Administrative and Management Services Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525, who shall furnish all assistance necessary to locate a specified record.

Region I, 10 Causeway Street, room 473, Boston, MA 02222 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont).

Region II, 6 World Trade Center, room 756, New York, NY 10048 (New Jersey, New York, Puerto Rico, and the Virgin Islands).

Region III, U.S. Customs House, 2nd and Chestnut Streets, room 108, Philadelphia, PA 19106 (Delaware, District of Columbia, Kentucky, Maryland, Ohio, Pennsylvania, Virginia, and West Virginia).

Region IV, 101 Marietta Street, NW., room 1003, Atlanta, GA 30323 (Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, and Tennessee).

Region V, 175 West Jackson Boulevard, room 1207, Chicago, IL 60604 (Illinois, Indiana, Iowa, Michigan, Minnesota, and Wisconsin).

Region VI, 1100 Commerce Street, room 6B11, Dallas, TX 75242 (Arkansas, Kansas, Louisiana, Missouri, New Mexico, Oklahoma, and Texas).

Region VIII, Executive Tower Building, room 2930, 1405 Curtis Street, Denver, CO 80202 (Colorado, Montana, Nebraska, North Dakota, South Dakota, Utah, and Wyoming).

Region IX, 211 Main Street, room 530, San Francisco, CA 94105 (American Samoa, Arizona, California, Guam, Hawaii, and Nevada).

Region X, Jackson Federal Building, 915 Second Ave., suite 3190, Seattle, WA 98174 (Alaska, Idaho, Oregon, and Washington).

Notification—Individuals may inquire whether any system contains information pertaining to them by addressing the System Manager in writing. Such request should include the name and address of the individual, his or her social security number, and any relevant data concerning the information sought, and, where possible, the place of assignment or employment, etc. In case of any doubt as to which system contains a record, interested individuals should contact the Director, Administrative and Management Services Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525, who has overall supervision of records systems and who will provide assistance in locating and/or identifying appropriate systems.

Access and Contest—In response to a written request by an individual, the appropriate System Manager arranges for access to the requested record or advises the requester if no record exists. If an individual wishes to contest the content of any record, he or she may do so by addressing a written request to the Director, Administrative and Management Services Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525. The Director shall provide all necessary information regarding such contest and appeal.

ACTION–1

SYSTEM NAME:

Accounts Payable File.

SYSTEM LOCATION:

Accounting and Financial Management Division, ACTION, Room

VOL 56 ISS 251 DEC 31 1991 UMI

3100, 100 Vermont Avenue, NW, Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals to whom the agency owes money.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name of payee, address, taxpayer, identification number, amount owed, date of liability, amount paid, schedule number authorizing Treasury to issue payment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973, and the Budget and Accounting Procedures Act, 1950.

PURPOSE:

To maintain a current record of amounts owed and paid by the agency.

ROUTINE USE OF RECORDS IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement. Data is also released to the Internal Revenue Service in accordance with the Internal Revenue Code.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders which are stored in locked metal cabinets.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Records are available only to staff in the Accounting & Financial Management Division and other appropriate ACTION officials with the need for such records in the performance of their official duties.

RETENTION AND DISPOSAL:

Records are held for three (3) years and then retired to the Federal Records Center.

SYSTEM MANAGER AND ADDRESS:

Director, Accounting & Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

To determine whether there is a record in the system about individual, that individual should submit a request in writing to the System Manager giving name, taxpayer identification number, and address.

RECORD ACCESS PROCEDURES:

See Notification procedures.

CONTESTING RECORD PROCEDURES:

Anyone desiring to contest or amend information contained in this system should write to the System Manager at the address given and set forth the basis for which the record is believed to be incomplete or incorrect.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from documents submitted by individuals covered by the system as well as documents issued by ACTION officials involved with managing funds.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-2

SYSTEM NAME:

Accounts Receivable and Advances File.

SYSTEM LOCATION:

Accounting and Financial Management Division, ACTION, Room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals owing money to the agency.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name of debtor, address, taxpayer identification number, amount owed, date of liability, amount collected.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973, and the Budget and Accounting Procedures Act of 1950.

PURPOSE:

To maintain a current record of amounts owed and paid to the agency.

ROUTINE USE OF RECORDS IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement. Data may be disclosed to the Department of Justice or to the General Accounting Office in connection with requests to institute litigation or approve writing off a debt when ACTION is unable to collect a debt through its own efforts.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders which are stored in locked metal cabinets.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Records are available only to staff in the Accounting & Financial Management Division and other appropriate ACTION officials with the need for such records in the performance of their official duties.

RETENTION AND DISPOSAL:

Records are held for three (3) years and then retired to the Federal Records Center.

SYSTEM MANAGER AND ADDRESS:

Director, Accounting & Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

To determine whether there is a record in the system about an individual, that individual should submit a request in writing to the System Manager giving name, taxpayer identification number, and address.

RECORD ACCESS PROCEDURES:

See Notification procedures.

CONTESTING RECORD PROCEDURES:

Anyone desiring to contest or amend information contained in this system should write to the System Manager and set forth the basis for which the record is believed to be incomplete or incorrect.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from documents submitted by individuals covered by the system as well as documents issued by ACTION officials involved with managing funds.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-3

SYSTEM NAME:

ACTION Domestic Full-Time Volunteer Census Master File.

SYSTEM LOCATION:

ACTION/VISTA, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any person who has served or is serving as a VISTA Volunteer or other full-time, stipended volunteer under an ACTION program.

CATEGORIES OF RECORDS IN THE SYSTEM:

The records maintained contain information extracted from the volunteer's application, information about the volunteer's period of service, and information about the volunteer's history with ACTION.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973.

PURPOSE:

The system of records was established to maintain service histories on all current and former VISTA Volunteers and other full-time, stipended volunteers serving in ACTION programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on magnetic tape; disks and hard copy are kept in a locked room when not in use.

RETRIEVABILITY:

Records are retrieved by social security number and the first four letters of the Volunteer's last name.

SAFEGUARDS:

The material on tapes and disks is generally available only to ACTION's Automation Staff and is so coded as to be unavailable to anyone else. Hard copy records are available only to ACTION staff with a need for such records in the performance of their duties.

RETENTION AND DISPOSAL:

These records are maintained permanently.

SYSTEM MANAGER AND ADDRESS:

Director of VISTA, ACTION, 1100 Vermont Avenue, NW Washington, DC 20525

NOTIFICATION PROCEDURES:

Volunteers and former Volunteers wishing to determine if this system contains their records should contact the Director of VISTA, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525, providing name, social security number, and dates of volunteer service.

RECORDS ACCESS PROCEDURES:

Volunteers and former Volunteers wishing access to information about their records should contact the Director of VISTA, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

CONTESTING RECORD PROCEDURES:

A Volunteer wishing to amend his/her record may do so by addressing such request to the Director, Administrative and Management Services Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

RECORD SOURCE CATEGORIES:

The data is obtained from the Volunteer application and status change and payroll change notices.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-4

SYSTEM NAME:

ACTION Domestic Full-Time Volunteer Personnel File.

SYSTEM LOCATION:

All ACTION Regional Offices and State Offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All active VISTA Volunteers and any other full-time, stipended Volunteers assigned under an ACTION program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records maintained contain Volunteer application and reference forms, volunteer status and payroll information, volunteer travel vouchers, future plans forms, including evaluation of service, and general correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973.

PURPOSE:

This system of records was established to maintain information on VISTA Volunteers and other full-time ACTION Volunteers while they are assigned to local sponsoring organizations

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The content of these records may be disclosed to the Volunteers sponsor concerning placement, performance, support and related matters, as well as to ACTION Regional and State staff and other ACTION officials with a need for such records in the performance of their duties. Also see General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in folders in filing cabinets with manipulation proof combination locks, or in a room with a combination lock on the door.

RETRIEVABILITY:

Records are retrievable alphabetically by last name.

SAFEGUARDS:

Records in the system are available only to appropriate ACTION staff in Regional or State Offices and other appropriate officials of ACTION with the need for such records in the performance of their duties.

RETENTION AND DISPOSAL:

Records are retained for one (1) year after Volunteer has terminated and then retired to the Federal Records Center where they are maintained for six (6) years.

SYSTEM MANAGER AND ADDRESS:

The system manager is the Executive Officer in each ACTION Region.

NOTIFICATION PROCEDURES:

Volunteers wishing to determine if this system contains their records should contact the ACTION Regional Executive Officer for the Region in which the Volunteer is assigned.

RECORD ACCESS PROCEDURES:

Volunteers wishing access to information about their records should contact the particular ACTION Regional Executive Officer providing name, social security number, and dates and location of volunteer service.

CONTESTING RECORD PROCEDURES:

A Volunteer wishing to amend his/her record may do so by addressing a request to the Director, Administrative and Management Services Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

RECORD SOURCE CATEGORIES:

The data is supplied by the Volunteer or through forms signed and executed by the Volunteer, or by ACTION Regional or State Office personnel.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-5

SYSTEM NAME:

ACTION Employee and Applicant Records File.

SYSTEM LOCATION:

ACTION, Personnel Management Division, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees; applicants; any individual involved in a grievance or grievance appeal or who has filed a complaint with the Department of Labor, Federal Labor Relations Council, Federal Mediation and Conciliation Service, or similar organization; and individuals considered for access to classified information.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) The Staff Security Files contain investigative information regarding an individual's character, conduct, behavior in the community where he or she lives; loyalty to the U.S. Government; arrests and convictions for any violations against the law; reports or interviews with former supervisors, coworkers, associates, educators, etc., about qualifications of an individual for a specific position; reports of inquiries with law enforcement agencies, former employers, educational institutions attended; and other similar information developed from the above.

(2) The Grievance, Appeal and Arbitration Files contain copies of petitions, complaints, charges, responses, rebuttals, evidentiary materials, briefs, affidavits, statements, records of hearings and decisions or findings of fact with respect thereto and incidental correspondence regarding complaints and appeals with respect to grievances and arbitration matters.

(3) The Employees Indebtedness Files contain records which are primarily correspondence regarding alleged indebtedness of ACTION employees, including employees' responses, the agency's response to the employee and/or creditor and administrative correspondence and records relating to agency assistance to the employee in resolving the indebtedness, if appropriate.

(4) The Employee Reemployment and Repromotion Priority Consideration Files list a person's name and the positions he or she was considered for, dates of consideration and a copy of the individual's latest Standard Form 171 and performance evaluation.

(5) The Performance Evaluation File consists of the annual performance evaluations of employee performance prepared by supervisors and reviewed by supervisory reviewing officials, together with comments, if any, by the employee evaluated.

(6) The Management-Union Records System consists of automated data printouts showing an employee's name, grade, series, title, organizational entity and other data which determine inclusion or exclusion from the bargaining unit under the existing union contract. The record also contains a printout showing the amount of dues withheld from each employee who has authorized such withholding, and other related data.

(7) The Personnel Management System is a computer based record which includes data relating to tenure, benefits eligibility, awards, etc., and other data needed by Personnel and agency managers.

(8) The Inactive Service Record Card and/or the Personnel History Program contain a record of personnel actions made during employment, forwarding address, reason for leaving, social security number, date of birth, tenure, information regarding date and reason for termination.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973, provisions of the Federal Personnel Manual, Executive Orders concerning management relations with employee organizations and Executive Order 10450, and various acts of Congress relating to personnel investigations authorizing the same by the Office of Personnel Management whose responsibility can, under Civil Service regulations and law, be delegated in whole or in part to agencies.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OR USERS AND THE PURPOSES OF SUCH USES:

As indicated below, the subsystems incorporate all or some of the published routine uses.

(1) Staff Security Files—in addition to our general routine uses may be disclosed to the Office of Personnel Management as part of the central personnel investigation records system.

(2) Grievance, Appeal and Arbitration Records and Files—in addition to our general routine uses may be disclosed and used: (a) To OPM; the Merit System Protection Board; and the Office of Special Counsel, Merit System Protection Board, on request in conjunction with any appeal or in conjunction with its official duties with regard to personnel matters and investigations regarding complaints of Federal employees and applicants. (b) To designated hearing examiners, arbitrators and third-party appellate authorities involved in the hearing or appeal procedures.

(3) Employees Indebtedness Records and Files—may be released under our routine uses numbers 1, 2, and 3 except that under routine use number 1 records may be released only to an appropriate Federal agency and the records may also be referred to a court of law or an administrative board of hearing on matters related to probation and parole.

(4) Employee Reemployment and Repromotion Priority Consideration Records and Files—in addition to our general routine uses may be disclosed to (a) OPM as part of the OPM personnel management evaluation system, and (b) to OPM for information concerning reemployment and repromotion rights.

(5) Performance Evaluation Files—in addition to our general routine uses may be disclosed to OPM in connection with any request for information or inquiry as to Federal personnel regulations.

(6) Management Union Records—in addition to the general routine uses may be disclosed to and used for: (a) The ACTION employees union for maintenance of its dues and inclusion in the bargaining unit, (b) the Treasury Department for preparation of payroll checks with appropriate withholding of dues, and (c) OPM for reports of management/labor relations.

(7) Personnel Management Information System—used by agency officials for day-to-day work information; statistical reports without personal identifiers and for in-house reports relating to management. Information contained in this record is reflected in the individual's official personnel folder.

(8) Inactive Service Record Care File/Personnel History Program—is used by personnel staff to verify service and for day-to-day information.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders, floppy disks, lists or looseleaf binders and are stored in metal file cabinets with a lock or in secured rooms with access limited to those employees whose duties require access. Where data is obtained via computer, controlled access is maintained through computer security control procedures.

RETRIEVABILITY:

Records are indexed by name, social security number or employee number.

SAFEGUARDS:

Records are generally available to ACTION employees having a need for such records in the performance of their duties. Generally, the Security Files are available only to office heads or security personnel. Such personnel must have an appropriate security clearance.

RETENTION AND DISPOSAL:

After termination, death or retirement or consideration of an applicant, the Staff Security Files are kept in the security office three (3) years and then retired to a Federal Records Center for twenty-seven (27) years and then destroyed. The Grievances, Appeals and Arbitration Files are retained indefinitely in the Personnel Management Division. The Employee Indebtedness Files are destroyed on a bi-annual basis or when the problem is resolved. The Employee Reemployment and Repromotion Priority Consideration Files are retained according to length of reemployment or repromotion eligibility. The Performance Evaluation Files are retained one year or until superseded. The Personnel Management Information system records and the Inactive Employee Service Record Cards/Personnel Program data are kept indefinitely in the Personnel Management Division. The management-Union Lists are retained until superseded by a corrected or updated list.

SYSTEM MANAGER AND ADDRESS:

Director, Personnel Management Division, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

See the Notification paragraph in the Preliminary Statement.

RECORD ACCESS PROCEDURES:

See the Notification paragraph in the Preliminary Statement.

CONTESTING RECORD SOURCE CATEGORIES:

Same as "Record Access Procedures".

RECORD SOURCE CATEGORIES:

From the individual, the official personnel folder, statistical and other information developed by Personnel Management Division staff, such as enter on duty date and within grade increase due dates; agency supervisors and reviewing officials; individual employee fiscal and payroll records alleged creditors of employees; witnesses to occurrences giving rise to a grievance, appeal or other action; hearing records and affidavits and other documents used or usable in connection with grievance, appeal and arbitration hearings. Information contained in the Staff Security files is obtained from (a) applications and other personnel and security forms furnished by the individual, (b) investigative material furnished by other Federal agencies, (c) by personal investigation or written inquiry from associates, police departments, courts, credit bureaus, medical records, probation officials, prison officials, and other sources as may be developed from the above, and (d) from the individual.

ACTION-6

SYSTEM NAME:

ACTION Employees/Volunteers Occupational Injury/Illness Reports and Claims File.

SYSTEM LOCATION:

Headquarters, ACTION, room 5100, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

ACTION staff persons and full-time Volunteers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports of work related injuries and illnesses and claims for workers' compensation submitted to Department of Labor.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Employees Compensation Act & OSHA Act.

PURPOSE:

To maintain injury/illness reports data, to file and submit workers' compensation claims on behalf of ACTION staff and full-time Volunteers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To determine annual work related injury/illness data re: ACTION staff, and to identify trends if possible. To prepare and submit workers' compensation claims. Additionally, please see General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in folders in metal file cabinet with tamper proof combination lock.

RETRIEVABILITY:

Records are maintained by name in alphabetical sequence.

SAFEGUARDS:

Records are available only to claimants and ACTION Staff who demonstrate a need to know.

RETENTION AND DISPOSAL:

Official Files are kept seven (7) years following year of occurrence. Disposal of records is by shredding.

SYSTEM MANAGER AND ADDRESS:

OWCP Liaison, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

Send to address listed. Claimant writes request for data.

RECORD ACCESS PROCEDURES:

Requester should give OWCP claim number, but it is not mandatory. Data requests may be requested in the name of injured employee/volunteer.

CONTESTING RECORD PROCEDURES:

Claimant or injured employee/volunteer may submit any data deemed relevant to the case to address listed.

RECORD SOURCE CATEGORIES:

Individual who suffers work related injury/illness submits any pertinent data necessary: Medical reports, witness statements, time and attendance records, medical bills, legal briefs.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-7

SYSTEM NAME:

ACTION Travel Files.

SYSTEM LOCATION:

ACTION, 1100 Vermont Avenue, NW., room 2116, Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All ACTION Staff, Consultants, Invitational travelers and Relocated Staff.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individuals' records and special event records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973.

PURPOSE:

VOL 56 ISS 251 DEC 31 1991 UMI

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in individual folders in a locked metal file cabinet when not in immediate use.

RETRIEVABILITY:

Individual's name in alphabetical order and Travel Authorization number.

SAFEGUARDS:

Access only to appropriate personnel and ACTION officials. The metal travel file cabinet is always under lock and key.

RETENTION AND DISPOSAL:

Retention three (3) years—Disposal by shredding.

SYSTEM MANAGER AND ADDRESS:

Budget/Travel Analyst, ACTION, MB/AMS, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

Send to address listed.

RECORD ACCESS PROCEDURES:

Budget/Travel Analyst, ACTION, MB/AMS, 1100 Vermont Avenue, NW., Washington, DC 20525.

CONTESTING RECORD PROCEDURES:

Send to address listed.

RECORD SOURCE CATEGORIES:

Submitted by ACTION employees, etc.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-6

SYSTEM NAME:

Conflict of Interest Records File.

SYSTEM LOCATION:

Office of General Counsel/ACTION, room 9200, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees, Contractors, Consultants and other persons employed by or dealing with ACTION.

CATEGORIES OF RECORDS IN THE SYSTEM:

Statement of personal and family interests in business enterprise, public and confidential disclosure of financial interests, and correspondence with respect thereto including opinions of counsel and confirmation materials.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 735.401 and E.O. 11222(5865)

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are kept in separate file folders in cabinets in a room locked when not in use.

RETRIEVABILITY:

Records are indexed alphabetically and by year.

SAFEGUARDS:

Records are generally available only to attorneys and other personnel of the Office of General Counsel and to designated ACTION officials having a need for such knowledge in the performance of their official duties.

RETENTION AND DISPOSAL:

Records are destroyed when six (6) years old; except that documents needed in an on-going investigation will be retained until no longer needed in the investigation.

SYSTEM MANAGER AND ADDRESS:

General Counsel/ACTION, room 9200, 1100 Vermont Avenue, NW., Washington, DC 20525.

RECORD SOURCE CATEGORIES:

Data is obtained from the following categories of sources: 1. Employees of ACTION. 2. Work product of attorneys for ACTION.

ACTION-9

SYSTEM NAME:

Counselors' Report Files.

SYSTEM LOCATION:

Director, Equal Opportunity, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any employee or applicant for employment, volunteer or applicant or trainee for volunteer status, or employee of a grantee who has contacted an ACTION Equal Opportunity Counselor for counseling but has not filed a formal discrimination complaint.

CATEGORIES OF RECORDS IN THE SYSTEM:

Counselors' Reports, Privacy Act notice, confidentiality agreement, notice to members of collective bargaining agreement, notice of final interview, notes and correspondence, and copies of personnel records or other documents relevant to the matter presented to the Counselor, and any other records relating to the counseling instance.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Titles VI and VII of the Civil Rights Act of 1964, as amended; Age Discrimination in Employment Act, as amended; Rehabilitation Act of 1973, as amended; Title IX of the Education Amendments of 1972, as amended; Domestic Volunteer Service Act of 1973, as amended; Age Discrimination Act, as amended.

PURPOSE:

To enable Equal Opportunity Counselors to look into matters brought to their attention, provide counseling, and attempt to resolve the matter.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Referral or disclosure: (1) To a Federal, state, or local agency charged with the responsibility of investigating, enforcing, or implementing the statute, rule, regulation, or order; (2) to an investigator, Counselor, grantee or other recipient of Federal financial assistance, or hearing officer or arbitrator charged with the above responsibilities; (3) any and all appropriate and necessary uses of such records in a court of law or before an administrative board or hearing; and (4) such other referrals as may be necessary to carry out the enforcement and implementation of the statutes, rules, regulations, or orders.

2. Disclosure to the Congressional committees having legislative jurisdiction over the program involved, including when actions are proposed to be undertaken by suspending or terminating or refusing to grant or to continue Federal financial assistance for violation of the statutes, rules, regulations, or orders for recipients of Federal financial assistance from ACTION.

3. Disclosure to any source, either private or governmental, to the extent necessary to secure from source information relevant to, and sought in furtherance of, a legitimate investigation or EO counseling matter.

4. Disclosure to a contractor, grantee or other recipient of Federal financial assistance, when the record to be released reflects serious inadequacies

with the recipient's personnel, and disclosure of the record is for the purpose of permitting the recipient to effect corrective action in the Government's best interests.

5. Disclosure to any party pursuant to the receipt of a valid subpoena.

6. Disclosure during the course of presenting evidence to a court, magistrate or administrative tribunal of appropriate jurisdiction and such disclosure shall include disclosures to opposing counsel in the course of settlement negotiations.

7. Disclosure to a member of Congress submitting a request involving an individual who is a constituent of such member who has requested assistance from the member with respect to the subject matter of the record.

8. Information in any system may be used as a data source, for management information, for the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies. Information may also be disclosed to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act.

9. Information in any system of records to be disclosed to a Congressional office, in response to an inquiry from any such office, made at the request of the individual to whom the record pertains.

10. A record from any system of records may be disclosed as a routine use of the National Archives and Records Administration, in records management inspection conducted under authority of 44 U.S.C. 209 and 290.

11. Referral to Federal, state, local and professional licensing authorities when the record to be released reflects on the moral, educational, or vocational qualifications of an individual seeking to be licensed.

12. Disclosure to the Office of Government Ethics (OGE) for any purpose consistent with OGE's mission, including the compilation of statistical data.

13. Disclosure to the Department of Justice in order to obtain the Department's advice regarding ACTION's disclosure obligations under the Freedom of Information Act.

14. Disclosure to the Office of Management and Budget (OMB) or the Equal Employment Opportunity Commission (EEOC) in order to obtain OMB's advice regarding ACTION's obligations under the Privacy Act.

Note: The Agency-wide statement of general routine uses does not apply to this system of records (ACTION-9).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in folders or computer diskettes and locked in metal file cabinets when not in immediate use.

RETRIEVABILITY:

Retrievability is by the name of the person who contacted the Counselor.

SAFEGUARDS:

Records in the system are available only to appropriate personnel in the Office of Equal Opportunity and other designated officials of ACTION with a need for such records in the performance of their duties.

RETENTION AND DISPOSAL:

Two (2) years after completion of counseling, the files are discarded.

SYSTEM MANAGER AND ADDRESS:

Director, Equal Opportunity, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

Request by individuals on whether a record is maintained about himself/herself should be addressed to the System Manager.

RECORD ACCESS PROCEDURES:

Request for access to these records should be addressed to the System Manager.

CONTESTING RECORD PROCEDURES:

Contest to information included in these records should be addressed to the System Manager.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from the following categories of sources: 1. Aggrieved persons, witnesses, etc., in counseling matters. 2. Counselors' Reports. 3. Copies of documents relevant to any counseling matters. 4. Correspondence.

ACTION-10

SYSTEM NAME:

Discrimination Complaint Files.

SYSTEM LOCATION:

Director, Equal Opportunity, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any employee or applicant for employment, volunteer or applicant or trainee for volunteer status, or employee of a grantee, or program beneficiary who has filed a formal complaint with or against ACTION.

CATEGORIES OF RECORDS IN THE SYSTEM:

Formal complaints, Reports of Investigation, Counseling documents, case decisions, and relevant correspondence, including settlement agreements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Titles VI and VII of the Civil Rights Act of 1964, as amended; Age Discrimination in Employment Act, as amended; Rehabilitation Act of 1973, as amended; Title IX of the Education Amendments of 1972, as amended; Domestic Volunteer Service Act of 1973, as amended; Age Discrimination Act, as amended.

PURPOSE:

To enable Agency to investigate and adjudicate complaints of discrimination.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Referral or disclosure: (1) To a Federal, state, or local agency charged with the responsibility of investigating, enforcing, or implementing the statute, rule, regulation, or order; (2) to an investigator, counselor, grantee or other recipient of Federal financial assistance or hearing officer or arbitrator charged with the above responsibilities; (3) any and all appropriate and necessary uses of such records in a court of law or before an administrative board or hearing; and (4) such other referrals as may be necessary to carry out the enforcement and implementation of the statutes, rules, regulations, or orders.

2. Disclosure to the Congressional committees having legislative jurisdiction over the program involved, including when actions are proposed to be undertaken by suspending or terminating or refusing to grant or to continue Federal financial assistance for violation of the statutes, rules, regulations, or orders for recipients of Federal financial assistance from ACTION.

3. Disclosure to any source, either private or governmental, to the extent necessary to secure from source information relevant to, and sought in furtherance of, a legitimate investigation or EO counseling matter.

4. Disclosure to a contractor, grantee or other recipient of Federal financial assistance, when the record to be released reflects serious inadequacies with the recipient's personnel, and

VOL 56 ISS 251 DEC 31 1991 UMI

disclosure of the record is for the purpose of permitting the recipient to effect corrective action in the Government's best interests.

5. Disclosure to any party pursuant to the receipt of a valid subpoena.

6. Disclosure during the course of presenting evidence to a court, magistrate or administrative tribunal of appropriate jurisdiction and such disclosure shall include disclosures to opposing counsel in the course settlement negotiations.

7. Disclosure to a member of Congress submitting a request involving an individual who is a constituent of such member who has requested assistance from the member with respect to the subject matter of the record.

8. Information in any system may be used as a data source, for management information, for the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies. Information may also be disclosed to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act.

9. Information in any system of records may be disclosed to a Congressional office, in response to any inquiry from any such office, made at the request of the individual to whom the record pertains.

10. A record from any system of records may be disclosed as a routine use of the National Archives and Records Administration, in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

11. Referral to Federal, state, local and professional licensing authorities when the record to be released reflects on the moral, educational, or vocational qualifications of an individual seeking to be licensed.

12. Disclosure to the Office of Government Ethics (OGE) for any purpose consistent with OGE's mission, including the compilation of statistical data.

13. Disclosure to the Department of Justice in order to obtain the Department's advice regarding ACTION's disclosure obligations under the Freedom of Information Act.

14. Disclosure to the Office of Management and Budget (OMB) or the Equal Employment Opportunity Commission (EEOC) in order to obtain OMB's advice regarding ACTION's obligations under the Privacy Act.

Note: The Agency-wide statement of general routine uses does not apply to this system of records (ACTION–10).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in folders or computer diskettes locked in metal file cabinets when not in immediate use.

RETRIEVABILITY:

Files are retrieved by the complainant's name.

SAFEGUARDS:

Records in the system are available only to appropriate personnel in Equal Opportunity and other designated officials of ACTION with a need of such records in the performance of their duties.

RETENTION AND DISPOSAL:

Records are destroyed four (4) years after the close of the case.

SYSTEM MANAGER AND ADDRESS:

Director, Equal Opportunity, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

Request by individuals on whether a record is maintained about himself/herself should be addressed to the System Manager.

RECORD ACCESS PROCEDURES:

Request for access to these records should be addressed to the System Manager.

CONTESTING RECORD PROCEDURES:

Contest to information included in these records should be sent to the System Manager.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from the following categories of sources: 1. Complainants, witnesses, etc., in discrimination complaints. 2. Reports of investigations and Counselors' Reports. 3. Copies of documents relevant to any EO investigation. 4. Records of hearings on complaints. 5. Correspondence.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION–11

SYSTEM NAME:

Employee Pay and Leave Records File.

SYSTEM LOCATION:

ACTION, Personnel Management Division, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons employed by ACTION.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel actions; employing, promoting and terminating employees; savings bond applications, advises of allotments, IRS tax withholdings, applications, and records regarding collections for overpayments, and time and attendance records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

GAO Policy and Procedures Manual; 31 U.S.C. 66(a); and the Budget and Accounting Procedures Act of 1950.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information from these records is routinely provided: 1. To the Treasury for payroll and savings bonds and other deduction purposes. 2. To Internal Revenue Service with regard to tax deductions. 3. To participating insurance companies holding policies with respect to employees of ACTION. Also, see General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in folders in metal file cabinets with manipulation proof combination locks. The individual Time and Attendance records maintained by designated timekeepers throughout the agency are stored in metal file cabinets with a key lock or manipulation proof combination lock.

RETRIEVABILITY:

Records are by name in alphabetical order.

SAFEGUARDS:

Records in the system are available only to employees of ACTION with a need for such records in the performance of their official duties.

RETENTION AND DISPOSAL:

Records in the system are maintained for three (3) years after the end of the fiscal year in which an employee terminates employment with ACTION, and then retired to the nearest Federal Records Center in accordance with General Accounting Office instructions.

SYSTEM MANAGER AND ADDRESS:

Chief, Staff Payroll, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

See the Notification paragraph in the Preliminary Statement.

RECORD ACCESS PROCEDURES:

See the Access and Contest paragraph in the Preliminary Statement.

CONTESTING RECORD PROCEDURES:

Same as Record Access Procedures category.

RECORD SOURCE CATEGORIES:

ACTION employee to whom the record pertains.

ACTION–12

SYSTEM NAME:

Freedom of Information Act (FOIA) Requests and Privacy Act (PA) Requests File.

SYSTEM LOCATION:

ACTION, Administrative and Management Services Division, Management Services Branch, room 3200, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have submitted FOIA and/or PA requests to ACTION.

CATEGORIES OF RECORDS IN THE SYSTEM:

Formal requests (FOIA/PA), research data, written decisions, and relevant correspondence, including final responses to the requesters.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Freedom of Information Act of 1966 and The Privacy Act of 1974.

PURPOSE:

To maintain files of FOIA/PA requests and ACTION's responses.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are kept in separate file folders in a cabinet locked when not in use.

RETRIEVABILITY:

Records are indexed by number and by year.

SAFEGUARDS:

Records in the system are available only to the FOIA/PA officer and other designated officials of ACTION with a need of such records in the performance of their duties.

RETENTION AND DISPOSAL:

Records concerning requests and appeals are destroyed three (3) years after initial request.

SYSTEM MANAGER AND ADDRESS:

FOIA/PA Officer, ACTION, room 3200, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURE:

See Notification paragraph in the Preliminary Statement.

RECORD ACCESS PROCEDURE:

See Access and Consent paragraph in the Preliminary Statement.

CONTESTING RECORD PROCEDURES:

See Access and Contest paragraph in the Preliminary Statement.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from documents submitted by individuals engaging in official FOIA/PA requests as well as from responses issued by officials of ACTION.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION–13

SYSTEM NAME:

Legal Office Litigation/Correspondence Files.

SYSTEM LOCATION:

Office of General Counsel/ACTION, room 9200, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals involved in litigation which requires General Counsel action.

CATEGORIES OF RECORDS IN THE SYSTEM:

Statements; affidavits/declarations; investigatory and administrative reports; personnel, financial, medical and business records; discovery and discovery responses; motions; orders, rulings; letters; messages; forms; reports; surveys; audits; summons; English translations of foreign documents; photographs; legal opinions; subpoenas; pleadings; memos; related correspondence; briefs; petitions; court records involving litigation; and, related matters.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

These records are maintained under the general authority of the Office of the General Counsel to represent the Agency in connection with its dealings with its employees and the general functions of the Office of the General Counsel to provide advice and counsel to the Director of the Agency and his/her staff.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To prepare correspondence and materials for litigation.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File cabinets and computerized docket system.

RETRIEVABILITY:

Name of individual and the year litigation commenced.

SAFEGUARDS:

Manual records are maintained in file cabinets under the control of authorized personnel during working hours. The office space in which the file cabinets are located is outside of official working hours. Computer terminals are located in supervised areas.

RETENTION AND DISPOSAL:

Records will be maintained in the Office of General Counsel for one (1) year after closure. Records will then be sent to the Federal Records Center where they will be destroyed after ten (10) years.

SYSTEM MANAGER AND ADDRESS:

General Counsel/ACTION, room 9200, 1100 Vermont Avenue, NW., Washington, DC 20525.

RECORD ACCESS PROCEDURES:

Litigation files are not subject to access. Other files may be accessed in accordance with agency-wide regulations.

RECORD SOURCE CATEGORIES:

Data is obtained from the following categories of sources: 1. ACTION employees. 2. Correspondence and reports from persons and agencies dealing with the agency and its employees. 3. Work product and research of lawyers of the office. 4. Court records.

VOL

1991
UMI

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Any information compiled in reasonable anticipation of a civil action or proceeding. 5 U.S.C. 552a(d)(5).

ACTION–14

SYSTEM NAME:

Merit Promotion Plan Files.

SYSTEM LOCATION:

ACTION, Personnel Management Division, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for employment with ACTION.

CATEGORIES OF RECORDS IN THE SYSTEM:

These files contain copies of applications for employment (SF–171), submitted by applicants and other background information regarding qualifications of the applicant for staff positions in ACTION.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The contents of these records and files may be disclosed and used as follows: 1. To the Office of Personnel Management with regard to any question of eligibility, suitability or qualifications of an applicant for employment. 2. To any source which requests information in the course of an inquiry as to the qualifications of an applicant to the extent necessary to identify the individual, inform the source of the nature and purpose of the inquiry, and to identify the type of information requested. Also, see General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in folders in metal file cabinets with combination locks.

RETRIEVABILITY:

Records are indexed in order of vacancy announcement number.

SAFEGUARDS:

Records are generally available only to ACTION employees with the need for such records in the performance of their duties.

RETENTION AND DISPOSAL:

Records are destroyed when applications are two (2) years old. Applications which resulted in appointment are filed in the Official Personnel Folder and are subsequently retired to the Federal Records Center, St. Louis, Missouri.

SYSTEM MANAGER AND ADDRESS:

Chief, Personnel Staffing and Employee Development Branch, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURE:

See the Notification paragraph in the Preliminary Statement.

RECORD ACCESS PROCEDURES:

See the Access and Contest paragraph in the Preliminary Statement.

CONTESTING RECORD PROCEDURES:

Same as Record Access Procedures category.

RECORD SOURCE CATEGORIES:

Information contained in the system is obtained from the following categories of sources: Applications and other personnel forms furnished by the individual; oral or written inquiries from sources disclosed by the applicant, such as, employers, schools, references, etc.

ACTION–15

SYSTEM NAME:

Office of the Inspector General Investigative Files.

SYSTEM LOCATION:

Office of the Inspector General, ACTION, 1100 Vermont Avenue, NW., room 12100, Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Subjects of investigations or complaints, including (but not necessarily limited to) former and present ACTION employees; former and present ACTION grant recipients, applicants, consultants, contractors and subcontractors and their employees; and other parties doing business with ACTION.

CATEGORIES OF RECORDS IN THE SYSTEM:

All correspondence relevant to the investigation; all internal staff memoranda; information provided by subjects, witnesses, and governmental investigatory or law enforcement organizations; copies of all subpoenas issued during the investigation; affidavits, statements from witnesses, memoranda of interviews, transcripts of testimony taken in the investigation and accompanying exhibits; documents and records or copies obtained during the investigation; working papers of the staff, investigators' notes, and other documents and records relating to the investigation; information about criminal, civil, or administrative referrals; and opening reports, progress reports, and closing reports, with recommendations for corrective action.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Inspector General Act of 1978, as amended, 5 U.S. Code appendix 3.

PURPOSE:

To maintain files of investigations and investigative activities carried out by the Office of the Inspector General.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Referral to Federal, state, local and foreign investigative or prosecutive authorities.

A record in the system of records, *which indicates either by itself or in combination with other information within the Agency's possession,* a violation or potential violation of law, whether civil, criminal or regulatory and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, may be disclosed, as a routine use, to the appropriate Federal, foreign, state or local agency or professional organization charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing or investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulation or order issued pursuant thereto.

2. Disclosure to a Federal or state grand jury agent pursuant to a Federal or state grand jury subpoena or prosecution request that such record be released for the purpose of its introduction to a grand jury.

3. Referral to suspension/debarment authorities, internal to the Agency, when the record released is germane to a determination of the propriety of, or necessity for, a suspension or debarment action.

4. Referral to Federal, state, local and professional licensing authorities when the record to be released reflects on the moral, educational, or vocational qualifications of an individual seeking to be licensed.

5. Disclosure to a contractor, grantee or other recipient of Federal funds, when the record to be released reflects serious inadequacies with the recipient's personnel, and disclosure of the record is for the purpose of permitting the recipient to effect corrective action in the Government's best interests.

6. Disclosure to a contractor, grantee or other recipient of Federal funds, when the recipient has incurred an indebtedness to the Government through its receipt of Government funds, and release of the record is for the purpose of allowing the debtor to effect a collection against a third party.

7. Disclosure to any source, either private or governmental, to the extent necessary to secure from such source information relevant to, and sought in furtherance of, a legitimate investigation or audit.

8. Disclosure to a domestic, foreign or international governmental agency considering personnel or other internal actions, such as assignment, hiring or retention of an individual, issuance of a security clearance, reporting an investigation of an individual, award of a contract or issuance of a license, grant or other benefit, to the extent that the information is relevant and necessary to such agency's decision on the matter.

9. Disclosure to the Office of Government Ethics (OGE) for any purpose consistent with OGE's mission, including the compilation of statistical data.

10. Disclosure to a Board of Contract Appeals, the General Accounting Office, or other tribunal hearing a bid protest involving an Agency procurement.

11. Disclosure to a domestic, foreign or international governmental law enforcement agency maintaining civil, criminal or other relevant enforcement information, or other pertinent information, in order that ACTION may obtain information relevant to an Agency decision concerning the assignment, hiring or retention of an individual, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

12. Disclosure to the Department of Justice in order to obtain the Department's advice regarding ACTION's disclosure obligations under the Freedom of Information Act.

13. Disclosure to the Office of Management and Budget (OMB) in order to obtain OMB's advice regarding ACTION's obligations under the Privacy Act.

14. Disclosure to a member of Congress making a request at the behest of a party protected under the Privacy Act, when the member of Congress informs the appropriate Agency official that the individual to whom the record pertains has authorized the member of Congress to have access.

15. Disclosure to any Federal agency pursuant to the receipt of a valid subpoena.

16. Disclosure to the Department of the Treasury or the Department of Justice when ACTION is seeking an ex parte court order to obtain taxpayer information from the Internal Revenue Service.

17. Disclosure to debt collection contractors for the purpose of collecting delinquent debts as authorized by the Debt Collection Act of 1982, 31 U.S.C. 3713.

18. Disclosure to a "consumer reporting agency" as that term is defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) and the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)), in order to obtain information in the course of an investigation or audit.

19. Disclosure to Agency counsel, the administrative hearing tribunal, and counsel to the adverse party, in a Program Fraud Civil Remedies Act litigation.

20. Disclosure to a Federal, State, or local agency for use in computer matching programs to prevent and detect fraud and abuse in benefit programs administered by those agencies, to support civil and criminal law enforcement activities of those agencies and their components, and to collect debts and overpayments owed to those agencies and their components.

21. Disclosure to any court or administrative authority or during the course of any litigation in which ACTION is a party or has an interest.

A record in the system of records may be disclosed in a proceeding before a court or adjudicative body before which ACTION is authorized to appear, or in the course of settlement negotiations with opposing counsel when—

(1) ACTION, or any component thereof,

(2) Any employee of ACTION in his or her official capacity,

(3) Any employee of ACTION in his or her individual capacity, where the Government has agreed to represent the employee, or

(4) The United States, where ACTION determines that the litigation is likely to affect ACTION or any of its components—

is a party to the litigation or has an interest in such litigation, and ACTION determines that the use of such records is relevant and necessary to the litigation; provided, however, that in each case ACTION determines that disclosure of the records is a use of the information contained in the records that is compatible with the purpose for which the records were collected. A record relating to the case also may be provided to an actual or potential party or his/her attorney for the purpose of negotiation or discussion on such matters as settlement of the case or matter, plea bargaining, or discovery proceedings.

22. Disclosure to ACTION's legal representative, including the Department of Justice and other outside legal counsel, when ACTION is a party in litigation or has an interest in litigation.

A record in the system of records may be disclosed to the Department of Justice or outside legal counsel when—

(1) ACTION or any component thereof,

(2) Any employee of ACTION in his or her official capacity,

(3) Any employee of ACTION in his or her individual capacity, where the Department of Justice has agreed or is considering a request to represent the employee, or

(4) The United States, where ACTION determines that the litigation is likely to affect ACTION or any of its components—

is a party to the litigation or has an interest in such litigation, and ACTION determines that the use of such records by the Department of Justice or outside legal counsel is relevant and necessary to the litigation; provided, however, that in each case, ACTION determines that disclosure of the records to the Department of Justice or outside legal counsel is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The Office of the Inspector General Investigative Files consist of paper records maintained in folders and an automated data base maintained on computer diskettes. The folders and diskettes are stored in locked metal file cabinets. The file cabinets are located in the Office of the Inspector General.

RETRIEVABILITY:

The records are retrieved by the name of the subject of the investigation or by a unique control number assigned to each investigation.

SAFEGUARDS:

Records in the system are available only to those persons whose official duties require such access. The records are kept in limited access areas during

VOL 56 ISS 251 DEC 31 1991 UMI

duty hours and in locked file cabinets in a locked office at all other times.

RETENTION AND DISPOSAL:

Records will be held in the office pursuant to General Records Schedule 22, June 1988, and will be destroyed by shredding or burning when no longer needed.

SYSTEM MANAGER AND ADDRESS:

Inspector General, Office of the Inspector General, ACTION, 1100 Vermont Avenue, NW, Washington, DC 20525.

NOTIFICATION PROCEDURES:

To determine whether this system of records contains a record pertaining to the requesting individual, the individual should write to the System Manager, furnishing his or her name, address and social security number.

RECORD ACCESS PROCEDURES:

See Notification procedures.

CONTESTING RECORD PROCEDURES:

Individuals desiring to contest or amend information maintained in this system of records should write to the System Manager, setting forth the basis for which the individual believes the record is incomplete, irrelevant, incorrect or untimely.

RECORD SOURCE CATEGORIES:

Information in this system of records is obtained from ACTION staff and official Agency records, current and former employees, contractors, grantees and their employees, volunteers or former volunteers in ACTION-funded programs, and from non-ACTION persons and records, to the extent necessary to carry out Inspector General investigations authorized by 5 U.S.C. app. 3. Individuals to be interviewed and records to be examined are selected based on the nature of the allegations being investigated.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The Office plans to publish an exemption under 5 U.S.C. 552a (j) and (k).

ACTION-16

SYSTEM NAME:

Travel Authorization File.

SYSTEM LOCATION:

Accounting and Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

ACTION employees or any other person invited to travel at the expense of the agency.

CATEGORIES OF RECORDS IN THE SYSTEM:

The records consist of travel authorizations, vouchers, receipts payment records, and other materials related to official travel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973, and the Budget and Accounting Procedures Act of 1950.

PURPOSE:

To record and manage the payment of expenses for official travel.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE

Records are maintained in file folders which are stored in locked metal cabinets.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Records are available only to staff in the Accounting & Financial Management Division and other appropriate ACTION officials with the need for such records in the performance of their official duties.

RETENTION AND DISPOSAL:

Records are held for three (3) years and then retired to the Federal Records Center.

SYSTEM MANAGER AND ADDRESS:

Director, Accounting & Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

To determine whether there is a record in the system about an individual, that individual should submit a request in writing to the System Manager giving name, taxpayer identification number, and address.

RECORD ACCESS PROCEDURE:

See Notification procedures.

CONTESTING RECORD PROCEDURES:

Anyone desiring to contest or amend information contained in this system should write to the System Manager and set forth the basis for which the record is believed to be incomplete or incorrect.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from documents submitted by individuals engaging in official travel as well as documents issued by ACTION officials involved with authorizing and managing travel.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-17

SYSTEM NAME:

Vendor Name and Identification Number File.

SYSTEM LOCATION:

Accounting and Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All individuals with whom ACTION does business.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Domestic Volunteer Service Act of 1973, and the Budget and Accounting Procedures Act of 1950.

PURPOSE:

To maintain a single list of all entities with which the agency does business.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Data may be disclosed to the Department of Justice or the General Accounting Office in connection with attempting to collect debts or to the Internal Revenue Service in the reporting of disbursements as required by the Internal Revenue Code. See General Routine Uses contained in Preliminary Statement.

CATEGORIES OF RECORDS IN THE SYSTEM:

The data recorded includes the name, the taxpayer identification number, and the address of the entity.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Data is stored on magnetic media in a computer system with access controlled by a security system that requires passwords and identification of each user.

RETRIEVABILITY:

Data can be retrieved by taxpayer identification number.

SAFEGUARDS:

Access to data stored on magnetic media is controlled by a security system that requires passwords and identification of each user.

RETENTION AND DISPOSAL:

Records are held for three (3) years and then retired to the Federal Records Center.

SYSTEM MANAGER AND ADDRESS:

Director, Accounting & Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

To determine whether there is a record in the system about an individual, that individual should submit a request in writing to the System Manager giving name, taxpayer identification number, and address.

RECORD ACCESS PROCEDURES:

See Notification procedures.

CONTESTING RECORD PROCEDURES:

Anyone desiring to contest or amend information contained in this system should write to the System Manager and set forth the basis for which the record is believed to be incomplete or incorrect.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from documents submitted by individuals covered by the system as well as documents issued by ACTION officials involved with managing funds.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

ACTION-18

SYSTEM NAME:

VISTA Volunteer Payroll System File.

SYSTEM LOCATION:

Accounting and Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former VISTA Volunteers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

the Domestic Volunteer Service Act of 1973, and the Budget and Accounting Procedures Act of 1950.

PURPOSE:

To record payments and allowances to VISTA volunteers.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See General Routine Uses contained in Preliminary Statement. Information is also disclosed to the Social Security Administration and the Internal Revenue Service about the funds paid to comply with legal requirements that enable these agencies to perform their functions. Data from the system is also disclosed to the Financial Management Service of the Department of the Treasury to enable payments to be made.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records include names of individuals covered by the system, address, social security number, data concerning the individual's sex, marital status, skills, service as a VISTA volunteer, including dates served and projects served, amounts paid to the volunteer while serving, amounts overpaid and repayment records of such overpayment.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESS, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual data is stored alphabetically in filing cabinets that are kept in a room that is only used for storing such materials. That room is kept locked except when employees who work with the VISTA payroll system are using the data. Access to all other individuals is not allowed. Data is also stored on magnetic media in a computer system with access controlled by a security system that requires passwords and identification of each user.

RETRIEVABILITY:

Data can be retrieved by individual name for manual records or by social security number for automated records.

SAFEGUARDS:

The storage room is kept locked except when employees who work with the VISTA payroll system are using the data. Access to all other individuals is not allowed. Access to data stored on magnetic media is controlled by a security system that requires passwords and identification of each user.

RETENTION AND DISPOSAL:

Records are held for three (3) years and then retired to the Federal Records Center.

SYSTEM MANAGER AND ADDRESS:

Director, Accounting & Financial Management Division, ACTION, room 3100, 1100 Vermont Avenue, NW., Washington, DC 20525.

NOTIFICATION PROCEDURES:

To determine whether there is a record in the system about an individual, that individual should submit a request in writing to the System Manager giving name, taxpayer identification number, and address.

RECORD ACCESS PROCEDURES:

See Notification procedures.

CONTESTING RECORD PROCEDURES:

Anyone desiring to contest or amend information contained in this system should write to the System Manager and set forth the basis for which the record is believed to be incomplete or incorrect.

RECORD SOURCE CATEGORIES:

Data in this system is obtained from documents submitted by individuals covered by the system as well as documents issued by ACTION officials involved with managing funds.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Oil and Gas Leasing EIS, Shoshone National Forest, Park and Fremont Counties, WY

AGENCY: Forest Service, USDA.

ACTION: Revised notice of intent to prepare an environmental impact statement.

SUMMARY: The Shoshone National Forest, Wyoming, announced (56 FR 14682, April 11, 1991) its intent to prepare an environmental impact statement (EIS) on oil and gas leasing for the Forest. A draft EIS was to have been completed by December 1991, and offered for a comment period of 90 days. At this time, the draft is scheduled for release in June of 1992. A forty-five day comment period will follow. The final EIS is scheduled to be published in November 1992.

FOR FURTHER INFORMATION CONTACT: Bob Rossman, Interdisciplinary Team Leader (307) 527–6241, Shoshone National Forest, P.O. Box 2140, Cody, WY 82414.

Dated: December 20, 1991.

Barry Davis,

Forest Supervisor.

Low-Fuming Brazing Copper Wire and Rod From South Africa; Intent To Revoke Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of intent to revoke antidumping duty order.

SUMMARY: The Department of Commerce is notifying the public of its intent to revoke the antidumping duty order on low-fuming brazing copper wire and rod from South Africa. Interested parties who object to this revocation must submit their comments in writing no later than January 31, 1992.

EFFECTIVE DATE: December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Robert J. Marenick, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On January 29, 1986, the Department of Commerce ("the Department") published an antidumping duty order on low-fuming brazing copper wire and rod from South Africa (51 FR 3640). The Department has not received a request to conduct an administrative review of this duty order for the most recent four consecutive annual anniversary months.

The Department may revoke an antidumping duty order or finding if the Secretary of Commerce concludes that it is no longer of interest to interested parties. Accordingly, as required by § 353.25(d)(4) of the Department's regulations we are notifying the public of our intent to revoke this antidumping duty order.

Opportunity to Object

No later than January 31, 1992, interested parties, as defined in § 353.2(k) of the Department's regulations, may object to the Department's intent to revoke this antidumping duty order.

Seven copies of any such objections should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B–099, U.S. Department of Commerce, Washington, DC 20230.

If interested parties do not request an administrative review by January 31, 1992, in accordance with the Department's notice of opportunity to request administrative review, or object to the Department's intent to revoke by January 31, 1992, we shall conclude that the order/finding is no longer of interest to interested parties and shall proceed with the revocation.

This notice is in accordance with 19 CFR 353.25(d).

Dated: December 23, 1991.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

Final Results of Antidumping Duty Administrative Review: Tapered Roller Bearings and Parts Thereof From the People's Republic of China

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

EFFECTIVE DATE: December 31, 1991.

FOR FURTHER INFORMATION CONTACT: John Beck, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–3464.

Final Results

Background

On October 4, 1991, the Department of Commerce (the Department) published in the **Federal Register** (56 FR 50309) the preliminary results of this administrative review of the amended antidumping duty order on tapered roller bearings and parts thereof (TRBs), from the People's Republic of China (PRC) (55 FR 6669, February 26, 1990). This order was amended pursuant to a remand of the final determination by the Court of International Trade. The Department has now completed this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

The Timken Company (petitioner), Premier Bearing and Equipment, Ltd. (Premier), a Hong Kong trading company that exports TRBs, which are produced in the PRC, to the United States, China National Machinery and Equipment Import and Export Corporation (CMEC), Guizhou Machinery Import and Export Corporation (Guizhou), Henan Machinery and Equipment Import and Export Corporation (Henan), Jilin Machinery Import and Export Corporation (Jilin), Liaoning Machinery and Equipment Import and Export Corporation (Liaoning), Luoyang Bearing Factory (Luoyang), and Shanghai General Bearing Co., Ltd. (Shanghai General) (respondents in this review), and interested parties submitted case and rebuttal briefs on October 16 and 23, 1991. A public hearing was held on October 25, 1991.

Scope of Review

Imports covered by this review are shipments of tapered roller bearings and parts thereof from the PRC. This merchandise is currently classifiable under items 8482.20.00, 8482.91.00.60, 8482.99.30, 8483.20.40, 8483.20.80, 8483.30.80, 8483.90.20, 8483.90.30 and 8483.90.80 of the *Harmonized Tariff Schedule*, (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

This review covers the period June 1, 1989, through May 31, 1990, for Premier and Shanghai General, and from May 12, 1989, to May 31, 1990, for all other companies.

United States Price

For sales made by CMEC, Guizhou, Henan, Jilin, Liaoning, Luoyang, and Premier, we based the United States Price (USP) on purchase price, in accordance with section 772(b) of the Act, both because the subject merchandise was sold to unrelated purchasers in the United States prior to importation into the United States and because exporter's sales price (ESP) methodology was not indicated by other circumstances. For sales made by Shanghai General, we based the USP on ESP, in accordance with section 772(c) of the Act, because sales to the first unrelated purchaser took place after importation into the United States. We made adjustments to purchase price based on errors discovered at verification.

We calculated purchase price based on either the packed, CIF or packed ex-factory prices to unrelated purchasers. With respect to CIF sales, we made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, brokerage and handling and customs declaration fees (Premier only). We valued the inland freight deduction for all companies in the PRC using surrogate information provided by the U.S. Embassy in India. We selected India as the surrogate country for the reasons explained in the "Foreign Market Value" section of this notice. We calculated ESP based on the packed, ex-warehouse U.S. subsidiary price. We made deductions for foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S. inland freight, U.S. inland insurance, and U.S. brokerage. Given that SG&A expenses were shown as a percentage of the cost of manufacture in our constructed value, we were unable to isolate the selling expenses from the total SG&A on the foreign market value side. Therefore, we made no further adjustments to ESP for selling expenses.

Foreign Market Value

Section 773(c)(1) of the Act provides that the Department will determine foreign market value (FMV) using a factors of production methodology if: (1) The merchandise is exported from a non-market economy (NME) country; and (2) the information does not permit the calculation of FMV using home market prices, third country prices, or constructed value (VC) under section 773(a).

Pursuant to section 771(18) of the Act and consistent with determinations made in prior proceedings, we have determined that the PRC is an NME in this case. (See, e.g., Initiation of Antidumping Duty Investigation: Refined Antimony Trioxide from the People's Republic of China (56 FR 23549, May 22, 1991); Final Determination of Sales at Less than Fair Value: Natural Menthol from the People's Republic of China (46 FR 24614, May 1, 1981)). Respondents have not contested this determination. Nor did respondents attempt to show that FMV could be based on home market prices, third-country prices, or CV under section 773(a). As a result, section 773(c) of the Act, requires the Department to determine FMV on the basis of the market valuation of the factors of production used in producing the subject merchandise.

Section 773(c) of the Act further requires the Department to value the factors of production in one or more market economy countries that are at a level of economic development comparable to that of the NME and that are significant producers of comparable merchandise.

Of countries known to produce TRBs, we have determined that India, Pakistan, Indonesia, and the Philippines are comparable to the PRC in terms of per capita gross national product (GNP), the growth rate in per capita GNP, and the national distribution of labor. We chose India as the most comparable surrogate on the basis of these criteria. We calculated FMV based on factors of production reported by the seven companies in the PRC. We used publicly available information relating to India to value the various factors of production.

The material cost for each component was determined by multiplying the gross weight of steel for each component by the steel unit price for that component. The result was reduced by the gross weight of steel scrap multiplied by the scrap value. The gross weight of steel scrap was reduced to account for waste and burn-off. Based on our findings at verification, Luoyang's reported material input for eight U.S. TRB part numbers did not account for additional steel bar used in the production process. We have included this additional steel bar input for the appropriate part numbers in our calculations. See Comment 10 in the "Analysis of Comments Received" section of this notice.

The direct labor hours for each unit of output were reported by the seven companies in the PRC. These direct labor hours were calculated by dividing the total direct labor hours for the product by the total production of the product.

We valued the factors of production as follows:

- For hot rolled alloy steel bars and rods, irregular coils used in the production of rollers, hot rolled alloy steel bars and rods used in the production of cups and cones, and cold rolled strip and sheet used in the production of cages, we used the FOB U.S. dollar per kilogram value of exports from the European Community to India for 1989. We adjusted those FOB values to CIF values using a conversion factor obtained in the International Monetary Fund's International Financing Statistics. Furthermore, we adjusted these values forward in time to the period of review (POR) to reflect inflation, using a price index obtained from the International Financial Statistics. Finally, we adjusted these values to include freight from the port to the factory. For bearing quality and non-bearing quality steel scrap, we used, as best information available (BIA), ratios of the price of bearing and non-bearing quality steel scrap used in the remanded determination to the average price of bar and steel sheet used in the remanded determination. We then applied these ratios to the applicable steel input values described above to arrive at a value for bearing and non-bearing quality steel scrap.
- For direct labor, we used the U.S. Department of Labor, Bureau of Labor Statistics rate for India from 1985, adjusted forward in time to the POR to reflect inflation, using a price index obtained from the International Financial Statistics. For indirect labor and sales, general and administrative (SG&A) labor, we used the appropriate percentage of direct labor from the respondents' deficiency responses.
- For factory overhead, we used information obtained from a financial report of a producer of similar merchandise in India as BIA. This information showed factory overhead as a percentage of total materials and total labor costs. We adjusted the overhead

1991
UMI

percentage downward to account for depreciation expenses from prior years and an amount for depreciation which we included under SG&A. We have also allocated the amount of miscellaneous expenses in the financial statement to overhead and SG&A. See Comment 8 in the "Analysis of Comments Received" section of this notice.

- For SG&A expenses, we used information obtained from the same financial report used to obtain factory overhead. This information showed SG&A expenses as a percentage of the cost of manufacture. We adjusted the SG&A expenses downward to account for packing, forwarding and excise taxes which were included in the reported amount. We also adjusted the SG&A expenses downward to account for interest income applicable to short-term interest-bearing assets. We adjusted the SG&A expenses upward to account for depreciation originally included as part of overhead, and for the entire amount of the auditing fees. We have also allocated the amount of miscellaneous expenses in the financial statement to overhead and SG&A. After these adjustments were made, SG&A as a percentage of the cost of manufacture was less than ten percent. Therefore, we used the statutory minimum of ten percent of the cost of manufacture for SG&A. See Comment 9 in the "Analysis of Comments Received" section of this notice.
- For profit, we used the statutory minimum of eight percent of the cost of manufacture plus SG&A expenses.
- For packing, we used as BIA one percent of the total ex-factory cost and SG&A expenses combined. This amount, obtained from publicly available data, is contained in the Final Determination of Sales at Less Than Fair Value: TRBs from Italy, 52 FR 24198 (June 29, 1987), and is consistent with the Department's valuation of packing in the Final Determination of Sales at Less than Fair Value: TRBs from the People's Republic of China, 52 FR 19748 (May 27, 1987). See also, TRBs from the Hungarian People's Republic, 52 FR 17428 (May 8, 1989), TRBs from the Socialist Republic of Romania, 52 FR 17433 (May 8, 1989), and the Final Results of Antidumping Duty Administrative Review: TRBs from the Republic of Hungary, 56 FR 41819 (August 23, 1991).

We have based FMV for Premier on its third-country sales since: (1) Premier is a Hong Kong reseller of the subject merchandise, and the producers of TRBs in the PRC who supplied Premier were unaware of the countries to which Premier intended to resell the merchandise (see section 773(f) of the Act); and (2) Premier does not have a viable home market for TRBs. In order to determine whether there were sufficient sales of TRBs in the home market to serve as a viable basis for calculating FMV, we compared the volume of Premier's home market sales of TRBs to the volume of Premier's third country sales of TRBs, in accordance with section 773(a)(1)(B) of the Act. Premier did not have a viable home market with respect to sales of TRBs during the POR, and thus we calculated FMV based on delivered prices to unrelated customers in Brazil and Singapore, in accordance with section 773(a)(1)(B) of the Act.

As we stated in our preliminary results, Premier claimed that it did not have access to information concerning the physical characteristics of the merchandise produced in the PRC. Therefore, for those comparisons that involve non-identical merchandise, Premier did not report differences in these physical characteristics. In our preliminary results, we determined that the BIA rate for comparisons of non-identical merchandise should be the greater of either: (1) The weighted-average rate obtained from a comparison of the identical merchandise; or (2) the 0.97% rate used in the first two administrative reviews. We then determined that the 0.97% rate would be the greater of these two rates.

In deciding what to use as BIA, 19 CFR 353.37(b) provides that the Department may take into account whether a party refused to provide requested information. Thus, the Department determines on a case-by-case basis what is BIA. When a company refuses to provide the information requested in the form required, or otherwise significantly impedes the Department's review, the Department will normally assign to that company the highest margin for the subject merchandise of either: (1) The highest margin calculated for that company in any previous review or the original investigation; or (2) the highest calculated margin for any respondent that supplied adequate responses for the current review. When a company has cooperated with the Department's request for information but fails to provide the information requested in a timely manner or in the form required, the Department will normally assign the affected company the highest margin assigned to that company in any previous review or in the investigation.

Since our preliminary results, we have concluded that Premier has cooperated with the Department but was unable to provide the requested information. We do not believe that the information on the record demonstrates that Premier could obtain difference in merchandise information from its suppliers. Therefore, we do not see evidence of a lack of cooperation sufficient to warrant the use of an adverse BIA. Furthermore, even if Premier could supply difference in merchandise information for those unmatched sets sold in the United States, the Department would still be unable to match the sales of cups and cones sold to the United States with comparable merchandise sold to third countries. See Comment 6 in the "Analysis of Comments Received" section of this notice. Therefore, we are assigning Premier's unmatched sales the highest margin assigned to the company in any previous review or the investigation, which is 0.97%.

For Premier, we made deductions for brokerage and handling, ocean freight, marine insurance and customs declaration fees. Pursuant to 19 CFR 353.56, we made circumstance-of-sale adjustments for differences in credit expenses and commissions. We made further adjustments to foreign market value based on errors discovered at verification.

Currency Conversion

We made currency conversions in accordance with 19 CFR 353.60(a). Currency conversions were made at the rates certified by the Federal Reserve Board (for Premier) or at the rates published by the International Monetary Fund in International Financial Statistics (for all other companies).

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received case and rebuttal briefs from the petitioner, the respondents, and other interested parties.

Comment 1

Petitioner contends that the information it provided to value materials and scrap based on figures from the remanded determination and adjusted for transportation costs and inflation should be used in this administrative review. Petitioner argues that, since the values used in the remanded determination are actual prices in India of steel used in the production of TRBs, their use would be most consistent with the statutory objective of using actual prices of inputs where possible. Petitoner also states that the value information from the remanded determination is consistent with the value information contained in Asian Bearing, Ltd.'s (Asian's) (a producer of similar merchandise in India) annual report. Furthermore, petitioner states that the methodology used in the remanded determination for converting steel values using the Trigger Price Mechanism is reasonable.

Respondents argue that petitioner has not provided any significant basis for rejection of the EC export statistics showing shipments to India. Respondents state that the Department was fully justified in rejecting the steel and scrap values used in the remanded determination, since this information was outdated, was for a type of steel not used by Chinese TRB producers, and was obtained through the use of a conversion factor based on nine-year-old steel cost information. Interested parties note that the information supplied by petitioner was also never verified. Respondents state that the steel bar value methodology used in the remanded determination was never considered by the courts, and that the Department used the scrap values in the remanded determination as BIA at the time. As for petitioner's comment that the remanded price information is consistent with Asian's prices, respondents and interested parties note that petitioner: (1) Did not specify what kind of steel bar was used by Asian; and (2) admitted that the prices for steel bar in Asian's annual report do not appear to be representative of the Indian bearing industry. Also, respondents contend that the domestic Indian steel prices are artificial due to the influence of and control by the Indian government.

DOC Position

We agree with respondents that the adjusted figures from the remanded determination are not the best source of information for this review. Information from the remanded determination, although adjusted for inflation, is from 1986, further removed from the POR than the EC export statistics. Furthermore, information supplied by petitioner is skewed by the fact that it is necessary to adjust the price of tube to bar using a 1982 ratio of production costs for the two products in Japan. Moreover, we do not know if this information is from the Tata Iron and Steel Company, a joint venture partner of petitioner. Finally, we do not agree with petitioner's contention that, since the remanded information is consistent with Asian's information, the remanded information should be used. We have found Asian's financial information not to be in accordance with the generally accepted accounting principles of India. Accordingly, we have not used the information from the remanded determination for purposes of valuing material inputs. Instead, we have used the EC export statistics to India as discussed in the "Foreign Market Value" section of this notice.

Comment 2

Petitioner argues that, if market price data were not available, it would be more reasonable to use Indian import statistics from all countries for valuation purposes, rather than EC export statistics to India. Petitioner notes that, in the Final Administrative Review of Tapered Roller Bearings from the Republic of Hungary (56 FR 41819) (August 23, 1991), the Department rejected the use of EC export data to Yugoslavia and used instead the Yugoslav Statistics of Foreign Trade.

DOC Position

Although we agree with petitioner that it would be preferable to use Indian import statistics from all countries, this is not possible for this review. In the Hungarian TRB review cited by petitioner, EC export data and Yugoslav Statistics of Foreign Trade data were both submitted on the record and in time for all parties to comment on their use. The Yugoslav Statistics of Foreign Trade data was found to be a better measure of the value of raw materials than the EC export data. In this review, the Indian import statistics submitted by petitioner were untimely. Furthermore, the Department did not have independent access to current Indian trade statistical information. Therefore, as BIA, we are using the EC export statistics to India, with appropriate adjustments.

Comment 3

Petitioner contends that, if the EC export statistics to India were used, an adjustment would be necessary to convert the FOB value to a CIF value. Petitioner reiterated its claim that, if import values are used, import duties must be added to reflect full market costs in India. Petitioner also argues that, even if a refund of duties was possible, the full amount of duty would not be refunded due to scrap.

Respondents and interested parties maintain that there is no indication on the record whether the EC export statistics are based upon CIF, C&F or FOB values. Respondents state that the Department has used these statistics in other reviews without applying any conversion factor. Respondents further contend that, should a conversion factor be applied, this factor should represent the difference between CIF and FOB values of exports of appropriate types of steel, and that there is no indication of how petitioner's conversion data was calculated.

Interested parties contend that, even if the EC export data to India does not include freight and other costs, it would still be incorrect to adjust the data, since Chinese manufacturers, as a rule, do not import steel. Therefore, interested parties claim that CIF expenses would not be applicable to Chinese factories. If an adjustment is to be made, interested parties urge the Department to use U.S. import statistics which contain a breakdown between Customs values and CIF values. Finally, interested parties contend that the Indian CIF/FOB factor should be revised to reflect the 20 percent decline found in the world CIF/FOB factor since 1983.

DOC Position

We agree with petitioner that an adjustment is necessary to convert the FOB value to a CIF value. After contacting the European Community's Office in Washington, DC, we have found that the EC export statistics are based on FOB values, not CIF values. Therefore, we have applied a CIF/FOB conversion factor obtained from the International Monetary Fund's International Financial Statistics for 1990 to these EC export statistics. This factor was the same for both 1989 and 1990 and was derived from India's CIF imports compared to its FOB imports. However, we disagree with petitioner's statement that refunded duties do not include scrap used in the production of TRBs. Petitioner has provided no evidence in this review that would suggest that the full amount of the duty paid is not refunded upon exportation of the merchandise. We also disagree with interested parties' statement that, since Chinese manufacturers do not import steel, an adjustment should not be made to the EC export statistics. Converting an FOB price to a CIF price more closely reflects what is actually paid by Indian producers in the surrogate country. The amount of steel imported into China is not relevant.

Comment 4

Petitioner maintains that, since Asian and Bimetal Bearing Ltd. (Bimetal) represent the known universe of producers of comparable merchandise in India, Asian's experience has not been shown to be unlike the experience of PRC producers, and Asian appears to be a more significant producer of TRBs than Bimetal, the overhead and SG&A rates for the two companies should be averaged.

Respondents argue that Asian is inappropriate for use as a surrogate company since it is considered a failing company under Indian tax law.

VOL
56
ISS
251
DE
31
1991
UMI

Respondents note that Asian has accumulated losses equal to or exceeding its entire net worth, and therefore is eligible for various types of assistance from the Indian government. Respondents further argue that there is no evidence to suggest that Asian is representative of the Chinese TRB industry.

Interested parties note that the information from Asian does not relate to the POR. Interested parties also maintain that Asian is primarily a ball bearings producer, and therefore should not be deemed a better surrogate than Bimetal, which also produces ball bearings. Furthermore, respondents and interested parties contend that the calculation of SG&A for Asian is flawed due to the inclusion of interest expenses, excise duties, turnover tax and handling costs. Finally, respondents contend that the calculation of overhead for Asian is flawed due to the inclusion of miscellaneous expenses.

DOC Position

We agree with respondents that Asian is inappropriate for use as a surrogate company and therefore believe that the overhead and SG&A rates for Asian and Bimetal should not be averaged. We recognize, as respondents argue, that Asian has accumulated losses equal to or exceeding its entire net worth, and that its information is further removed from the POR than that of Bimetal. However, we believe that Asian is not an appropriate surrogate primarily because the auditor's report notes that the financial statements are not presented in accordance with the generally accepted accounting principles of India.

Comment 5

Petitioner contends that the failure of Premier to identify all related parties in the PRC in its questionnaire response renders all of its responses unusable. Petitioner notes that the verification report for Premier indicates that Premier has a relationship with a range of related parties. Petitioner argues that Premier withheld information about these parties. Furthermore, petitioner claims that, since the record does not reveal exactly what is manufactured or marketed by each of the related parties, the Department should use BIA in calculating a rate for Premier. Petitioner notes that the statute authorizes the Department to use BIA whenever it is unable to verify the accuracy of the information submitted or whenever a party refuses or is unable to produce information in a timely manner or in the form required.

Premier contends that the questionnaire required it to provide information on related companies which deal with the products in this investigation, which Premier did. Premier stated that it interpreted the questionnaire as asking for all affiliations that deal with TRBs only. Premier argues that it has no relationship with companies that produce TRBs. According to Premier, it owns no interest in such companies, such companies own no interest in Premier, and there is no third party that owns a 20 percent interest in both Premier and such companies. Premier further argues that transactions between itself and another Hong Kong trading company were financing accommodations, and that the other trading company did not know the final destination of merchandise sold to Premier.

DOC Position

Although we agree with petitioner that Premier failed to identify all of its affiliations in the PRC, we do not agree that this failure renders its responses unusable. Premier did not report its affiliations with companies involved with other products. However, at verification, we did not find any relationships with manufacturers of TRBs. As stated in the Final Results of Antidumping Duty Administrative Review; Lug Nuts From the People's Republic of China (56 FR 46153) (September 10, 1991), "During verification, it is the Department's practice to select only a certain number of items to verify. Due to time constraints, the Department often is unable to complete the review of source documentation for all selected items. Nevertheless, if the Department's verification team establishes the integrity of the source documents for those sales that it does review, then it assumes that source documents for the remaining sales are similarly reliable." In this instance, the verifier established to the best of his ability, that Premier is not related to any other company that produces TRBs. Therefore, we are accepting this finding for purposes of these final results.

Comment 6

Petitioner maintains that the BIA rate used in the preliminary determination was not adverse, and that the highest rate calculated for any respondent in this review should be used for either: (1) The entire margin for Premier; or (2) the margin for Premier's unmatched sales. Petitioner notes that the difficulties encountered in the previous reviews in obtaining matching data and difmer information for Premier have not been resolved in this review. Furthermore, petitioner contends that using the 0.97 percent margin from the first two reviews for this review is contrary to the Department's promise to use a more adverse BIA rate if the need arose. Petitioner argued that an adverse BIA rate was used in a number of other cases where the respondent was either uncooperative or unable to provide an adequate response due to circumstances beyond its control. Petitioner suggested that, as an alternative BIA rate for Premier, the Department could use information provided by Premier itself and presented by petitioner. This rate would limit the similar matches to those with variable costs within plus or minus 20 percent.

Premier asserts that it answered the Department's questions to the best of its ability, but it was not able to report difmer information because it is not a manufacturer of TRBs. Premier argues that the circumstances of this review do not warrant a punitive BIA rate, because Premier fully cooperated with the Department. Premier states that, although it should not be penalized for failing to provide information that it does not have, if such a BIA rate is applied, it should be the rate applied in the preliminary results.

DOC Position

We agree with respondent. We do not believe that an adverse BIA rate is appropriate for Premier's entire margin or its unmatched sales. We have therefore assigned these unmatched sales the 0.97% margin used in the preliminary results as BIA. Based on the information on the record, there is no basis to support a conclusion that Premier is able to get difference in merchandise information from its suppliers. Furthermore, the information provided by Premier to limit the similar matches to those with variable costs within plus or minus 20 percent is not adequate since it does not take into account the sales of cups and cones to the United States. See the "Foreign Market Value" section of this notice for an explanation of the Department's methodology.

Comment 7

Respondents maintained in their case briefs that the department's use of Bimetal's expenses as the basis for calculating certain factors of production was incorrect. Respondents point out that Bimetal produces other than TRBs, and that its costs are not representative of costs incurred in a market economy by a manufacturer of the subject merchandise. However, during the hearing, respondents and interested parties stated that, if there were no other viable alternatives, Bimetal's information should be used with various adjustments. Respondents and interested parties stated at the hearing that Bimetal is a viable producer, that its auditors gave it an unqualified audit report, and that the record does not indicate whether the products produced by Bimetal are more or less technologically advanced than TRBs.

Although in its case brief petitioner argued in favor of averaging the overhead and SG&A rates of Bimetal and Asian, in its rebuttal brief petitioner stated that, since Bimetal does not produce TRBs, it is not an appropriate source for calculating certain factors of production. Petitioner urges that the Department use only Asian's information instead, since Asian does produce TRBs.

DOC Position

We believe that Bimetal's information is the most accurate information on the record, and therefore believe that the use of this information is appropriate. We agree with respondents' and interested parties' statements that Bimetal is a viable producer of bearings, its auditors found no inconsistencies, and the Department has in the past used information from companies that were not producers of such or similar merchandise for use in constructing a value.

Comment 8

Interested parties contend that the overhead rate used in the preliminary results is a rate suited to developed countries and should not be used in the final results. Interested parties state that the Department should use either: (1) The rate from the previous review; or (2) the Yugoslavian rate data provided by interested parties.

Respondents and interested parties argue that, should the Department use Bimetal's expenses in its analysis, the Department should correct the calculation of overhead. Respondents and interested parties state that depreciation expenses from prior years were incorrectly included in the overhead expense. Interested parties also argue that some depreciation should be included with SG&A expenses. Respondents and interested parties further argue that unidentified and unexplained miscellaneous expenses were incorrectly included in the overhead expense.

Petitioner asserts that, if Bimetal's data were used in the final results, there is no basis for excluding miscellaneous expenses or depreciation costs from the overhead total. According to petitioner, miscellaneous expenses are not included anywhere in Bimetal's material or labor accounts. Furthermore, petitioner maintains that, since it is impossible to know the amount of depreciation expense for a given year until future years have passed, the only reasonable approach is to estimate this expense on the basis of the past year's experience, as was done in the preliminary results. Finally, petitioner contends that the overhead rate used in the preliminary results is consistent with the known experience of TRB manufacturers around the world.

DOC Position

We disagree with interested parties that the overhead information used in the preliminary results is suited only to developed countries. As stated in our position to Comment 7, we are using this information for purposes of our final results. However, we do agree with respondents and interested parties that certain adjustments need to be made to the overhead rate provided by petitioner. We have therefore recalculated overhead by deducting from the total overhead figure depreciation expenses from prior years and an amount for depreciation which we are including under SG&A. Furthermore, we have allocated the miscellaneous expenses contained in overhead to both overhead and SG&A based on the percentage of overhead and SG&A net of miscellaneous expenses to the combined amount of overhead and SG&A net of miscellaneous expenses.

Comment 9

Respondents and interested parties argue that, should the Department use Bimetal's expenses in its analysis, the calculation of Bimetal's SG&A expenses should be revised to correct certain errors. Respondents and interested parties argue that packing, forwarding, and shipping costs were incorrectly included in SG&A expenses. Furthermore, respondent and interested parties note that the amount of excise duty included in SG&A expenses was completely recovered and therefore Bimetal incurred no actual expense for this item. Interested parties argue that, if it is not clear that this expense was completely recovered, this expense should be treated as a materials expense. Interested parties further argue that an amount of depreciation included in overhead should be allocated to SG&A. Finally, respondent and interested parties argue that the amount of interest income reported by Bimetal should be used as an offset to Bimetal's interest expense.

Petitioner agrees that respondents' claims regarding the effect of packing, forwarding and excise taxes upon the SG&A expenses are valid if Bimetal's information was used in the final results. However, petitioner states that respondents' claims concerning interest is unfounded in that the links necessary to make the requested adjustment in the constructed value calculations have not been shown.

DOC Position

We agree with all parties that Bimetal's SG&A expenses should be revised to exclude packing, forwarding and excise taxes which were included in SG&A in the preliminary results. We have made this adjustment. In addition, we agree with respondents and interested parties that the interest income reported by Bimetal should be used as an offset to the interest expense. However, we have offset interest expense only by the amount of interest income applicable to short-term interest-bearing assets. Furthermore, we agree with interested parties that an amount of depreciation included in overhead should be allocated to SG&A and have done so. We have increased SG&A to account for the entire amount of auditing fees incurred by Bimetal as there was no basis for excluding certain portions of this expense. Finally, we have allocated the miscellaneous expenses contained in overhead to both overhead and SG&A, based on the respective ratios of overhead net of miscellaneous expenses and SG&A amounts to the combined amount of overhead and SG&A.

Comment 10

Luoyang contends that the Department should value steel scrap used as inputs by Luoyang at the cost of steel scrap, not steel bar. Luoyang maintains that there are essential differences between steel bar and steel scrap used by Luoyang. Furthermore, Luoyang asserts that steel bar has a much higher value than steel scrap. Finally, Luoyang states that, since it takes a significantly greater amount of steel scrap inputs to produce TRBs than steel bar, if both types of inputs had the same value, Luoyang would manufacture TRBs with steel bar entirely, and sell the scrap at steel bar prices.

Petitioner counters that new material remains new product throughout the production process. According to petitioner, the only time scrap has any significance is when a respondent

VOL 56 ISS 251 DEC 31 1991 UMI

demonstrates that it recovered and sold scrap from its production process, thereby reducing its net material cost. Petitioner maintains that there is no such thing as input scrap.

DOC Position

We do not believe that the scrap steel input reused by Luoyang should be valued at the cost of steel scrap. Respondent had sufficient time before verification to bring this issue to the attention of the Department and to suggest alternatives with which to value this reused steel input. However, respondent failed to do so. Since this issue was discovered during verification, and since there is no other reasonable valuation alternative, we have valued this reused steel input at the price of steel bar.

Comment 11

Respondents and interested parties assert that the Department should not have included Guizhou and Jilin in this administrative review, since the petitioner did not request a review for these companies. Interested parties assert that the inclusion of Guizhou and Jilin is not legally permissible. Respondents argue that petitioner's request for review did not equate CMEC with all PRC companies that exported TRBs to the United States. Interested parties state that the only companies that can be legally reviewed are those listed in the Notice of Initiation or those listed in petitioner's request for review. Both respondent and interested parties contend that Guizhou and Jilin were never part of CMEC. Thus, respondents state that the data obtained from Guizhou and Jilin should not be used to determine the "all other" rate in this review, and that entries made by these two companies during the POR should be liquidated at the deposit rate. Furthermore, interested parties point out that, since the Department's preliminary results show the respondents to be independent, there is no basis to include Guizhou and Jilin in the review.

Petitioner maintains that respondents themselves identified CMEC as the sole exporter of TRBs from the PRC in the original investigation and in the two subsequent reviews. Petitioner points out that identifying the name of individual plants in its request for review was unnecessary. In spite of this fact, petitioner notes that there were no imports reported in this review for which Timken did not request a review of either the producer or the exporter.

DOC Position

We agree with petitioner. Respondents' and interested parties' contention that the Department was wrong in including all Chinese companies in this review because they were not specifically requested by petitioner is without merit. Our reasoning for including all Chinese companies has been quite clear. As we stated in our preliminary results, at the time of the investigation, CMEC was the umbrella organization through which all companies in the PRC exported TRBs to the United States. The notion that CMEC was the only exporter of TRBs in the PRC was also accepted during our initiation of this review. As such, in reviewing CMEC, we included all PRC companies that exported TRBs to the United States. By initiating this review for CMEC and Premier, we therefore meant to include all exports of TRBs from the PRC. Even if the umbrella organization situation with CMEC did not exist, 19 CFR 353.22(c) specifically permits the Department to review any firm on its own initiative when appropriate. Furthermore, we note that there were no imports reported in this review for which Timken did not request a review of either the producer or the exporter.

Comment 12

Respondents assert that the Department should base the "all others" rate on the weighted-average margin of all TRB producers, not on the highest margin calculated for any single producer. Respondents argue that the use of the highest margin calculated for any single producer is particularly inappropriate in this case because the rate is unrepresentative of Chinese exports. Respondents note that the highest margin calculated in the preliminary results was based on one sale of one unusual part number, which was not exported by any other company during the POR.

Interested parties contend that the Department has no legal right to impose an "all others" rate on companies that did not participate in this review for purposes of assessing duties on imports which entered during the POR. Interested parties argue that the application of an "all others" rate should only be used to determine what the estimated antidumping duty rates will be on future entries. Even if the Department is allowed to impose an "all others" rate, interested parties maintain that the highest non-BIA rate used by the Department in the preliminary results is unfair. Interested parties suggest that the weighted-average margin of all companies reviewed should be the "all others" rate.

DOC Position

We disagree with interested parties. For assessment purposes, all shippers not individually reviewed in this case will be assessed duties equal to the highest rate for any non-BIA reviewed firm, which is the "all others" rate. As noted in Comment 11, the Department intended to cover all exporters of the subject merchandise in this review. The fact that the Department did not specifically name a company is attributable to the unique and evolving circumstances of non-market economy cases from the PRC. However, all companies not specifically named, but nevertheless covered in this review, had the opportunity to participate and receive their own margins.

We also disagree with respondents that a weighted-average margin is the appropriate "all others" rate for estimated duty deposit purposes. As stated in the Final Results of Antidumping Duty Administrative Review: Certain Fresh Cut Flowers From Mexico (56 FR 29621) (June 28, 1991), the Department has changed its practice with respect to the "new shipper/all others" rate because of difficulties Customs has in determining when a producer/exporter begins shipping the subject merchandise to the United States. The current practice of the Department is to assign all shippers not having an individual rate in any previous administrative review or the investigation, and which are not related to any firms with individual rates, regardless of when they began exporting, the "all others" rate, which is the highest rate calculated for any reviewed firm. (Note that this rate was formerly called the "new shipper" rate. The Department will no longer calculate a separate "new shipper" rate, but will update the "all others" rate with each administrative review.) Therefore, the "all others" rate will continue to be the highest margin calculated for any single producer.

Comment 13

Interested parties maintain that, in the event that a "new shipper" rate or "all other" rate is imposed after this review, this new rate should not apply to Chin Jun Industrial Ltd. (Chin Jun). Chin Jun is an exporter of TRBs to the United States which first exported bearings after May 31, 1989.

DOC Position

We disagree with interested parties. As stated in response to Comment 12, the "all others" rate applies to all shippers not receiving individual rates in this review, regardless of when they began exporting.

Final Results of the Review

For purposes of these final results, we have determined that company-specific dumping margins are warranted for the eight companies listed below. (For a further discussion of company-specific dumping margins, see the preliminary results of this administrative review (56 FR 50309, October 4, 1991), and a July 23, 1991, memo from the Director, Office of Antidumping Investigations, to the DAS for Investigations, both of which are on file in room B-099, U.S. Department of Commerce.) For any other exporters, with entries during the review period, we have assigned an "all others" rate equal to the highest rate for any company in this administrative review. This rate will also be the deposit rate for all companies who have not received an individual rate in any administrative review or the less than fair value investigation, and are not related to any firms with individual rates. As a result of our review, we determine the margins to be:

Manufacturer/exporter	Time period	Margin (percent)
CMEC	5/12/89-5/31/90	0.00
Guizhou	5/12/89-5/31/90	0.00
Henan	5/12/89-5/31/90	0.00
Jilin	5/12/89-5/31/90	8.83
Liaoning	5/12/89-5/31/90	0.00
Luoyang	5/12/89-5/31/90	1.05
Premier	6/01/89-5/31/90	0.60
Shanghai General	6/01/89-5/31/90	0.00
All Others	5/12/89-5/31/90	8.83

This Department will instruct the Customs Service to assess antidumping duties at these rates on all appropriate entries. Individual differences between United States Price and Foreign Market Value may vary from the percentages stated above. The Department will issue appraisement instructions concerning these eight companies and all others directly to the Customs Service.

Furthermore, as provided by section 751(a)(1) of the Tariff Act: (1) A cash deposit of estimated antidumping duties based on the above margins shall be required on entries of this merchandise from Jilin, Luoyang, Premier and all others; and (2) since the margins for CMEC, Guizhou, Henan, Liaoning and Shanghai General are 0.00 percent, the Department shall not require a cash deposit of antidumping duties on entries of TRBs from these companies. These deposit requirements are effective for all shipments of TRBs from the PRC entered or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

The administrative review and notice are in accordance with sections 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(6).

Dated: December 23, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Minority Business Development Agency

Business Development Center Applications: Ponce, Puerto Rico (Service Area)

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625, the Minority Business Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) program to operate an MBDC for approximately a 3-year period, subject to Agency priorities, recipient performance and the availability of funds. The cost of performance for the first Budget period (12 months) is estimated as $184,260 in Federal funds, and a minimum of $32,516 in non-Federal (cost sharing) contribution, from June 1, 1992 to May 31, 1993. Cost-sharing contributions, may be in the form of cash contributions, client fees, in-kind contributions or combinations thereof. The MBDC will operate in the Ponce, Puerto Rico SMSA geographic service area.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, state, local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDA funds organizations that can identify and coordinate public and private sector resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated initially by regional staff on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive. The selection of an application for further processing by MBDA will be made by the Director based on a determination of the application most likely to further the purpose of the MBDC Program. The application will then be forwarded to the Department for final processing and approval, if appropriate. The Director will consider past performance of the applicant on previous Federal awards.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contributions. To assist them in this effort, MBDCs may charge client fees for management and technical assistance (M&TA) rendered. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less, and 35% of the total cost for firms with gross sales of over $500,000.

MBDCs performing satisfactorily may continue to operate after the initial competitive year for up to 2 additional budget periods. MBDCs with year-to-date "commendable" and "excellent" performance ratings may continue to be funded for up to 3 or 4 additional budget periods, respectively. Under no circumstances shall an MBDC be funded for more than 5 consecutive budget periods without competition. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continued fundings will be at the discretion of MBDA based on such factors as an MBDC's performance, the availability of funds and the Agency priorities.

Awards under this program shall be subject to all Federal and Departmental regulations, policies, and procedures applicable to Federal assistance awards.

In accordance with OMB Circular A-129, "Managing Federal Credit Programs," applicants who have an outstanding account receivable with the

VOL
56
ISS
251
DE
31
1991
UMI

Federal Government may not be considered for funding until these debts have been paid or arrangements satisfactory to the Department of Commerce are made to pay the debt.

Applications are subject to Governmentwide Debarment and Suspension (Nonprocurement) requirements as stated in 15 CFR part 26.

The departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the MBDC has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements; unsatisfactory performance of MBDC work requirements; and reporting inaccurate or inflated claims of client assistance or client certification. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

On November 18, 1988, Congress enacted the Drug-Free Work-place Act of 1988 (Pub. L. 100-690, title V, subtitle D). The statute requires contractors and grantees of Federal agencies to certify that they will provide a drug-free workplace. Pursuant to these requirements, the applicable certification form must be completed by each applicant as a precondition for receiving Federal grant or cooperative agreement awards.

"Certification for Contracts, Grants, Loans, and Cooperative Agreements" and SF-LLL the "Disclosure of Lobbying Activities" (if applicable) is required in accordance with section 319 of Public Law 101-121, which generally prohibits recipients of Federal contracts, grants, and loans from using legislative Branches of the Federal Government in connection with a specific contract, grant or loan.

CLOSING DATE: The closing date for application is February 18, 1992. Applications must be postmarked on or before February 18, 1992.

Proposals will be reviewed by the Washington Regional Office. The mailing address for submission is:

ADDRESSES:

Gina A. Sanchez, Regional Director, Washington Regional Office, Minority Business Development Agency, 14th & Constitution Ave. NW., room 6711, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT:

John F. Iglehart, Regional Director, New York Regional Office at (212) 264-3283.

SUPPLEMENTARY INFORMATION:

Anticipated processing time of this award is 120 days. Executive Order 12372 "Inter-governmental Review of Federal Programs" is not applicable to this program. Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above New York address.

11.800 Minority Business Development (Catalog of Federal Domestic Assistance).

Dated: December 24, 1991.

William R. Fuller,

Deputy Regional Director, New York Regional Office.

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

[Docket No. 911192-1292]

Western Pacific Bottomfish and Seamount Groundfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of control date for entry into the bottomfish fishery in the Mau Zone of the Northwestern Hawaiian Islands.

SUMMARY: This notifies owners of vessels that enter the bottomfish fishery in the Mau Zone of the Northwestern Hawaiian Islands (NWHI) after December 17, 1991, that they may be determined to be ineligible for future participation in that fishery should the Western Pacific Fishery Management Council (Council) decide to limit access to the fishery based in part on historical participation. Owners are defined as persons listed as owners on Coast Guard vessel documentation records, or on state vessel registration records for undocumented vessels.

This announcement is intended to alert bottomfish fishery participants in the Mau Zone who enter the fishery after the referenced date that their investment may be at risk if the Council decides to limit access to the fishery. This announcement does not preclude consideration of any other date for eligibility from being proposed and implemented.

FOR FURTHER INFORMATION CONTACT:

Kitty Simonds, Executive Director, Western Pacific Fishery Management Council, (808) 523-1368; or E. C. Fullerton, Regional Director, Southwest Region, NMFS (213) 514-6196 or (FTS) 795-6196.

SUPPLEMENTARY INFORMATION: A limited entry permit is currently required to participate in the bottomfish fishery in the Ho'omalu Zone of the NWHI, that portion of the exclusive economic zone (EEZ) west of 165° W. longitude. Access is not limited in the Mau Zone, that portion of the EEZ between 161° 20' and 165° W. longitudes, but participants must hold Federal permits. Persons fishing in the Mau Zone can earn points for possible qualification for a Ho'omalu Zone limited entry permit.

Due in part to restrictions in other Hawaiian fisheries such as the longline and lobster fisheries, the Mau Zone fishery is experiencing a significant increase in fishing effort. While the number of Ho'omalu Zone limited entry permits has decreased by 50 percent in the past year, the number of Mau Zone permits increased by 75 percent. There are now 29 Mau Zone permits.

The Council is concerned about the increasing effort in this fishery. Estimates of Spawning Potential Ratio (SPR) indicate that the status of opakapaka stocks in the Mau Zone (SPR = 0.28) more closely resembles the status of opakapaka in the Main Hawaiian Islands (SPR = 0.35), than in the Ho'omalu Lone (SPR = 0.65). The Plan Team has expressed concern that the bottomfish stocks in the Main Hawaiian Islands are showing signs of stress, and the Mau Zone stocks may be approaching a similar condition. In addition, an economic analysis by the NMFS Honolulu Laboratory indicates that the Mau Zone can economically sustain a fleet of 6 full-time vessels; 14 vessels were active in the Mau Zone in 1990

The Council's Bottomfish Advisory Review Board (BARB), which was established to advise the Council on the NWHI limited entry program, has requested several times that the Council consider limited access for the Mau Zone. At its December 17-18, 1991, meeting, the Council agreed to establish a December 17, 1991 control date for possible use in a limited access program for the Mau Zone. The Council has directed the bottomfish plan team to evaluate the BARB's proposal and develop alternative approaches for the Council to consider

Establishment of a potential control date is needed to minimize a rush to enter the fishery while limited access alternatives are being discussed. However, establishment does not commit the Council to any particular management regime or criterion for entry to the bottomfish fishery in the Mau Zone. Fishermen are not guaranteed future participation in the Mau Zone fishery regardless of their date of entry or intensity of participation in the fishery before or after the control date. The Council may choose a different control date, or it may choose a management regime that does not make use of a control date. The Council may choose to give variable consideration to participants in the fishery before and after the control date. The Council may also choose to take no further action to control entry or access to the fishery.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 24, 1991.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

[FR Doc. 91-31246 Filed 12-30-91; 8:45 am]

BILLING CODE 3510-22-M

North Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The North Pacific Fishery Management Council (Council), and its Advisory Panel (AP) and its Scientific and Statistical Committee (SSC) will hold public meetings on January 13-17, 1992, at the Downtown Hilton Hotel, Portland, OR. A Council executive session, pertaining to a briefing on litigation, which is not open to the public, is scheduled to begin on January 16 at noon. The Council is scheduled to convene its regular public meeting on January 17 at 8 a.m. The Council's AP and SSC will begin their meetings on January 13 at 1 p.m. Their agendas will be similar to that of the Council (see below). Other workgroup and committee meetings also may be held on short notice during the meeting week.

The Council will consider the following agenda items: (1) Report on the status of seabirds, and review of the draft Alaska Seabird Management Plan prepared by the U.S. Fish and Wildlife Service; (2) review of progress on the revision to the North Pacific Fisheries Research Plan, and consideration of approval of a program for public review; (3) review of progress on the development of a moratorium on all fisheries under the Council's jurisdiction and on a comprehensive rationalization program; (4) a status report on an amendment to the Marine Mammal Protection Act proposed by the National Marine Fisheries (NMFS); (5) a status report on Secretarial action taken on Amendment 17/22—Walrus Islands; (6) an update on research on pollock in the Gulf of Alaska; (7) review of research priorities and recommendations to the NMFS; (8) an overview of crab management and consideration of the need for adjustments to the management plan; (9) review of staff tasking; and (10) restrictions on U.S. operations affiliated with foreign activities in the Central Bering Sea.

In relation to groundfish management, the Council will: (1) Receive a report from the NMFS on plan amendments, regulatory changes and emergency rules in progress; (2) discuss catch and discard estimation procedures; (3) receive a report from the Alaska Fisheries Science Center on the need for the current joint U.S./Japan longline survey; and (4) hear results of scoping on the proposed delay in the Bering Sea/Aleutian Islands pollock "B" season, and consider the need for a plan amendment.

For more information contact the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone (907) 271-2809.

Dated: December 24, 1991.

David S. Crestin,

Deputy Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishment of an Import Limit for Certain Wool Textile Products Produced or Manufactured in Costa Rica; Correction

December 24, 1991.

As the result of a data investigation, the import level for Costa Rica 443 is being revised. In the letter to the Commissioner of Customs published in the **Federal Register** on October 24, 1991 (56 FR 55120), second column, the import level for Category 443 is changed from 176,810 numbers to 187,983 numbers.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 91-31188 Filed 12-30-91; 8:45 am]

BILLING CODE 3510-DR-F

Adjustment of Import Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Products Produced or Manufactured in Thailand

December 24, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 30, 1991.

FOR FURTHER INFORMATION CONTACT:

Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343-6581. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for special shift, carryforward and cancellation of special shift previously added and subtracted.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 55 FR 50756, published on December 10, 1990). Also see 56 FR 32558, published on July 17, 1991.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 24, 1991.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on July 11, 1991, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Thailand and exported during the twelve-month period which began on January 1, 1991 and extends through December 31, 1991.

Effective on December 30, 1991, you are directed to amend further the directive dated July 11, 1991 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and Thailand:

VOL 56 ISS 251 DEC 31 1991 UMI

Category	Adjusted twelve-month limit [1]
Sublevels in Group II	
338/339	1,572,760 dozen.
345	208,050 dozen.
347/348/847	516,990 dozen.
638/639	1,583,990 dozen.
647/648	711,555 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1990.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 91-31189 Filed 12-30-91; 8:45 am]

BILLING CODE 3510-DR-F

Denial of Participation in the Special Access and Special Regime Programs

December 24, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs denying the right to participate in the Special Access and Special Regime Programs.

EFFECTIVE DATE: April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-3400.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Committee for the Implementation of Textile Agreements (CITA) has determined that Western Caribbean Jeans is in violation of the requirements set forth for participation in the Special Access and Special Regime Programs.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs, effective on April 1, 1992, to deny Western Caribbean Jeans the right to participate in the Special Access and Special Regime Programs, for a period of three years, beginning April 1, 1992 and ending March 31, 1995. In addition, for the period April 1, 1992 through March 31, 1995, U.S. Customs will not sign ITA-370P forms for export of U.S.-formed and cut fabric for Western Caribbean Jeans.

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 54 FR 50425, published on December 6, 1989.

Requirements for participation in the Special Regime Program are available in **Federal Register** notices 53 FR 15724, published on May 3, 1988; 53 FR 32421, published on August 25, 1988; 53 FR 49346, published on December 7, 1988; and FR 50425, published on December 6, 1989.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 24, 1991.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: The purpose of this directive is to notify you that the Committee for the Implementation of Textile Agreements has determined that Western Caribbean Jeans is in violation of the requirements for participation in the Special Access and Special Regime Programs.

Effective for entry on or after April 1, 1992, you are directed to prohibit Western Caribbean Jeans from further participation in the Special Access and Special Regime Programs for a period of three years, beginning April 1, 1992 and ending March 31, 1995. Goods accompanied by Form ITA-370P which are presented to U.S. Customs for entry under the Special Access and Special Regime Programs will no longer be accepted. In addition, for the period April 1, 1992 through March 31, 1995, you are directed not to sign ITA-370P forms for export of U.S.-formed and cut fabric for Western Caribbean Jeans.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

Textile and Apparel Categories With the Harmonized Tariff Schedule of the United States; Change to the 1992 Correlation

December 23, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Change to the 1992 Correlation.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-3400.

SUPPLEMENTARY INFORMATION:

The Correlation: Textile and Apparel Categories based on the Harmonized Tariff Schedule of the United States (1992) presents the harmonized tariff numbers under each of the cotton, wool, man-made fiber, silk blend and other vegetable fiber categories used by the United States in monitoring imports of these textile products and in the administration of the bilateral agreement program. The 1992 Correlation should be amended to correct the unit of measure for Category 632 from dozen to dozen pair.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

COMMODITY FUTURES TRADING COMMISSION

Coffee, Sugar & Cocoa Exchange, Inc.: Proposed Amendments Relating to the Delivery of Coffee in Licensed Warehouses in New Orleans on the Coffee "C" Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Proposed Contract Market Rule Changes.

SUMMARY: The Coffee, Sugar & Cocoa Exchange, Inc. (CSCE) has submitted proposed amendments to its coffee "C" futures contract that will declare a moratorium on the licensing of additional wharf warehouses located in the Port of New Orleans and require that any new coffee certified by the CSCE must not be stored in existing CSCE-licensed wharf warehouses located in New Orleans. The proposed amendments will be made effective by the CSCE immediately following Commission approval with respect to all existing and newly listed contract months. In accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis (Division) of the Commodity Futures Trading Commission (Commission) has determined, on behalf of the Commission, that the proposed amendments are of major economic significance. On behalf of the Commission, the Division is requesting comments on this proposal.

DATES: Comments must be received on or before January 30, 1992.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to the proposed changes affecting CSCE-licensed wharf warehouses in the Port of New Orleans for the Coffee "C" futures contract.

FOR FURTHER INFORMATION CONTACT: Fred Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, telephone (202) 254-7303.

SUPPLEMENTARY INFORMATION: The existing terms of the coffee "C" futures contract provide for the delivery of CSCE-certified coffee stored in CSCE-licensed warehouses located in the Port of New York and the Port of New Orleans.[1] Currently, the contract's terms stipulate certain requirements that coffee warehouses located in the above-cited ports must meet in order to be eligible for licensing as delivery warehouses for the futures contract. These warehouse licensing standards currently do not place any restrictions on where licensed warehouses may be located within the above-noted ports. At present, in the Port of New Orleans, the CSCE-licensed warehouses are located at both wharf and inland locations.

The CSCE is proposing to declare a moratorium on the licensing of additional wharf warehouses in the Port of New Orleans and to require that any new coffee certified by the CSCE must not be stored in wharf warehouses located in the Port of New Orleans. Under the proposals, the CSCE will continue to certify new coffee that is stored at inland warehouses located in the Port of New Orleans and will continue to permit the delivery of existing certified coffee that is stored at currently licensed wharf warehouses in New Orleans. The proposed amendments will be implemented immediately following Commission approval with respect to all existing and newly listed contract months.

The CSCE indicates that the proposed amendments are being adopted to address concerns regarding the potential for bags of coffee held in storage at wharf warehouses in New Orleans to burst at a higher rate than bags of coffee stored in other CSCE-licensed warehouses. In this respect, the CSCE indicates that an independent consultant hired by the CSCE conducted two inspections of coffee stored in CSCE-licensed wharf and inland warehouses, and determined that bags of coffee stored in wharf warehouses in New Orleans are more likely to burst than bags of coffee stored at other CSCE-licensed warehouses. The CSCE indicates that the consultant also determined that bags of coffee from certain origins were more likely to burst than bags of coffee of other origins. The CSCE further indicates that a CSCE analysis of the situation confirmed the consultant's findings.

The Commission is seeking comment on the proposed amendments noted above. In particular, the Commission is requesting comment on the appropriateness and acceptability of the CSCE's proposal to apply to all existing contract months the proposed amendment specifying that newly certified coffee must not be stored in CSCE-licensed wharf warehouses located in the Port of New Orleans. In addition, in consideration of the fact that the eventual effect of the proposed amendments will be to eliminate the possibility of futures delivery in wharf warehouses in New Orleans, the Commission is requesting comment on the extent to which the proposed amendments will affect the level of economically deliverable supplies available for the coffee "C" futures contract.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, at the above address. Copies of the amended terms and conditions of the coffee "C" futures contract can be obtained through the Office of the Secretariat by mail at the same address or by telephone at (202) 254-6314.

The materials submitted by the CSCE in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)). Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the above address in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, at the above address by the specified date.

Issued in Washington, DC on December 27, 1991.

Gerald Gay,

Director.

[FR Doc. 91-31322 Filed 12-30-91; 8:45 am]

BILLING CODE 6351-01-M

[1] Beginning with the July 1992 contract month, delivery on the coffee "C" futures contract also will be permitted at CSCE-licensed warehouses located in the Port of San Francisco.

COPYRIGHT ROYALTY TRIBUNAL

[CRT Docket No. 91-3-SCRA]

1991 Satellite Carrier Royalty Rate Adjustment Proceeding

AGENCY: Copyright Royalty Tribunal.

ACTION: Notice.

SUMMARY: The Tribunal gives notice that negotiations to adjust the satellite carrier royalty rate have not proved successful. As a result, the arbitration proceeding is initiated and an arbitration panel is being formed. The Tribunal gives notice of those arbitrators that are available for selection by the copyright owners, satellite carriers, and satellite distributors.

DATES: The arbitration proceeding is initiated, effective December 31, 1991. By January 10, 1992, the copyright owners shall select one arbitrator, and the satellite carriers and distributors shall select one arbitrator.

FOR FURTHER INFORMATION CONTACT: Robert Cassler, General Counsel, Copyright Royalty Tribunal, 1825 Connecticut Avenue, NW., suite 918, Washington, DC 20009 (202-606-4400).

SUPPLEMENTARY INFORMATION: The Satellite Home Viewer Act of 1988 created a satellite carrier compulsory copyright license which permits satellite carriers to retransmit broadcast signals so long as those carriers pay 12 cents per subscriber per month for each independent broadcast signal, and 3 cents per subscriber per month for each network-affiliated broadcast signal.

Congress provided that the 12 cents/3 cents rate would be reviewed in 1991-1992, first by negotiations between the affected parties, and then by arbitration if negotiations prove unsuccessful.

The Tribunal was informed by the copyright owners, the satellite carriers and the satellite distributors that a negotiated adjustment of the rate will not be reached.

Accordingly, the Tribunal gives notice that the arbitration proceeding has begun, effective December 31, 1991.

The Tribunal has received from the American Arbitration Association a list of 26 qualified and available arbitrators.

VOL 56 ISS 251 DEC 31 1991 UMI

Their names and qualifications are listed below. By January 10, 1992, the copyright owners shall select one arbitrator, and the satellite carriers and distributors shall select one arbitrator.

The names and qualifications of available arbitrators are as follows:

Donald Banner—copyright attorney/law professor; Elizabeth Barad—copyright attorney; Thomas Barocci—arbitrator/business consultant; William Becker—copyright attorney; Richard Bennet—copyright attorney; Terrell Birch—copyright attorney; Virginia Carson—copyright/communications attorney; Bernard Corbett—attorney/former CEO of electronics systems company; George Douglas—economic consultant; Stuart Dwork—copyright attorney; Lenore Ehrig—former Chief ALJ for the FCC; Prof. Charles Engle—professor of copyright law; Kenneth Frankl—communications attorney; Hon. George Gallagher—Senior Judge, D.C. Court of Appeals; Prof. James Heisler—professor of economics; James Hobson—former chief, Cable TV Bureau, FCC; David Horowitz—attorney/former CEO, MTV Networks; James Johnston—copyright/communications attorney; Neal Jackson—copyright attorney; Tobey Marzouk—computer/copyright attorney; Bernard Norwood—economic consultant; Douglas Rae—economic and market research consultant; Stephen Rubin—copyright attorney; Edward Shafer—former professor of management & finance/communications consultant; Michael Walter—computer/copyright attorney; Michael Yokell—economic and business consultant.

The biographies of the available arbitrators are available from the Tribunal upon request. For further information about the available arbitrators, the parties are advised to contact Lois Garmon at the American Arbitration Association.

Dated: December 20, 1991.

Mario F. Aguero,

Acting Chairman.

BILLING CODE 1410-09-M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: DoD Policy for the Pilot-Mentor Protege Program.

Type of Request: New Collection.

Average Burden Hours/Minutes Per Response: 8 Hours.

Responses Per Respondent: 2.

Number of Respondents: 30.

Annual Responses: 60.

Annual Burden Hours (Including Recordkeeping): 720.

Needs and Uses: Section 831 of the Fiscal Year 1991 Department of Defense (DoD) Authorization Act (Pub. L. 101-510) requires the Secretary of Defense to establish a pilot program to provide incentives for DoD contractors to furnish disadvantaged small business concerns with assistance designed to enhance their capabilities to perform as subcontractors and suppliers under DoD contracts and other contracts and subcontracts in order to increase the participation of such business concerns under DoD, other Federal Government, and commercial contracts. Because the law provides for credit toward subcontracting goals which are reported on Standard Form (SF 295, "Summary Subcontract Report," and the law requires a report evaluating whether the purposes of the program have been attained, it is necessary to collect additional information to that currently required on the SF 295.

Affected Public: Businesses or other for profit.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Peter N. Weiss.

Written comments and recommendations on the proposed information collection should be sent to Mr. Weiss at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202-4302.

Dated: December 26, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Office of the Secretary

DOD Advisory Group on Electron Devices Advisory Committee Meeting

SUMMARY: Working Group C (Mainly Opto-Electronics) of the DoD Advisory Group on Electron Devices (AGED) annuonces a closed session meeting.

DATES: The meeting will be held at 0900, Wednesday and Thursday, January 15 and 16, 1992.

ADDRESS: The meeting will be held at the Lawrence Livermore National Lab, Livermore, CA.

FOR FURTHER INFORMATION CONTACT: Gerald Weiss, AGED Secretariat, 2011 Crystal Drive, suite 307, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. This opto-electronic device area includes such programs as imaging device, infrared detectors and lasers. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Public Law No. 92-463, as amended, (5 U.S.C. App. II 10(d) (1988)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly, this meeting will be closed to the public.

Dated: December 26, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DOD Advisory Group on Electron Devices Advisory Committee Meeting

SUMMARY: Working Group A (Microwave Devices) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATE: The meeting will be held at 0900, Wednesday, 22 January 1992.

ADDRESS: The meeting will be held at the Palisades Institute for Research Services, Inc., 2011 Crystal Drive, One Crystal Park, suite 307, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Walter Gelnovatch, AGED Secretariat, 2011 Crystal Drive, Suite 307, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. This microwave device area includes programs on developments and research related to microwave tubes, solid state microwave devices, electronic warfare devices, millimeter wave devices, and passive devices. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Public Law No. 92-463, as amended (5 U.S.C. App. II 10(d) (1988)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly, this meeting will be closed to the public.

Defense Science Board Task Force on Feasibility of Employing Pit Reuse in the Production of W88 Warheads for Trident II Meeting

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Defense Science Board Task Force on Feasibility of Employing Pit Reuse in the Production of W88 Warheads for Trident II will meet in closed session on January 28-29, 1992 at Science Applications International Corporation, McLean, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will investigate the feasibility of reusing existing plutonium pits in the production of Mark 5 Reentry Body/W88 warheads for deployment in Trident II SLBMs.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92-463, as amended (5 U.S.C. App. II, (1988)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c) (1) (1988), and that accordingly this meeting will be closed to the public.

Dated: December 26, 1991.

BILLING CODE 3810-01-M

Corps of Engineers, Department of the Army

Regulatory Guidance Letters Issued by the Corps of Engineers

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice.

SUMMARY: The purpose of this notice is to provide a copy of the latest Regulatory Guidance Letter (RGL) to all known interested parties. RGL's are used by the Corps of Engineers as a means to transmit guidance on the permit program (33 CFR 320-330) to its division and district engineers.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph T. Eppard, Regulatory Branch, Office of the Chief of Engineers, at (202) 272-1783.

SUPPLEMENTARY INFORMATION: In accordance with a notice published by the Corps of Engineers on January 22, 1991, (56 FR 2408), we will publish all RGL's upon issuance. Accordingly, RGL No. 91-1, subject: Extension of Time for Individual Permit Authorizations, is hereby published. This is the first RGL published in 1991.

Regulatory Guidance Letter, RGL 91-1

Date: 6 Nov 1991 Expires: 31 Dec 96.

Subject: Extension of Time For Individual Permit Authorizations.

1. The purpose of this guidance is to provide clarification for District and Division offices relating to extensions of time for Department of the Army permits (See 33 CFR 325.6).

2. General: A permittee is informed of the time limit for completing an authorized activity by General Condition #1 of the standard permit from (ENG Form 1721). This condition states that a request for an extension of time should be submitted to the authorizing official at least one month prior to the expiration date. This request should be in writing and should explain the basis of the request. The District Engineer (DE) may consider an oral request from the permittee provided it is followed up with a written request prior to the expiration date. A request for an extension of time will usually be granted unless the DE determines that the time extension would be contrary to the public interest. The one month submittal requirement is a workload management time limit designed to prevent permittees from filing last minute time extension requests. Obviously, the one month period is not sufficient to make a final decision on all time extension requests that are processed in accordance with 33 CFR 325.2. It should be noted that a permittee may choose to request a time extension sooner than this (e.g., six months prior to the expiration date). While there is no formal time limit of this nature, a request for an extension of time should generally not be considered by the DE more than one year prior to the expiration date. A permit will automatically expire if an extension is not requested and granted prior to the applicable expiration date (See 33 CFR 325.6(d)).

3. Requests for Time Extensions Prior to Expiration: For requests of time extensions received prior to the expiration date, the DE should consider the following procedures if a decision on the request cannot be completed prior to the permit expiration date:

(a) The DE may grant an interim time extension while a final decision is being made; or

(b) The DE may, when appropriate, suspend the permit at the same time that an interim time extension is granted, while a final decision is being made.

4. Requests for Time Extensions after Expiration: A time extension cannot be granted if a time extension request is received after the applicable time limit. In such cases, a new permit application must be processed, if the permittee wishes to pursue the work. However, the DE may consider expedited processing procedures when: (1) The request is received shortly (generally 30 days) after the expiration date, (2) the DE determines that there have been no substantial changes in the attendant circumstances since the original authorization was issued, and (3) the DE believes that the time extension would likely have been granted. Expedited processing procedures may include, but are not limited to, not requiring that a new application form be submitted or issuing a 15 day public notice.

5. This guidance expires 31 December 1996 unless sooner revised or rescinded.

For the Director of Civil Works

John P. Elmore,

Chief, Operations, Construction and Readiness Division, Directorate of Civil Works.

BILLING CODE 3710-92-M

DEPARTMENT OF ENERGY

Availability of Restricted Eligibility Solicitation, DE-PS01-91W00231, for the Conduct of Feasibility Studies for the Siting of a Monitored Retrievable Storage Facility

AGENCY: Department of Energy.

ACTION: Amended notice of availability to make grants of financial assistance on a restricted eligibility basis pursuant to 10 CFR 600.7(b)(1) in response to applications received from eligible states, Indian Tribes and affected units of local government pursuant to section 406(b) of the Nuclear Waste Policy Act Of 1982, as amended.

SUMMARY: On June 5, 1991, the Department of Energy published a Notice of Availability of a Restricted Eligibility Solicitation for the Conduct of Feasibility Studies for the siting of a Monitored Retrievable Storage (MRS) Facility. (56 FR 25674).

On August 30, 1991, the Department of Energy published an amendment to the restricted eligibility solicitation. (56 FR 43006).

The Department of Energy hereby announces a second amendment to the restricted Eligibility Solicitation. This amendment includes extension of closing dates to March 31, 1992 for Phase 1 grants and June 30, 1992 for Phase 2 grants. The solicitation is now available inviting the submission by eligible states, Indian Tribes and affected units of local government of applications for financial assistance. Executive Order 12372, Intergovernmental Review of Federal Programs, as implemented by 10 CFR part 1005, applies to this program.

Those who have previously requested copies of the solicitation will be sent copies of the amendment.

ADDRESSES: Requests for copies of the solicitation and amendments must be in writing to: U.S. Department of Energy, Office of Placement and Administration, Attn: Mr. Nick Graham, PR-322.1, 1000 Independence Avenue, SW., Washington, DC 20585. For further information, contact Mr. Nick Graham on (202) 586-9634.

Arnold A. Gjerstad,

Acting Director, Operations Division "B", Office of Placement and Administration.

Federal Energy Regulatory Commission

[Docket Nos. ST92-0437-000 through ST92-1047-000 and ST92-0352-000 through ST92-0380-000]

ANR Pipeline Co.; Self-Implementing Transactions

December 24, 1991.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to part 284 of the Commission's regulations, sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA) and section 5 of the Outer Continental Shelf Lands Act.[1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction.

A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to § 284.102 of the Commission's regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's regulations and section 311(a)(2) of the NGPA.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to § 284.163 of the Commission's regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's regulations.

A "G-S" indicates transportation by interstate pipelines on behalf of shippers other than interstate pipelines pursuant to section 284.223 and a blanket certificate issued under § 284.221 of the Commission's regulations.

A "G-LT" or "G-LS" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.224 of the Commission's regulations.

A "G-HT" or "G-HS" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.224 of the Commission's regulations.

A "K" indicates transportation of natural gas on the Outer Continental Shelf by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.303 of the Commission's regulations.

A "K-S" indicates transportation of natural gas on the Outer Continental Shelf by an intrastate pipeline on behalf of shippers other than interstate pipelines pursuant to § 284.303 of the Commission's regulations.

Lois D. Cashell,

Secretary.

[1] Notice of a transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filing is in compliance with the Commission's regulations.

Canyon Creek Compression Co.; Changes in FERC Gas Tariff

December 24, 1991

Take notice that on December 20, 1991, Canyon Creek Compression Company (Canyon) tendered for filing First Revised Sheet Nos. 12A, 32A and 33 to be a part of its FERC Gas Tariff, First Revised Volume No. 1A, to be effective January 19, 1992.

Canyon states that the purpose of the filing is to add tariff provisions as required by Order No. 537 that require shippers to certify that their service qualifies under section 311.

Canyon requested waiver of the Commission's Regulations to be extent necessary to permit the tariff sheets to become effective January 19, 1992.

Canyon states that a copy of the filing is being mailed to Canyon's jurisdictional customers and interested states regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,
Secretary.

[Docket Nos. RP92-57-000 and GT92-10-000]

CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

(December 24, 1991).

Take notice that CNG Transmission Corporation ("CNG"), on December 17, 1991, pursuant to section 4 of the Natural Gas Act and part 154 of the Commission's regulations, filed the following tariff sheets to comply with Commission Order Nos. 500-K and 537:

First Revised Sheet Nos. 181, 182, and 183

CNG is removing from its tariff all provisions containing language related to Order No. 500 offers of credit, in compliance with ordering paragraph (A) of Order No. 500-K. And, CNG states that it is adding new tariff language to clarify that it may require certifications from shippers to verify that certain transportation qualifies under NGPA § 311.

The proposed effective date for these tariff sheets is January 16, 1992.

CNG states that it has provided copies of its filing to its customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All motions or protests should be filed on or before December 31, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Persons that are already parties to these proceedings need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

[FR Doc. 91-31216 Filed 12-30-91; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. TM92-4-22-000]

CNG Transmission Corp.; Changes in FERC Gas Tariff

December 24, 1991.

Take notice that CNG Transmission Corporation ("CNG"), on December 18, 1991, pursuant to section 4 of the Natural Gas Act, provisions of the Stipulation and Agreement approved by the Commission on October 6, 1989, in Docket Nos. RP88-217-000, *et al.*, section 12.10 of the General Terms and Conditions of CNG's FERC Gas Tariff, and Order Nos. 528 and 528-A, filed six copies of Seventh Revised Sheet no. 44, to First Revised Volume No. 1 of CNG's FERC Gas Tariff.

The proposed effective date for this tariff sheet is January 17, 1992.

CNG states that the purpose of the filing is to flow through changes in take-or-pay costs allocated to CNG by Tennessee Gas Pipeline Company (Tennessee). CNG proposes to reflect the revised allocation of take-or-pay costs proposed by Tennessee in its November 27, 1991, filing in Docket no. RP92-52.

CNG states that copies of the filing were served upon CNG's customers as well as interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party just file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,
Secretary.

El Paso Natural Gas Co.; Compliance Tariff Filing

December 24, 1991.

Take notice that on December 17, 1991, El Paso Natural Gas Company ("El Paso") filed pursuant to part 154 of the Federal Energy Regulatory Commission ("Commission") Regulations Under the Natural Gas Act and in compliance with the Commission's Order No. 537, Original Sheet No. 222A to be contained in its FERC Gas Tariff, First Revised Volume No. 1-A, to be effective January 17, 1992.

El Paso states that in compliance with § 284.102(e) of the Commission's Regulations, it is filing Original Sheet No. 222A which, when accepted and made effective by the Commission, will revise Section 13, Service Conditions, of the General Terms and Conditions in its FERC Gas Tariff, First Revised Volume No. 1-A in compliance with Order No. 537. El Paso states that as a condition to El Paso providing service under § 284.102(d), El Paso may require Shipper's certification including sufficient information to verify that its services qualify under said section. Prior to commencing transportation service, El Paso must receive the certification required from a local distribution company or an intrastate pipeline pursuant to § 284.102(d)(3) of the Commission's Regulations.

El Paso requested that the tendered tariff sheet be accepted for filing and permitted to become effective January 17, 1992.

El Paso states that copies of the filing were served upon all of El Paso interstate pipeline system transportation customers and interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 31, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,
Secretary.

[Docket No. RP92-56-000]

Florida Gas Transmission Co.; Compliance Filing

December 24, 1991.

Take notice that on December 17, 1991 Florida Gas Transmission Company (FGT) tendered for filing to become part of its FERC Gas Tariff, the following tariff sheets to be effective December 30, 1991:

First Revised Sheet No. 103
First Revised Sheet No. 133
Original Sheet No. 172A

FGT states that on September 20, 1991 the Commission issued the Final Rule in Order No. 537 amending the regulations governing transportation by intrastate and interstate pipelines under Section 311 of the Natural Gas Policy Act of 1978 and transportation by interstate pipelines under blanket certificates issued pursuant to § 284.221 of the Commission's regulations. Among other things, the Final Rule added a new § 284.102(e) requiring interstate pipelines to file tariff revisions necessary to obtain certification that transportation of natural gas on behalf of an intrastate pipeline or local distribution company meets the requirements of § 284.102(d) of the Commission's regulations as revised in

VOL
56
ISS
251
DE
31
1991
UMI

the Final Order. Accordingly, in the instant compliance filing, FGT is revising its Rate Schedules ITS–1, PTS–1, and FTS–1 to require the necessary certifications.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 31, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM92–8–4–000]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates

December 24, 1991.

Take notice that on December 19, 1991, Granite State Gas Transmission, Inc. (Granite State), 300 Friberg Parkway, Westborough, Massachusetts 01581 filed Fourth Revised Sheet No. 24 in its FERC Gas Tariff, Second Revised Volume No. 1, proposing changes in rates for effectiveness on January 19, 1992.

According to Granite State, its filing is submitted to passthrough to its customers the take-or-pay buydown and buyout costs directly billed to Granite State by Tennessee Gas Pipeline Company (Tennessee).

Granite State states that in November 1991, Tennessee filed revised tariff sheets to recover additional transition costs in Docket No. RP92–51–000. According to Granite State, its tariff sheet reflects the changes in Tennessee's allocation of take-on-pay costs to Granite State and also complies with the requirements of the reallocation of costs to small customers pursuant to Order No. 528–A.

According to Granite State the proposed rate changes are applicable to its jurisdictional sales services rendered to Bay State Gas Company and Northern Utilities, Inc. and to a sale to a direct customer, Pease Air Force Base. Granite State further states that copies of its filing were served upon its customers and the regulatory commissions of the States of Maine, New Hampshire and Massachusetts.

Any person desiring to be heard or to make any protest with reference to said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–63–000]

Moraine Pipeline Co.; Changes in FERC Gas Tariff

December 24, 1991.

Take notice that on December 20, 1991, Moraine Pipeline Company (Moraine) tendered for filing First Revised Sheet Nos. 5, 6, 16 and 17 to be a part of its FERC Gas Tariff, Original Volume No. 1, to be effective January 19, 1992.

Moraine states the purpose of the filing is to add tariff provisions as required by Order No. 537 that require shippers to certify that their service qualifies under section 311.

Moraine requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective January 19, 1992.

Moraine states that a copy of the filing is being mailed to Moraine's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–1–003]

Northern Natural Gas Co.; Proposed Changes in F.E.R.C. Gas Tariff

December 24, 1991.

Take notice that Northern Natural Gas Company (Northern) on December 17, 1991, tendered for filing to become part of Northern's F.E.R.C. Gas Tariff Third Revised Volume 1, the following tariff sheets with their associated proposed effective dates:

Docket No. RP92–1–011 and Effective Dates

Original Sheet No. 4G.5a, December 1, 1991
Original Sheet No. 4G.5b, December 1, 1991
Original Sheet No. 4G.5c, December 1, 1991
Original Sheet No. 4G.5d, December 1, 1991

Docket Nos. TA92–1–59–000 and TM92–2–59–000 and Effective Dates

Substitute First Revised Sheet No. 4G.4, January 1, 1992
Substitute First Revised Sheet No. 4G.5, January 1, 1992

Northern states that such tariff sheets are being submitted in compliance with the Commission's Letter Order dated December 6, 1991, in Docket No. RP92–1–001, to clarify the MIDs matrix by including, when applicable, ACA, TCR, TOP, and the Market Area commodity rate. Additionally, Northern is filing tariff sheets to include the specific fuel charges.

Northern further states that copies of the filing have been mailed to each of its customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street. NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–27–001]

Northwest Pipeline Corp.; Change in FERC Gas Tariff

December 24, 1991.

Take notice that on December 17, 1991 Northwest Pipeline Corporation ("Northwest") tendered for filing and acceptance Substitute First Revised Sheet No. 441, to be a part of its FERC Gas Tariff, First Revised Volume No. 1–A.

The purpose of this filing was to correct First Revised Sheet No. 441, which was filed November 12, 1991 in compliance with the Commission's Final Rule in Order No. 537, issued on September 20, 1991, wherein the Commission modified § 284.102, expanding the definition of "on behalf of" for section 311 transportation.

Northwest has requested an effective date of January 17, 1992 for the tendered tariff sheet.

Northwest states that copies of the filing were served on Northwest's jurisdictional customers list and affected state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. RP92–61–000]

Stingray Pipeline Co.; Changes in FERC Gas Tariff

December 24, 1991.

Take notice that on December 20, 1991, Stingray Pipeline Company (Stingray) tendered for filing First Revised Sheet Nos. 57A, 58, 95, 96 and 97 to be a part of its FERC Gas Tariff, First Revised Volume No. 1, to be effective January 19, 1992.

Stingray states the purpose of the filing is twofold: first, to add tariff provisions as required by Order No. 537 that require shippers to certify that their service qualifies under Section 311; and second, to change the time that transportation nominations are due.

Stingray requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective January 19, 1992.

Stingray states that a copy of the filing is being mailed to Stingray's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket No. RP92–62–000]

Trailblazer Pipeline Co.; Changes in FERC Gas Tariff

December 24, 1991.

Take notice that on December 20, 1991, Trailblazer Pipeline Company (Trailblazer) tendered for filing as part of its FERC Gas Tariff, the below listed tariff sheets to be effective January 19, 1992:

Original Volume No. 1

Title Page
Second Revised Sheet No. 119

First Revised Volume No. 1A

First Revised Sheet No. 13
Original Sheet No. 13A
First Revised Sheet No. 32
Original Sheet No. 32A

Trailblazer states that the purpose of the filing is to: (a) Update the title page; (b) change the time that transportation nominations are due; and (c) add tariff provisions as required by Order No. 537 that require shippers to certify that their service qualifies under section 311.

Trailblazer requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective January 19, 1992.

Trailblazer states that a copy of the filing is being mailed to Trailblazer's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket No. TM91–9–29–003]

Transcontinental Gas Pipe Line Corp.; Compliance Filing

December 24, 1991.

On December 17, 1991, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing First Revised Sheet Nos. 138 and 151 to its FERC Gas Tariff, Third Revised Volume No. 1.

Transco proposes to notify its customers via its electronic bulletin board of any rate change proposal filed by CNG Transmission Corporation, Penn-York Energy Corporation, and National Fuel Gas Supply Corporation which Transco will track under its Rate Schedule LSS and any rate change proposal filed by Penn-York and National Fuel which Transco will track under its Rate Schedule SS–1 within 3 business days following Transco's receipt of notice of such filing.

Transco proposes to file to track any such rate change no later than 15 days following the date Transco receives a copy of the Commission order which accepts and makes effective the rate change.

VOL 56 ISS 251 DEC 31 1991 UMI

Transco has requested that this revised tariff sheet be effective January 16, 1992.

Transco states that copies of the filing have been sent to all interested state commissions and all parties in the captioned proceedings.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TM92-5-29-000]

Transcontinental Gas Pipe Line Corp.; Proposed Changes in FERC Gas Tariff

December 24, 1991.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on December 19, 1991, the following revised tariff sheets to its FERC Gas Tariff, which tariff sheets are proposed to be effective November 1, 1991:

Third Revised Volume No. 1.

Third Revised Sheet No. 28
Second Revised Sheet No. 50

Transco states that the purpose of the filing is to track rate changes attributable to (1) storage services purchased from Consolidated Natural Gas (CNG) under its Rate Schedule GSS the costs of which are included in the rates and charges payable under Transco's Rate Schedule LSS, (2) transportation services purchased from Texas Gas Transmission Corporation (Texas Gas) under its Rate Schedule FT the costs of which are included in the rates and charges payable under Transco's Rate Schedule FT-NT, and (3) transportation services purchased from CNG under its Rate Schedule X-74 the costs of which are included in the rates and charges payable under Transco's Rate Schedule FT-NT. The tracking filing is being made pursuant to Section 4 of Transco's Rate Schedule LSS and Section 4 of Transco's Rate Schedule FT-NT.

Included in Appendices A and B attached to the filing are explanations of the tracking rate changes and details regarding the computation of the revised LSS and FT-NT rates.

Transco states that copies of the filing are being mailed to each of its customers and interested State Commissions.

Any person desiring to be heard or to protests said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before January 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6540-01-M

[FE Docket No. 91-101-NG]

Tarpon Gas Marketing Ltd.; Application To Import Natural Gas from Canada

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to import natural gas.

SUMMARY: The Office of Fossil Energy of the Department of Energy (DOE) gives notice of receipt on November 20, 1991, of an application filed by Tarpon Gas Marketing Co. (TGM), for blanket authorization to import up to 100 Bcf of Canadian natural gas for a term of two years beginning on January 20, 1992, the date its existing blanket import authority expires. The proposed imports would take place at any point on the international border where existing pipeline facilities are located. No new pipeline construction would be involved.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., Eastern time January 30, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, FE-50, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478.

FOR FURTHER INFORMATION CONTACT:

Thomas Dukes, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-094, FE-53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9590.

Lot Cooke, Office of Assistant General Counsel for Fossil Energy, Office of General Counsel, U.S. Department of Energy, Forrestal Building, room 6E-042, GC-14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-0503.

SUPPLEMENTARY INFORMATION: TGM is an independent Canadian corporation with its principal place of business in Calgary, Alberta. TGM indicates that the contracts it plans to enter into would be similar to those it is currently engaged in under blanket import authority granted by DOE in DOE/ERA Opinion and Order No. 265 (Order 265).[1] Order 265 expires on January 20, 1992. The arrangements would continue to be month-to-month spot sales, typically tied to price indices of gas trade journals, and on an interruptible basis. TGM asserts that its application request would be in the public interest since sales would only be made where they would be responsive to current market forces, pose no environmental impacts, and where they further DOE's policy goals on natural gas imports and the 1988 U.S.-Canada Free Trade Agreement. According to quarterly reports filed with FE, TGM has imported approximately 9.96 Bcf of Canadian natural gas through September 30, 1991, under its existing blanket import authority.

The decision on the application for import authority will be made consistent with DOE's natural gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties, especially those that may oppose this application, should comment on the issue of competitiveness as set forth in the policy guidelines regarding the requested import authority. The applicant asserts that imports made under the proposed arrangement will be competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C., 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of TGM's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Innovative Regulatory Strategies Workshop: Market-Based Incentives and Other Innovations for Air Pollution Control

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public workshop.

SUMMARY: The EPA will sponsor a workshop on innovative regulatory strategies for air quality management. This workshop is part of an EPA innovative regulatory strategies program to encourage and facilitate, as appropriate, the development, demonstration, and implementation of innovative regulatory programs, including market-based, informational, and pollution prevention approaches. The Clean Air Act as amended in 1990 allows, and in some cases requires, States to consider the adoption of effective market-based strategies or other innovative types of control.

The workshop will focus primarily on market-based air pollution control programs. The purpose of the workshop is to bring together and facilitate discussion among individuals who have practical experience or interest in developing market-based strategies. The workshop is designed to meet the following objectives:

(1) Promote the consideration and use of appropriate market-based strategies.

(2) Explore design and implementation issues related to strategies such as marketable emissions permits, pollution fees, and transportation controls.

(3) Facilitate peer exchange of information and ideas on actual programs (either existing or being developed).

(4) Identify implementation obstacles and other issues for future research.

Participation is being invited from a diverse population, including Federal, State and local regulators, industry, environmental groups, and academic/scientific groups.

DATES: The workshop will begin at 1 p.m. on Wednesday, January 15, 1992 and conclude at noon on Friday, January 17, 1992.

ADDRESSES: The workshop will be held at the Georgetown University Conference Center, 3800 Reservoir Road, NW., Washington, DC.

To assist the EPA in planning the workshop, persons interested in attending should request registration information from Ms. Tricia Crabtree at (919) 541-5655, Ambient Standards Branch, (MD-12), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

FOR FURTHER INFORMATION CONTACT: Dr. Connie Oldham at (919) 541-7774 or Dr. Karen Martin at (919) 541-5274, Regulatory Strategies Section, Ambient Standards Branch (MD-12), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Dated: December 20, 1991.

John Calcagni,

Director, Air Quality Management Division.

BILLING CODE 6560-50-M

[PF-551; FRL-3949-1]

Mobay Corp.; Amendment of Pesticide Petition for Fenamiphos

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received from the Mobay Chemical Corp. the filing of a Section F amendment of pesticide petition (PP) 7F3523, which proposed amending 40 CFR 180.349 by establishing a regulation to permit residues of the pesticide fenamiphos and its sulfone and sulfoxide metabolites in or on peanut shells at 0.5 part per million. The amendment proposes establishing tolerances of 1.0 ppm on peanuts and 5.0 ppm on peanut hulls.

ADDRESSES: By mail, submit written comments identified by the document control number, [PF-551], to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA.

Information submitted and any comment(s) concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment(s) that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Information on the proposed test and any written comments will be available for public inspection in rm. 1128 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Cynthia Giles-Parker (PM-22), Registration Division (H-7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 251, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA, (703)-557-0705.

SUPPLEMENTARY INFORMATION: This notice announces that EPA has received from the Mobay Chemical Corp., Agricultural Chemicals Div., P.O. Box 4913, Kansas City, MO 64120, a revised Section F for PP 7F3523, which originally appeared in the **Federal Register** of August 5, 1987 (52 FR 29061) and proposed amending 40 CFR 180.349 by establishing a regulation to permit residues of the pesticide fenamiphos (ethyl-3-methyl-4-(methylthio)phenyl (1-methylethyl)phosphoramidate) and its sulfone and sulfoxide metabolites in or on peanut shells at 0.5 ppm. The amended petition would establish tolerances for fenamiphos in or on peanuts at 1.0 ppm and peanut hulls at 5.0 ppm. The proposed analytical method for determining residues is gas chromatography.

Authority: 21 U.S.C. 346a and 348.

Dated: December 16, 1991.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-F

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

December 23, 1991.

Background

Notice is hereby given of the submission of proposed information collection to the Office of Management and Budget (OMB) for its review and approval under the Paperwork Reduction Act (title 44 U.S.C. chapter 35) and under OMB regulations on Controlling Paperwork Burdens on the Public (5 CFR part 1320). A copy of the proposed information collection and supporting documents is available from the agency clearance officer listed in the notice. Any comments on the proposal

should be sent to the agency clearance officer and to the OMB desk officer listed in the notice.

DATES: Comments on this proposed revision to information collection are welcome and should be submitted on or before January 24, 1992.

FOR FURTHEN INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Frederick J. Schroeder—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3829).

OMB Desk Officer—Gary Waxman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, room 3208, Washington, DC 20503 (202-395-7340).

Request for OMB Approval to Revise the Following Report

1. *Report title:* Reports of Condition and Income.

Agency form number: FFIEC 031-034.

OMB Docket number: 7100-0036.

Frequency: Quarterly.

Reporters: State member banks.

Annual reporting hours: 161,023.

Estimated average hours per response: 39.7.

Number of respondents: 1,014.

This information collection is mandatory (12 U.S.C. 324) and is given partial confidential treatment.

On a quarterly basis, State member banks are required to file detailed schedules of assets, liabilities, and capital in the form of a condition report and summary statement; detailed schedule of operating income and expense, sources and disposition of income, and changes in equity capital in the form of an income statement; and a variety of supporting schedules. Data are used for supervisory and monetary policy purposes. The proposed changes for March 1992 affect several existing Call Report schedules. Unless otherwise indicated, the proposed changes would apply to all four sets of reporting forms (FFIEC 031, FFIEC 032, FFIEC 033, and FFIEC 034); the proposed changes are as follows:

(1) Other Real Estate Owned By Type of Property

The existing item for other real estate owned in the memoranda schedule (Schedule RC-M) would be broken down by type of property (e.g., construction, farmland, residential, and nonfarm nonresidential properties). On the FFIEC 031 reporting forms, banks with domestic and foreign offices would also separately report a single figure for other real estate owned in foreign offices.

(2) Residential Mortgages Serviced for Others by Type of Servicing Contract

New items for the principal amount outstanding of one-to-four family residential mortgages serviced for others under certain servicing contracts would be added to the memoranda schedule (Schedule RC-M). The types of servicing contracts specified include: GNMA, FHLMC with recourse, FHLMC without recourse, FNMA "special option," FNMA "regular option," and all other contracts.

(3) Purchased Credit Cardholder Relationships

An existing item for identifiable intangible assets other than purchased mortgage servicing rights would be split into items for purchased credit cardholder relationships and all other identifiable intangibles on the memoranda schedule (Schedule RC-M).

(4) Floating Rate Debt Securities Maturing Within One Year

A memorandum item for floating rate debt securities with a remaining maturity of one year or less would be added to the securities schedule (Schedule RC-B).

(5) Other Data for Deposit Insurance Assessments

The following new items would be added to the assessments schedule (Schedule RC-O): (i) Accrued interest on deposits of consolidated subsidiaries, (ii) accrued interest on deposits in insured branches in Puerto Rico and U.S. territories and possessions (on the FFIEC 031 report forms only), (iii) premiums and discounts on time and savings deposits that cause the amount reported for these deposits in the deposit liabilities schedule (Schedule RC-E) under applicable accounting and reporting standards to differ from the amounts actually due to the depositors and subject to assessment, and (iv) the amount of "adjusted attributed deposits" held by banks with SAIF-insured deposits acquired from thrifts (referred to as "Oakar deposits").

The effective date for these reporting changes, if approved, would be the March 31, 1992, report date. Nonetheless, as is customary for Call Report changes, banks will be advised that they may provide reasonable estimates for any of the new items in their March 31, 1992, Call Reports if the requested information is not readily available.

Board of Governors of the Federal Reserve System, December 23, 1991.

William W. Wiles

Secretary of the Board.

[FR Doc. 91-31194 Filed 12-30-91; 8:45 am]

BILLING CODE 6210-01-M

Australia and New Zealand Banking Group Limited, Melbourne, Australia; Application to Provide Investment Advisory and Brokerage Services on a Combined Basis, to Provide Certain Financial Advisory Services, and to Arrange for Sales and Purchases of Loans or other Extensions of Credit as Agent

Australia and New Zealand Banking Group Limited, Melbourne, Australia, ("Applicant"), has applied pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) (the "BHC Act") and § 225.23(a) of the Board's Regulation Y (12 CFR 225.23(a)), for prior approval to retain its interest in ANZ McCaughan Securities (USA) Inc., New York, New York ("Company"), an indirect wholly owned subsidiary of Applicant, and thereby to engage through Company in providing to institutional customers:

(1) Securities brokerage services and investment advisory services on a combined basis ("full-service brokerage");

(2) (a) Corporate finance advisory services by acting as a financial adviser, either on a retainer or success fee basis, including advice with respect to structuring, financing, and negotiating domestic and international mergers and acquisitions, joint ventures, divestitures, leveraged buyouts, capital raising vehicles, interest rate swaps, interest rate caps, interest rate collars, currency swaps, similar hedging devices, and other corporate transactions, and to provide ancillary services or functions incidental to the foregoing activities; (b) performing feasibility studies, principally in the context of determining the financial attractiveness and feasibility of particular corporate transactions; (c) providing valuation services; and (d) rendering fairness opinions in connection with corporate transactions.

(3) Arranging for sales and purchases of loans or other extensions of credit originated by affiliated and unaffiliated lenders as agent. Company would conduct the proposed activities domestically and internationally.

Pursuant to the Board's Regulation K, Applicant currently engages through Company in the proposed activities, that are "incidental" to its foreign or

VOL

1991
UMI

international business. Applicant seeks authority under section 4(c)(8) of the BHC Act, so that it may provide these services generally to its U.S. customers.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with prior Board approval, engage directly or indirectly in any activities "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto."

The Board has previously determined that engaging in full-service brokerage activities is closely related and a proper incident to banking. See, e.g., National Westminster Bank PLC, 72 Federal Reserve Bulletin 584 (1986)("Natwest"). Applicant has committed for Company to conduct these activities subject to the limitations in Natwest, as they were modified in The Toronto Dominion Bank, 76 Federal Reserve Bulletin 573 (1990); The Bank of Tokyo, Ltd., 76 Federal Reserve Bulletin 654 (1990); Bankers Trust New york Corporation, 74 Federal Reserve Bulletin 695 (1988); and Manufacturers Hanover Corporation, 73 Federal Reserve Bulletin 930 (1987).

The Board has previously determined that the proposed financial advisory services are closely related and a proper incident to banking, and Applicant proposes to conduct these activities in accordance with the limitations relied upon by the Board in approving these activities. See, e.g., The Fuji Bank, Limited, 75 Federal Reserve Bulletin 577 (1989); Banc One Corporation, 76 Federal Reserve Bulletin 756 (1990).

In addition, the Board has previously determined that arranging for sales of loans or other extensions of credit originated by affiliated and unaffiliated lenders as agent is encompassed within the authorization of § 225.25(b)(1) of the Board's Regulation Y, 12 CFR 225.25(b)(1). See, e.g., Toronto-Dominion Bank, 78 Federal Reserve Bulletin 573 (1990); Bryn Mawr Bank Corporation, 74 Federal Reserve Bulletin 329 (1988).

In determing whether an activity is a proper incident to banking, the Board must consider whether the proposal may "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." 12 U.S.C. 1843(c)(8). Applicant contends that permitting it to engage in the proposed activities would result in increased competition and greater convenience to customers. Applicant believes that the proposed activities will not result in any unsound banking practices or other adverse effects.

In publishing the proposal for comment the Board does not take a position on issues raised by the proposal. Notice of the proposal is published solely in order to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal meets or is likely to meet the standards of the BHC Act or the Glass-Steagall Act.

Any comments or requests for a hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than January 27, 1992. Any request for a hearing on this application must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Federal Reserve Bank of San Francisco.

Board of Governors of the Federal Reserve System, December 24, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

BankAmerica Corp., San Francisco, CA and Security Pacific Corp., Los Angeles, CA; Acquisitions by and Mergers of Bank Holding Companies and Acquisitions of Nonbanking Companies

The companies listed in this notice have applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to acquire voting securities of a bank or bank holding company. The listed companies have also applied under § 225.23(a) of Regulation Y (12 CFR 225.23(a)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of companies engaged in nonbanking activities that are listed in § 225.25 of Regulation Y and that are not listed in Regulation Y but have previously been approved by Board Order as closely related to banking and permissible for bank holding companies, or to engage in such an activity. These activities will be conducted throughout the United States.

The applications are available for immediate inspection at the Federal Reserve Bank located in San Francisco as well as the offices of the Board of Governors in Washington, DC. Interested persons may express their views in writing on the applications including the factors set forth in section 3(c) of the Bank Holding Company Act (12 U.S.C. 1842(c)) and in section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)), including whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment on an application that requests a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding these applications must be received not later than January 30, 1992, and should be addressed to the attention of Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and Constitution Avenue, NW., Washington, DC 20551.

A Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director) 101 Market Street, San Francisco 94105:

1. BankAmerica Corporation, San Francisco ("BankAmerica"); to acquire and merge with Security Pacific Corporation, Los Angeles, California ("Security Pacific"), and thereby indirectly acquire Security Pacific National Bank, Los Angeles, California; Security Pacific Bank, National Association, Tempe, Arizona; Security Pacific National Trust Company (New York), New York, New York; Security Pacific State Bank, Costa Mesa, California; Sequor National Bank Texas, Dallas, Texas; Security Pacific Bancorporation Northwest, Seattle, Washington; and its subsidiaries Security Pacific Bank Alaska, N.A., Anchorage, Alaska; Security Pacific Bank Idaho, N.A., Coeur d'Alene, Idaho; Security Pacific Bank Washington, N.A., Seattle, Washington; Security Pacific Oregon BanCorp, Portland, Oregon; Security Pacific Bank Oregon, Portland, Oregon; Security Pacific Savings Bank, Tacoma, Washington; Security Pacific Bancorporation Southwest, Phoenix, Arizona; and its subsidiaries Security Pacific Bank Arizona, Phoenix, Arizona; and Security Pacific Bank Nevada, National Association, Las Vegas, Nevada. In a subsequent reorganization of the bank operations of Security Pacific and BankAmerica, SeaFirst Corporation and Nevada First Development Corporation (two BankAmerica subsidiaries) and Security Pacific Bancorporation Northwest and Security Pacific Bancorporation Southwest may merge or may obtain control of one or more of the banks named above or one or more of the domestic bank subsidiaries of BankAmerica.

BankAmerica has applied to exercise an option to buy up to 19.9 percent of the voting shares of Security Pacific.

In connection with this application, Security Pacific has applied to exercise an option to buy up to 9.95 percent of the voting shares of BankAmerica.

Nonbanking Activities

BankAmerica has also applied under section 4 of the Bank Holding Company Act, 12 U.S.C. 1843, to acquire all of the existing nonbanking subsidiaries of Security Pacific. All of the proposed activities will be conducted subject to all of the commitments, conditions and limitations in the Board's Regulations and Orders governing conduct of these activities by Security Pacific. These subsidiaries include—

Lending Activities

The following companies engaged in commercial and/or consumer finance pursuant to § 225.25(b)(1) of the Board's Regulation Y: First Fenwick Mortgage Corporation, San Diego, California, and other locations in Virginia; Rainier Industrial Loan Company, Seattle, Washington; Security Pacific Business Credit, Inc., San Diego, California, and other locations in California, Illinois, Massachusetts, Minnesota, New York, Pennsylvania, and Texas; Security Pacific Consumer Discount Company, San Diego, California, and other locations in Pennsylvania; Security Pacific Corporate Funding Inc., Los Angeles, California; Security Pacific Executive/Professional Services Inc., San Dimas, California, and Aurora, Colorado; Security Pacific Credit Corporation, San Diego, California and other locations in California, Illinois, Massachusetts, New Jersey, and Texas; Security Pacific Finance Credit Corp., San Diego, California, and other locations in Connecticut, Florida, Georgia, Kansas, North Carolina, Ohio, Tennessee, and Texas; Security Pacific Financial Services Inc., San Diego, California, and other locations in Alabama, Arizona, California, Colorado, Connecticut, Delaware, Florida, Hawaii, Idaho, Illinois, Kentucky, Louisiana, Massachusetts, Maryland, Michigan, Missouri, North Carolina, New Hampshire, New Jersey, New Mexico, Nevada, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, Virginia, Vermont, Washington, West Virginia; Security Pacific Financial Services of Des Moines Inc., San Diego, California, and other locations in Iowa; Security Pacific Financial Services of Florida Inc., San Diego, California; Security Pacific Financial Services of Iowa Inc., San Diego, California, and other locations in Indiana, Nebraska, South Dakota, and Wisconsin; Security Pacific Financial Services of Minnesota Inc., San Diego, California, and Bloomington and Duluth, Minnesota; Security Pacific Financial Services of New York Inc., San Diego, California, and other locations in New York; Security Pacific Housing Services, Inc., San Diego, California, and other locations in Arizona, California, Florida, Georgia, Indiana, Kansas, North Carolina, New Mexico, Nevada, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, Washington; Security Pacific Realty Corp., San Diego, California, and other locations in New York; Security Pacific Southwest Financial Services Company, Phoenix, Arizona, and Albuquerque, New Mexico; Security-First CMO–I Corporation, Cypress, California; Security Pacific Acceptance Corp., San Diego, California; Security Pacific Acceptance Corp. II, San Diego, California; Security Pacific E/P Assets, Inc., San Diego, California; and Security Pacific Leasing Services Corporation, San Francisco, California.

In addition, BankAmerica proposes to acquire the following inactive nonbanking companies which have authority to engage in making or servicing loans pursuant to § 225.25(b)(1) of the Board's Regulation Y: American Finance Corporation, San Diego, California; Orbanco Real Estate Services Co., Portland, Oregon; Rainier Bancorporation, Seattle, Washington, Rainier Mortgage Company, Seattle, Washington; Security Pacific Automotive Financial Services Corp., San Diego, California and other locations in New Jersey and Texas; and Security Pacific Mortgage Corporation, San Diego, California.

Industrial Banking Activities

The following companies engaged in operating an industrial loan company, as authorized by state law, pursuant to § 225.25(b)(2) of the Board's Regulation Y: Security Pacific Financial Services of West Virginia Inc., San Diego, California, and other locations in West Virginia; Security Pacific Industrial Loan Company, Bellevue, Tacoma and Tukwilla, Washington; and Rainier Industrial Loan Company, Seattle, Washington.

Trust Company Activities

The following company engaged in providing trust services pursuant to § 225.25(b)(3) of the Board's Regulation Y: SP Escrow Service, Inc., Los Angeles, San Diego, and San Bernardino, California.

The following company engaged in clearing fixed income securities in a fiduciary capacity and making call loans to securities dealers pursuant to § 225.25(b)(3) of the Board's Regulation Y: Security Pacific Clearing & Services Corp., Jersey City, New Jersey, and other locations in Illinois and New York.

Investment Advisory Activities

The following companies engaged in furnishing investment, financial and economic advisory services pursuant to § 225.25(b)(4) of the Board's Regulation Y: Security Pacific Investment Managers, Inc., Los Angeles, California; 50 percent of the outstanding voting shares of Sumisei SecPac Investment Advisors, Inc., Los Angeles, California; 50 percent of the outstanding voting shares of Sumitrust Security Pacific Investment Managers, Inc., Los Angeles, California.

The following company engaged in providing portfolio investment advice regarding fixed income municipal bonds pursuant to § 225.25(b)(4)(iii) of the Board's Regulation Y: Security Pacific Investments Inc., a Washington Corporation, Seattle, Washington.

Leasing Activities

The following companies engaged in personal and real property leasing and furnishing investment, financial and economic advisory services regarding such leasing pursuant to § 225.25(b)(5) of the Board's Regulation Y: MCOG Leasing Corp., San Francisco, California; Security Pacific Capital Leasing Corporation, San Francisco, California; Security Pacific Credit Corporation, San Diego, California and other locations in California, Illinois, Massachusetts, New Jersey, and Texas; and Security Pacific Leasing Services Corporation, San Francisco, California.

VOL

UMI

The following company engaged in personal and real property leasing pursuant to § 225.25(b)(5) of the Board's Regulation Y and in leasing personal property, and acting as agent, broker, or adviser in leasing such property, including leasing transactions that allow this company to rely for its compensation on an estimated residual value of the leased property at the expiration of the initial lease term of up to 100 percent of the acquisition costs of the property in accordance with the Board's Order in *Security Pacific Corporation*, 76 Federal Reserve Bulletin 462 (1990): Security Pacific Leasing Corporation, San Francisco, California.

Community Development Activities

The following company engaged in making debt and equity investments in corporations or projects designed to promote community welfare, including the purchase, construction, rehabilitation, restoration, and sales of residential and commercial properties, pursuant to § 225.25(b)(6) of the Board's Regulation Y: Security Pacific Community Service Corporation, Seattle, Washington.

Data Processing Activities

The following companies engaged in providing to others data processing and data transmission services with respect to banking data, pursuant to § 225.25(b)(7) of the Board's Regulation Y: Security Pacific Information Services Corporation, San Diego, California, Denver, Colorado, and New York, New York; Security Pacific Automation Company, Inc., Los Angeles, California, and other locations in California, Delaware, and Oregon; and American Data Services, Inc., Los Angeles, California and other locations in Montana, Oregon, and Washington.

Insurance Activities

The following companies engaged in the sale as principal of insurance directly related to an extension of credit by Security Pacific or its subsidiaries and limited to ensuring the repayment of the outstanding balance due on the extension of credit in the event of death and disability of the debtor pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y: Chartered Protective Life Insurance Company, San Diego, California; and General Fidelity Life Insurance Company, San Diego, California.

The following companies engaged in the sale as agent of insurance directly related to an extension of credit by Security Pacific or its subsidiaries and limited to ensuring the repayment of the outstanding balance due on the extension of credit in the event of death, disability or involuntary unemployment of the debtor pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y and in the sale as agent or broker for insurance directly related to extensions of credit by finance company subsidiaries of Security Pacific pursuant to § 225.25(b)(8)(ii) of the Board's Regulation Y: Dealers Credit, Inc., San Diego, California, and other locations in Arizona, California, Colorado, Hawaii, Iowa, Maryland, Missouri, Nevada, Oregon, Pennsylvania, Virginia, and Washington; Security Pacific Financial Services of Nevada Inc., San Diego, California, and Las Vegas and Reno, Nevada; and the Midwestern Agency Corporation, Inc., San Diego, California, and other locations in Arizona, California, Colorado, Hawaii, Iowa, Maryland, Missouri, Nevada, Oregon, Pennsylvania, Virginia, and Washington.

The following company engaged in the sale as principal of insurance directly related to an extension of credit by Security Pacific or its subsidiaries and limited to ensuring the repayment of the outstanding balance due on the extension of credit with respect to involuntary unemployment of the debtor pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y: General Fidelity Insurance Company, San Diego, California.

The following company engaged in the sale as agent of insurance directly related to an extension of credit by Security Pacific or its subsidiaries and limited to ensuring the repayment of the outstanding balance due on the extension of credit in the event of death, disability or involuntary unemployment of the debtor pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y and in the sale as agent of property insurance protecting collateral on loans made by subsidiaries of Security Pacific, which company engaged in this activity prior to May 1, 1982, as permitted under § 225.25(b)(8)(iv) of the Board's Regulation Y: SP Insurance Agency, Inc., San Diego, California.

BankAmerica also proposes to acquire the following inactive nonbanking company which has authority to act as principal, agent, or broker for credit-related insurance pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y: Security Pacific Southwest Insurance Agency, Inc., Phoenix, Arizona.

Securities Activities

The following company engaged in underwriting and dealing in "bank-eligible" securities pursuant to § 225.25(b)(16) of the Board's Regulation Y; in underwriting and dealing in, on a limited basis, the following securities:

(a) Municipal revenue bonds, including certain industrial development bonds;

(b) Residential mortgage-related securities;

(c) Consumer-receivable-related securities; and

(d) Commercial paper;

as authorized by Board Orders. Security Pacific Corporation, 73 Federal Reserve Bulletin 622 (1987); Security Pacific Corporation, 73 Federal Reserve Bulletin 731 (1987): Security Pacific Securities, Inc., Seattle, Washington.

The following company engaged in providing discount securities brokerage pursuant to § 225.25(b)(15) of the Board's Regulation Y: Security Pacific Investments Inc., a Washington Corporation, Seattle, Washington.

Intermediate Companies Which Do Not Engage Directly in Nonbank Activities

The following companies which engage in holding subsidiaries pursuant to 12 U.S.C. 1843(a): SP Financial Services Holdings, Inc., San Diego, California; SPC Acquisition, Inc., Los Angeles, California; SP Insurance Services, Inc., San Diego, California; Security Pacific Equipment Finance, Inc., Los Angeles, California; Security Pacific Finance System Incorporated, San Diego, California; Security Pacific Financial Services System, Inc., San Diego, California; The Sequor Group Inc., Los Angeles, California, and other locations in California and New York; White Sands Leasing Corporation, San Francisco, California; and Windmill Sands Leasing Corporation, San Diego, California.

Edge Act Corporations and Foreign Branches and Subsidiaries

Bank of America National Trust and Savings Association has also applied to acquire:

(1) Security Pacific Overseas Corp., Los Angeles, California, an investment Edge Act corporation, and all its foreign subsidiaries, joint ventures and portfolio investments, pursuant to section 25 and 25(a) of the Federal Reserve Act, 12 U.S.C. 601 and 611–31, and § 211.4 of the Board's Regulation K; and

(2) Security Pacific International Bank, New York, New York, an Edge Act corporation engaged in banking, pursuant to section 25 and 25(a) of the Federal Reserve Act, 12 U.S.C. 601 and 611–31, and § 211.4 of the Board's Regulation K;

(3) The foreign branch of Security Pacific National Bank, located in Nassau, Bahamas, pursuant to 12 U.S.C. 601; and

(4) The foreign subsidiaries of Security Pacific National Bank.

Security Pacific National Bank also has branches in the Bahamas where neither BankAmerica nor any of its affiliates have branches. Bank of America National Trust and Savings Association is filing a notice to establish branches in the Bahamas pursuant to § 211.3(a).

Seattle First-National Bank has applied to acquire the foreign branch of Security Pacific Bank Washington, N.A., located in Grand Cayman, Cayman Islands, and plans to apply to acquire the foreign branch of Security Pacific Bank Washington, N.A., located in Kaohsuing, Taiwan pursuant to 12 U.S.C. 601.1.

Finally, BankAmerica seeks the Board's specific consent under section 4(c)(13) of the BHC Act, 12 U.S.C. 1843(c)(13), and the Board's Regulation K to acquire all of the foreign subsidiaries, joint ventures and portfolio investments of Security Pacific held under section 4(c)(13) of the BHC Act.

Board of Governors of the Federal Reserve System, December 27, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 4160–15–M

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of February 1992:

Name: National Advisory Council on Migrant Health.

Date and Time: February 9–11, 1992—8:30 a.m.

Place: Hyatt Rgency Washington on Capital Hill, 400 New Jersey Avenue, NW Washington, DC.

The meeting is open to the public.

Purpose: The Council is charged with advising, consulting with, and making recommendations to the Secretary and the Administrator, Health Resources and Services Administration, concerning the organization, operation, selection, and funding of Migrant Health Centers and other entities under grants and contracts under section 329 of the Public Health Service Act.

Agenda: The agenda will cover presentation and discussion with other organizations and agencies, of the National Advisory Council on Migrant Health 1991/92 recommendations to the Secretary, Department of Health and Human Services.

Anyone requiring information regarding the subject Council should contact Mr. Jack Egan, Acting Executive Secretary, National Advisory Council on Migrant Health, room 7A–55, Parklawn Building, 5600 Fishers Lane Rockville, Maryland 20857, telephone (301) 443–1153.

Agenda Items are subject to change as priorities dictate.

Dated: December 26, 1991.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

Social Security Administration

Social Security Acquiescence Ruling 91–X(5)—Lidy v. Sullivan, 911 F.2d 1075 (5th Cir. 1990)—Right To Subpoena an Examining Physician for Cross-Examination Purposes

AGENCY: Social Security Administration, HHS.

ACTION: Notice of Social Security Acquiescence Ruling.

SUMMARY: In accordance with 20 CFR 422.406(b)(2) published January 11, 1990 (55 FR 1012), the Commissioner of Social Security gives notice of Social Security Acquiescence Ruling 91–X(5).

EFFECTIVE DATE: December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Ethel Hill, Litigation Staff, Social Security Administration, 6401 Security Blvd., Baltimore, MD 21235, (410) 966–5044.

SUPPLEMENTARY INFORMATION: Although not required to do so pursuant to 5 U.S.C. 552(a)(1) and (a)(2), we are publishing this Social Security Acquiescence Ruling in accordance with 20 CFR 422.406(b)(2).

A Social Security Acquiescence Ruling explains how we will apply a holding in a decision of a United States Court of Appeals that we determine conflicts with our interpretation of a provision of the Social Security Act or regulations when the Government has decided not to seek further review of that decision or is unsuccessful on further review.

We will apply the holding of the Court of Appeals decision as explained in this Social Security Acquiescence Ruling to claims at the disability hearing, Administrative Law Judge, and Appeals Council levels within the Fifth Circuit. This Social Security Acquiescence Ruling will apply to all determinations and decisions made at these levels on or after December 31, 1991. If we made a determination or decision at these levels on your application for benefits between September 17, 1990, the date of the Court of Appeals' decision and December 31 1991, the effective date of this Social Security Acquiescence Ruling, you may request application of the Social Security Acquiescence Ruling to your claim if you first demonstrate, pursuant to 20 CFR 404.985(b), 410.670c(b), or 416.1485(b), that application of the Ruling could change our prior determination or decision.

If this Social Security Acquiescence Ruling is later rescinded as obsolete, we will publish a notice in the **Federal Register** to that effect as provided for in 20 CFR 404.985(e), 410.670c(e), or 416.1485(e). If we decide to relitigate the issue covered by this Social Security Acquiescence Ruling as provided for by 20 CFR 404.985(c), 410.670c(c), or 416.1485(c), we will publish a notice in the **Federal Register** stating that we will apply our interpretation of the Act or regulations involved and explaining why we have decided to relitigate the issue.

Commissioner of Social Security.

Acquiescence Ruling 91–X(5)

Lidy v. *Sullivan*, 911 F.2d 1075 (5th Cir. 1990)—Right to Subpoena an Examining Physician for Cross-examination Purposes—titles II and XVI of the Social Security Act.

Issue

Whether a claimant for disability insurance benefits and/or supplemental security income payments based on disability has an absolute right, upon request, to have the Secretary issue a subpoena in order that the claimant may cross-examine an examining physician.

Statute/Regulation/Ruling Citation

Section 205 of the Social Security Act (42 U.S.C. 405), 20 CFR 404.916(b), 404.950(d), 416.1416(b), 416.1450(d), SSR 71-53c.

Circuit

Fifth (Louisiana, Mississippi, and Texas) *Lidy* v. *Sullivan*, 911 F.2d 1075 (5th Cir. 1990).

Applicability of Ruling

This Ruling applies to claims at the disability hearing, Administrative Law Judge and Appeals Council levels.

Description of Case

The plaintiff, Mr. Lidy, filed an application for disability insurance benefits. The report of Dr. Finney, who examined plaintiff following a referral by his worker's compensation insurer, formed the basis of the Administrative Law Judge's finding of no disability.

In order to challenge Dr. Finney's report, the plaintiff sought to subpoena him for cross-examination. The Administrative Law Judge refused the plaintiff's request, but did permit him to submit a set of written interrogatories. The plaintiff then sought to submit a second set of interrogatories to clarify some of Dr. Finney's responses and urged the Administrative Law Judge to require live cross-examination. These requests were denied and the plaintiff's application for benefits was denied. The Administrative Law Judge's decision became the final decision of the Secretary.

The plaintiff filed a civil action in district court. A magistrate recommended that the court grant the plaintiff's motion for summary judgment on the ground that the refusal to permit cross-examination of Dr. Finney constituted a denial of due process. The district court disagreed with the magistrate and found that the Administrative Law Judge had acted within his discretion in denying cross-examination. The plaintiff then appealed the decision to the United States Court of Appeals for the Fifth Circuit.

Holding

The Fifth Circuit Court of Appeals interpreted the Supreme Court's holding in *Richardson* v. *Perales*, 402 U.S. 389 (1971) to mean that, under section 205(d) of the Social Security Act, entitlement to a subpoena for cross-examination purposes is automatic. Therefore, the court held that once a claimant has requested a subpoena for the purpose of cross-examining an examining physician, the request must be granted.

Statement as to How Lidy Differs from SSA Policy

SSA has interpreted *Richardson* v. *Perales* to mandate the issuance of a subpoena only when it is shown that the testimony sought is "reasonably necessary for the full presentation of a case." Therefore, SSA's policy is that a claimant's right to a subpoena is qualified.

Social Security Administration Regulations at 20 CFR 404.950(d) and 416.1450(d) state that when the claimant requests a subpoena, he or she must "state the important facts that the witness or document is expected to prove; and indicate why these facts could not be proven without issuing a subpoena." These sections also state that the Administration Law Judge may issue a subpoena, "(w)hen it is reasonably necessary for the full presentation of a case."

Current instructions provide that an Administrative Law Judge "may deny the claimant's request to subpoena an individual if the claimant fails to show that the evidence or testimony he or she wishes to obtain from the individual is essential, or that the evidence or testimony cannot be obtained in any other way." An exception to this policy is made when securing expert medical opinion after a hearing. Section I-2-540 states that if the claimant objects to the use of interrogatories and requests a supplemental hearing, the Administrative Law Judge must grant the request in such event.

As indicated above, the Fifth Circuit has held that in the Social Security hearings process the right to a subpoena for the purposes of cross-examining an examining physician is absolute.

Explanation of How SSA Will Apply this Decision within the Circuit

This Ruling applies only to cases involving claimants for disability insurance benefits and/or supplemental security income payments based on disability who reside in Louisiana, Mississippi, or Texas at the time of the proceedings at the disability hearing, Administrative Law Judge, or Appeals Council levels. In such cases, when a claimant requests, prior to the closing of the record, that a subpoena be issued for the purpose of cross-examining an examining physician, the adjudicator must issue the subpoena.

BILLING CODE 4190–25–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES–030–2–4212–18; MIES–043236]

Realty Actions, Sales, Leases, etc.; MI

AGENCY: Bureau of Land Management, Interior.

ACTION: Sale of Public Land in Chippewa County, Michigan—Modified Competitive Method.

SUMMARY: The following public land has been found suitable for sale under section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1713), at not less than the estimated fair market value (FMV) of $6,600.00. The public land will not be offered for sale for at least 60 days following the date of this notice. The public land is described as follows:

MIES–043236

T. 41N., R. 7E., Sec. 30, Lot 3, Michigan Meridian, Drummond Township, Chippewa County, Michigan (containing approximately 2.50 acres).

The public land described above is hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action, or 270 days from the date of publication of this notice in the **Federal Register**, whichever occurs first.

The public land will be offered for sale at a public auction beginning at 10 a.m., CST, on March 16, 1992 at Reuss Federal Plaza, suite 225, West Tower, 310 West Wisconsin Avenue, Milwaukee, Wisconsin 53203. This sale will be by modified competitive procedures. Mr. Thomas A. McCaskill will be given the opportunity to meet the highest bid received at public auction. Sale will be by sealed bid only.

All sealed bids must be submitted to the BLM's Milwaukee District Office at Reuss Federal Plaza, suite 225, West Tower, 310 West Wisconsin Avenue, Milwaukee, Wisconsin 53203, no later than 3 p.m. CST on March 13, 1992. Bid envelopes must be marked on the left front corner with MIES–043236 and March 16, 1992. Bids must be for not less than the appraised FMV specified in this notice. Each sealed bid shall be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the U.S. Department of the Interior, BLM for not less than 10 percent of the amount bid.

The terms and conditions applicable to the sale are: (1) All minerals shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document, is available for review at the Milwaukee District Office.

Federal law requires that all bidders must be U.S. citizens, 18 years or older, or in the case of corporations, be subject to the laws of any State of the United States. Proof of these requirements must accompany the bid.

Under modified competitive sale procedures, an apparent high bid will be declared at public auction. The apparent high bidder and the designated bidder (Mr. Thomas A. McCaskill) will be notified. The designated bidder shall have fifteen (15) days from the date of modification to exercise the preference consideration given to meet the high bid. Should the designated bidder fail to submit a bid that matches the apparent high bid within the specified time period, the apparent high bidder shall be declared high bidder. The total purchase price for the land shall be paid within 180 days of the date of the sale.

Detailed information concerning the sale, including the reservations, procedures for and conditions of sale, planning and environmental documents, are available at the Milwaukee District Office.

DATES: On or before February 14, 1992, interested parties may submit comments to the District Manager, Bureau of Land Management, P.O. Box 631, Milwaukee, Wisconsin 53201–0631. In the absence of objections, this proposal shall become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Duane Marti, Realty Specialist, Bureau of Land Management, P.O. Box 631, Milwaukee, Wisconsin 53201–0631; telephone number (414) 297–4429 or (FTS) 362–4429.

Gary D. Bauer,

District Manager.

[FR Doc. 91–31183 Filed 12–30–91; 8:45 am]

BILLING CODE 4310–GJ–M

Fish and Wildlife Service

Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora; Eighth Regular Meeting; Public Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice sets forth summaries of the proposed United States negotiating positions for the eighth regular meeting of the Conference of the Parties (COP8) to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Comments or other relevant information concerning these proposed negotiating positions are solicited. A public meeting to discuss these proposed negotiating positions will also be held.

DATES: A public meeting will be held on January 8, 1992, in room 7000 of the Department of the Interior, 18th and C Streets NW, Washington, DC. The Service will consider information and comments received by close of business January 28, 1992.

ADDRESS: Comments should be sent to the Director, U.S. Fish and Wildlife Service, c/o Office of Management Authority, 4401 N. Fairfax Drive, room 432, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Marshall P. Jones, Chief, Office of Management Authority, at the above address; telephone 703/358–2093.

SUPPLEMENTARY INFORMATION:

Background

The Convention on International Trade in Endangered Species of Wild Fauna and Flora, hereinafter referred to as CITES or the Convention, is an international treaty designed to control international trade in certain animal and plant species which are or may become threatened with extinction, and are listed in Appendices to the treaty. Currently, 113 countries, including the United States, are CITES Parties. CITES calls for biennial meetings of the Conference of the Parties which review its implementation, make provisions enabling the CITES Secretariat (in Switzerland) to carry out its functions, consider amending the list of species in appendices I and II, consider reports presented by the Secretariat, and make recommendations for the improved effectiveness of the Convention.

This is a part of a series of notices which, together with public meetings, provide the public with an opportunity to participate in the development of the U.S. positions for the eighth regular meeting of the Conference of the Parties (COP8) to CITES. The first **Federal Register** notice was published on February 7, 1991 (56 FR 4965), which requested information from the public on animal or plant species that should be considered by the United States. The second **Federal Register** notice was published on June 11, 1991 (56 FR 26832), which announced the time and place of the meeting of COP8 and the provisional agenda, requested information and comments on the provisional agenda, announced procedures for those applying for observer status at the COP, and announced a public meeting on June 25, 1991. The third **Federal Register** notice was published on July 24, 1991 (56 FR 33894), which invited comments and information on those proposals for amending the Convention's appendices that the United States was considering. The Service's regulations governing this public process are found in title 50 of the Code of Federal Regulations §§ 23.31–23.39.

Proposed Negotiating Positions

In this notice, the Service summarizes proposed negotiating positions for COP8. Numerals next to each agenda item correspond to the numbers used in the provisional agenda received from the CITES Secretariat. Some of the documents have not yet been received from the CITES Secretariat; they will be available on request from the Service after they have been received. They will be available at the January 8, 1992 public meeting, if they have been received by that time. When information and comments on the agenda items were submitted in writing to the Service or received at the June 25, 1991 public meeting, they are included with the proposed negotiating position. Each proposed position includes a brief rationale explaining the basis of the position.

Agenda (Provisional)

I. Opening ceremony by the Authorities of Japan

Proposed negotiating position: No position necessary.

Rationale: Not an issue for negotiation.

VOL 56 ISS 251 DE 31 1991 UMI

II. Welcoming Addresses

Proposed negotiating position: No position necessary.

Rationale: Not an issue for negotiation.

III. Adoption of the Rules of Procedure

Proposed negotiating position: Support the use of electronic voting for COP8 if it can be made available. Support the anticipated request by some Parties to change the rules of procedure to make it easier to obtain a secret vote, provided use of this process does not result in excessive loss of time. Oppose any attempt to define criteria by which Parties determine the eligibility for observer status of a national non-governmental organization (NGO). Support addition of the Budget Committee chair to be a member of the Bureau.

Rationale. Electronic voting is a faster and more accurate method of casting and tallying votes, which would minimize the amount of time necessary to conduct a secret vote; however, Japan may not be able to provide electronic voting for budgetary and other reasons. A rules change making it easier to obtain a secret vote will allow Parties to cast their votes on controversial or sensitive issues free from their concern, whether justified or not, of retaliation. It might be possible to release an electronic vote tally to Party governments on official request to ensure delegate accountability. If electronic voting is not available, the rules could be relaxed to make it easier to obtain a secret ballot for a limited number of targeted issues. This would prevent excessive time loss from too many secret ballots. Regardless of how few or many secret ballots are taken, all U.S. positions and votes on issues will be publicly disclosed. In terms of observer eligibility, the United States has always interpreted the phrase in the treaty "technically qualified in protection, conservation or management of wild fauna and flora" liberally, and will oppose any attempt to further define this language. The Bureau is the entity responsible for forwarding the business of the meeting of the COP. Addition of the Budget Committee Chairman to the Bureau would increase the stature of the committee and enable the Conference to have a better geopolitical balance in leadership positions.

IV. Election of Chair and Vice-Chair of the Meeting and of Committees I and II

Proposed negotiating position: Support the host government's choice for Conference chair, and work to encourage this person's constructive participation in Conference preparations, including attendance at the CITES Standing Committee meeting January 20–21, 1992. Support a candidate for Committee I chair who possesses the best combination of scientific credibility, CITES knowledge, and chairmanship skills. Support a candidate for Committee II chair who possesses a combination of knowledge of CITES management issues and chairmanship skills. The United States is prepared to offer one of the senior members of its delegation to serve as chair of Committee II, if requested by the Bureau.

Rationale: It is traditional for the host government to put forward a candidate to chair the meeting and for the Parties to approve that individual. The Chair of Committee I will be required to provide knowledge and leadership for the controversial and potentially divisive species listing issues which will be taken by this Committee. Like Committee I, Committee II will also have a number of controversial issues with which to deal, with substantial importance to the long-term future of CITES. Representatives of Europe, and South America, Central America, and the Caribbean, were Chairs of Committee I and II (respectively) at COP7. CITES benefits from the participation and leadership from every region of the world. The Budget Committee has taken on much greater importance in recent conferences as the Parties have taken on an increasingly active role in overseeing the Secretariat's financial and work priorities.

V. Adoption of the Agenda and Working Programme

Proposed negotiating position: Support adoption of an Agenda and Working Programme that guarantees a smoothly operating meeting that addresses all species and implementation issues. Support requests by Zimbabwe and other southern African countries to have the following resolutions considered at the beginning of the meeting: Recognition of the Benefits of Trade, Criteria for Amendments to the appendices, Support of Range States for Amendments of appendices I and II. This support for moving these resolutions up on the agenda does not imply support for them; see discussion under agenda items XIII (6, 28, 30).

Rationale: It is logical to consider these resolutions early in the meeting as they have relevance to more than a few of the other agenda items.

VI. Establishment of the Credentials Committee and Committees I and II

Proposed negotiating position: Support the establishment of the Credentials Committee and Committees I and II.

Rationale: Establishment of the Credentials Committee is a pro forma matter. The United States supports the establishment of Committees I and II, provided most participating Parties have been able to send at least two delegates, or that the rules governing debate of the Committees ensure that most delegations will have an opportunity to debate recommendations before a final decision is made.

VII. Report of the Credentials Committee

Proposed negotiating position: Support adoption of the report of the Credentials Committee if it does not recommend the exclusion of legitimate representatives of countries that art Parties to CITES. Representatives whose credentials are not in order should be afforded observer status as provided for under article XI. If credentials have been delayed, representatives should be allowed to vote on a provisional basis. A liberal interpretation of the rules of procedure on credentials should be adhered to in order to permit clearly legitimate representatives to participate.

Rationale: Adoption of the report is generally pro forma. Exclusion of Party representatives whose credentials are not in order could undermine essential cooperation among Parties.

VIII. Admission of Observers

Proposed negotiating position: Support admission to the meeting of all technically qualified NGOs and oppose unreasonable limitations on their full participation at COP8.

Rationale: NGOs play an important role in CITES activities and have much to offer to the debates and negotiations at a COP. Their participation is specifically provided by article XI of CITES. The United States supports the opportunity for all technically qualified observers to fully participate at COPs.

IX. Matters Related to the Standing Committee

Proposed negotiating position: Stress the leadership role of the Standing Committee in the oversight of the Secretariat's activities. Encourage selection of new members from regions whose current members are due to rotate off the Committee (Africa, Asia, and South America) who will also take an active role in Standing Committee activities. Encourage a country with a commitment to active involvement in CITES affairs to seek election as the new Standing Committee chair.

Rationale: The Standing Committee is the governing body of CITES between meetings of the COP. It is composed of representatives of North America (Canada), South and Central America and the Caribbean (Peru), Asia (Nepal), Oceania (New Zealand), Africa (Malawi) and Europe (Sweden), along with Switzerland (the depository country) and Japan (the host country). The regional representatives of Africa, Asia, and South and Central America and the Caribbean are open for review at COP8. In order for the Standing Committee to continue in the strengthened oversight role the United States advocated when it chaired the Committee (1987–1989), countries with a commitment to active participation are needed for Committee membership. The new Committee will need a capable and experienced chair to guide its activities during the 1992–1993 biennium.

X. Report of the Secretariat

Proposed negotiating position: The Report of the Secretariat has not yet been received by the Service. When received, the Service will carefully review issues pertaining to: The relationship of CITES to the United Nations Environment Programme (UNEP); success of the new procedures for Parties to set budgetary and work priorities; setting of new short term objectives for the Secretariat; evaluation of the performance of the Secretary General; and progress in assisting Parties to more forcefully implement the Convention.

Rationale: The biennial report provides the major way for the Secretariat, and the Secretary General, to report priorities, accomplishments, and problems to the Parties. These are critical management issues facing CITES which need to be addressed in the Secretariat's report.

XI. Financing and Budgeting of the Secretariat and of Meetings of the Conference of the Parties

1. Financial Report for 1989–1990–1991

Proposed negotiating position: This document has not yet been received from the CITES Secretariat; no position is possible at this time.

2. Anticipated Expenditure for 1992

Proposed negotiating position: This document has not yet been received from the CITES Secretariat; no position is possible at this time.

3. Budget for 1993–1995 and Medium Term Plan for 1993–1998

Proposed negotiating position: Oppose any substantial increase in the Secretariat's budget representing a significant increase in its work plan. Support budget increases requested by the Secretariat in cases where the growing membership is placing increasing burdens on staff, without any commitment to an increased U.S. contribution. Support the permanent budgeting of an enforcement officer.

Rationale: The budget increases requested by the Secretariat are justified and reasonable in cases where the growing membership is placing increasing burdens on the staff, although the United States cannot at present commit to a larger contribution to the CITES budget.

4. External Funding

Proposed negotiating position: This document has not yet been received from the CITES Secretariat; no position is possible at this time.

Information and comments: One organization recommended requiring 6 months of review by the Standing Committee prior to fund raising for or funding of externally funded projects.

XII. Committee Reports and Recommendations

1. Animals Committee

Proposed negotiating position: The United States supports the active role of the Animals Committee in scientific and management issues pertaining to animal species listed in the CITES Appendices. Efforts should be made to secure a budget for the Animals Committee consistent with its increasing role.

Rationale: The Animals Committee report may contain information or recommendations dealing with appendix II species subject to significant trade, breeding facilities for appendix I species, marking techniques, and other issues. The United States will continue to be an active participant in Animals Committee functions.

2. Plants Committee

Proposed negotiating position: The United States supports the continued activities of the Plants Committee to improve the effectiveness of CITES for plants, with a focus on the following: publication of identification guides and checklists; significant trade in orchids, succulents, and other species; review of the timber trade; trade in artificially propagated plants. Efforts should be made to secure a budget for the Plants Committee consistent with its diverse role.

Rationale: The United States has chaired the Plant Working Group and Plants Committee since 1983, and will continue to actively support Plants Committee functions.

3. Identification Manual Committee

Proposed negotiating position: Continue to support the Identification Manual Committee and development of animal and plant identification manuals for use by port and border enforcement officers, in providing a standard of reference for the identification of CITES species. Endeavor to ensure that membership in the committee will be adequate to handle the enormous problems involved in fulfilling the needs of the parties.

Rationale: The enforcement officers of the Parties must be equipped with guides which are accurate, realistic, and helpful in the identification of the many CITES species and products found in trade throughout the world.

4. Nomenclature Committee

Proposed negotiating position: Encourage and support the development and adoption of checklists for all taxa. Support the reprinting and necessary revisions of existing checklists for fauna prior to development of new ones. Because of the expense in developing checklists for taxa, the United States supports recognition of existing checklists for remaining taxa when suitable. Efforts should be made to secure a budget for the Nomenclature Committee consistent with its role, including consideration of partial funding for a checklist coordinator.

Rationale: Implementation of the Convention is strengthened by the use of uniform names of listed species.

XIII. Interpretation and Implementation of the Convention

1. Terms of Reference for the Administration of the Secretariat by UNEP

Proposed negotiating position: Support continuing efforts by a Standing Committee working group to develop a proposal to UNEP to clarify its rule in CITES as that of providing administrative support for the Secretariat, with the Secretariat answering to the Standing Committee and the Parties for general policy direction.

Rationale: Clarification of the relationship between the CITES Secretariat and UNEP will help the administration of the Secretariat, including financial, personnel, and policy matters. The CITES Secretariat is not an organ of the United Nations;

VOL 56 ISS 251 DEC 31 1991 UMI

UNEP provides administrative support, but not policy direction, which is the function of the Parties. It is critical that the Standing Committee clarify UNEP's role.

2. Report on National Reports under Article VIII, Paragraph 7, of the Convention

Proposed negotiating position: Support efforts to encourage all Parties to submit annual reports, consistent with their domestic legislation.

Rationale: Each Party is required by the Convention to submit an annual report containing a summary of the permits it has granted, and the types and numbers of specimens of species in the CITES appendices that it has imported and exported. Accurate report data are essential to measure the impact of international trade on species, and can be a useful enforcement tool.

3. Review of Alleged Infractions

Proposed negotiating position: Support the Secretariat's review of alleged infractions by the Parties, and necessary and appropriate recommendations to obtain wider compliance with the terms of the Convention. Support an open discussion at COP8 of major infractions, and a greater emphasis by the Parties on the enforcement of the laws and regulations implementing the Convention.

Information and comments: One organization recommended adoption of a resolution urging trade sanctions against countries that are the subject of infractions or are otherwise not in compliance with the Convention, including not having a Scientific Authority or CITES-implementing legislation.

Rationale: Article XIII provides for COP review of alleged infractions. The Secretariat prepares an Infractions Report for each COP, which details instances that the Convention is not being effectively implemented, or where trade is adversely affecting a species. The first draft of the Infractions Report contains 138 such alleged infractions. A cursory review of the alleged infractions indicates a great difference in the depth of the reporting on infractions over previous reports. A large number of infractions are caused by lack of training, lack of personnel, or lack of knowledge on the workings of CITES; however, the majority of the alleged infractions should be a major cause of concern to the Parties.

4. Implementation of the Convention in the European Economic Community

Proposed negotiating position: Support a tightening of controls on trade with those members of the EEC highlighted in the Secretariat's Infractions Report as posing particular problems for CITES enforcement and implementation. Support a report by the Secretariat on CITES implementation in those countries, but not a new major study on the implementation of CITES within the EEC. The United States cannot support ratification of the Gaborone amendment at this time.

Rationale: Some EEC countries are mentioned several times in the Secretariat's Infractions Report for COP8. The United States should support recommendations requiring more effective implementation or even restricting trade with those countries that may be undermining the effectiveness of CITES, while encouraging EEC countries which are effectively implementing the Convention. A focus needs to be placed on those EEC countries with implementation problems, along with informing the Parties of anticipated changes in the EEC that will become effective in 1993. In 1983, an amendment to article XXI was adopted that permitted the accession to the Convention of any Regional Economic Integration Organization (REIO) constituted by sovereign States, such as the EEC. The Amendment is not specific to the EEC, but would allow other REIO's to accede to the Convention. Only 27 of the required 54 Parties have ratified the amendment; the United States has not ratified it. There are serious problems with the implementation and enforcement of CITES within some of the countries of the EEC. There are concerns that the changes in Europe in 1993 will undermine CITES and increase illegal trade.

5. Illegal Trade of Singapore

Proposed negotiating position: Support urging all importing countries to reject export permits or re-export certificates issued by Singapore for trade in any crocodilian product, since it cannot be guaranteed that such products come from legally acquired skins from the producer countries.

Rationale: The illegal trade in crocodilian parts and products is one of the serious wildlife problems for the United States and the rest of the world. Every effort should be made to close any loophole in achieving the adequate protection of these species, to prevent illegal exports from the range states to the consumer states. This illegal trade undermines the Convention and should not be allowed to continue.

6. Recognition of the Benefits of Trade in Wildlife

Proposed negotiating position: Support the concept that commercial trade can provide conservation benefits to species and ecosystems, although economic values are of no greater weight than scientific, aesthetic, cultural and recreational values, as stated in the CITES preamble. Support enumerating conditions under which trade provides conservation benefits to appendix II species. Support a recommendation that Parties not penalize ranching and breeding/propagation, provided they meet CITES criteria, but do not support a general recommendation that specifically encourages them over other management regimes.

Rationale: A statement that commercial trade can provide conservation benefits to a species reconfirms the economic value of species already recognized in the CITES preamble. While CITES does not require a finding of a conservation benefit to the species, the concept of beneficial commercial trade may be useful to exporting countries in making nondetriment findings for appendix II species. The Parties should not penalize ranching or captive breeding/propagation that meets CITES requirements, but should not encourage one type of management over another, except in very specific circumstances; that is an internal matter for each Party to decide.

7. Reconsideration of "Primarily Commercial Purposes"

Proposed negotiating position: Oppose a resolution which effectively would amend Resolution Conf. 5.10 by calling for a finding of noncommercial use by the Management Authority of an importing country if an appendix I species were to benefit from its commercial trade. Oppose efforts to effectively amend the treaty by allowing primarily commercial trade in appendix I species.

Rationale: Conservation benefit to the species is not relevant to whether an appendix I specimen is to be used for primarily commercial purposes, as per article III, paragraph 3(c). It is relevant to the finding of "nondetriment" only, under article III, paragraph 3(b). Since the "primarily commercial purposes" finding is made by the Management Authority of the importing country, conservation benefits which normally occur in the exporting country are not relevant to that finding. This resolution is contrary to accepted interpretations of the Convention. If this resolution were accepted, it would substantially increase the amount of commercial trade in endangered species.

8. Exports of Leopard Hunting Trophies and Skins

Proposed negotiating position: No document has been received on this topic. However, the United States opposes any increases in quotas without adequate supporting data.

Rationale: The SErvice anticipates that this document will be similar to Resolution Conf. 7.7, which refers to the importation of leopard skins, including hunting trophies, under a quota system approved by the COP. Trade in leopard skins for noncommercial purposes is allowed under CITES Resolution Conf. 7.7, which recognizes killing in defense of life and property and to enhance the survival of the species.

9. Exports of Cheetah Hunting Trophies and Skins

Proposed negotiating position: No document has been received on this topic. No position is possible at this time.

10. Trade in Specimens of Species Transferred to Appendix II Subject to Annual Export Quotas

Proposed negotiating position: No document has been received on this topic, and no position is possible at this time.

11. Trade in Birds

a. Significant Trade Species

Proposed negotiating position: Advocate adoption of the resolution submitted by the United States to: Suspend commercial trade in wild bird species listed in appendix II that are identified as "significant trade" species for which either there is insufficient information on which to base a nondetriment finding, or for which remedial measures have been recommended but not implemented; allow the Standing Committee to recommend the removal of a species from the list of those suspended from trade, based on consultations with the Animals Committee and the Secretariat. Support (as proposed by another Party) urging countries not to export animal species that do not meet the criteria in article IV. Oppose (as submitted by another Party) suspending all commercial shipments of live animals until the Standing Committee can confirm that the requirements of article IV have been satisfied.

Information and comments: One organization recommended restricting trade in wild birds which are either declining due to trade or for which insufficient data exist to determine the adverse impacts of trade. The same organization recommended that all appendix II psittacines be transferred to apendix I or otherwise restricted from trade until such trade can be demonstrated to be nondetrimental to their survival in the wild. Another organization recommended a resolution calling for the cessation of all trade in psittacine species listed in the CITES Appendices.

Rationale: The trade in live wild-caught birds is an issue of great concern to both the United States and the CITES Parties, in that the trade in many species of birds listed in appendix II may be detrimental to their survival. The COP will address issues relating to the trade in species identified by previous COPs as subject to significant trade and for which insufficient information exists to assess the effects of trade on their populations (see also agenda item XIII.16). The United States supports the sustainable utilization of wildlife, including wild-caught birds, but is opposed to utilization that is not known to be sustainable, particularly when these species have been identified as potential problems for over five years. It is time for the CITES Parties to take decisive action on significantly trade species.

b. Trade in Species Sensitive to High Mortality Rates

Proposed negotiating position: Advocate a suspension of commercial trade in species that experience high mortalities during transport, based on criteria adopted by the CITES Transport Working Group (TWG) (resolution submitted by the United States). Support reducing shipment sizes for species that warrant further study of their sensitivity to transport, also based on criteria adopted by the TWG; provide for review and lifting of restrictions when shown to be justified by improved transport practices.

Information and comments: One organization recommended that a resolution be adopted promoting the humane holding and transport of all live animals, as well as requiring the consideration of mortality in capture and transport as bearing on determination of nondetriment under article IV. Another organization recommended a resolution calling for the cessation of all trade in psittacine species listed in the CITES appendices, due to transport-related mortalities.

Rationale: Article IV, paragraph 2(c) requires that prior to the issuance of an appendix II export permit, a Management Authority must be "satisfied that any living specimen will be so prepared and shipped as to minimize the risk of injury, damage to health, or cruel treatment". Many Management Authorities in exporting countries are unable to make such a finding, but continue to export the shipments. The transport of live specimens has been an issue at every COP. The TWG found that for many bird species, mortality in transport remains unacceptably high and compliance with article IV paragraph 2(c) is inadequate.

For those species that experience high mortalities during transport, implementation of article IV is particularly difficult or impossible, and those species should not be traded for commercial purposes. More extensive data collection on transport-related mortalities is needed. Preliminary studies indicate that higher transport mortalities result from larger shipment sizes, due to a number of factors. Therefore, the United States supports a reduction in shipment sizes for sensitive species requiring further study.

12. Trade in Wild-Caught Animal Specimens

Proposed negotiating position: Advocate adoption of the resolution prepared by the Animals Committee (and submitted by the United States) dealing with wild-caught significant trade animal species, whereby the Animals Committee will (in consultation with the Secretariat): Identify problems with the implementation of article IV, which may be operating to the detriment of species; recommend appropriate remedial measures; recommend a consultative process with the exporting Party (to be engaged in by the Secretariat); and recommend the suspension of trade from countries not implementing the recommended remedial measures.

Information and comments: One commenter recommended that the United States take a leadership role in requesting that the CITES Secretariat review the implementation of CITES article IV, including the consideration of appropriate remedial measures.

Rationale: Article IV paragraph 2(a) requires that a Scientific Authority of the State of export advise that an export will not be detrimental to the survival of that species, prior to the issuance of an export permit for specimens of a species listed in appendix II. Many Parties have not been able to conduct properly designed surveys and necessary biological studies, so as to identify scientifically-based quotas and to implement effective management plans for species listed in appendix II. There is

VOL
56
ISS
251
DE
31
1991
UMI

cause for serious concern that the international commercial trade in wild-caught specimens is contributing to the decline in the wild of some species listed in appendix II.

13. Detrimental Trade in Sea Turtles

Proposed negotiating position: No document has been received on this topic. The U.S. position is to continue the certification of Japan under the Pelly Amendment until Japan ends all trade in sea turtles and remove its CITES reservations.

Rationale: On March 20, 1991, the Departments of Interior and Commerce certified Japan under the Pelly Amendment for diminishing the effectiveness of CITES, by its continued trade in endangered sea turtles. Japan announced on June 19, 1991 that it will sharply limit hawksbill sea turtle (*Eretmochelys imbricata*) imports between now and December 1992, at which time it will end all sea turtle trade, and it will withdraw its hawksbill sea turtle reservation by 1994. The Pelly amendment certification will remain in effect until Japan removes its CITES reservations and ceases trade in sea turtles. The United States is on record that such detrimental trade by reserving Parties undermines the effectiveness of CITES.

14. Trade in Crocodilian Products

Proposed negotiating position: Advocate adoption of the resolution submitted by the United States and Australia to require the skins of all crocodilian species to be tagged before being allowed to be traded by CITES Parties (whether or not a reservation has been entered by a Party).

Rationale: This refers to a resolution submitted by both the United States and Australia to institute a system of universal marking for all crocodilian skins in trade, as a response to serious problems of illegal trade in crocodilian skins, parts, and products.

15. Trade in Plant Specimens

a. Trade in Flasked Seedlings

Proposed negotiating position: Oppose an exemption from CITES document requirements for artificially propagated Appendix I flasked orchid seedlings; encourage efforts to expedite document issuance for these specimens.

Rationale: This refers to seedlings of appendix I orchids still in aseptic flasks, which are artificially propagated and therefore deemed to be specimens of appendix II species The proposed resolution would deregulate such flasked seedlings, arguing that because they cannot be distinguished from hybrid seedlings of appendix I species, they are not readily recognizable, and should be exempted from the treaty's requirements. The United States is strongly opposed to categorical assumptions on what may or may not be readily recognizable. Additionally, even though trade in such specimens may not be detrimental to wild populations, the treaty does not provide for any exemption from permit requirements for parts or derivatives of Appendix I plant or animal species. The Service will encourage efforts to expedite issuance of permits (if commercial) or certificates (if noncommercial) for these specimens.

b. Nursery Registration for Artificially Propagated Appendix I Species

Proposed negotiating position: Oppose the resolution establishing registration criteria for operations and shipping, with defined inspection of nurseries that produce artificially propagated specimens of appendix I plants and hybrids for commercial purposes. Support sound conservation practices in nurseries by cooperative development of guidelines.

Rationale: The proposed system is overly strict and inflexible, and would be counterproductive as well as prohibitively expensive to implement. Resolution Conf. 5.15 provides an adequate basis for registration.

c. Artificial Propagation and Trade in Appendix I Hybrids

Proposed negotiating position: Support efforts to refine and clarify the meaning of artificially propagated and the trade in such appendix I hybrids, but not the need to replace conf. 2.12(c) and 6.19.

Rationale: The need for replacement of prior resolutions of the COP on artificially propagated plants is not considered necessary, and is not established in the supporting document, which is confusing. The Plants Committee and the secretariat's Plant's Officer may need to develop training and implementation materials or guidelines on artificial propagation before COP9.

d. Plan Nomenclature

Proposed negotiating position: Support: The adoption of the checklist of names for Cactaceae; the use of certain texts as generic standards; the preparation of an orchid checklist; and the issuance of CITES documents utilizing these standard names. Oppose the adoption of the checklist of cycads. Support cooperative assignment of priorities for nomenclatural work on orchid taxa subject to significant trade. Support the allocation of some funds from the CITES Trust Fund for the preparation of the orchid checklist.

Rationale: Implementation of the Convention is strengthened by the consistent use of names of listed species.The checklist of Cactaceae will be complete, but that for cycads is without synonyms and thus unsuitable, because of the high usage of synonyms by growers.

16. Significant Trade in Appendix II Species

Proposed negotiating position: No document has been received on this agenda item. Support the continued focus of the Parties on appendix II species identified as subject to significant trade and the proper implementation of article IV, as critical to the implementation of the treaty and species conservation. Support the provision of funding for the coordination and implementation of significant trade study projects, with oversight by the Animals, Plants, and Standing Committee.

Information and comments: One commenter recommended that the United States take a leadership role in requesting that the CITES Secretariat review the implementation of CITES article IV, including the consideration of appropriate remedial measures.

Rationale: This topic refers to the trade in those appendix II species identified as subject to significant trade, for which insufficient biological information exists to warrant trade at current levels. Many of these species may have been traded at levels detrimental to their survival. The CITES Parties have provided funds to the World Conservation Union (IUCN) and the Conservation Monitoring Centre to assess priorities in studying these species.

17. Trade With States Not Parties to the Convention

Proposed negotiating position: Support a procedure leading to refusal of documentation from non-parties that have not identified Management and Scientific Authorities, provided the same procedure applies to Parties that have not identified such Authorities. Oppose an unqualified ban on trade in wild-origin appendix I specimens with non-Parties. The United States does not support the cumbersome process of requiring approval by the Animals or Plants Committees of imports of captive-bred or artificially propagated appendix I specimens from non-Parties.

Rationale: the United States supports recommendations on trade moratoria when it is shown that trade is continuing without Scientific Authority advices, to the detriment of species, whether from Parties or non-Parties. Issuance of export permits without Scientific Authority determinations of nondetriment is not allowed under the treaty. For wild-origin appendix I specimens, the resolution submitted would ban such trade regadless of whether the non-Party had identified relevant authorities, and regardless of whether those Authorities oversee functioning in accordance with article X and Resolution Conf. 3.8. In the case of captive-bred or artificially propagated appendix I specimens, the advice of the Animals and Plants Committees would be useful. However, decisions on trade moratoria should be made in accordance with functions and procedures set forth in articles XII and XIII.

18. Existence of Hair, Wool and Cloth of Vicuna in the European Economic Community, Japan and Hong Kong

Proposed negotiating position: Oppose additional controls over stockpiles of vicuna (*Vicugna vicugna*) wool and cloth legally traded and held by certain non-range States. Oppose placing a time limit on legally traded stockpiles. Support instead calling on the Parties to accept only cloth with certain registered marks exported only from those CITES Parties that are members of the Vicuna Convention.

Rationale: The vicuna has been listed in appendix I since 1975 and certain populations in Chile and Peru in appendix II since 1987, in order to export wool and cloth. The cloth must be marked according to CITES requirements, and a properly executed appendix II export permit from either Chile or Peru is required. Under the Vicuna Convention Chile and Peru must have the cloth identified by a registered mark, and it must be made from wool sheared from live animals.

This resolution would create a precedent whereby the parties disallow the trade in items already legally found in trade. The vicuna cloth has been traded legally as Appendix II items and has been placed in stockpiles. This resolution would give the countries with stockpiles one year to identify and liquidate these stockpiles. This would cause an unnecessary burden upon the Parties which allowed legal import of the appendix II products in good faith with the proper CITES documents. If the range states for vicuna are having a problem with illegal vicuna exports, the solution is not found in such an ex post facto requirement on legal appendix II vicuna wool.

19. Return to the Wild of Confiscated Live Animals of Species Included in Appendixes II and III

Proposed negotiating position. Oppose requiring Scientific Authority advice on the return of confiscated appendix II and III specimens to the State of export. Oppose requiring a postal vote of the Parties requesting advice on reintroduction to the wild of specimens that are returned to their State of origin. The United States supports the return to the wild of confiscated live animals, when biologically and ecologically appropriate, and encourages interested scientific organizations, such as IUCN, to develop a list of considerations to be assessed before introducing or reintroducing animals to the wild, to be consulted by interested Parties.

Rationale: Interest in what Parties should do with confiscated specimens, both live and dead and their products goes back to the drafting of the Convention. The re-export of appendix II specimens does not require a Scientific Authority finding. The Parties have spoken quite clearly on the issue of return of confiscated specimens to the country of origin and have consistently left the management of native wild specimens in the hands of each sovereign State when trade is not involved. This resolution goes beyond the Convention as discussed in article VIII, paragraph 4(b), and attempts to intrude upon a State's management prerogatives for wildlife within its borders. The United States supports the return to the wild of confiscated live animals, when biologically or ecologically appropriate, but considers such determinations beyond the scope of CITES. The United States encourages the development by scientists of a list of considerations to be assessed before introducing or reintroducing animals to the wild, to be consulted by interested Parties, and would encourage IUCN or other international scientific organizations to pursue such an effort.

20. Export of Confiscated Specimens

Proposed negotiating position: Advocate the adoption of the resolution proposed by the United States to clarify eligibility for export permits (under certain conditions) of illegally obtained specimens that have been subsequently confiscated.

Rationale: While illegally imported specimens have been deemed eligible for reexport certificates under Conf. 4.17, no similar clarification has been made for specimens illegally obtained in the country of export. The prohibition against export of illegally obtained specimens was obviously meant to prevent those who illegally obtained the specimens from getting permits to export them. Export of confiscated specimens should also not be allowed if the individuals from whom the specimens were seized received any financial compensation for the specimens. The Scientific Authority would still have to make its "no detriment" finding before the permit could be issued, and appendix I specimens could not be traded for primarily commercial purposes.

21. Marking of Specimens

Proposed negotiating position: Support a resolution requiring the use of coded microchip implants for marking live appendix I captive bred animals in trade and those which form part of a travelling exhibition or circus.

Rationale: In Conf. 7.12 the Parties recommended that coded microchip implants be tried on a trial basis and that the Animals Committee further explore the issue. The Animals Committee looked at the issue in its fourth and fifth meetings in Australia in 1990 and Canada in 1991, and recognized the value of micrchip technology in the marking of high value captive bred specimens. This resolution is a direct result of those two meetings. The United States has long supported efforts to develop practical and effective methods of marking CITES specimens, particularly of high value Appendix I species. The IUCN/SSC Captive Breeding Specialist Group has studied microchip technology, availability, and reliability, and recommended standards for micrchip use throughout the world. Efforts should be made to ensure that microchips meet uniform standards and are properly controlled and registered.

22. Standardization of CITES Permits and Certificates

Proposed negotiating position: This document has not yet been received from the CITES Secretariat; no position is possible at this time.

23. Transport of Live Specimens

Proposed negotiating position: Support the adoption by the COP of the report of the Chairman of the Transport Working Group (TWG). The United States will remain actively involved with the TWG, and with all aspects of the transport of live wild animals.

Rationale: The humane transport of live wild animals remains a significant concern of the United States. The TWG's Terms of Reference with the Standing Committee include working to improve implementation of the Convention and relevant resolutions,

VOL 56 ISS 251 DEC 31 1991 UMI

training, improvement of international standards, coordination with the International Air Transport Association Live Animals Board, and the transport of live wild birds.

24. Role of the Scientific Authority

Proposed negotiating position: Advocate adoption of the resolution submitted by the United States outlining the responsibilities of Scientific Authorities, and the process for the issuance of nondetriment findings by the Scientific Authority, which are required by the CITES treaty.

Rationale: The Animals Committee agreed that such a resolution was necessary, and asked the United States to help develop it. It is critical that a country consult with the Scientific Authority and involve the scientific community in providing the best available biological information on decisions to conserve wildlife and plant resources. The effectiveness of the Convention is seriously undermined when a country does not have an active Scientific Authority.

25. Proposals to Register the First Commercial Captive-Breeding Operation for an Appendix I Animal Species

Proposed negotiating position. Support the proposed resolution to return the major responsibility for approving new commercial breeding operations for appendix I species to each Management Authority, while strengthening the role of the Secretariat in accepting or refusing such registrations; support the establishment of new, consolidated criteria for approval of such facilities.

Rationale: This resolution replaces Resolutions Conf. 6.21 and 7 10, which allow for the registration of the first commercial captive-breeding operation for an appendix I animal species, upon a two-thirds majority vote of the Parties. On the recommendation of the Animals Committee, this resolution establishes standards by which each Party's Management Authority could determine which facilities are registered as captive-breeding an appendix I animal species for commercial purposes. The Secretariat is delegated authority to approve and register facilities put forward by a Party, after consultation with all Parties and appropriate experts.

26. Guidelines for Evaluating Marine Turtle Ranching Proposals

Proposed negotiating position: None necessary; guidelines will not be discussed at COP8.

Rationale: The Secretariat has stated that no discussion of guidelines for evaluating marine turtle ranching proposals (none of which were submitted by Parties) can occur at COP8. IUCN has informed the Secretariat that it is not able to follow up on the proposed Guidelines.

27. Exemption for Blood and Tissue Samples for DNA Studies From CITES Permit Requirements

Proposed negotiating position. Oppose exemptions from permit requirements for blood and tissue samples for DNA studies.

Rationale: Such exemptions go beyond those specified in the treaty. The United States supports encouraging efficient and timely issuance of permits for perishable samples, as was suggested by the Secretariat at COP7.

28. Criteria for Amendments to the Appendices

Proposed negotiating position. The Service supports the need to reevaluate the Berne Criteria for listing species in the Appendices, but opposes consideration at COP8 of the complex and extensive document revising the Berne Criteria. The Service supports the establishment of a separate working group reporting to the Standing Committee to address these important issues, accompanied by a workshop involving a diverse group of scientists and experts, to revise the criteria for consideration at COP9.

Rationale: The Berne Criteria need to be reviewed and adapted to address a broader array of taxa and to be more descriptive and definitive, to the extent possible. The diverse scientific and management issues addressed in the proposed resolution and background statement are too complex to deal with at a COP, but deserve detailed scientific and technical deliberations.

29. Review of Procedures and Criteria for the Transfer of Crocodilians From Appendix I to Appendix II

Proposed negotiating position: Support adoption of the resolution recommending that commercial captive-breeding operations only be established using wild-caught specimens if captive-bred specimens are not available, and only if it can be established that use of wild-caught stock does not result in the depletion of breeding stock in the wild. Support recommending limits on harvest of wild adults.

Rationale: Ranching programs for crocodilians based on controlled egg or hatchling collection can be a positive force for conservation. Crocodilian species have been (and can again be) overharvested quickly unless strong management programs exist; emphasis should be placed on not harvesting wild adults.

30. Support of Range States for Amendments to Appendices I and II

Proposed negotiating position. Support a recommendation that a Party proposing to amend the Appendices notify and consult with the range States concerned, and include any range State opinions in the proposal. The United States supports recommending submission of the full text of the proposal to range States 60 days prior to submission to the Secretariat. The United States opposes an amendment to the Rules of Procedure requiring withdrawal of an appendix I listing proposal upon a ⅔ vote of the range States, as contrary to the text to the Convention. However, the United States supports suggestions that range States consider and if they desire vote on species proposals in their respective COP regional meetings, and be given a specific opportunity to present their recommendations to Committee I.

Rationale: The United States supports the exchange of information with the range States, and the full participation and democratic decisions of all Parties on species to be included in appendix I and II.

31. Review of Appendix III

Proposed negotiating position. Oppose the proposed resolution urging more judicious use of appendix III, including direct consultation with the Animals or Plants Committee and a review of existing appendix III listings.

Rationale: The CITES Secretariat has been working to screen Appendix III proposals and consult with the submitting Party. The Service supports the need for judicious use of appendix III, but not the need for a resolution at this time. The Service supports urging all Parties to carry out their responsibilities in implementing and enforcing appendix III listings.

32. "Stricter Domestic Measures"

Proposed negotiating position. The United States opposes a recommendation that would limit a State's right to take any stricter domestic measures with regard to its own or other countries' species, but could support a recommendation that such State consult with range States before taking stricter measures. The United States supports a recommendation that range States and all Parties have laws that adequately implement CITES (including means to minimize illegal trade), but opposes a recommendation that range States promote sustainable use.

Rationale: The Convention provides that nothing shall "affect the right of a party to adopt * * * stricter measures regarding the conditions for trade * * * or the complete prohibition thereof * * *" The United States endorses consultations with range States prior to adopting stricter domestic measures, and full consideration of their views, but it will not limit itself to adopting only those measures supported by range States. The United States reserves its sole authority to make final decisions under the Endangered Species Act, Marine Mammal Protection Act, Lacey Act, etc., and supports the similar right of all other countries regarding their stricter domestic laws. The United States has been a leader in efforts to see that all Parties have laws that adequately implement CITES. The United States also supports the principles of sustainable use, and the utilization of natural resources, including wildlife, on a sustainable basis. In recognizing the sovereign rights of individual countries, however, it is not the business of CITES to promote sustainable use of wildlife over other conservation regimes; rather, it is up to each Party to decide the basis of its conservation programs. CITES does provide that if a CITES-controlled species is traded internationally, its trade shall not be detrimental to that species' survival.

XV. Conclusion of the Meeting

1. Determination of the Time and Venue of the Next Regular Meeting of the Conference of the Parties

Proposed negotiating position: No documents have been received indicating requests from possible host governments. Favor holding COP9 in country where all Parties will be admitted without political difficulties. Support the holding of COPs on a biennial basis, or, as in the case of COP8, after an interval of two and one half years.

Rationale: COP meetings energize governmental and nongovernmental organizations concerned with CITES issues to examine its implementation, and species that need it. Stretching out intervals between meetings to 3 years is not in the interest of conservation; the cost savings that might result from a 3-year interval would be partially reduced by an increase in committee meetings in the interim.

Announcement of Public Meeting

A public meeting will be held on Wednesday, January 8, 1992, from 2:00 to 4:30 p.m., in room 7000, U.S. Department of the Interior, 18th and C Streets NW, Washington, DC, for the purpose of receiving information and comments on the proposed negotiating positions summarized above. Written statements may be submitted at or before the meeting, and comments received by January 28, 1992 will be considered in developing final negotiating positions for the U.S. delegation to COP8. The meeting will be conducted in an informal manner, with all participants provided the opportunity, to the extent that time allows, to comment on each point.

Request for Information and Comments

The Service invites information and comments on the proposed negotiating positions on COP8 agenda items, excluding item XIV, "Consideration of proposals for amendment of appendices I and II", which is the subject of a separate **Federal Register** notice. Information and comments should be submitted to the Service no later than January 31, 1992.

Observers

Article XI, paragraph 7 of the Convention provides that: "Any body or agency technically qualified in protection, conservation or management of wild fauna and flora, in the following categories, which has informed the Secretariat of its desire to be represented at meetings of the Conference by observers, shall be admitted unless at least one-third of the Parties object: (a) International agencies or bodies, either governmental or non-governmental, and national governmental agencies and bodies; and (b) national non-governmental agencies or bodies which have been approved for this purpose by the State in which they are located. Once admitted, these observers shall have the right to participate but not to vote."

Persons wishing to be observers representing national non-governmental organizations in the United States must receive prior approval of the U.S. Fish and Wildlife Service. Requests for such approval should include evidence of technical qualification in protection, conservation or management of wild fauna or flora, on the part of both the organization and the individual representative. Such requests should be sent to the Office of Management Authority (see "ADDRESSES", above). Copies of the letters of approval from the Office of Management Authority should be used by these organizations to inform the CITES Secretariat of their wish to send observers to the meeting. The Secretariat requires such information to be received at least one month prior to the meeting (February 2, 1992). Approved observers should send copies of their letters of approval to the following address: CITES Secretariat, 6 rue du Maupas, Case postale 78, CH-1000 Lausanne 9 Chauderon, Switzerland.

Author: This notice was prepared by Dr. Susan S. Lieberman, Office of Management Authority, U.S. Fish and Wildlife Service (703/358-2095).

Dated: December 26, 1991.

Richard N. Smith,

Deputy Director.

BILLING CODE 4310-70-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–361 and 50–362]

San Onofre Nuclear Generating Station, Units 2 and 3; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of a one-time exemption from the requirements of 10 CFR part 55 to the Southern California Edison Company and the San Diego Gas and Electric Company (the licensees), for the San Onofre Nuclear Generating Station, Units 2 and 3, located in San Diego County, California.

Environmental Assessment

Identification of the Proposed Action

The exemption would grant relief from the requirements of 10 CFR 55.59 (a) and (c) which require licensed operators to complete a requalification program that does not exceed 24 months in duration. The licensees are requesting a one-time extension of the program duration from 24 to 25 months. The licensees' request for exemption is contained in a letter dated November 5, 1991.

The Need for the Proposed Action

In an effort to align the San Onofre licensed operator examination schedule with the NRC National Examination Schedule, the licensees propose to change the end date of the current requalification program from December 1991 to January 1992. This proposed change will extend the current requalification cycle to 25 months. The schedule realignment will decrease the administrative burdens associated with the requalification examinations.

Environmental Impacts of the Proposed Action

The proposed action would align the San Onofre Units 2 and 3 operator requalification schedule with the NRC National Examination Schedule. This exemption will not increase the risk of facility accidents. Thus, post-accident radiological releases will not be greater than previously determined, nor does the proposed exemption otherwise affect the quantity of radiological plant effluent, nor result in any increase in occupational exposure. Likewise, the exemption does not affect nonradiological plant effluent and has no other environmental impact. Therefore, the Commission concludes that there are no significant radiolgical or nonradiological impacts associated with the proposed exemption.

Alternative to the Proposed Action

Because it has been concluded that there is no measurable impact associated with the proposed exemption, any alternatives to the exemption will have either no environmental impact or greater environmental impact. Since the Commission has concluded that the environmental effects of the proposed action are not significant, any alternative with equal or greater environmental impacts need not be evaluated.

The principal alternative to the exemption would be to deny the requested exception. This would not reduce environmental impacts attributable to this facility and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the Final Environmental Statement dated April 1981, related to the operation of San Onofre Units 2 and 3.

Agencies and Persons Consulted

The Commission's staff reviewed the exemption request and did not consult with other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based upon the foregoing environmental assessment, the staff concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for exemption dated November 5, 1991 which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Main Library, University of California, P.O. Box 19557, Irvine, California 92713.

Dated at Rockville, Maryland, this 23rd day of December, 1991.

For the Nuclear Regulatory Commission.

Theodore R. Quay,

Director, Project Directorate V, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 91–31209 Filed 12–30–91; 8:45 am]

BILLING CODE 7590-01-M

Trojan Nuclear Power Plant; Environmental Assessment and Finding of No Significant Impact

[Docket No. 50–344]

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of a one-time exemption from the requirements of 10 CFR part 55 to Portland General Electric Company (the licensee), for the Trojan Nuclear Plant, located in Columbia County, Oregon.

Environmental Assessment

Identification of Proposed Action

The exemption would grant relief from 10 CFR 55.59 paragraphs (a)(1) and (c)(1) which require a successful completion of a requalification program to be conducted for a continuous period not to exceed 24 months in duration.

The licensee's request for exemption is contained in a letter dated March 27, 1991.

The Need for the Proposed Action

The proposed exemption is from the requirements of 10 CFR 55.59 paragraphs (a)(1) and (c)(1) which require each licensee to successfully complete a requalification program to be conducted for a continuous period not to exceed 24 months in duration. The licensee is requesting an extension to align the Trojan requalification program with the National Examination Schedule. This one-time exemption will result in a permanent adjustment to the 24-month requalification cycle and the annual requalification examination schedule.

Environmental Impacts of the Proposed Action

The proposed action would align the Trojan requalification cycle with the NRC National Examination Schedule.

VOL 56 ISS 251 DEC 31 1991 UMI

This exemption will not increase the risk of facility accidents, thus, post-accident radiological releases will not be greater than previously determined, nor does the proposed exemption otherwise affect the quantity of radiological plant effluent, nor result in any significant increase in occupational exposure. Likewise, the exemption does not affect nonradiological plant effluent and has no other environmental impact. Therefore, the Commission concludes that there are no significant radiological or nonradiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action

Because it has been concluded that there is not measurable impact associated with the proposed exemption, any alternatives to the exemption will have either no environmental impact or greater environmental impact. Since the Commission has concluded that the environmental effects of the proposed action are not significant, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative to the exemption would be to deny the requested exemption. This would not reduce environmental impacts attributable to this facility and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the Final Environmental Statement dated August 1973, related to operation of the Trojan facility.

Agencies and Persons Consulted

The Commission's staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based upon the foregoing environmental assessment, the staff concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated March 27, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Branford Price Millar Library, Portland State University, 934 SW. Harrison Street, P.O. Box 1151, Portland, Oregon 97207.

Dated at Rockville, Maryland, this 20th day of December 1991.

For the Nuclear Regulatory Commission.

Charles M. Trammell,

Acting Director, Project Directorate V, Division of Reactor Projects III/IV/V Office of Nuclear Reactor Regulation.

[FR Doc. 91-31208 Filed 12-30-91; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-344]

Portland General Electric, Trojan Nuclear Plant; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-1, issued to Portland General Electric Company (the licensee), for operation of the Trojan Nuclear Plant located in Columbia County, Oregon.

The amendment would revise: (1) Trojan Technical Specification (TTS) section 3.4.6.2.c, "Operational Leakage," and Bases 3/4.4.5, "Steam Generators," and 3/4.4.6.2, "Operational Leakage," to reduce the total allowable primary-to-secondary leakage for any one steam generator from 500 gallons per day (gpd) to 130 gpd and to reduce the total allowable primary-to-secondary leakage through all steam generators from one gallon per minute (gpm) to 400 gpd; and, (2) Technical Specification Surveillance Requirement 4.4.5.4.a.6, "Repair Limit," and associated Bases will be modified to clarify that the percent tube wall degradation criteria is inappropriate to determine serviceability of tubes with outer diameter stress corrosion cracking/intergranular attack (ODSCC/IGA) at tube support plate (TSP) intersections. Rather, the appropriate method for determining serviceability for tubes with ODSCC/IGA at TSP intersections is by a methodology that more reliably assesses structural integrity. TTS 4.4.5.4.a.6 and the associated Bases will indicate that this change is applicable only for Operating Cycle 14.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee has evaluated the proposed amendment against the standards of 10 CFR 50.92, and has determined the following:

1. Reduction of Allowed Primary-to-Secondary Leak Rate

a. The operation of Trojan Nuclear Plant (TNP) with primary-to-secondary leak rate limits reduced from 500 gpd to 130 gpd for any one steam generator and from 1 gpm to 400 gpd through all steam generators will not involve a significant increase in the probability or consequences of an accident previously evaluated.

In fact, the reduction of the allowed primary-to-secondary leak rate may decrease the probability of a tube rupture accident postulated in the Final Safety Analysis Report (FSAR) section 15.6.3. The individual steam generator leak rate was based on licensing basis assumptions that a steam generator tube could leak, through stress corrosion-induced cracks, up to a certain rate and still maintain tube integrity. The total steam generator tube leakage limit for all steam generators is based on limiting the dose contribution from the leakage to a small fraction of 10 CFR part 100 (title 10, Code of Federal Regulations, part 100) limits in the event of either a steam generator tube rupture or steam line break.

The PGE (Portland General Electric Company, et al) Report (Steam Generator Tube Integrity Safety Analysis Report for Tube Support Plate Intersection, submitted December 15, 1991) concludes, among other things, that ODSCC/IGA (Outside Diameter Stress Corrosion Cracking/Intergranular Attack) that may remain in the TNP steam generator tubes at TSP (tube support plate) intersections during Operating Cycle 14 will not result in the burst pressure criteria provided by the NRC Staff in RG (Regulatory Guide) 1.121 being exceeded.

PGE has subsequently concluded based on its evaluation of ODSCC/IGA at TSP intersection that a more conservative individual steam generator primary-to-secondary leak rate limit would be appropriate. The amount of leakage from a crack is directly related to the size, characteristics, and orientation of the crack. It is clear that since the primary-to-secondary leak rate limit will be reduced to 130 gpd, the corresponding effective crack size also is reduced. Therefore, since the effective crack size is reduced, the probability of a steam generator tube rupture as a result of such a crack also will be reduced * * *.

Correspondingly, the total steam generator tube leakage limit was reduced from 1 gpm to 400 gpd to be consistent with the reduction in the individual steam generator leakage limit.

Further RG 1.121, which has been used by the TNP, states in part that, "(t)he rupture of a number of single tube wall barriers between primary and secondary fluid has safety consequences only if the resulting fluid flow exceeds an acceptable amount and rate." Should a tube rupture occur due to ODSCC/IGA at TSP intersections, there will not be a significant increase in the consequences of the accident since the results will still be within the 10 CFR part 100 limits as applied to TNP operation * * *.

b. The operation of the TNP with the primary-to-secondary leak rate limits reduced will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The FSAR postulates in Section 15.6.3, a steam generator tube rupture. The kind of accident that could result from operating TNP with different leakage limits for primary-to-secondary leakage will continue to be a steam generator tube rupture.

c. The operation of TNP with the primary-to-secondary leak rate limits reduced will not involve a significant reduction in a margin of safety.

The margin of safety may be increased in that (1) Less leakage, which correlates to a smaller effective crack size, will be allowed from each steam generator and (2) a smaller total leakage limit will further ensure that the dose contribution from tube leakage will be a small fraction of 10 CFR/Part 100 limits for the analyzed accidents.

2. Modification of Technical Specification 4.4.5.4.a.6 to clearly state the specific serviceability requirements that are applicable for ODSCC/IGA at TSP intersections for Operating Cycle 14.

a. Operation of the TNP with in-service tubes that meet the more specific steam generator tube serviceability criteria applicable to TSP intersections for Operating Cycle 14 will not involve a significant increase in the probability or consequences of an accident previously evaluated.

* * * [The PGE Report] addresses the probability of a steam generator tube rupture at the TNP from ODSCC/IGA at TSP intersections. Each type of tube defect contributes to the overall probability of tube failure. ODSCC/IGA is but one of those contributors. The [PGE] Report concludes that based on extensive data collected during this TNP outage there is a 3.4E-05 probability of a steam generator tube rupture due to operation with acceptable ODSCC/IGA at TSP intersections during Operating Cycle 14.

The contribution of ODSCC/IGA at TSP intersections to the overall probability of steam generator tube failure is related in great part to the residual strength of the tube to resist bursting. Other critical factors that have been considered when assessing probability of a steam generator tube failure due to ODSCC/IGA at TSP intersections include the geometry of the defect and defect growth rate. It is not expected that growth rate will change significantly during Operating Cycle 14, when compared to previous operating cycles. Therefore, since growth rate for ODSCC/IGA at TSP intersections will not significantly change, there will not be a significant increase in the probability of a steam generator tube rupture.

The remaining significant contributor to the probability of a steam generator tube rupture due to ODSCC/IGA at the TSP intersections is the residual strength (i.e., integrity) of the tube. The residual strength of a tube at the TSP intersection, has been analyzed (as shown in the PGE Report). The NRC Staff has provided, in RG 1.121, the required tube integrity (i.e., tube strength) that must be maintained for any in-service tube (three times the differential pressure). PGE has satisfied RG 1.121, and has confirmed that the tube integrity criteria of the RG will be satisfied during Operating Cycle 14. Since the residual strength of the tubes that will remain in service at the TSP intersections satisfies RG 1.121, the contribution from ODSCC/IGA at TSP intersections to the overall probability of a tube failure is minimal, if any.

The contribution to the probability of tube failure as a result of traditional 40 percent through-wall degradation was also based on tube integrity criteria (which later became RG 1.121). It does not appear that the industry or the NRC has quantified tube burst probability specifically for traditional 40 percent through-wall degradation. Terminology that has been used to describe probability for traditional degradation is that the steam generator tube rupture is highly unlikely (i.e., of low probability). PGE equates this description of probability for a tube rupture from traditional 40 percent through-wall degradation to the probability of a tube rupture from ODSCC/IGA at TSP intersections (3.4E-05). It follows that the probability of accident occurrence associated with this Technical Specification change is essentially the same or less than the tube burst probability that exists if the 40 percent through-wall degradation criteria option (applied to more traditional tube degradation) of the Technical Specification is applied.

Should a tube rupture occur due to ODSCC/IGA at TSP intersections, there will not be a significant increase in the consequences of an accident since the results will still be within the 10 CFR part 100 limits as applied to TNP operation. (as shown in the PGE Report.)

Based on the above, there will not be a significant increase in the probability or consequences of a steam generator tube break due to ODSCC/IGA at TSP intersections.

b. Operation of TNP based on clarified steam generator tube inspection criteria will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The FSAR postulates in section 15.6.3, a steam generator tube rupture. The kind of accident that could result from operating TNP with steam generator tubes that have been inspected using the methodology described in this change will continue to be a steam generator tube rupture.

c. Operation of the TNP with in-service tubes that meet the more specific serviceability criteria applicable to the TSP intersections for Operating Cycle 14 will not involve a significant reduction in a margin of safety.

As previously noted, this Technical Specification change is being submitted to clarify that PGE will demonstrate that steam generator tubes left in service with ODSCC/IGA at TSP intersections will not become unserviceable prior to the next inspection. It is PGE's understanding that allowed tube imperfection depths are established by the NRC based on maintaining a factor of safety of three (for differential pressure) against a tube bursting during normal operating conditions. The NRC Staff has stated this position in RG 1.121. This Guide states that, "(t)he margin of safety against tube rupture under normal operating conditions shall be not less than 3 at any tube location where defects have been detected * * * (t)he margin of safety against tube failure under postulated accidents, such as LOCA, (Loss of Coolant Accident), steam line break, or feedwater line break concurrent with the SSE, [Safe Shutdown Earthquake], should be consistent with the margin of safety determined by the stress limits specified in NB-3225 of Section III of the ASME Boiler and Pressure Vessel Code."

PGE concludes from the above that 40 percent imperfection depth for the TNP as specified in TTS 4.4.5.4.a.6 was also based on a factor of safety of three. In the case of ODSCC/IGA at TSP intersections, structural integrity margin of a tube can be established by demonstrating that the basis for the 40 percent imperfection depth is maintained (i.e., demonstrating a factor of safety of three) * * *.

As such, PGE has established tube integrity criteria that will confirm that any tube with ODSCC/IGA at TSP intersections, which is left in-service, will satisfy the factor of three test. Therefore, the margin of safety required for a tube with the traditional 40 percent imperfection depth will be the same as the required margin of safety for a tube with ODSCC/IGA at TSP intersections.

In addition, the margin of safety likely will be increased since (1) TNP will be installing N-16 [Nitrogen-16] monitors which are designed to provide early detection of primary-to-secondary leakage; (2) additional operator training on steam generator tube ruptures has been conducted; (3) the allowed primary-to-secondary leak rate for any one steam generator has been reduced significantly from 500 gpd to 130 gpd; and finally, (4) PGE has applied a conservative limit for tube flaw detection and repair for ODSCC/IGA at TSP intersections. Therefore, there will not be a significant reduction in the margin of safety if this change is approved."

The staff has reviewed the licensee's no significant hazards analysis and concurs with the licensee's conclusions. As such, the staff proposes to determine that the requested changes do not involve a significant hazards considerations.

The Commission is seeking public comments on this proposed determination. Any comments received within thirty (30) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination

unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-223, Philips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 30, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Room located at Branford Price Millar Library, Portland State University, 934 S.W. Harrkson Street, P.O. Box 1151, Portland, Oregon 97207. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to shoe that genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of 30-days, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves a no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Theodore R. Quay, Project Director: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to D. R. Nichols, Esquire, Trojan Nuclear Plant at 71760 Columbia River Road, Ranier, Oregon 97048, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated December 15, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room located at the Branford Price Millar Library, Portland State University, 934, SW. Harrison Street, P.O. Box 1151, Portland, Oregon 97207.

Dated at Rockville, Maryland, this 23rd day of December, 1991.

For the Nuclear Regulatory Commission.

Lawrence E. Kokajko,

Project Manager, Project Directorate V, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 91-31207 Filed 12-30-91; 8:45am]

BILLING CODE 7590-01-M

[Docket No. 50-333]

Power Authority of the State of New York; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-59, issued to the Power Authority of the State of New York (the licensee), for operation of the James A. FitzPatrick Nuclear Power Plant located in Oswego County, New York.

The proposed amendment would revise Technical Specification (TS) Sections 3.12.F and 4.12.F, "Fire Barrier Penetration Seals,' and the associated Bases to be more consistent with the NRC's Standard Technical Specifications (STS) NUREG-0123, "Standard Technical Specifications for General Electric Boiling Water Reactors," dated Fall 1980. Specifically, TS 3.12.F.1.a. and 4.12.F.1.a would be revised to clarify which fire barriers are covered by the associated Limiting Conditions for Operation (LCO) and what actions are required when a fire barrier penetration is found not in the as-designed condition, respectively. Furthermore, TS 3.12.F.1.b would be revised to allow the use of hourly fire watch patrols supplementing operable fire detectors in lieu of continuous fire watches when a fire barrier penetration is deemed non-functional. The proposed revision will change TS 3.12.F.1.b to read:

"With one or more of the required fire barrier penetrations non-functional, within one hour establish a continuous fire watch on at least one side of the affected penetration or verify the operability of fire detectors on at least one side of the non-functional fire barrier and establish an hourly fire watch patrol. Restore the non-functional fire barrier penetration(s) to functional status within 7 days or, in lieu of any other report required by Specification 6.9.A, prepare and submit a Special Report to the Commission pursuant to Specification 6.9.B within 30 days outlining the action taken, the cause of the non-functional penetration and plans and schedule for restoring the fire barrier penetration(s) to functional status.

Bases section 3/4.12.F would also be revised to reflect the changes to the associated LCOs and Surveillance Requirements and to provide clarifying information.

Administrative changes would also be made as a part of the proposed amendment.

This proposed amendment is being processed on an exigent basis to reduce unnecessary personnel exposure and adhere to accepted ALARA principles. Specifically, on August 2, 1991, during a meeting with the NRC's staff concerning FitzPatrick's fire protection program, the licensee committed to complete a full baseline barrier seal inspection not later than 30 days after startup from the 1993 refueling outage. As a baseline inspection, this inspection uses inspection requirements more detailed than previously employed at FitzPatrick and a new acceptance criteria. On November 8, 1991, the first fire barrier penetration seal was inspected. Engineering evaluations of the seals inspected have resulted in a significantly higher failure rate than anticipated by the licensee. In accordance with TS 3.12.F.1.b, when a fire barrier penetration seal is determined to be non-functional, a continuous fire watch is established on one side of the fire barrier. As a result of the non-functional fire barrier penetration seals found to date during the baseline inspection, approximatley 28 continuous fire watches have been established. Furthermore, as more fire barrier penetration seals are determined to be non-functional during this baseline inspection, additional personnel will be required to stand continuous fire watch. Because many of these penetrations are in radiation and high radiation areas, the posting of continuous fire watches (as opposed to hourly roving fire watches) results in unnecessary personnel exposures and is contradictory to ALARA principles. The use of roving hourly fire watches would provide an estimated reduction in personnel exposure of approximately 20 person-rem during the remainder of the baseline inspection. On December 19, 1991, the NRC granted a Temporary Waiver of Compliance allowing hourly fire watch patrols in areas with operable fire detection capability in lieu of continuous fire watches when a fire barrier penetration is determined to be non-functional. This Temporary Waiver of Compliance will remain in effect until the NRC has completed its review of the associated application for an exigent technical specification amendment.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Operation of the FitzPatrick plant in accordance with the proposed amendment would not involve a significant hazards consideration as defined in 10 CFR 50.92, since it would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes involve no hardware changes, no changes to the functions of the fire barrier penetration seals or the fire barriers, and does not change the ability of fire protection equipment to perform its intended functions. The compensatory actions implemented by the Authority constitute a level of protection equivalent to that required in the existing FitzPatrick Technical Specifications and identical to that previously accepted by the NRC staff.

2. Create the possibility of a new or different kind of accident from those previously evaluated.

The proposed changes involve no hardware changes, no changes to the functions of the fire barrier penetration seals or the fire

VOL
56
ISS
251
DE
31
1991
UMI

barriers, and do not change the ability of fire protection equipment to perform its intended functions. These changes will not introduce any new fire hazards. A functional fire detection system on one side of the barrier plus an hourly patrol or a continuous fire watch constitutes an equivalent level of protection.

3. Involve a significant reduction in the margin of safety.

The proposed changes involve no hardware changes, no changes to the functions of the fire barrier penetration seals or the fire barriers, and does not change the ability of fire protection equipment to perform its intended functions. The probability of a fire will not be increased nor will the ability of the fire detection and suppression systems to detect and extinguish a fire be degraded as a result of these changes.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within fifteen (15) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 30, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13128.

If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of 30 days, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before issuance of the amendment.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Capra: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. Charles H. Pratt, 1633 Broadway, New York, New York 10019, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated December 19, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room, located at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Dated at Rockville, Maryland, this 24th day of December 1991.

For the Nuclear Regulatory Commission.

John E. Menning,

Acting Project Manager, Project Directorate, Division of Reactor Projects—Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL MANAGEMENT

Request for Extension of OF-300 Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a proposed unchanged extension of a form which collects information from the public. Optional Form 300, Qualifications Analysis and Appraisal of Candidates for Supervisory Positions, is completed by the employers and/or co-workers of applicants for supervisory positions throughout the Federal Government. The qualification standard for supervisory positions in General Schedule occupations (GS-15 and below) contained in the Qualifications Standards Handbook, recommends the use of this form to facilitate the collection of information used in evaluating supervisory candidates. Approximately 400 forms are completed annually and require about 15 minutes to complete for a total burden of 100 hours. For copies of this proposal, call C. Ronald Trueworthy on (703) 908-8550.

DATES: Comments on this proposal should be received on or before January 30, 1992.

ADDRESSES: Send or deliver comments to:

C. Ronald Trueworthy, Agency Clearance Officer, U.S. Office of Personnel Management, Room CHP 500, 1900 E Street, NW., Washington, DC 20415

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, room 3002, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Steve Perloff, (202) 606-2557.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Advisory Commission on Conferences in Ocean Shipping; Open Meeting

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Notice of open meeting of the Advisory Commission on Conferences in Ocean Shipping.

SUMMARY: The Commission will be holding a meeting in Washington, DC on Thursday and Friday, January 16-17, 1992; the meeting is open to the public. The Commission plans to examine key issues before the Commission, particularly antitrust immunity and tariff filing and enforcement.

DATES: *Meeting:* Thursday and Friday, January 16-17, 1992; 9:30 AM to 5:30 PM EST.

ADDRESSES: The address for the public meeting is Department of Transportation Headquarters Building, 400 Seventh Street, SW., Washington, DC., room 10234.

FOR FURTHER INFORMATION CONTACT: Florizelle B. Liser, Executive Director; telephone (202) 366-9781; FAX (202) 366-7870.

SUPPLEMENTARY INFORMATION: The Commission was created by the Shipping Act of 1984 to conduct an independent and comprehensive study of conferences in ocean shipping, particularly whether the Nation would be best served by prohibiting conferences, or by closed or open conferences. The Commission is to provide its report, including recommendations, to the President and the Congress by April 10, 1992. After holding five field hearings around the country during the summer, the Commission began the deliberative stage of its work in October. In particular, they will focus on tariff filing and enforcement on Thursday, January 16, 1992 and on antitrust immunity on Friday, January 17, 1992.

Issued in Washington, DC on December 26, 1991.

Florizelle B. Liser,

Executive Director.

Coast Guard

[CGD 91-065]

Merchant Marine Personnel Advisory Committee

AGENCY: Coast Guard, DOT.

ACTION: Request for applications.

SUMMARY: The U.S. Coast Guard is seeking applicants for appointment to membership on the Merchant Marine Personnel Advisory Committee (MERPAC). The Committee is a nineteen member Federal advisory committee that advises the Coast Guard on matters related to the training, qualification, licensing, certification and fitness of seamen serving in the U.S. merchant marine. To assure a balanced representation, members shall be chosen, insofar as practicable, from the following groups: Ten active U.S. merchant mariners, including three deck officers, three engineering officers, two unlicensed seamen, one staff officer and one pilot; five marine educators; two shipping company managers; and two persons from the general public, one of whom should be an attorney. Members are appointed by the Secretary of Transportation. Each member shall normally hold office for a term of three years. However, the length of the terms of the original appointees shall be staggered, with approximately one-third of the terms expiring each year.

Applications are being sought for initial membership. To achieve the balance of membership required by the Federal Advisory Committee Act, the Coast Guard is especially interested in receiving applications from minorities and women.

The Committee will meet at least once each year at a location selected by the Coast Guard. When attending meetings of the Committee, members are entitled to travel expenses, subsistence and accommodations as allowed by current regulations.

DATES: Requests for applications should be received no later than January 30, 1992.

ADDRESSES: Persons interested in applying should write to Commandant (G–MVP), room 1210, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC 20593–0001.

FOR FURTHER INFORMATION CONTACT: LCDR S.J. Glover, Executive Director, Merchant Marine Personnel Advisory Committee, room 1210, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC 20593–0001, (202) 267–0221.

Dated: December 19, 1991.

D.H. Whitten,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: December 23, 1991.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220

Bureau of Alcohol, Tobacco and Firearms

OMB Number: 1512–0216.

Form number: ATF F 5120.17.

Type of review: Extension.

Title: Monthly Report of Wine Cellar Operations.

Description: This report is used to monitor wine operations, insure collection of wine tax revenue, and insure wine is produced in accordance with law and regulations. AFT F 5120.17 provides raw data for the Bureau of Alcohol, Tobacco and Firearms (ATF's) Monthly Statistical Release on Wine, which is used by ATF and other Federal agencies, along with industry itself, as a tool in trend analysis and planning.

Respondents: Businesses or other for-profit, Small businesses or organizations.

Estimated number of respondents: 1,610.

Estimated burden hours per respondent: 1 hour, 6 minutes.

Frequency of response: Monthly

Estimated total reporting burden: 21,252 hours.

Clearance officer: Robert N. Hogarth (202) 927–8930, Bureau of Alcohol, Tobacco and Firearms, room 3200, 650 Massachusetts Avenue, NW., Washington, DC 20226.

OMB Reviewer: Milo Sunderhauf (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

DEPARTMENT OF VETERANS AFFAIRS

Geriatrics and Gerontology Advisory Committee; Meeting

The Department of Veterans Affairs gives notice under Pub. L. 92–463 that a meeting of the Geriatrics and Gerontology Advisory Committee (GGAC) will be held January 16–17, 1992 by the Department of Veterans Affairs, at 801 I Street, NW., Washington, DC, in the Omar Bradley Conference Room. The purpose of the Geriatrics and Gerontology Advisory Committee is to advise the Secretary of Veterans Affairs and the Chief Medical Director relative to the care and treatment of the aging veterans, and to evaluate the Geriatric Research, Education and Clinical Centers. The meeting will convene at 8:30 a.m. and adjourn at 5 p.m. on January 16 and will reconvene at 8:30 a.m. on January 17 and adjourn at 12 noon. The meeting is open to the public up to the seating capacity of the room. For those wishing to attend contact Jacqueline Holmes, Program Assistant, Office of Assistant Chief Medical Director for Geriatrics and Extended Care (phone 202/535–7164) prior to January 14, 1992.

Present and future Geriatric Research, Education, and Clinical Centers and Veterans Health Administration Long Term Care Task Force activities will be the primary topics for discussion.

Dated: December 19, 1991.

By Direction of the Secretary.

Diane H. Landis,

Committee Management Officer.

Prosthetics Services Advisory Committee Meeting

The Department of Veterans Affairs (VA) gives notice under Public Law 92–463 that a meeting of the Executive Committee of the Prosthetics Services Advisory Committee (PSAC) will be held on January 14, 1992, in room 548, 801 I (EYE) Street, NW., Washington, DC.

The purpose of the PSAC is to advise the Secretary of Veterans Affairs and the Chief Medical Director on major policy questions raised by VA's responsibility to provide state-of-the-art prosthetics and associated rehabilitation research, development, and evaluation of such technology.

The purpose of this Executive Committee meeting is to review the PSAC progress to date, plan the schedule of PSAC meetings during the remainder of the fiscal year and discuss PSAC goals and procedures. The PSAC Executive Committee consists of the Chairperson and three members of the full committee.

The meeting will convene at 9 a.m. and adjourn at 4 p.m. on January 14, 1992. The meeting is open to the public to the capacity of the room. For those wishing to attend, contact Jim Mayer, Voluntary Service, phone (202) 535–7405, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, prior to January 8, 1992.

Dated: December 19, 1991.

DEPARTMENT OF ENERGY

10 CFR Part 961

Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

AGENCY: Department of Energy.

ACTION: Final Rule.

SUMMARY: On April 18, 1983, the Department of Energy (DOE) published a rule, pursuant to the Nuclear Waste Policy Act of 1982, which established the Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste. The Standard Contract established, among other things, the fees and terms of payment required of the owners or generators of spent nuclear fuel and/or high-level radioactive waste for receiving disposal services. This rule was amended on September 18, 1987, in conformance with a December 6, 1985, ruling of the U.S. Court of Appeals for the District of Columbia that the ongoing 1.0 mill per kilowatt hour fee in the Standard Contract should be based on net rather than gross generation of electricity. On March 17, 1989, the U.S. Court of Appeals for the District of Columbia ruled that by use of the phrase "* * * electricity generated * * * and sold * * *" in the Nuclear Waste Policy Act of 1982 Congress intended to include in the fee only that electricity which is both generated and actually sold. In response to this ruling, on September 7, 1990, DOE published for comment conforming amendments to Articles I 13, and VIII–A.1, B.1, and appendix G of the Standard Contract. Having reviewed the comments, DOE is hereby publishing conforming amendments to Articles I–13, and VIII–A.1, B.1, and appendix G of the Standard Contract. This final rule implements the Court's decision and modifies the annex A of appendix G, NWPA–830G form, "Standard Remittance Advice for Payment of Fees" previously approved for use by the U.S. Office of Management and Budget (OMB) under OMB No. 1901–0260.

EFFECTIVE DATE: January 30, 1992.

I. Background

The Nuclear Waste Policy Act of 1982, as amended, (NWPA), 42 U.S.C. 10101 *et seq.*, provides a comprehensive framework for disposing of commercial spent nuclear fuel (SNF) and high-level radioactive waste (HLW) of domestic origin. Section 302 of the NWPA required the Department of Energy (DOE) and each owner or generator of SNF and/or HLW (hereinafter also referred to as "contract holder" or "purchaser") to execute, by June 30, 1983, a contract under which DOE will accept and dispose of such waste in return for the payment of certain specified fees. The fee as prescribed in Article VIII–A.1 of the Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste (Standard Contract) is currently 1 mill per kilowatt hour (1M/kWh). Pursuant to 302(c) of the NWPA, these fees are to be paid into the Nuclear Waste Fund (NWF).

On April 18, 1983, DOE published its final rule which established the Standard Contract (48 FR 16590, codified at 10 CFR part 961). Article I–13 defined "kilowatt hours generated" as being the reactors' gross electricity generation, and Articles VIII–A.1 and B.1 used this definition as a basis for calculating the 1M/kWh fee. By its decision on December 6, 1985, the U.S. Court of Appeals for the District of Columbia held that the definition of "kilowatt hours generated" must be based on "net" generation of electricity, not "gross" generation (*Wisconsin Electric Power Co.* v. *Hodel*, 778 F.2d 1 (D.C. Cir. 1985)).

Subsequent to this ruling, on September 18, 1987, DOE published an amended final rule (52 FR 35356) which defined "kilowatt hours generated" as "net kilowatt hours generated" (also referred to as "net electricity generated"). This term was further defined as the gross electrical output produced by a civilian nuclear power reactor, as measured at the output terminals of the turbine generator, minus the normal onsite nuclear station service loads during the time electricity is being generated. The owners of nuclear power reactors were to pay fees to the NWF based on "net electricity generated" rather than on "gross" electricity generation. At the conclusion of the rulemaking process, DOE requested that all utilities revise historical nuclear electricity generation data to conform to the new definition. DOE verified the historical "net electricity generated" data and allowed utilities a credit for any overpayments resulting from the adjustments (including interest on the overpayments) on subsequent payments to the NWF. This resulted in a total repayment of approximately $50 million in principal and interest.

On March 17, 1989, the U.S. Court of Appeals for the District of Columbia ruled that the Department's definition of the term "net electricity generated" did not conform to the "generated and sold" provision specified in section 302(a)(2) of the Act [*Consolidated Edison Company of New York, Inc.* v. *DOE*, 870 F.2d 694 (D.C. Cir. 1989)]. The Court held that "despite the obstacles to precise measurement, we require that DOE adopt a method that implements Congress's intent that the ongoing fee under 42 U.S.C. 10222(a)(2) applies only to electricity that is both generated and actually sold." The Court recognized that "* * * to some extent, DOE must rely on approximations or industry-based averages in deducting the amount of electricity used offsite and lost in the T&D [transmission and distribution] process, and we leave it to the agency to decide upon a reasonable method."

II. Discussion

On September 7, 1990, DOE published for comment a Notice of Proposed Rulemaking (NOPR) (55 FR 37152) which proposed to revise the Standard Contract in a manner which would comply with the Court's decision. For the convenience of the reader and to provide a consolidated record, this section states the basis and purpose of the approach which DOE has determined will most effectively comply

with the Court's decision. Section III discusses the comments received on the NOPR and DOE's analysis and evaluation of those comments. Section IV determines the calculation methodology which contract holders will use to compute "electricity generated and sold" and provides samples of the computations. Section V identifies pertinent amendments to the Standard Contract resulting from these final rule determinations, and Section VI addresses relevant procedural requirements.

A. Point of Sale

The threshold issue involved in implementing the court ruling concerns the appropriate interpretation of the phrase "* * * and sold * * *" in section 302(a)(2) of the NWPA. Specifically, the issue is to define, for fee calculation purposes, the point (between the generation of electricity and its delivery to the retail customer) at which the nuclear electricity is sold. For the majority of contract holders, which are sole owners of a reactor and sell all their electricity directly to the retail customer, there is no question as to the point of sale, i.e., the sale to the retail customer. However, other organizational, contractual, legal, and operational considerations exist in today's electricity markets which add considerable complexity to this issue, especially when dealing with electricity sold to wholesalers for resale.

Neither the Standard Contract, the NWPA and its legislative history, nor previous court decisions have addressed whether the term "and sold" should be interpreted to refer to the electricity sold at the point of first sale, after the electricity leaves the busbar (which may be either to a reseller or the ultimate consumer), or whether it refers only to the electricity sold to the ultimate consumer. DOE examined whether its obligation in implementing the court decision on electricity "generated and sold" extends to sales to the ultimate consumer when other utilities, on a purchase-resale basis, intervene between the point of electricity generation and the ultimate consumer.

DOE recognizes that although sales for resale represent less than 15 percent of total sales by utilities with nuclear reactors, some utilities sell all or most of their nuclear-generated electricity to non-contract holders at the busbar or at some other intermediate point prior to ultimate sale to the consumer. While most energy losses are negligible for sales at the busbar, some sales for resale occur at subsequent connection points after experiencing additional energy losses. Another level of complexity is introduced by the fact that sales for resale, while predominantly made without regard to the generation source, are sometimes from a designated nuclear unit. In either case, the electricity initially sold for resale is subsequently resold to ultimate consumers and additional energy losses occur prior to the final sale.

To interpret the term "and sold" to refer to first sales (whether or not the electricity is resold) would mean that the marketing arrangement of a particular utility would influence the amount of electricity subject to the fee. Such a result would not provide an equitable basis for the collection of the fee and might even result in utilities seeking to alter their marketing arrangements. DOE believes that construing "and sold" to mean "sold to the ultimate consumer" is a reasonable and preferable interpretation of the statute. Given this interpretation, DOE must then address the practical consideration of how to obtain necessary loss data (including data from non-contract holders) while minimizing the administrative burden of data collection for owners/generators and fee verification by DOE. DOE has decided to define energy losses on net electricity sold for resale in a way that enables owners to adjust for these losses in a reasonable manner using an adjustment factor that represents a national average of all net electricity generated but not sold to an ultimate consumer.

B. Assumptions and Approach

Since it is impossible because of the interconnected distribution system to determine precisely the nuclear electricity that has been generated and sold on a plant-specific basis, DOE has made several simplifying assumptions. These assumptions are required to support DOE's decision to develop a reasonable calculation methodology which: (1) Can be applied uniformly by each contract holder and (2) relies exclusively on existing data historically supplied to the Federal Government. This will eliminate the burdens and cost of collecting, documenting, and maintaining itemized energy losses specifically associated with each nuclear plant as well as controlling DOE's cost of fee verification.

While this approach does not fully accommodate all unique circumstances that exist in the industry, DOE believes that the benefit of a reduced administrative burden for both utilities and DOE far outweighs the benefits of more exact results from more complicated approaches and is consistent with the U.S. Court of Appeals ruling that DOE is obligated to implement some reasonable and fair method of uniform accounting for transmission and distribution losses and other electricity which was not sold.

DOE intends to use existing data supplied to the Federal Government. These data are reported by each owner on either the "Annual Electric Utility Report," Energy Information Administration (EIA) Form EIA–861 or the "Annual Report of Major Electric Utilities, Licensees and Others," Federal Energy Regulatory Commission (FERC) Form No. 1. These owner-level data will be used for all computations required to adjust net electricity generated as currently reported to the Department on the Annex A of Appendix G, NWPA–830G form, "Standard Remittance Advice for Payment of Fees."

In order to determine the estimated amount of electricity generated and sold from a specific nuclear powerplant, it is necessary to calculate each purchaser's share of electricity sold based on: (1) electricity sold to ultimate consumers and (2) electricity sold for resale. In turn, these two components must then be adjusted to account for the amount of electricity lost or otherwise not sold.

In determining these two components, DOE specifies that each of the purchasers use individual utility-level data rather than plant-specific data. DOE believes that a utility's division of total sales between sales to ultimate consumers and sales for resale is sufficiently representative of how a specific utility's nuclear plant net generation is actually split. The variations in industry practices on sales for resale were considered when making this simplifying assumption of using utility-level data. For example, the predominant industry practice is for a utility to make short-term commitments, generally without specifying the energy source, which vary over time both by quantity and by purchaser. However, there also exist long-term contracts which specify a percentage of a nuclear powerplant's net generation to be sold for resale. While this simplifying assumption affects the calculations of individual utilities with each of these different practices, DOE believes the utility-level approach is reasonable, and that its uniformity and simplicity outweigh any benefits to be derived from creating methods to accommodate relationships that would require plant-specific data.

For the "sales to ultimate consumers component," DOE specifies that each purchaser adjust this component by the amount of electricity not sold to the total electricity available to be sold as

VOL 56 ISS 251 DEC 31 1991 UMI

reported on the Form EIA–861 or FERC Form No. 1 submissions.

For the "sales for resale component," DOE specifies that each contract holder adjust this component using an industry-wide average consistent with this approach for sales to ultimate consumers. DOE believes that this simplification is necessary because of the complexities involving the number of reseller non-contract holders, the short-term and temporal characteristics of most sales for resale transactions, and, for most utilities, the relatively small amount that sales for resale represents of the total sales.

DOE used a national average sales for resale adjustment factor based upon electricity data collected from more than 3,000 utilities over a 3-year period. As illustrated in Table 1, using a 3-year average results in an adjustment factor of .9400. This 3-year average term will be evaluated annually and revised in increments of .005. For example, if the 3-year average is calculated to be .9374 or .9426, the adjustment factor would be changed to .9350 or .9450, respectively. Subsequent adjustments will be made by written notification from the Contracting Officer.

TABLE 1.—NATIONAL SALES FOR RESALE ADJUSTMENT FACTOR [1]

[In Gigawatt hours]

	1986	1987	1988	Total
Energy furnished without charge	4	5	6	15
Energy used by the utility's electric department	17	17	17	51
Total energy losses	188	199	209	596
Total electricity not sold	209	221	231	661
Total electricity sold	3,273	3,361	3,510	10,144
Total electricity available for sale	3,482	3,582	3,741	10,806
Sales for resale adjustment factor	.9400	.9393	.9382	.9368

[1] Totals may not equal sum of components due to independent rounding.

Source: Energy Information Administration, Electric Power Annual, 1988, Table 34 (revised), "Energy Account Balance of Electricity, 1986–1988," adjusted to remove Alaska and Hawaii; the "Annual Electric Utility Report," Form EIA–861, 1986, 1987, 1988; and "Annual Report of Major Electric Utilities, Licensees and Others," FERC Form No. 1, 1986, 1987, and 1988.

In summary, the approach that DOE will use to determine the total electricity generated and sold at each plant will require the reporting utility to:

(1) Sum each owners' adjustment for "sales to ultimate consumer" and "sales for resale";

(2) Multiply this summation by each owner's respective share of the plant, to calculate each owner's weighted energy adjustment factor;

(3) Sum the owners' weighted energy adjustment factors to obtain the nuclear powerplant's total energy adjustment factor; and

(4) Multiply the total energy adjustment factor by the "net electricity generated" as currently reported on the annex A of appendix G, NWPA–830G form submitted to DOE.

III. Comments

Written comments on the proposed rule were received from the following 18 organizations representing nuclear power companies and an electric power association:

- Cajun Electric Power Cooperative, Inc.
- Carolina Power & Light Company
- Commonwealth Edison
- Connecticut Yankee Atomic Power Company
- Consolidated Edison Company of New York, Inc.
- Duke Power Company
- Edison Electric Institute
- Energy Operations, Inc.
- Florida Power and Light
- The Light Company (Houston Lighting & Power)
- New York Power Authority
- Northeast Utilities
- Philadelphia Electric Company
- Portland General Electric Company
- Southern Company Services
- Tennessee Valley Authority
- Washington Public Power Supply System
- Yankee Atomic Electric Company

Every comment received by DOE in response to the NOPR of September 7, 1990, was reviewed and fully considered in the formulation of this final rule. A summary of the comments received by DOE is set forth below together with DOE's action regarding these comments. Copies of all comments received are available for inspection in DOE Reading Room, room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

A. Areas of Primary Interest

Overall, the written comments received on the NOPR addressed four primary areas: (1) Assumptions and approach; (2) calculation methodology; (3) supporting documentation; and (4) credit for past overpayments and payment of interest. As described more fully below, several provisions were revised or clarified as a result of the comments received. They are grouped under the four primary areas of interest.

B. Analysis of Public Comments

1. Assumptions and Approach

(a) *Clarification of annual data submission.* Six commenters requested clarification of which annual data submission should be used for calculating energy adjustment factors for each quarterly payment. There was also a request for clarification of the dates when purchasers should begin to use the most recent annual data submissions (i.e., the "changeover date" for fee calculation purposes).

DOE has determined that it will use existing data supplied to the Federal Government on the Energy Information Administration (EIA) form "Annual Electric Utility Report" Form EIA–861 and on the Federal Energy Regulatory Commission's "Annual Report of Major Electric Utilities, Licensees and Others," Form No. 1. Utilities for future submissions should use their latest EIA or FERC submissions; all utilities are required to file such forms annually by May 1 or April 30, respectively. Accordingly, all quarterly payments after the respective submission dates should use the information in the latest forms, and thus the annual submission date becomes the effective changeover date. Section III–B.4 provides details on specific periods to use for calculating revised payments.

(b) *Availability of owner-level data.* Two commenters addressed this issue. One commenter requested further guidance on how to provide the necessary data since ownership of a multi-unit nuclear powerplant was jointly shared with several municipal and cooperative utilities and this ownership arrangement does not precisely conform to those discussed in the proposed rule. The second commenter suggested that two forms from the United States Department of Agriculture's Rural Electrification Administration (REA): the "Financial and Statistical Report," REA Form 7, and the "Operating Report," REA Form 12, be included in the list of reference documents suitable for use in calculating the Total Energy Adjustment Factor (TEAF).

DOE reviewed data actually reported by these entities where ownership of a multi-unit nuclear powerplant is jointly shared with several municipal and cooperative utilities. This review indicated that since Form EIA–861 and FERC Form No. 1 were filed by such organizations to report energy losses and electricity as "Sales for Resale," adequate data is available and no change in forms, instructions, or filing of forms is required.

The Form EIA–861, along with FERC Form No. 1, will serve as the basis for the calculation of the energy loss ratios. Since all of the commenters have filed Form EIA–861, DOE considers that no further clarification or change in calculating energy adjustment factors is needed. With respect to the second commenter's concern, since distribution system loss calculations are routinely reported by distribution cooperatives on REA Form 7 at the end of each year, DOE accepts the suggestion that REA Forms 7 and 12 may be included as supporting documentation in the calculation of the energy adjustment factors.

(c) *Jointly-owned generating companies and generation and transmission (G&T) cooperatives.* Two commenters addressed this issue. One commenter stated that because of its company's legal and financial arrangement the fee calculation based on the proposed algorithms would lead to inequities to the owners of jointly owned generating companies. The commenter suggested amending the definition of Owners's Share of the plant (OS) to include "Sponsor company's fixed entitlement percentage of the plant's output." DOE never intended that any inequity occur regarding jointly owned generating companies and has accepted the commenter's suggestion and clarified the definition of OS accordingly.

A second commenter stated that because of the G&T cooperatives' legal and financial framework, member cooperatives should be allowed to include data on transmission losses as if they were owners. DOE has determined that those utilities that are joint owners of generating companies (and thereby own a portion of a nuclear unit) or who participate in a G&T cooperative will be allowed to offset net generation with appropriate energy losses for fee calculation purposes. DOE has modified the definition of OS accordingly.

(d) *Offsets and reporting inconsistencies for out-of-service units.* Two commenters addressed this issue. The first commenter suggested that the final rule should allow station use for unit(s) out-of-service to be used to offset generation for a unit in-service regardless of whether or not the unit is collocated on the same site.

Typically, a utility's base load generation (e.g. nuclear) is used to power its out-of-service nuclear units. Rarely is this power purchased from another utility. If a utility has multiple nuclear units and one or more is generating electricity, some of this base load nuclear power is used to power the out-of-service unit. When the units share the same site, meters usually quantify this usage.

When a power line connects the operating unit with an off-site unit, and the power line is metered, again the usage is quantified. In both of these cases, DOE has allowed and continues to allow the offset.

This same issue was discussed in the previous final rulemaking on the Standard Contract (52 FR 35358 September 18, 1987). In that rulemaking, DOE did not adopt this recommendation stating,

"* * * there is little assurance the nuclear electricity generated offsite will actually serve the load of a non-operating station because: (1) the contribution of nuclear generation to total system generation fluctuates from minute to minute according to customer demands and (2) the stations may be hundreds of miles apart. This situation would also differ significantly from that of a collocated multi-unit station where a direct relationship exists between nuclear generation and station use. If a direct line were to exist between non-collocated units, and if this line were metered, DOE would treat these units according to the collocated multi-unit assumption. If the commenter's recommended methodology were adopted, DOE believes that the additional burden and cost of the data collection and verification effort that would be needed to maintain current confidence levels for fee calculations would outweigh any financial benefit to a particular utility."

DOE has received no information which refutes this analysis or warrants a change in the previous position. Therefore, DOE has not adopted the suggestion.

The second commenter suggested that a calculational bias is introduced because station service load for stations out-of-service is not being fully accounted for on the FERC Form No. 1. Specifically, the commenter stated the FERC Form No. 1 treats non-running station service as a subtraction from "Total Source Energy." The commenter recommended two alternatives for addressing this concern. First, DOE could treat non-running station service as a company use which increases the Total Source Energy by an equal amount. Alternatively, DOE could allow a utility to subtract non-running station service from the gross electrical generation in the same manner as running station service.

DOE acknowledges that variations in the reported data exist and that these variations (such as reporting non-running station service load as a subtraction from Total Source Energy) can create inequities for some utilities. DOE conducted an analysis using station service data submitted on the Annex A of appendix G, NWPA–830G forms over the past several years to quantify and evaluate the bias. For both single unit and multi-unit stations, the variations were not statistically significant. As stated in the NOPR (55 FR 37153):

"Since it is impossible because of the interconnected distribution system to determine precisely the nuclear electricity that has been generated and sold on a plant-specific basis, DOE has made several simplifying assumptions. These assumptions are required to support DOE's decision to develop a reasonable calculation methodology which: (1) Can be applied uniformly by each contract holder and (2) relies exclusively on existing data historically supplied to the Federal Government. While the proposed approach reflects tradeoffs in precision and may not fully accommodate all unique circumstances that exist in the industry, DOE believes that the benefit of a reduced administrative burden for both utilities and DOE far outweighs the benefits of more exact results from more complicated approaches * * *."

Therefore, the suggested change has not been adopted.

(e) *Offsets for pumped-storage hydro facilities.* Two commenters addressed the need for offsets for pumped-storage hydro facilities. One comment was made that the proposed methodology does not account for a pumped-storage hydro facility which uses nuclear base load electrical power to store the energy for subsequent use. The commenter stated that when nuclear power provides a significant portion of base

VOL 56 ISS 251 DEC 31 1991 UMI

load power, an offset should be allowed for the pumping losses associated with operating the facility.

When a utility's base load generation is used to power pumped-storage hydro facilities, and a nuclear share of that electricity is used, DOE will allow the offset for pumping losses under certain circumstances. If a power line connects the operating pumped storage unit with an off-site nuclear unit, and the power line is metered, the usage is considered to be quantified and DOE will allow an offset for the associated pumping losses.

DOE will also allow such offsets if the proportion of nuclear generated electricity consumed by a pumped-storage hydro facility can be estimated and if the electricity losses associated with pumped storage facilities can be documented (e.g., based on routine and uniform records of district power data on contributions from different electricity sources). In such cases, a prorated nuclear share shall be allowed as an offset to gross electricity generation reported on the Annex A of appendix G, NWPA–830G form. The burden of demonstrating the validity of the offset will be on the utility. Specific methodologies for calculating these offsets must be approved by the Contracting Officer in advance.

A second comment requested that the definition of the term Sales to ultimate Consumer Adjustment Factor (SCAF) be modified to exclude that net energy used for the pumped-storage hydro facility. The NOPR guidelines for the acceptance of an approach to determine electricity "generated and sold" included: Simplicity, data availability, and verifiability. Calculating rather than metering the nuclear electricity consumption by a pumped-storage facility as an offset to a nuclear unit's gross electricity generation introduces problems associated with assumptions and verification. DOE believes that the type and range of assumptions which would need to be developed to adequately address the issue of calculating the nuclear share for all specific circumstances would not be consistent with these NOPR guidelines and would significantly expand the task of fee verification. Therefore, DOE has decided not to modify the definition of SCAF to include offsets to the gross electricity generation associated with pumped-storage losses. However, DOE will consider such offsets on a case-by-case basis as discussed in the preceding paragraph.

2. Calculation Methodology

(a) *Adjustment of Fraction of Sales to ultimate Consumer (FSC) and Fraction of Sales for Resale (FSR) in relation to National average Adjustment Factor (NAF).* One commenter proposed that purchasers be allowed to set their FSC to 100% and the FSR to 0% so that the total system energy losses could be adjusted accordingly. The commenter is a utility with a SCAF less than the NAF, and the proposal would allow the utility to lower the fees of their bulk power purchasers.

The NAF is calculated on a national basis, using aggregate data from all utilities generating electrical energy, in order to significantly decrease the information gathering and administrative burden on reporting utilities. This approach eliminates the requirement for collecting energy loss data from other companies to which the nuclear generated electricity is wholesaled. Calculating this term on a national level also decreases the burden on the validation of the calculations and the verification of fees. By using this approach, DOE recognized that some utilities might accrue an advantage, but DOE believes that the aggregate benefits outweigh isolated individual disadvantages. Therefore, DOE has not adopted the commenter's suggestion.

(b) *Adjustment of SCAF, FSC and FSR in relation to mixed energy sales.* A commenter suggested that the formula for SCAF as well as the formulas for FSC and FSR be revised because in the case of two utilities with equal system transmission and distribution losses, the utility with a mixture of retail and wholesale energy sales will have a higher value for Owner's Energy Adjustment Factor (OEAF) than the utility with all retail sales. The commenter stated that this situation arises because in the case of a utility with a mixture of retail and wholesale energy sales the reported losses under the rule would be biased toward a value with a higher content of transmission losses (e.g., resale energy sold at the tieline) or even no losses (e.g., resale energy sold at the busbar).

This commenter suggested that in such situations, a fraction of the NAF be used to create an assumed value for the portion of underreported energy losses. Specifically, a calculation methodology was suggested that would be proportional to 50 percent of the national average for electricity not sold or roughly 3 percent. The proposed formula would adjust the calculated FSC upwards while adjusting the FSR downwards. The commenter suggested that this approach would provide a value more reflective of sales to the ultimate consumer. In the formula for SCAF, the total reported losses would be increased by the same amount that the Sales for Resale are decreased.

DOE acknowledges that reporting energy losses as a portion of electricity sales might lead to variations in the reported data, and that these variations might create a minor calculational bias for some utilities. However, for DOE to allow a utility to modify the FSC and FSR by setting it proportional to the NAF would create a more significant bias. In addition, the uniformity of the basic approach would be distorted by the implementation of this suggestion. Therefore, the commenter's suggested calculation method has not been accepted.

(c) *Calculation of the NAF.* One commenter recommended that the NAF be based upon last year's data consistent with the individual utility's adjustment factors. Another commenter suggested that DOE allow the SCAF to be set equal to the NAF when the majority of the sales are sales for resale and total system energy losses related to their sales transactions are included on Form EIA–861 under "Sales for Resale" and "Sales to Ultimate Consumers" (lines l and k), rather than as "Total Energy Losses" (line o).

As previously stated, the NAF is calculated on a national basis using aggregated data from all utilities generating nuclear energy. If the NAF were set equal to the adjustment factor of an individual utility, the potential for an inequitable fee calculation would arise. For example, a utility with a high adjustment factor, which sells electricity to another utility with an adjustment factor approaching the industry average, would have to pay higher fees than would another utility with a low adjustment factor in the same situation. The uniformity of the basic approach would be distorted by the implementation of either of these suggestions. Therefore, the two suggested changes have not been implemented.

(d) *Use of decimal places and rounding.* Five commenters stated that while the sample problems in the proposed rule use values expressed to four decimal places, there is nothing in the rule to preclude the use of two, three, five, or some other number of decimal places. A second question raised was when to round the decimal places (i.e., at what stage of the calculations). One other commenter suggested that, for consistency, it may be advantageous to specify the NAF to four decimal places instead of three as proposed in the NOPR. Another commenter stated that in order to avoid potential disputes and questions during DOE's data validation or audits, the final rule should specify the number of decimal places to be used and when the values are to be rounded.

According to EIA Standard 86–05–07 (Standards Manual, Energy Information Administration, April 1989), "to round a number to n digits (decimal places): add one unit to the nth digit if the (n+1)st digit is 5 or larger, and keep the nth digit unchanged if the (n+1)st digit is less than 5." DOE has determined that the NAF should be specified to four decimal places to avoid an unnecessary increase in the burden of its calculation. The FSC, SCAF, Adjustment for Sales to ultimate Consumer (ASC), FSR, Adjustment for Sales for Resale (ASR), OEAF, OS, Weighted Energy Adjustment Factor (WEAF), and Total Energy Adjustment Factor (TEAF) should be computed to n+1 digits, i.e., five decimal places, then rounded and reported to four decimal places. The Current Fee Due will have the same number of significant digits as the Gross Electricity, the Net Electricity, and the Electricity Generated and Sold.

(e) *Annual establishment of the NAF value.* Two commenters recommended that the NAF definition be changed from a specific current value of .9400 to reflect a NAF that would be set by the Contracting Officer who then would notify purchasers of any changes. DOE has accepted this recommendation and after annual review, when a change is considered to be necessary, a formal notification will be issued by the Contracting Officer. Article I–13.k has been revised accordingly. For purposes of setting the initial value only, this Federal Register Notice will substitute for formal notification by the Contracting Officer and establishes .9400 as the value for NAF.

(f) *Definitional consistency of SCAF.* A commenter pointed out that the term SCAF is defined in the NOPR as one minus the quotient of energy lost or not sold "divided by the total energy available for sale." The commenter suggested that this phrase should read "total energy available for disposition." DOE agrees and the suggested wording has been incorporated into the annex A of appendix G, NWPA–830G form instructions.

(g) *Exclusion of electricity sold for resale from the denominator in SCAF.* Two commenters stated that the proposed calculation method did not deduct the portion of electricity sold for resale from the denominator in the equation for SCAF. One commenter stated that the "calculation of the SCAF as presently proposed by DOE * * * will not meet the Court's fairness test nor DOE's own equity test."

DOE has determined that for a utility with a mixture of retail and wholesale energy sales the commenter is correct that the proposed calculation methodology would result in a bias to SCAF. Therefore, DOE has revised the calculation method. Using the references to the EIA Form–861 as an example,

$$SCAF = 1 - \frac{\text{line m} + \text{line n} + \text{line o}}{\text{line j}}$$

is changed to:

$$SCAF = 1 - \frac{\text{line m} + \text{line n} + \text{line o}}{\text{line j} - \text{line l}}$$

which deducts the portion of electricity sold for resale from the denominator. In the event that "line j—line l" is zero, the value of SCAF will remain equal to one. Article I–13.g has been revised accordingly.

(h) *Owner's Share of the plant (OS).* One commenter stated that in determining the OS multiplier for each owner, the methodology allows flexibility between the use of owner fraction and total sales fraction. DOE agrees with the commenter's observation and has determined that either method is appropriate for use in the fee calculations.

(i) *Typographical error in the instructions for the calculation of the FSC and FSR.* The annex A of appendix G, Form NWPA–830G of the proposed Standard Remittance Advice used the plural possessive term "years'" instead of the singular possessive "year's" in calculating FSC and FSR. The final rule has been changed to "year's."

(j) *Definition of Owners Energy Adjustment Factor (OEAF).* One commenter stated that in the annex A of appendix G, Form NWPA–830G definitions, the OEAF is incorrectly defined as "the product of ASC and ASR" rather than "the sum of ASC and ASR." The commenter is correct and the final rule has been changed accordingly.

3. Supporting Documentation

(a) *Data required for DOE audits.* Five commenters stated that the proposed requirement for routinely preparing and maintaining supporting documentation to support DOE's fee verification process would be excessively burdensome. The recommendation was made that the utilities have the necessary information available and be able to explain any inconsistencies on an "as requested" basis or shortly prior to an audit.

Since this recommendation is consistent with DOE's intent, DOE accepts this suggestion and will require the comparison data to be available for all audits or reviews in order to explain any data differences. This supporting documentation includes but is not limited to: station diagrams showing meter locations; a table displaying and comparing the net electricity generated reported on (a) "Annex A of appendix G," Form NWPA–830G, (b) "Electric Power Monthly," Form EIA–759, (c) the Nuclear Regulatory Commission's (NRC) Operating Data Report, (d) the NRC's Average Daily Unit Power Level Report, and (e) Rural Electrification Administration (REA) Forms 7 and 12, if appropriate, and; annual data displaying and comparing the net electricity generated reported on the Annex A with the data reported on the "Annual Report of Major Electric Utilities, Licensees and Others," FERC Form No. 1, and with the data reported on the "Annual Electric Utility Report," Form EIA–861. This supporting documentation should include explanations of any inconsistencies among the data.

(b) *Changes in the referenced forms.* Four commenters stated that the FERC Form 1 is currently undergoing revisions through the rulemaking process. These commenters suggested that provisions be made in the final rule to accommodate any changes in reporting energy sources and disposition on the FERC Form No. 1 or Form EIA–861.

On November 13, 1990, the FERC Form No. 1 was formally modified (55 FR 47311). DOE has determined that the changes adopted by FERC will not have a significant effect on the use of this data in the calculation of the energy adjustment factor. The FERC Form No. 1 modification was limited, for purposes of this rulemaking, to the division of "Sales for Resale" into two separate categories: "Requirements Sales for Resale" and "Non-Requirements Sales for Resale" and the corresponding change in applicable line numbers referenced in the proposed rule. Table 2 shows the specific line number changes for use in the TEAF calculation.

Sales for resale	line l	line 22	line 23+24.
Energy furnished w/o charge	line m	line 23	line 25.
Energy used by the company	line n	line 25	line 26.
Total energy losses	line o	line 30	line 27.

4. Credit for Past Overpayments and Payment of Interest

(a) *Past overpayments.* Three commenters requested guidance on the appropriate data to use for the appropriate period in computing past overpayments.

The process of calculating and submitting annex A of appendix G, NWPA–830G forms whether ongoing or revised, involves determining the appropriate reference data to be used. The filing dates for each form are intended to establish which data submission is to be used. A changeover from one year's data for the next year's data will occur either May 1 or April 30 of each year for the EIA–861 or FERC Form No. 1 respectively. Revisions of the annex A of appendix G, NWPA–830G submissions will use data appropriate to each respective calendar year. For example, for the following payment submissions, utilities may use the referenced Form EIA–861 or the FERC Form No. 1:

Payment submission date	EIA–861 filing date	FERC form No. 1 filing date
July 1983–December 1983	May 1, 1984	April 30, 1984.
January 1984–December 1984	May 1, 1985	April 30, 1985.
January 1985–December 1985	May 1, 1986	April 30, 1986.
January 1986–December 1986	May 1, 1987	April 30, 1987.
January 1987–December 1987	May 1, 1988	April 30, 1988.
January 1988–December 1988	May 1, 1989	April 30, 1989.
January 1989–December 1989	May 1, 1990	April 30, 1990.
January 1990–December 1990	May 1, 1991	April 30, 1991.
January 1991–April 1991	May 1, 1991	April 30, 1991.
May 1991–April 1992	May 1, 1991	April 30, 1991.
May 1992–April 1993	May 1, 1992	April 30, 1992.

For each annex A of appendix G, NWPA–830G form previously submitted, contract holders should submit to the Contracting Officer a signed revision to the annex A of appendix G, NWPA–830G and appendix G, NWPA–830G with a summary sheet detailing the total refund (principal) requested. The revisions will be reviewed and verified by DOE prior to authorization of the refund of the overpayments.

(b) *Specification of NAF instead of calculation of SCAF.* A commenter proposed that the NAF should be specified as the only value needed to offset historical net electrical generation for the ensuing reverification and refund process instead of each utility calculating a separate SCAF for each co-owner for each quarter over the history of payments made to the NWF.

DOE believes that the specification of one value for all SCAF for all utilities for all historic submissions, while simple, would result in an inequitable sharing of the program costs for many utilities. Therefore, the commenter's suggestion has not been implemented. DOE has determined, however, that in the resubmission of the revised annex A of appendix G, NWPA–830G to specify the amounts of historical overpayments, the NAF value of .9400 should be used.

(c) *Payment of interest.* Four commenters supported DOE efforts to obtain interest on past overpayments and two commenters disagreed with DOE's determination that congressional authorization is needed to pay interest on all overpayments.

The issue of whether interest on the overpayments can be paid by DOE has been resolved by Congress. The Fiscal Year 1991 Energy and Water Development Appropriations Act (Pub. L. 101–514) authorized DOE to pay interest on overpayments pursuant to *Consolidated Edison Company of New York, Inc.* v. *DOE,* 870 F.2d 694 (D.C. Cir. 1989), "* * * at a rate to be determined by the Secretary of the Treasury and calculated from the date the amounts were deposited into the Nuclear Waste Fund."

C. Other Administrative Changes

DOE has made several administrative changes to the appendix G, NWPA–830G and annex A of appendix G, NWPA–830G forms.

First, pursuant to modified procedures required by the Office of Management and Budget (OMB), the statement of public reporting burden on the appendix G, NWPA–830G form has been expanded to include the estimate of reporting time per response and points of contact for comments on burden and information collection.

Second, several clarifications have been made on the annex A of appendix G, NWPA–830G form:

(1) Under section 4, columns for individual generating units have been added for accounting purposes;

(2) Under section 4.2 and 4.3, the phrases "station total, 1 Mill/KWh" and "4.2 times $1.00" have been deleted to minimize redundancy;

(3) Under section 2.4 of the Instructions, the phrase "as part of section 3" has been deleted from paragraphs C. and D. to minimize redundancy.

(4) Under section 3.1 of the Instructions, the phrase "disposition to ultimate consumers" in the paragraph Sales to Consumer Adjustment Factor (SCAF) replaces "for sale by that owner," in response to comments. In the paragraph Owner's Share (OS), the phrase "or the sponsor company's fixed entitlement percentage of the Plant's output" has been added in response to comments. A section defining NAF has been added for completeness. Under the paragraph Weighted Energy Adjustment Factor (WEAF), the word "times" has been added for clarity.

(5) Under section 3.2 of the Instructions, the words "individual owners" have been added for clarification.

(6) Under section 4.2 of the Instructions, to assure editorial consistency with the form, the sentence "Multiply the values in Item 4.1 by the 'Unit' and 'Station Total' values in Item 2.6 to calculate these values for the reporting station" has been changed to "Multiply values in Item 4.1 by the 'Unit' values in Item 2.6. Sum these values and enter in 'Station Total'."

Third, minor editorial corrections have been made including: the correction of zip code numbers; the addition of OMB authorization numbers and expiration dates; the deletion of the word "disposal" in line 1.4 of annex A of appendix G, NWPA–830G; and references to forms in section 3.1 of annex A of appendix G, NWPA–830G Instructions have been re-ordered but not changed

IV. Calculation Methodology and Sample Calculations

A. Calculation Methodology

DOE specifies that to calculate the amount of electricity generated and sold for a specific nuclear plant, the net electricity generated must be decreased by a factor to account for the amount of nuclear generation lost in transmission and distribution or otherwise not ultimately sold. This calculation is represented by the following formula:

Electricity Generated and Sold = Net Electricity Generated × Total Energy Adjustment Factor

1. Net Electricity Generated

This rule does not alter the basic methodology used to calculate "net electricity generated" as defined in the final rule published on September 18, 1987 (i.e., "the gross electrical output produced by a civilian nuclear power reactor measured at the output terminals of the turbine generator, minus the normal onsite nuclear station service loads during the time electricity is being generated"). The calculation of "net electricity generated" will now be used as an intermediate value in the determination of "electricity generated and sold."

In calculating "net electricity generated" DOE has determined, however, that all onsite use can be deducted from the gross generation if the onsite use came from a nuclear power reactor and is not double counted in any other energy loss term of the calculation methodology provided below. This determination revokes DOE Contracting Officer's letter, dated February 1, 1988, focusing on the deduction of service loads during startup testing. The calculated "net electricity generated" is to be recorded on the annex A of appendix G, NWPA–830G Remittance Advice form.

2. Total Energy Adjustment Factor

The Total Energy Adjustment Factor (TEAF) is the sum of all the Weighted Energy Adjustment Factors (WEAF) for each of a plant's owners. The WEAF is derived by multiplying the Owner's Energy Adjustment Factor (OEAF) by the Owner's Share of the plant (OS) (or share of metered sales). The OEAF is calculated by adding an owner's adjustment for "sales to ultimate consumers" to an owner's adjustment for "sales for resale." The TEAF is represented by the following formula:

BILLING CODE 6450-01-M

VOL 56 ISS 251 DEC 31 1991 UMI

$$TEAF = \sum_{i=1}^{NO} WEAF_i$$

where:

WEAF = OEAF × OS
= (ASC + ASR)OS
= [(FSC × SCAF) + (FSR × NAF)]OS

where:

TEAF = Total Energy Adjustment Factor
NO = Number of Owners
WEAF = Weighted Energy Adjustment Factor for each plant owner
OS = Owner's Share of the plant (station) or share of metered sales
OEAF = Owner's Energy Adjustment Factor
ASC = Adjustment for Sales to ultimate Consumer
ASR = Adjustment for Sales for Resale
FSC = Fraction of Sales to ultimate Consumer
SCAF = Sales to ultimate Consumer Adjustment Factor
FSR = Fraction of Sales for Resale
NAF = National average Adjustment Factor, currently defined as .9400

In developing these adjustment factors, as detailed below, utilities will use the following information from Form EIA-861 (Schedule 2, question 9) or the FERC Form No. 1 (page 401):

Category	Form EIA-861 Line	FERC Form No. 1 Line
Total sources of energy	j	20
Sales to ultimate consumer	k	22
Sales for resale	l	23 + 24
Energy furnished w/o charge	m	25
Energy used by the company	n	26
Total energy losses	o	27

(a) Owner's Adjustment for Sales to the Ultimate Consumer

The owner's Adjustment for Sales to the ultimate Consumer (ASC) is the product of the owner's Fraction of Sales to ultimate Consumer (FSC) and the owner's Sales to ultimate Consumer Adjustment Factor (SCAF) calculated as follows:

ASC = FSC × SCAF

where:

ASC = Adjustment for Sales to ultimate Consumer
FSC = Fraction of Sales to ultimate Consumer calculated as either:

Form EIA-861

$$\frac{\text{line k}}{\text{line k + line l}}$$

or

FERC Form No. 1

$$\frac{\text{line 22}}{\text{line 22 + (line 23 + line 24)}}$$

SCAF = Sales to ultimate Consumer Adjustment Factor, calculated as either:

Form EIA-861

$$1 - \frac{\text{line m + line n + line o}}{\text{line j - line l}}$$

or

FERC Form No. 1

$$1 - \frac{\text{line 25 + line 26 + line 27}}{\text{line 20 - (line 23 + line 24)}}$$

(b) Owner's Adjustment for Sales for Resale

The owner's Adjustment for Sales for Resale (ASR) is the product of the owner's Fraction of Sales for Resale (FSR) and the sales for resale National average Adjustment Factor (NAF), calculated as:

ASR = FSR × NAF

where:

ASR = Adjustment for Sales For Resale
FSR = Fraction of Sales For Resale, calculated as either:

Form EIA-861

$$\frac{\text{line l}}{\text{line k + line l}}$$

or

FERC Form No. 1

$$\frac{\text{line 23 + line 24}}{\text{line 22 + (line 23 + line 24)}}$$

NAF = National average Adjustment Factor, currently defined as .9400

(c) Owner's Share of the Plant

The Owner's Share of the plant (OS) is based on either the fraction of plant ownership or the fraction of metered sales. The sum of all owner's shares must equal 1.00. For a nuclear station with more than one reactor and different ownerships for each reactor, a separate Annex A of Appendix G, NWPA-830G will be required for each reactor.

B. Sample Calculations

Two sample calculations based on the final rule for adjusting net electricity generated are detailed below.[2] The first example illustrates a sample case for a single owner, while the second example details the TEAF calculation for a plant with multiple owners.

EXAMPLE 1—SINGLE OWNER

Owner Data	
Owner's share	1.0000
Total sources of energy	26,167,838 MWh
Sales to ultimate consumer	24,248,986 MWh
Sales for resale	582,437 MWh
Energy furnished w/o charge	4,410 MWh
Energy used by the company	40,045 MWh
Total energy losses	1,291,960 MWh

Since the utility owns 100% of the net electricity generated, the Owner's Share of the plant (OS) (station) or share of metered sales is equal to 1.00, and the Total Energy Adjustment Factor (TEAF) is equal to the Weighted Energy Adjustment Factor (WEAF). Using the methodology developed above, the TEAF would be calculated as follows (expressed to five significant digits):

OEAF = ASC + ASR

ASC = FSC x SCAF

$$FSC = \frac{24,248,986}{24,248,986 + 582,437} = .97654$$

$$SCAF = 1 - \frac{4,410 + 40,045 + 1,291,960}{26,167,838 - 582,437} = .94777$$

ASC = .97654 x .94777 = .92554

ASR = FSR x NAF

$$FSR = \frac{582,437}{24,248,986 + 582,437} = .02346$$

NAF = .9400

ASR = .02346 x .9400 = .02205

OEAF = ASC + ASR = .92554 + .02205 = .94758

WEAF = OEAF x OS = .94758 x 1.00000 = .94758

TEAF = WEAF = .94758

Table 3 illustrates how the TEAF would be reported on the Annex A of Appendix G, NWPA-830G. The net electricity generated value would then be multiplied by the TEAF resulting in the amount of nuclear electricity generated and sold.

[2]Totals in these examples may not add due to independent rounding.

TABLE 3.—EXAMPLE OF REPORTING TEAF ON ANNEX A FOR A SINGLE OWNER

Name(s) of owners	Adjustment for Sales to ultimate Consumer (ASC)		Adjustment for Sales for Resale (ASR)		Owner's Energy Adjustment Factor (OEAF)	Owner's Share (OS)	Weighted Energy Adjustment Factor (WEAF)
	Fraction of Sales to ultimate Consumer (FSC)	Sales to ultimate Consumer Adjustment Factor (SCAF)	Fraction of Sales for Resale (FSR)	National average Adjustment Factor (NAF)			
Owner	(.9765 x	.9478) + (.0235 x	.9400) =	.9476 x	1.0000 =	.9476
_____	(_____ x	_____) + (_____ x	.9400) =	_____ x	_____ =	_____
_____	(_____ x	_____) + (_____ x	.9400) =	_____ x	_____ =	_____
_____	(_____ x	_____) + (_____ x	.9400) =	_____ x	_____ =	_____
Total Energy Adjustment Factor (TEAF = Σ WEAF)							.9476

EXAMPLE 2—MULTIPLE OWNERS

Three utilities, A, B, and C, own 41.2%, 41.0%, and 17.8% of a nuclear powerplant, respectively. As in Example 1, the WEAF must be calculated for each of the plant owners before the plant TEAF can be calculated.

Owner A Data	
Owner's share	.4120
Total sources of energy	8,942,417 MWh
Sales to ultimate consumer	6,650,363 MWh
Sales for resale	1,700,699 MWh
Energy furnished w/o charge	0 MWh
Energy used by the company	22,580 MWh
Total energy losses	568,776 MWh

OEAF = ASC + ASR

ASC = FSC x SCAF

$$FSC = \frac{6,650,363}{6,650,363 + 1,700,699} = .79635$$

$$SCAF = 1 - \frac{0 + 22,580 + 568,776}{8,942,417 - 1,700,699} = .91834$$

ASC = .79635 x .91834 = .73132

ASR = FSR x NAF

$$FSR = \frac{1,700,699}{6,650,363 + 1,700,699} = .20365$$

NAF = .9400

ASR = .20365 x .9400 = .19143

OEAF = ASC + ASR = .73132 + .19143 = .92275

WEAF = OEAF x OS = .92275 x .41200 = .38017

Owner B Data	
Owner's share	.4100
Total sources of energy	9,611,602 MWh
Sales to ultimate consumer	6,441,439 MWh
Sales for resale	2,617,181 MWh
Energy furnished w/o charge	0 MWh
Energy used by the company	11,111 MWh
Total energy losses	541,571 MWh

OEAF = ASC + ASR

ASC = FSC x SCAF

$$FSC = \frac{6,441,439}{6,441,439 + 2,617,181} = .71108$$

$$SCAF = 1 - \frac{0 + 11,111 + 541,571}{9,611,602 - 2,617,181} = .92094$$

ASC = .71108 x .92094 = .65487

ASR = FSR x NAF

$$FSR = \frac{2,617,181}{6,441,439 + 2,617,181} = .28892$$

NAF = .9400

ASR = .28892 x .9400 = .27158

OEAF = ASC + ASR = .65487 + .27158 = .92645

WEAF = OEAF x OS = .92645 x .41000 = .37984

Owner C Data	
Owner's share	.1780
Total sources of energy	2,204,391 MWh
Sales to ultimate consumer	2,068,231 MWh
Sales for resale	22,288 MWh
Energy furnished w/o charge	0 MWh
Energy used by the company	414 MWh
Total energy losses	113,458 MWh

OEAF = ASC + ASR

ASC = FSC x SCAF

$$FSC = \frac{2,068,231}{2,068,231 + 22,288} = .98934$$

$$SCAF = 1 - \frac{0 + 414 + 113,458}{2,204,391 - 22,288} = .94782$$

ASC = .98934 x .94782 = .93772

ASR = FSR x NAF

$$FSR = \frac{22,288}{2,068,231 + 22,288} = .01066$$

NAF = .9400

ASR = .01066 x .9400 = .01002

OEAF = ASC + ASR = .93771 + .01002 = .94782

WEAF = OEAF x OS = .94782 x .17800 = .16870

In the above example, the TEAF for this station is the sum of each owner's WEAF, calculated as:

Owner	WEAF
A	.38017
B	.37984
C	.16870
TEAF	.92871

Table 4 illustrates how the TEAF would be reported on the revised Annex A of Appendix G, NWPA-830G. The net electricity generated value would then be multiplied by the TEAF resulting in the amount of nuclear electricity generated and sold.

BILLING CODE 6450-01-C

VOL 56 ISS 251 DEC 31 1991 UMI

TABLE 4.—EXAMPLE OF REPORTING TEAF ON ANNEX A FOR MULTIPLE OWNERS

Name(s) of owners	Adjustment for Sales to ultimate Consumer (ASC)		Adjustment for Sales for Resale (ASR)		Owner's Energy Adjustment Factor (OEAF)	Owner's Share (OS)	Weighted Energy Adjustment Factor (WEAF)
	Fraction of Sales to ultimate Consumer (FSC)	Sales to ultimate Consumer Adjustment Factor (SCAF)	Fraction of Sales for Resale (FSR)	National average Adjustment Factor (NAF)			
Owner A	(.7963 ×	.9183) +	(.2037 ×	.9400) =	.9228 ×	.4120 =	.3902
Owner B	(.7111 ×	.8209) +	(.2889 ×	.9400) =	.9265 ×	.4100 =	.3798
Owner C	(.9893 ×	.9478) +	(.0107 ×	.9400) =	.9478 ×	.1780 =	.1687
_____	(_____ ×	_____) +	(_____ ×	.9400) =	_____ ×	_____ =	_____
_____	(_____ ×	_____) +	(_____ ×	.9400) =	_____ ×	_____ =	_____
Total Energy Adjustment Factor (TEAF = Σ WEAF)							.9287

V. Final Rule

The purpose of this final rule is to amend the Standard Contract consistent with the court ruling that the ongoing fee should be based on nuclear electricity generated and sold. Electricity which is generated and intended for sale, as metered at the station busbar, will be adjusted for losses prior to ultimate sale, hereafter referred to as "electricity generated and sold."

The following is a summary of the changes which have been made to the Standard Contract (10 CFR Part 961) necessary to implement the payment of the ongoing fee based on electricity generated and sold:

Article I—Definitions—Remove the definition of "net kilowatt hours generated" and add a new definition of "electricity (kilowatt hours) generated and sold."

Article VIII-A.1—Fees—Remove the term "net kilowatt hours generated" and add in its place the term "electricity generated and sold."

Article VIII-B.1—Payment—Remove the term "net electricity generated" and add in its place the term "electricity generated and sold."

Appendix G—Standard Remittance Advice for Payment of Fees—The annex A of appendix G, NWPA–830G form currently used by utilities has been revised to reflect payment based on electricity generated and sold. Also, section 4 of the annex A of appendix G, NWPA–830G has been modified slightly in order to accommodate existing accounting procedures, which track payments by specific nuclear units rather than the station as a whole. The annex A of appendix G, NWPA–830G form instructions have also been changed to reflect the proposed calculation procedures for identifying net generation for fee calculation purposes, for identifying and calculating the energy adjustment factors, and for reporting electricity generated and sold. The revised annex A of appendix G, NWPA–830G form and instructions are appended to this final rule.

VI. Procedural Requirements

A. Executive Order No. 12291

Under Executive Order No. 12291, agencies are required to determine whether proposed rules are major rules as defined in the Order. DOE has reviewed this proposed rule and has determined that it is not a major rule because: It will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have any significantly adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises. This notice was submitted to the Office of Management and Budget (OMB) for review under Executive Order 12291. OMB has completed its review.

B. Executive Order No. 12612

Under Executive Order No. 12612, agencies are required to ensure adequate consideration and respect for the institutional interests of States and their subdivisions when an agency is formulating or implementing proposed policies that have federalism implications. DOE has reviewed this final rule and has determined that the rule is unlikely to have a substantial direct effect on the States, the relationship between the States and Federal Government, or distribution of the power and responsibilities among various levels of government.

C. Regulatory Flexibility Act

In accordance with section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, DOE finds that sections 603 and 604 of that Act do not apply to this rule because it will not have a significant economic impact on a substantial number of small entities. This finding is based on the fact that the parties to the contract, who are owners and generators of spent nuclear fuel or high-level radioactive waste, are not small entities.

D. National Environmental Policy Act

In accordance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), execution of amendments to the Standard Contract in this rulemaking will not result in any activities which could cause environmental impacts. Therefore, this rulemaking is not a proposal for a major Federal action significantly affecting the quality of the human environment. Accordingly, preparation of either an environmental assessment or an environmental impact statement is not required.

E. Paperwork Reduction Act

Information collection requirements contained in this Final Rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 95–511) and assigned control number 1901–0260. This Final Rule does not substantively alter or materially modify the information collection requirements set forth in the Notice of Proposed Rulemaking as approved by OMB. Therefore, further review by OMB is not necessary (see 5 CFR 1320.13(f) and (g)). Comments on the information collection requirements of this rule should be submitted both to DOE address noted above and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Ronald Minsk.

List of Subjects in 10 CFR Part 961

Government contracts, Nuclear materials, Nuclear powerplants and reactors, Radiation protection, Waste treatment and disposal.

In consideration of the foregoing, part 961, chapter III of title 10, Code of Federal Regulations is amended as set forth below.

Berton J. Roth,

Acting Director, Office of Procurement, Assistance and Program Management.

PART 961—STANDARD CONTRACT FOR DISPOSAL OF SPENT NUCLEAR FUEL AND/OR HIGH-LEVEL RADIOACTIVE WASTE

1. The authority citation for part 961 continues to read as follows:

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254) and sec. 302, Pub. L. 97–425, 96 Stat. 2257 (42 U.S.C. 10222).

2. The Standard Contract in § 961.11 is amended by revising Article I, paragraph 13, and Articles VIII–A.1, and B.1, and appendix G to the Contract, including annex A to appendix G as set forth below. Annex B to appendix G remains unchanged.

§ 961.11 Text of the contract.

* * * * *

Article I—Definitions

* * * * *

13. The term *electricity (kilowatt hours) generated and sold* means gross electrical output produced by a civilian nuclear power reactor measured at the output terminals of the turbine generator minus the normal onsite nuclear station service loads during the time electricity is being generated multiplied by the total energy adjustment factor. For purposes of this provision, the following definition shall apply:

a. The term *Total Energy Adjustment Factor (TEAF)* means the sum of individual owners' weighted energy adjustment factors.

b. The term *Weighted Energy Adjustment Factor (WEAF)* means the product of an owner's energy adjustment factor times the owner's share of the plant.

c. The term *Owner's Energy Adjustment Factor (OEAF)* means the sum of the individual owner's adjustment for sales to ultimate consumers and adjustment for sales for resale.

d. The term *Owner's Share of the plant (OS)* means the owner's fraction of metered electricity sales, the owner's fraction of plant ownership, or the sponsor company's fixed entitlement percentage of the plant's output. This definition includes joint owners of generating companies or participants in a generation and transmission cooperative.

e. The term *Adjustment for Sales to ultimate Consumer (ASC)* means the owner's fraction of sales to the ultimate consumer multiplied by the owner's sales to ultimate consumer adjustment factor.

f. The term *Fraction of Sales to ultimate Consumer (FSC)* means the owner's fractional quantity of electricity sold to the ultimate consumer relative to the total of electricity sales (sales to ultimate consumers plus the sales for resale).

g. The term *Sales to ultimate Consumer Adjustment Factor (SCAF)* means one minus the quotient of all electricity lost or otherwise not sold for each owner divided by the total electricity available for disposition to ultimate consumers. Electricity lost or otherwise not sold includes:

(1) Energy furnished without charge;
(2) Energy used by the company;
(3) Transmission losses;
(4) Distribution losses; and
(5) Other unaccounted losses as reported to the Federal Government "Annual Report of Major Electric Utilities, Licensees and Others," Federal Energy Regulatory Commission (FERC) Form No.1; Rural Electrification Administration (REA) Forms 7 and 11 if appropriate; or the "Annual Electric Utility Report," Energy Information Administration (EIA) Form EIA–861.

h. The term *Total Electricity Available for Disposition to Ultimate Consumers* means the reporting year's total of all of a utility's electricity supply which is available for disposition, expressed in kilowatt hours, and is equal to the sum of the energy sources minus the electricity sold for resale by the utility.

i. The term *Adjustment for Sales for Resale (ASR)* means the owner's fraction of sales for resale multiplied by the national average adjustment factor.

j. The term *Fraction of Sales for Resale (FSR)* means the owner's fractional quantity of electricity sold for resale by the utility relative to the total of electricity sales.

k. The term *National Average Adjustment Factor (NAF)* means the ratio of the national total of electricity sold to the national total of electricity available for disposition, based on the most recent 3 years of national data provided to the Federal Government, and will be set by the Contracting Officer. This term will be evaluated annually and revised in increments of .005.

l. Pumped storage losses. If the proportion of nuclear generated electricity consumed by a pumped-storage hydro facility can be measured or estimated and if the electricity losses associated with pumped storage facilities can be documented (e.g. based on routine and uniform records of district power data on contributions from different electricity sources), a prorated nuclear share shall be allowed as an offset to gross electricity generation reported on the annex A of appendix G, NWPA–830G form. Specific methodologies for calculating these offsets must be approved by the Contracting Officer in advance.

Instructions to annex A of appendix G, NWPA–830G provide the necessary information to calculate the energy adjustment factors.

* * * * *

Article VIII—Fees and Terms of Payment

A. Fees

1. Effective April 7, 1983, Purchaser shall be charged a fee in the amount of 1.0 mill per kilowatt hour (1M/kWh) electricity generated and sold.

* * * * *

B. Payment

1. For electricity generated and sold by the Purchaser's civilian nuclear power reactor(s) on or after April 7, 1983, fees shall be paid quarterly by the Purchaser and must be received by DOE not later than the close of the last business day of the month following the end of each assigned 3-month period. The first payment shall be due on July 31, 1983, for the period April 7, 1983, to June 30, 1983. (Add as applicable: A one-time adjustment period payment shall be due on _____, for the period _____ to _____.) The assigned 3-month period, for purposes of payment and reporting of electricity generated and sold shall begin _____.

Appendix G - Standard Remittance Advice for Payment of Fees

This information is being collected under mandatory authorities vested in the U.S. Department of Energy under Public Law 97-425, Late filing, failure to file or to otherwise comply with the instructions provided may result in interest penalties as provided by Article VIII.C of the Standard Contract for Disposal of Spent Nuclear Fuel under High Level Radioactive Waste. For information concerning confidentiality of information see item 6 of the instructions. Public reporting burden for this collection of information is estimated to average 40 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Statistical Standards, EI-73, Mail Station 2H-087, 1000 Independence Ave., S.W. Washington D.C. 20585, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503

DEPARTMENT OF ENERGY
Germantown, MD 20875

APPENDIX G - STANDARD REMITTANCE ADVICE FOR PAYMENT OF FEES

General Information

1. Purpose
Standard Remittance Advice (RA) form is designed to serve as the source document for entries into the Department's accounting records to transmit data from Purchasers concerning payment of their contribution to the Nuclear Waste Fund.

2. Who Shall Submit
The RA must be submitted by Purchasers who signed the Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste. Submit Copy 1, 2, and 3 to DOE, Office of the Controller, Special Accounts and Payroll Division and retain Copy 4.

3. Where to Submit
Purchasers shall forward completed RA to:

U.S. Department of Energy
Office of the Controller
Special Accounts and Payroll Division (C-216 GTN)
Box 500
Germantown, MD 20875-0500
Request for further information, additional forms, and instructions may be directed in writing to the address above or by telephone to (301) 353-4014.

4. When to Submit
For electricity generated on or after 4-7-83 fees shall be paid quarterly by the Purchaser and must be received by DOE not later than the close of the last business day of the month following the end of each assigned three month period. Payment is by electronic wire transfer only.

5. Sanctions
The timely submission of RA by a Purchaser is mandatory. Failure to file may result in late penalty fees as provided by Article VIII.C of the Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste.

6. Provisions Regarding the Confidentiality of Information
The information contained in these forms may be (i) information which is exempt from disclosure to the public under the exemption for trade secrets and confidential commercial information specified in the Freedom of Information Act of 5 USC 522(b)(4)(FOIA) or (ii) prohibited from public release by 18 USC 1905. However, before a determination can be made that particular information is within the coverage of either of these statutory provisions, the person submitting the information must make a showing satisfactory to the Department concerning its confidential nature.

Therefore, respondents should state briefly and specifically (on an element-by-element basis if possible), in a letter accompanying submission of the form why they consider the information concerned to be a trade secret or other proprietary information, whether such information is customarily treated as confidential information by their companies and the industry, and the type of competitive hardship that would result from disclosure of the information. In accordance with the provisions of 10 CFR 1004.11 of DOE's FOIA regulations, DOE will determine whether any information submitted should be withheld from public disclosure.

If DOE receives a response and does not receive a request, with substantive justification, that the information submitted should not be released to the public, DOE may assume that the respondent does not object to disclosure to the public of any information submitted on the form.

A new written justification need not be submitted each time the NWPA-830G is submitted if:
a. views concerning information items identified as privileged or confidential have not changed and
b. a written justification setting forth respondent's views in this regard was previously submitted.

In accordance with the cited statutes and other applicable authority, the information must be made available upon request, to the Congress or any committee of Congress, the General Accounting Office, and other Federal agencies authorized by law to receive such information.

INSTRUCTIONS FOR COMPLETING STANDARD REMITTANCE ADVICE FOR PAYMENT OF FEES

Section 1.0 *Identification Information*
1.1 Name of Purchaser as it appears on the Standard Contract, the mailing address, state, and zip code
1.2 Name and telephone number of person responsible for the completion of this form.
1.3 Standard Contract identification number as assigned by DOE.
1.4 Period covered by this advice and date of this payment. Any period different from the assigned three month period should be explained on a separate attachment.

Section 2.0 *Spent Nuclear Fuel (SNF) Fee*
2.1 Enter the number of reactors for which the Purchaser had irradiated fuel as of midnight between 4/7 April 1983 (equal to the number of Annex B forms attached).
2.2 Total amount owed to the Nuclear Waste Fund for spent fuel used to generate electricity prior to April 7, 1983 (See Annex B for calculation)
2.3 Self explanatory.
2.4 Ten year Treasury Note rate on the date the payment is made, to be used if payments are being made using the 40 quarter option or if lump sum payment is made after June 30, 1985.
2.5 Unpaid balance before this payment is made.
2.6 Enter the payment option (1, 2, or 3) chosen. The selection of payment option must be made within two years of Standard Contract execution
2.7 Total payment of fee which this advice represents. Show principal, interest, and total.

Section 3.0 *Fee for Electricity Generated and Sold (M/kWh)*
3.1 Enter the number of reactors the Purchaser is reporting on during this reporting period.
3.2 Enter total electricity generated and sold during the reporting period from all reactors being reported. This is the sum of Station Total figures of line 4.2 from all Annex A forms attached, expressed in megawatt hours.
3.3 Current Fee Rate as provided by DOE (initially 1.0 M/kWh which is equal to 1.0 $/MWh)
3.4 Total Fee for Electricity Generated and Sold (M/kWh) represented by this advice.

Section 4.0 *Underpayment/Late payment (as notified by DOE)*
4.1 - 4.6 Self Explanatory.

Section 5.0 *Other Credits Claimed*
Represents all items for which a Purchaser may receive credit, as specified in the Standard Contract

Section 6.0 *Total Remittance*
6.1 - 6.6 This section is a summary of the payments made in the previously mentioned categories with this remittance

Section 7.0 *Certification*
Enter the name and title of the individual your company has designated to certify the accuracy of the data. Sign the "Certification" block and enter the current date.

ANNEX A TO APPENDIX G
Standard Remittance Advice for Payment of Fees

OMB No. 1901-0260
(Expires 11/30/93)

Section 1. Identification Information: Please first read the Instructions on the back.

1.1 **Purchaser Information:**
- 1.11 Name:
- 1.12 Address:
- 1.13 Attention:
- 1.14 City:
- 1.15 State: 1.16 Zip:
- 1.17 Utility ID Number: — —

1.2 **Contact Person:**
- 1.21 Name:
- 1.22 Title:
- 1.23 Phone No.:( )( ) Ext.:

1.3 **Station Name:**

1.4 **Standard Contract Identification Number:**

1.5 **Period Covered (MM/DD/YY):**

1.51 From: / / To: / /

1.52 Date of This Submission: / /

Section 2. Net Electricity Generated Calculation

Item	Unit 1	Unit 2	Unit 3	Station Total*
2.1 Unit ID Code:				
2.2 Gross Thermal Energy Generated (MWh):				
2.3 Gross Electricity Generated (MWh):				
2.4 Nuclear Station Use While At Least One Nuclear Unit Is In Service** (MWh):				
2.5 Nuclear Station Use While All Nuclear Units Are Out Of Service** (MWh):				
2.6 Net Electricity Generated (MWh) (Item 2.3 minus Item 2.4):				
2.7 Footnote (If any):				

*For a nuclear station with more than one reactor and different ownerships for each reactor, a separate Annex A will be required.
**Utilities unable to meter individual unit use shall report estimated unit use and shall explain in a footnote how the unit data were estimated.

Section 3. Total Energy Adjustment Factor Calculation

3.1 Weighted Energy Adjustment Factor Calculation	Adj. for Sales to ultimate Consumer (ASC)		Adjustment for Sales for Resale (ASR)				
Name of Nuclear Station Owner(s)	Fraction of Sales to ult. Consumer (FSC)	Sales to ultimate Consumer Adj. Factor (SCAF)	Fraction of Sales for Resale (FSR)	National average Adj. Factor (NAF)	Owner's Energy Adj. Factor (OEAF)	Owner's Share (OS)	Weighted Energy Adj. Factor (WEAF)
1.	.	X .	) + (.	X .	) = .	X .	= .
2.	.	X .	) + (.	X .	) = .	X .	= .
3.	.	X .	) + (.	X .	) = .	X .	= .
4.	.	X .	) + (.	X .	) = .	X .	= .
5.	.	X .	) + (.	X .	) = .	X .	= .
6.	.	X .	) + (.	X .	) = .	X .	= .
7.	.	X .	) + (.	X .	) = .	X .	= .
8.	.	X .	) + (.	X .	) = .	X .	= .
9.	.	X .	) + (.	X .	) = .	X .	= .
10.	.	X .	) + (.	X .	) = .	X .	= .
11.	.	X .	) + (.	X .	) = .	X .	= .
12.	.	X .	) + (.	X .	) = .	X .	= .
3.2 Total Energy Adjustment Factor (TEAF = ∑ WEAF)							.

Section 4. Fee Calculation for Electricity Generated and Sold

Item	Unit 1	Unit 2	Unit 3	Station Total*
4.1 Total Energy Adjustment Factor (Enter value from 3.2 above):				
4.2 Electricity Generated and Sold (Items in 4.1 times Items in 2.6):				
— Current Fee Rate (Dollars):	$1.00/MWh	$1.00/MWh	$1.00/MWh	$1.00/MWh
4.3 Current Fee Due (Dollars): (Transfer Station Total to line 3.4 of Appendix G)

Annex A to Appendix G
Standard Remittance Advice for Payment of Fees

OMB No. 1901-0260
(Expires 11/30/93)

Annex A Instructions

0. General Information

0.1 Purpose: To report the calculations of fees due the Department of Energy's Nuclear Waste Fund.

0.2 Please read all instructions before completing this form.

0.3 Complete a separate Annex A for each nuclear station. For a nuclear station that has different ownership arrangements for more than one reactor, a separate Annex A will be required for each reactor.

0.4 Submit Annex A Quarterly with Appendix G.

0.5 Where to submit:

U.S. DOE, Office of the Controller
Special Accounts & Payroll Division
(C-216 GTN), Box 500
Germantown, MD 20875-0500

Section 1. Identification Information: (Self explanatory)

Section 2. Net Electricity Generated Calculation

2.1 Unit ID Code: Enter the Reactor Unit Identification (ID) Code as assigned by DOE, for each reactor in the station.

2.2 Gross Thermal Energy Generated (MWh): Utility shall report the thermal output of the nuclear steam supply system during the gross hours of the reporting period.

2.3 Gross Electricity Generated (MWh): Utility shall report this amount for each unit in the appropriate column, and the total in the column labeled "Station Total." This amount is measured at the output terminals of the generator during the reporting period.

2.4 Nuclear Station Use While At Least One Nuclear Unit Is In Service (MWh): Utility shall report this amount for each unit in the appropriate column, and the total in the column called "Station Total." The utility is to report consumption of electricity by the nuclear portion of the station during days in which at least one of the station's nuclear units was on-line and producing electricity. A utility unable to meter an individual unit shall report the estimated unit use, and shall explain in item 2.7 how the unit data were estimated. **Note that:**

A. During days in which nuclear station use exceeds nuclear station generation, the utility shall treat all resulting negative values as zero for fee calculation purposes.

B. A utility that has multiple nuclear units at one station

- when at least 1 nuclear unit is operating and when generation from that unit exceeds the nuclear station's use, the utility may assume that the operating unit is supplying electricity for nuclear station use whether or not the electricity has been metered separately or the units terminate to a common electrical busbar, and
- shall report under item 2.5 any electricity use by the nuclear portion of the station during the days in which all nuclear units at the station were out of service simultaneously.

C. A utility that has a metered transmission line connecting an off station nuclear reactor with another nuclear station may treat the off station plant as part of this station for fee calculation purposes if it is not double counted.

D. Utility may deduct small quantities of unmetered non nuclear electricity generation included in "Gross Electricity Generated," provided that it is identified and explained in item 2.7.

E. A utility may deduct nuclear electricity generation which is not sold and does not pass the busbar, provided they identify and explain the deduction in item 2.7 and that the deduction is not double counted.

2.5 Nuclear Station Use While All Nuclear Units Are Out Of Service (MWh): Utility shall report this amount for each unit in the appropriate column, and the total in the "Station Total" column. In this row, the utility shall report the consumption of electricity by the nuclear portion of the station during days in which total nuclear unit use exceeds nuclear generation (e.g., a day in which all nuclear units at the station were out of service at once). Note that a utility unable to meter individual unit use will report estimated unit use, and shall explain in item 2.7 how the unit data were estimated.

2.6 Net Electricity Generated (MWh): The utility shall report this amount for each unit in the appropriate column, and the total in the "Station Total" column. This amount is the result of subtracting items 2.4 from items 2.3.

2.7 Footnote (If any): Utilities that are unable to meter individual unit use shall explain here how the unit data were estimated.

Section 3. Total Energy Adjustment Factor Calculation: The reporting utility shall obtain necessary data from all owners to calculate the Total Energy Adjustment Factor and maintain consistent, accurate, and complete records to support these submissions. The values provided in this section must be accurate to 4 significant digits. If there are more than 12 owners, use a continuation sheet. For a nuclear station with more than one reactor and different ownerships for each reactor, a separate Annex A will be required for each reactor.

3.1 Weighted Energy Adjustment Factor Calculation:

Name of Nuclear Station Owner(s): provide the name(s) in items 1. thru 12. of 3.1. If more than 12 names, use a continuation sheet.

Adjustment for Sales to ultimate Consumer (ASC): is the product of Fraction of Sales to ultimate Consumer (FSC) and the Sales to ultimate Consumer Adjustment Factor(SCAF).

Fraction of Sales to ultimate Consumer (FSC): is determined by dividing the owner's previous year's annual sales to the ultimate consumer by the sum of the owner's previous year's annual sales to the ultimate consumer plus the owner's previous year's annual sales for resale. These figures can be found on the Energy Information Administration (EIA) Form EIA-861 or the Federal Energy Regulatory Commission (FERC) Form No. 1.

Sales to ultimate Consumer Adjustment Factor (SCAF): is equal to one minus the quotient of all electricity lost or otherwise not sold for each owner, divided by the total electricity available for disposition to ultimate consumers. The total electricity available is the reporting year total of all of an owner's electricity supply which is available for disposition, expressed in kilowatt hours. Electricity lost or otherwise not sold includes (a) energy furnished without charge, (b) energy used by the company, (c) transmission losses, (d) distribution losses, (e) other unaccounted losses as reported on the Form EIA-861 or the FERC Form No. 1.

Adjustment for Sales for Resale (ASR): **Is the product of Fraction of Sales for Resale (FSR) and National average Adjustment Factor (NAF).**

Fraction of Sales for Resale (FSR): is determined by dividing the owner's previous year's annual sales for resale by the sum of the owner's previous year's annual sales to the ultimate consumer plus the owner's previous year's annual sales for resale. These figures can be found on the Form EIA-861 or the FERC Form No. 1.

National average Adjustment Factor (NAF): is the quotient of the national total of electricity sold divided by the national total of electricity available for disposition.

Owner's Energy Adjustment Factor (OEAF): is the Owner's fraction of metered electricity.

Weighted Energy Adjustment Factor (WEAF): is the product of an Owner's Energy Adjustment Factor (OEAF) times the Owner's Share (OS).

3.2 Total Energy Adjustment Factor (TEAF): is the sum of individual owner's Weighted Energy Adjustment Factors (WEAF).

Section 4. Fee Calculation for Electricity Generated and Sold:

4.1 Total Energy Adjustment Factor. Enter the value from item 3.2 as appropriate.

4.2 Electricity Generated and Sold. Multiply the values in item 4.1 by the "Unit" values in item 2.6. Sum these values and enter in "Station Total."

4.3 Current Fee Due (Dollars): Multiply the values in item 4.2 by one (1) dollar/megawatt hour (or 1.0 mill/kWh), which is the current fee. Add this station fee to the current fee due for all other reactors operated by the Purchaser, and then enter the sum on line 3.4 of the Appendix G, Remittance Advice.

RIN 0938-AE95

Medicare Program; Update of Ambulatory Surgical Center Payment Rates and Additions to and Deletions from the Current List of Covered Surgical Procedures

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice with comment period.

SUMMARY: This notice implements section 1833(i)(2)(A) of the Social Security Act, which requires that the payment rates for ambulatory surgical center (ASC) services be reviewed and updated annually, and responds to the public comment we received concerning the ambulatory surgical center payment rate update notice with comment period published on July 5, 1990 (55 FR 27690). It also implements section 1833(i)(1) of the Social Security Act, which requires, in part, that the list of covered ambulatory surgical center procedures be reviewed and updated at least every 2 years. This notice announces additions to and deletions from the list of surgical procedures for which facility services are covered when the procedures are performed in an ASC. This notice also announces the assignment of payment groups for each procedure and responds to public comments received in response to the notice proposing additions to and deletions from the list of covered surgical procedures that was published on December 7, 1990 (55 FR 50590).

DATES: *Effective Dates:* The payment rates contained in this notice are effective for services furnished on or after December 31, 1991. For ASC procedures that are being removed from the current list, the effective date is March 31, 1992. The effective date for procedures that are being added to the list is January 30, 1992.

Comment Date: Written comments on the payment rate update and on the twelve deletions from the list of covered ASC procedure found in this document at section V will be considered if we receive them at the appropriate address, as provided below, by 5 p.m. on March 2, 1992.

ADDRESSES:

Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-710-NC, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses: Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC 20201.

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Due to staffing and resource limitations, we cannot accept audio, visual, or facsimile (FAX) copies of comments.

In commenting, please refer to file code BPD-710-NC. Comments will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: 202-245-7890).

COPIES: To order copies of the **Federal Register** containing this document, send your request to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325. Specify the date of the issue requested and enclose a check payable to the Superintendent of Documents, or enclose your Visa or MasterCard number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 783-3238 or by faxing to (202) 275-6802. The cost for each copy (in paper or microfiche form) is $1.50. In addition, you may view and photocopy the **Federal Register** document at most libraries designated as U.S. Government Depository Libraries and at many other public and academic libraries throughout the country that receive the **Federal Register**. Ask the order desk operator for the location of the Government Depository Library nearest to you.

SUPPLEMENTARY INFORMATION:

I. Background

A. Update of Payment Rates

Section 1832(a)(2)(F)(i) of the Social Security Act (the Act) provides that benefits under the Medicare Supplementary Medical Insurance program (Part B) include services furnished in connection with those surgical procedures that, under section 1833(i)(1)(A) of the Act, are specified by the Secretary and are performed on an inpatient basis in a hospital but which also can be performed safely on an ambulatory basis in an ambulatory surgical center (ASC) or in a hospital outpatient department. To participate in the Medicare program as an ASC, a facility must meet the standards specified under section 1832(a)(2)(F)(i) of the Act and 42 CFR 416.25.

Generally, there are two elements in the total charge for a surgical procedure—a charge for the physician's professional services for performing the procedure and a charge for the facility's services (for example, use of an operating room). Section 1833(i)(2)(A) of the Act authorizes the Secretary to pay ASCs a prospectively determined rate for facility services associated with covered surgical procedures. ASC facility services are subject to the usual Medicare Part B deductible and coinsurance requirements. Therefore, participating ASCs are paid 80 percent of the prospectively determined rate. This rate is intended to represent the Secretary's estimate of a fair payment that takes into account the cost incurred by ASCs generally in providing the services which are furnished in connection with performing the procedure. Currently, this rate is a standard overhead amount that does not include physician fees and other medical items and services (for example, durable medical equipment) for which separate payment may be authorized under other provisions of the Medicare program.

The ASC facility payment for all procedures in each group is established at a single rate adjusted for geographic variation. The rate is a standard overhead amount that covers the cost of services such as nursing, supplies, equipment, and use of the facility.

Under section 1833(i)(3)(A) of the Act, the aggregate payment to hospital outpatient departments for covered ASC procedures is equal to the lesser of the following two amounts:

- The amount paid for the same services that would be paid to the hospital under section 1833(a)(2)(B) of the Act (that is, the lower of the hospital's reasonable costs or customary charges); or
- The amount determined under section 1833(i)(3)B)(i) of the Act based on a blend of the lower of the hospital's reasonable costs or customary charges and the amount that would be paid to a freestanding ASC in the same area for the same procedure.

Under section 1833(i)(3)(B)(i) of the Act, the blend amount for a cost reporting period is the sum of the cost proportion and the ASC proportion.

Under section 1833(i)(3)(B)(ii) of the Act, the cost proportion and the ASC proportion are determined as follows:

- For cost reporting periods beginning on or after October 1, 1987 and before October 1, 1988, the cost proportion is 75 percent and the ASC proportion is 25 percent.
- For cost reporting periods beginning on or after October 1, 1988 and on or before December 31, 1990, the cost proportion is 50 percent and the ASC proportion is 50 percent.
- For cost reporting periods beginning on or after January 1, 1991, the cost proportion is 42 percent and the ASC proportion is 58 percent.

The Report of the Conference Committee accompanying section 934 of the Omnibus Budget Reconciliation Act of 1980 (Pub. L. 96-499), enacted on December 5, 1980, (the legislation that added the ASC benefit to the Medicare program) states, "This overhead factor is expected to be calculated on a prospective basis * * * utilizing sample survey and similar techniques to develop reasonable estimated overhead allowances for each of the listed procedures * * *" (See H.R. Rep. No. 1479, 96th Cong., 2nd Sess. 134 (1980).) Section 416.140 of the regulations provides that a survey of ASCs participating in the program will be conducted periodically to collect data for analysis or re-evaluation of the payment rates. Such a survey will be conducted no more often than annually. In addition, section 1833(i)(2)(A)(ii) of the Act requires that the ASC facility payment rate result in substantially lower Medicare expenditure than would have been paid if the same procedure was performed on an inpatient basis in a hospital.

Section 9343(b)(1) of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509) revised section 1833(i)(2) of the Act to require annual rather than periodic updating of ASC rates.

The first ASC survey was conducted between May and August of 1986. The "Ambulatory Surgical Center Payment Rate Survey" (Form HCFA-452) was mailed to nearly 500 Medicare participating ASCs. We randomly selected ninety-seven of these facilities for audit. The ASC rate methodology implemented March 12, 1990 was based on the cost, charge, and utilization data collected by the survey.

A new ASC survey is being prepared to gather more current cost data. The survey form is being revised to enhance and refine the quality of the data received from ASCs. We anticipate distributing the revised survey to ASCs in 1992. Data obtained from the new survey will allow for changes in both ASC rates and the rate-setting methodology. These changes and rate-setting methodology will be announced through notice and comment procedures in the **Federal Register**.

On February 8, 1990, we published a final notice in the **Federal Register** (55 FR 4526) that set forth a revised methodology for determining the payment rates for ASC services furnished to beneficiaries under Part B of Medicare. The provisions of the final notice—

- Refined the methodology used to determine the payment rates;
- Based the payment rates on the most recent survey data collected from participating ASCs;
- Computed the payments using the HCFA hospital wage index;
- Incorporated a $200 payment for IOLs inserted during or subsequent to cataract surgery into the facility rate as required by section 4063(b) of Public Law 100-203;
- Established the payment policy for surgical procedures that are terminated due to medical complications; and
- Established eight payment groups. (Group 6 and 8 contain only procedures related to the insertion of IOLs.)

The new ASC payment rate methodology and IOL allowance were effective March 12, 1990. However, the rates were not implemented, but were superseded by rates contained in a separate notice with comment period that was also published in the **Federal Register** on February 8, 1990 (55 FR 4577). The provisions of that notice increased the ASC facility services payment rates for the eight groups by the estimated annual rate of increase (4.88 percent) in the consumer price index for urban consumers (CPU-U) for calendar year 1989. The IOL allowance remained $200.

A notice with comment period published in the **Federal Register** on July 5, 1990 (55 FR 27690) updated ASC facility rates for services furnished beginning July 1, 1990 by the estimated annual rate of change in the CPI-U for calendar year 1990. ASC payment group rates were increased by 4.21 percent. The IOL allowance remained at $200.

Section 4151(c)(3) of Public Law 101-508 froze the amount of payment for an IOL furnished by an ASC for insertion during or subsequent to cataract surgery at $200 through December 31, 1992.

B. Covered Procedures

Section 934 of Public Law 96-499 amended sections 1832(a)(2) and 1833 of the Act to authorize Medicare Part B coverage for facility services furnished in connection with certain surgical procedures performed in an ambulatory surgical center (ASC).

With respect to the surgical procedures covered under this provision, section 1833(i)(1) of the Act requires the Secretary to specify, in consultation with appropriate medical organizations, surgical procedures that, although appropriately performed in an inpatient hospital setting, can also be performed safely on an ambulatory basis. The report accompanying the legislation (Report of the Committee on the Budget, House of Representatives, that accompanied H.R. 7765, H.R. Rep. No. 1167, 96th Cong., 2nd Sess. 390 (1980)) explained that Congress intended that procedures currently performed on an ambulatory basis, especially in physicians' offices, which do not generally require the more elaborate facilities of an ASC, should not be included on the list of covered procedures.

In line with this Congressional intent, our current regulations (42 CFR 416.65(a)) specify the following four requirements regarding the range of covered services:

1. Procedures on the list are to be those commonly performed on an inpatient basis but which also may be safely performed in an ASC.
2. The list excludes procedures that are commonly performed, or may be safely performed, in physicians' offices.
3. Procedures are limited to those requiring a dedicated operating room and generally do not require an overnight stay.
4. The list does not contain procedures excluded from Medicare coverage.

We recognize that for individuals with certain medical conditions, a procedure on the list may nevertheless be safely performed only on an inpatient basis. The choice of operating site remains a matter for the professional judgment of the patient's physician.

Section 9343 of Public Law 99-509 requires that the ASC list of procedures be reviewed and updated by April 21, 1987 and not less often than every 2 years thereafter. Accordingly, we published the latest updates to the list of covered ASC procedures in the **Federal Register** on April 21, 1987 (52 FR 13176) and on June 1, 1989 (54 FR 23540). These updates supplement the original list of covered ASC procedures published on August 5, 1982 (47 FR 34099).

On December 7, 1990, we published a notice (55 FR 50590) proposing additions to and deletions from the current list of covered surgical procedures for ASCs. This final notice results from our consideration of the public comments received in response to the proposed

UMI

notice, consideration of the Part B Medicare Annual Data (BMAD) files, and correspondence from the medical community and other members of the public over the past few years. In the December 7, 1990 proposed notice, we published payment group rates established in the July 5, 1990 notice alongside the proposed procedures. We established these rates by using already existing procedure payment rates in the same coding and medical category.

II. Discussion of Comments

A. Payment Update

In response to the July 5, 1990 ASC payment rate update notice with comment period, we received one timely response from a hospital administrator who raised two issues. These issues and our responses to them follow:

Comment: HCFA has not stated that it will annually review and update the IOL allowance based on the market price similar to the current review process for the ASC group payment rates. Review of the payment allowance for IOLs should be part of the annual overall rate review process.

Response: Section 4151(c)(3) of Public Law 101–508, mandates that the amount of payment for an IOL inserted in an ASC during or subsequent to cataract surgery remain at $200 effective November 5, 1990, through December 31, 1992. Notwithstanding this freeze in the allowance for IOLs, we are continuing to collect data about IOL costs as a part of our ongoing, overall rate review process.

Comment: The current blend of ASC and hospital costs dilutes the impact of changes in wage index adjustments on payments to hospital outpatient departments. If the blended rate were phased out and replaced exclusively with the published ASC rate, changes in the wage index and groupings would have a noticeable impact on payment as compared to the costs of those services to an individual hospital.

Response: The method for determining payments for ASC covered procedures performed in hospitals on an outpatient basis is provided by law and, thus, we do not have the option of changing it.

B. Covered Procedures

We solicited comments on the December 7, 1990 proposed additions to and deletions from the ASC list. We requested specific comments on the appropriateness of our proposed payment group assignment for lithotripsy together with detailed information on facility charges and associated lithotripsy service costs in an ASC. We also proposed to coordinate ASC procedure list updates with payment rate updates and to make both ASC updates concurrent with the annual update of the inpatient hospital prospective payment system wage index. We requested that commenters refer to all surgical procedures by procedure codes as provided in the CPT.

We received 330 pieces of correspondence timely, 177 of which only addressed the lithotripsy payment provision. One hundred forty-nine comments were from urologists who perform lithotripsy services, 19 from lithotripsy centers, and nine from suppliers of mobile lithotripsy. The other 153 comments were submitted by 47 ASCs, 32 hospitals, 19 professional or medical societies, 6 medical centers, 4 suppliers, 3 law firms, 13 ophthalmologists, 2 plastic surgeons, 1 ultrasound radiologist and 26 other physicians, including hand surgeons, otolaryngologists, cardiovascular surgeons, gastroenterologists, and general practitioners. A summary of these comments and our responses follow:

1. Criteria for Determining Procedures to be Added to or Deleted from the ASC List

Comment: Thirty commenters asserted that the formula used in screening procedures for inclusion on the list is outdated. Under the formula, a procedure that is virtually always performed in a hospital outpatient department will not qualify because it is not performed on an inpatient basis at least 20 percent of the time. Yet, such a procedure is probably ideal for performance in an ASC.

Response: Given the progression in movement away from hospitalization over the past 10 years, there are some procedures virtually always performed in an outpatient setting that do not meet our 20 percent inpatient criteria. Some of these procedures may be suited for ASC coverage. In the interest of expediting the publication of this notice, which is adding a large number of procedures for ASC coverage, we are taking this suggestion under advisement for future study. In the meantime, based on the advice of our medical staff, we have extended coverage to a few procedures that do not meet the general criteria. We developed criteria consistent with Congressional intent and with the requirement in the regulations excluding procedures that are commonly performed in physicians' offices or are not commonly performed on an inpatient basis. We acknowledge that the threshold levels are, to some extent, judgmental and could be replaced with higher or lower levels.

Comment: In the December 7, 1990 proposed notice (at 55 FR 50591) HCFA stated that its medical consultants may make exceptions and override the general threshold criteria when they believe an exception to be clinically appropriate. One commenter suggested that Medicare contractors should also be allowed to override the threshold criteria.

Response: The provision for overriding the threshold criteria by our medical consultants was developed for acceptance or rejection of a procedure for the ASC list. This provision has been primarily used in those instances in which our database shows low frequency, and thus the data are susceptible to a disproportionate impact by reporting errors. The provision was not developed for use by Medicare contractors in special or unusual circumstances. The intent of the list is that it be national in scope with the approved surgical procedures being based on their generally accepted appropriateness and safety in the ASC. If Medicare contractors were permitted to make subjective decisions, there would be different ASC coverage policies throughout the country.

Procedures are covered in an ASC when they meet the statutory provisions and are generally considered safe and effective in that setting; that is, they meet the conditions for covered surgical procedures in an ASC set forth at § 416.65(a). For the most part, we look to generally accepted medical practice as evidenced by the BMAD files on site of service.

Comment: One commenter questioned why a list is required, and another commenter said all hospital outpatient procedures should be on Medicare's ASC list.

Response: The use of a list of procedures covered in an ASC is not discretionary. Section 1833(i)(1) of the Act specifically requires the Secretary, after consultation with appropriate medical organizations, to develop a list of surgical procedures that can be performed appropriately and safely on an ambulatory basis instead of in a hospital on an inpatient basis. This legal requirement for a list does not exist for hospital outpatient departments, which were already in existence at the time the Medicare program began. In contrast to the ASC, a hospital outpatient department has the safety feature of proximity to inpatient services should unforeseen complications develop in surgery. Outpatient departments also perform numerous medical procedures not available in the ASC. Finally, procedures must be determined covered

in order to be assigned to an ASC payment group.

2. Proposed Additions

a. *Additions based on data.* We listed in the addendum of the December 7, 1990 (55 FR 50595) proposed notice approximately 900 new procedures, which were the result of our review of the BMAD files, suggestions from our medical staff, and suggestions from the general public. The following proposed procedures received negative comment.

Comment: Nine urologists, one professional society, and one supplier opposed our proposal to add penile prosthesis surgery to the ASC list, that is, CPT codes 54400, 54401, 54402, 54405, 54407, and 54409. The commenters noted that these procedures should not be covered in an ASC because: (1) The necessary stabilization for elderly patients may be medically difficult; (2) The length of the surgical procedure often exceeds the 90 minutes specified for maximum length of ASC procedures; (3) The patient's frequent need for irrigation and drainage and the possibility of urinary retention prolongs recovery over the 4 hours anticipated; and (4) Patients frequently require continued administration of intravenous antibiotics to diminish the risk of infection.

Response: A further review of recent billing data shows inpatient percentages ranging from 74 percent to 83 percent for penile prosthesis procedures. Based upon information obtained from surgeons, penile prosthesis surgery recovery time is 24 to 72 hours. We have therefore concluded that at this time penile prostheses implantations are not suitable in the ASC setting.

Comment: Some physicians opposed performance of the following procedures on an outpatient basis for safety reasons. The procedures are grouped by body system, appropriate terminology, and the CPT code. (All of the procedures are on the proposed list unless otherwise noted).

- *Integumentary System*

One comment each: Treatment for burns 16030 and 16035.

Three comments: Chest wall tumor excision 19260.

- T3Musculoskeletal System

One comment each: Neck incision 21501 (on current list); neck tumor resection 21557; rib fracture treatment 21800; vertebral fracture treatment 22325, 22326, and 22327; arm muscle transfer 23397; scapulopexy 23400; sternoclavicular dislocation treatment 23530 and 23532; acromioclavicular dislocation treatment 23550 and 23552; scapular fracture treatment 23585; humeral fracture treatment 23615; shoulder arthrodesis 23800 and 23802; shoulder disarticulation 23921; upper arm/elbow tumor resection 24077; humerus tumor resection 24150 and 24151; head/neck tumor resection 24152 and 24153; elbow arthroplasty 24360, 24361, and 24363; humeral shaft, multiple osteotomies 24410; humerus repair 24430 and 24435; elbow fracture treatment 24587 and 24588; elbow joint arthrodesis 24800 and 24802; pelvis/hip tumor resection 27049; ligamentous reconstruction 27427, 27428, and 27429; knee arthroplasty 27440, 27441, 27442, and 27443; thigh amputation 27594; ankle fracture treatment 27814, 27822, and 27823.

Two comments: Rib fracture treatment 21810.

- *Cardiovascular System*

One comment: Intra-arterial infusion pump insertion 36260.

- *Digestive System*

One comment each: Parotid tumor excision 42410 (on current list), 42420, and 42425; anal abscess excisions 46050.

Two comments: Parotid tumor excision 42426.

- *Endocrine System*

One comment: Thyroid lobectomy 60220 (on current list).

- *Eye and Ocular Adnexa*

One comment each: Vitreous 67031 and 67040; retinal detachment 67115 and 67121; prophylaxis 67141; and orbit exploration, excision 67420, 67430, 67440, and 67450.

Two comments: Vitrectomy 67036.

Three comments: Retinal detachment repair 67112.

- *Urinary System*

One comment: The American Urological Association was opposed to extending ASC coverage to the following procedures noting that surgical and recovery time usually exceeded that specified for ASC coverage: perirenal abscess 50020 (on current list); renal biopsy 50200 and 50205; ureterotomy 50600 and 50605 (both on current list); ureterocutaneous fistula closure 50920; delegation of ureter 50940; cystotomy 51020, 51030, 51040, and 51045; cystolithotomy 51050; transvesical ureterolithotomy 51060; cystotomy with stone basket extraction 51065; perivesical abscess drainage 51080; urachal cyst excision 51500; cystotomy 51520, 51525, 51530, and 51535; cystostomy closure 51880, vesicouterine fistula closure 51920; cystourethroscopy 52310 (on current list), 52325, 52334, 52336, 52337, 52338, and 52340 (on the current list); transurethral resection 52500, and 52640 (both on current list); urethrectomy 53210 and 53215; bulbourethral gland excision 53250 and 53260; perineal prosthesis removal 53442; and penile urethrorrhaphy 53505. The American Urological Association also noted concerns with the following procedures in the male genital system: penis incision 54105; penis biopsy 54100:, penile plaque excision 54111 and 54112; penis plastic operation 54300 and 54360; priapism surgery 54420, 54430, and 54435; penis plastic operation for injury 54440; testis biopsy 54500; underscended testis exploration 54550 and 54560; testis torsion reduction 54600; contralateral testis fixation 54620; orchiopexy 54640 and 54645; vesiculectomy 55600; prostatotomy 55725; prostatolithotomy 55740; and prostate exposure for radioactive substance insertion 55860.

Response: Based on the commenters' suggestions and our further review of the latest billing data, our medical staff found that some of the cited procedures are usually provided in an inpatient setting. Therefore, from the body systems codes mentioned above, we are not adding the following codes: Ureterotomy 50600 and 50605; ureter suture 50920 and 50940; bladder incision 51040, 51050, 51060, 51065, and 51080; bladder excision 51520, 51525, 51530, and 51535; penis incision 54015; penis excision 54111 and 54112; penile prosthesis implants 54400, 54401, 54402, 54405, 54407, and 54430; testis excision 54560; testis repair 54645; prostate incision 55725 and 55740; and prostate excision 55860. Of the other codes from the urological system and the other 6 body systems mentioned above, our medical staff can find no data supportive of the commenters' allegations that these procedures should not be performed on an outpatient basis due to safety reasons. On the contrary, our data indicates these other procedures are now being performed a high percentage of the time on an outpatient basis.

We recognize that for individuals with certain medical conditions, a procedure on the list may nonetheless be safely performed only on an inpatient basis. The choice of operating site remains a matter for the professional judgment of the patient's physician.

Comment: The American College of Surgeons opposed extending coverage in the ASC setting to the following procedures, which are usually performed as inpatient hospital services: excision of chest wall tumor including ribs 19260; neck tumor resection 21557;

VOL 56 ISS 251 DEC 31 1991 UMI

treatment of rib fracture, closed or open requiring external fixation 21810; thigh amputation 27594; insertion of intra-arterial infusion pump 36260; and parotid tumor excision 42426.

Response: Based on the comments by the American College of Surgeons and our further review of the latest billing data, our medical staff found that several of the above procedures are usually provided in an inpatient setting. Therefore, we are deleting from our proposed list the following codes: neck tumor resection 21557, thigh amputation 27594, insertion of intra-arterial infusion pump 36260, and parotid tumor excision 42426.

b. *Additions not on the basis of data alone.* In the December 7, 1990 proposed notice, we stated our intention to reinstate four of the 29 skin lesion removal codes deleted from the ASC list by the June 1, 1989 notice.

Comment: Eight commenters favored the reinstatement of the nine skin lesion excisions deleted from the ASC list by the June 1, 1989 notice. Four commenters wanted the restoration of all 29 deleted skin lesion excision codes; two commenters suggested 3.0 cm lesion excisions be restored; and two commenters wanted all malignant and benign scalp and neck lesion excisions and up to 4 cm facial benign lesions restored to the current list. The commenters stated that these procedures should be covered when their necessity is substantiated with documentation.

Response: As we proposed in the December 7, 1990 notice, we are reinstating coverage for the four 3.1 to 4.0 cm skin lesion removal codes because upon further investigation our medical advisors have determined that they are not routinely removed in physician offices. Because smaller size lesions are routinely removed in physician offices, we have determined they should continue to be excluded from the list of covered ASC procedures.

Comment: One commenter suggested that there should be a provision for payment of noncovered procedures under the following circumstances: (1) When noncovered procedures are performed in conjunction with covered procedures; and (2) When multiple non-reimbursable procedures are performed.

Response: When performed with a covered procedure, a noncovered procedure would still not meet our criteria. Payment for noncovered procedures would defeat the purpose of our list to cover only procedures that meet our criteria.

We do not believe the simultaneous performance of a procedure with other procedures should change the coverage decision on that procedure. A situation in which multiple surgery warrants performance in a facility-equipped setting does not alter the failure of an individual procedure to meet the coverage criteria. Medicare coverage of procedures in an ASC does not preclude the physician from determining the most appropriate setting for an individual patient. When medical necessity indicates the need for a level of care higher than the physician's office setting, Medicare provides coverage of the procedure in a hospital outpatient department.

Comment: One commenter stated that we should develop a technique to allow the occasional transfer of a procedure from the inpatient to the ASC setting if the procedure can be safely performed in an ASC for a particular patient.

Response: Under section 1833(i)(A) of the Act, the Secretary, in consultation with appropriate medical organizations, must specify surgical procedures appropriately performed on an inpatient basis in a hospital but which also can be performed safely in an ASC. In implementing this statutory requirement, we have promulgated regulations at 42 CFR 416.65(b) outlining the conditions that a procedure must meet in order to be covered by Medicare. These regulations specify that the surgical procedures must meet specific standards such as not exceeding 90 minutes operating time or 4 hours recovery time. Obviously, surgical times and recovery times will vary with individual patients. Thus, while a procedure may on occasion meet the conditions for an individual patient, we must look to general or average surgical and recovery times in setting forth our covered procedures list. For these reasons, we cannot develop a technique for the occasional transfer of a procedure from the inpatient setting to the ASC as requested by the commenter. We note that outpatient surgery for beneficiaries such as those mentioned by the commenter may still be covered in hospital outpatient departments.

c. Additional suggestions for coverage—*Comment:* Commenters suggested that the following additional integumentary system procedure codes be added to the ASC list:

One comment each: Skin incision 10121; skin excisions 11200 and 11201; intralesional injections 11900; tattooing including micropigmentation 11920 and 11921.

Two comments each: Superficial wound repair 12013; lesion destruction 17106, 17107, and 17108; and reduction mammaplasty 19318.

Three comments each: Skin incisions 10060, 10061, 10080, and 10121; debridement 11040 and 11041; skin biopsy 11100 and 11101; benign lesion excision 11400 and 11420; wound repair 12001, 12002, and 12011; abdominoplasty 15831; benign lesion destruction 17101, 17102, 17104, 17105, 17110, 17200, and 17201.

Four comments each: Cyst incision 10081; benign lesion excision 11401, 11402, and 11440; lesion destruction 17001, 17002, and 17010.

Five comments each: Benign lesion excision 11421 and 11422; superficial wound repair 12004, 12014, and 12015; lesion destruction17000 and 17100.

Six comments each: Benign lesion excision 11423, 11441, and 11442; malignant lesion excision 11600 and 11601.

Seven comments each: Malignant lesion excision 11602, 11603, 11620, 11621, 11622, and 11623.

Eight comments each: Malignant lesion excision 11640, 11641, 11642 and 11643.

Response: Concerning integumentary system procedures, only abdominoplasty, code 15831, and reduction mammaplasty, code 19318, meet our threshold criteria. However, our medical staff advises that abdominoplasty is almost always for cosmetic purposes and, as such, is excluded from Medicare coverage. Reduction mammaplasty, code 19318, will be added to the list to be covered when medical necessity is documented.

Comment: Commenters suggested that the following musculoskeletal system codes be added to the ASC list:

One comment each: Arthrocentesis, major joint 20610; elbow arthroplasty 24362; foot excision 28108; arthroscopy 29804 and 29909 (for temporomandibular joint arthroscopy).

Three comments: Injection, tendon sheath 20550.

Response: Concerning musculoskeletal system procedures, only code 29909, temporomandibular joint arthroscopy, meets the ASC coverage criteria but it is a miscellaneous unspecified procedure code. As a rule, we do not include unspecified procedure codes on the ASC list because these codes generally are not clinically consistent. The unspecified codes often include a myriad of procedures rather than a single procedure.

Comment: Commenters recommended that the following respiratory system procedure codes be added to the list of covered ASC procedures:

One comment: Laryngoscopy 31575.

Three comments: Nasal endoscopy 31250.

Response: Neither code meets our criteria.

Comment: A commenter recommended that arteriovenous fistula revision 36832 be added to the covered cardiovascular system codes.

Response: Code 36832, arteriovenous fistula revision, meets our criteria and will be added to the list.

Comment: Commenters recommended that the following digestive system codes be added to the ASC list:

One comment each: Mouth biopsy 41108; gingivectomy 41820; alveoplasty 41874.

Two comments each: Gastrostomy tube change 43760; sigmoidoscopy 45330; hemorrhoid destruction 46934.

Response: Code 43760, change of gastrostomy tube, meets our criteria and will be added to the list.

Comment: Five commenters proposed the addition of code 49310, laparoscopic cholecystectomy, by the development of a mechanism for obtaining prior approval to perform a procedure not on the ASC list.

Response: Our medical staff advises that laparoscopic cholecystectomy usually requires at least one overnight stay and thus is not appropriate to the ASC setting at this time.

Comment: Concerning male genital system codes, four commenters suggested that balloon dilatation of the prostate for benign prostatic hyperplasia be covered under a durable medical equipment/prosthetic device code.

Response: There is no specific code in the 1991 CPT for this surgical approach. If a unique CPT code is published, the procedure can be reconsidered.

Comment: Concerning the female genital system commenters recommended addition of the following codes:

One comment each: Bartholin's gland abscess 56420; cervix cauterization 57511.

Response: Neither code meets our criteria.

Comment: Concerning nervous system codes, commenters recommended addition of the following codes:

One comment each: Somatic nerves injections 64400, 64402, 64405, 64412, 64418, 64425, 64435, 64440, 64441, 64445, and 64450; sympathetic nerve injection 64505; other procedure 64999.

Response: None of the above codes meets our criteria.

Comment: Concerning eye and ocular adnexa codes, commenters suggested addition of the following codes:

One comment each: Corneal lesion destruction 65450; corneal wedge resection 65775; aqueous shunts 66180 and 66185; corneal chalazion 67800, 67801, and 67805; eyelid excisions 67840 and 67850; and conjunctiva lesion excision 68110.

Two comments each: Radial keratotomy 65771 (for noncosmetic); corneal relaxing incision 65772; ciliary body destruction 66702; lens material removal 66852; intravitreal injection 67028; retinal detachment repair 67110; strabismus surgery 67334, 67335, 67340, 67343, and 67345; and tarsorrhaphy 67875.

Three comments each: Secondary membranous cataract excision 66820; Tenon's capsule injection 67515; eyelid wound suture 67930; subconjunctival injection 68200; lacrimal passage foreign body removal 68530.

Four comments each: Iris lesion destruction 66770; retinal lesion destruction 67210; trichiasis correction 67825; conjunctival lesion 68115; lacrimal gland excision 68400; closure of lacrimal puncture 68760.

Five comments: Lacrimal sac incision 68420.

Seven comments: Photocoagulation, retinal detachment prophylaxis 67145.

Eight comments: Retinopathy photocoagulation 67228.

Nine comments: Laser trabeculoplasty 65855.

Ten comments: Iridotomy photocoagulation 66761.

Response: None of the above codes meets our criteria. However, our medical staff has decided that lens material removal 66852 should be added for clinical consistency (that is, the previous and subsequent code numbers are on the list).

Comment: Concerning auditory system codes, one commenter suggested the addition of cochleostomy for the insertion of a cochlear implant. Another commenter suggested the addition of tympanotomy 69433. Three commenters recommended the addition of myringotomy 69420.

Response: The code 69930, cochlear device, implantation, has been proposed and accepted for the final list of additions. This procedure code includes the cochleostomy necessary for insertion of the device. Neither tympanotomy 69433 nor myringotomy 69420 meet our criteria.

Comment: Concerning nonsurgical codes, three commenters proposed that radioactive seed implantation for prostatic cancer be covered under some durable medical equipment/prosthetic device code.

Response: One of the criteria for inclusion on the ASC list is that the procedure be considered surgical. Radioactive seed implantation is radiation therapy and not surgery. Therefore, we are not extending coverage to the ASC setting.

Comment: The following codes not in the CPT surgical section were suggested for addition:

One comment each: Epidural drug daily management 01996; intravenous drug injection 90784; nasopharyngoscopy 92511; implantable pump maintenance 96530.

Two comments each: Other biofeedback training 90915; esophageal motility study 91010, 91011, and 91012; esophagitis acid tests 91030, 91032, and 91033; anorectal manometry 91122.

Three comments: Cardioversion 92960.

Four comments each: Ophthalmological examinations under anesthesia 92018 and 92019.

Response: Because only CPT surgical codes are listed on Medicare's list of covered procedures in an ASC, none of these codes can be added.

Comment: One commenter specifically suggested the following codes/procedures with language modifiers: skin incisions 10080, 10100, 10120, 10140, 10160, and 11041; and superficial wound repairs 12001 through 12021.

Response: We do not understand to what "language modifiers" the commenter might be referring. We do occasionally use code modifiers in the billing process, but we have an agreement with the American Medical Association to use the CPT without applying any language modifications to the existing CPT procedure descriptions.

Comment: Twelve commenters requested that the proposed 107 codes listed as not accepted in the December 7, 1990 notice be either added to the list or covered under certain circumstances. They also suggested that other physician's office procedures, under certain medical circumstances and with prior carrier or PRO approval, be covered in an ASC.

Response: We have previously reviewed these 107 procedures and under our criteria have determined that the majority (skin lesions) are performed in physician offices over 50 percent of the time and therefore do not meet our threshold criteria. Twenty-two of the procedures are not surgical in nature according to their section placement in the CPT. Congressional intent in establishing ASCs was to provide surgical care on an outpatient basis when inpatient care was unnecessary, not to move physician's office procedures to a more costly setting. Should any of these procedures warrant the hospital inpatient or outpatient setting based on the patient's medical needs, the physician should perform the surgery in these settings.

3. Proposed Retentions

We did not receive any comments to this specific provision in the proposed notice.

4. Proposed Deletions

We proposed to delete the following seven procedures from the ASC list because our data indicate that they are performed 50 percent or more of the time in physicians' offices:

CPT code	Description
41826	Excision of lesion or tumor, dentoalveolar.
42665	Ligation salivary duct, intraoral.
54205	Injection procedure for Peyronie disease with surgical exposure of plaque.
54230	Injection procedure for corpora cavernosography.
57450	Culdoscopy, diagnostic.
64408	Injection, anesthetic agent; vagus nerve.
69105	Biopsy external auditory canal.

In addition, we proposed to delete hysterosalpingography; complete procedure, code 74741, because it is a radiological procedure. We also proposed to delete the following three codes because they are performed only in conjunction with radiological procedures:

CPT code	Description
27095	Injection procedure for hip arthrography; with anesthesia.
31708	Instillation of contrast material for laryngography or bronchography, without catheterization.
50394	Injection procedure for pyelography.

Comment: Two commenters were opposed to our proposed deletion of dentoalveolar excision of lesion, code 41826, and ligation of salivary duct, code 42665. They believe these two procedures should continue to be performed in an ASC in cases where a patient is "medically compromised."

Response: Our medical staff advises that excision of lesion, dentoalveolar, code 41826, is performed in dental offices most of the time. Ligation of salivary duct, code 42665, is rarely performed. However, as we have stated previously, any patient who has a significant medical problem should have surgery in an appropriate setting as directed by his physician. In those cases where the patient's condition indicates the need for these two surgeries to be performed in a setting with a higher level of care than that available in a physician's office, surgery in a hospital outpatient department is appropriate.

Comment: One commenter wrote that whenever a procedure is deleted from the ASC list because we consider it a physician's office procedure, the procedure may be performed in a hospital outpatient department, which results in a greater Medicare expense.

Response: We recognize that patient needs and lack of necessary equipment in an individual physician's office may result in procedures that are generally performed in a physician's office being performed in a hospital outpatient department. However, under section 1833(i)(1) of the Act, we must establish a list of covered surgeries, and our threshold criteria were developed to implement this statutory provision.

Comment: A few commenters suggested that we delete some currently covered procedures because it is their belief that they cannot be safely performed in an ASC.

Response: Our data indicate these procedures are commonly performed on an outpatient basis, and we have no evidence of adverse consequences.

5. Suggested Procedures that are Sometimes Cosmetic

Comment: Fifty-four commenters wanted the four proposed blepharoplasty procedure codes (particularly the two upper eyelid codes) to be covered. They wanted these covered when the surgery is non-cosmetic and medically necessary. They stated that pre-operative visual field photos to substantiate non-cosmetic medical necessity are already required of the surgeon for a surgical fee, and these photos should be sufficient documentation to obtain an ASC facility fee.

Response: We are not adding these codes because our medical staff has informed us that ophthalmological codes 67901 through 67908 that involve blepharoplasty affecting vision are currently on the ASC covered procedures list.

6. Proposed Coordination of ASC Procedures List and Payment Rate Updates

We received 23 timely comments regarding our proposal to make the effective date of the ASC procedures list and payment group rates concurrent with the annual update of the hospital wage index.

Comments were submitted by 4 medical or professional associations or societies, 10 physicians, and 14 non-physician administrators. Commenters represented 17 ASCs located in 13 States. Nine of the letters received were "form" letters.

Comment: Five commenters wrote that it made sense, both administratively and economically, to make the procedure list and payment rate updates concurrent. Eighteen commenters asserted that if the ASC procedure list and payment rates were updated in October they will get "lost in the shuffle" bcause HCFA will be focusing on other issues, such as hospital prospective payment rates and budget reconciliation. As a result, ASC procedure list and payment rate updates will not receive the full attention they deserve. Two commenters preferred following the present schedule of separate procedures list and payment rate updates if consolidation of the updates necessitated going to an October effective date.

Response: The Secretary's annual review of ASC payment rates and biennial review of the ASC procedure list will be thorough regardless of when the resulting updates go into effect.

Comment: Twelve commenters wrote that HCFA lacks the statutory authority to make the annual ASC rate update any later than July 1 because July 1 is the only date mentioned in section 1833(i)(2)(A) of the Act, the section that requires payment rate updates, and there is nothing in the statute to authorize HCFA to implement the annual updates on a later date. Three commenters claimed that for similar reasons HCFA lacks the statutory authority to update the ASC procedures list any later than April 26 of alternate years.

Response: Section 1833(i)(2)(A) of the Act directs the Secretary to update ASC payment rates by no later than July 1, 1987, and to review and update the rates annually thereafter. Congress set July 1, 1987 as the deadline for the Secretary to update ASC payment rates that had not changed since September 1982. Congress also mandated that ASC rate updates be annual rather than "periodic" as had been previously required. However, while Congress required that the payment rate updates be annual and the procedure list updates biennial, it did not require that the changes take place on the anniversary date of the legislation. We believe that the Secretary is not precluded from changing these schedules when justified by sound administrative reasons and in the interest of good management. HCFA intends to adhere to annual and biennial updates, as required by the statute, but is making a one-time-only change in the update months to October with this notice. In the future, when we update the ASC procedure list, we intend to update the ASC payment rates at the same time. This would be done concurrently with the annual update in the hospital prospective payment system wage index because this wage index is used to calculate ASC payments. It is because the hospital wage index is updated annually effective October 1 that the ASC updates are being changed to October.

Comment: Four commenters objected to moving the ASC updates to October 1, because they assert that ASC rate updates have been so erratic that imposing another delay, even of only 3 months duration, would be unfair to ASCs.

Response: As noted previously, we have reviewed ASC payment rates and have prepared for publication in the **Federal Register** a notice updating the rates each calendar year since the statutory July 1, 1987 deadline for beginning annual updates. ASC payment rates have increased by 33 percent since August 1982, and 25 times as many procedures are covered now than were covered in August 1982.

Comment: Twenty-one commenters recommended that the ASC procedures list and the ASC payment rates be updated concurrently in April rather than in October since the statute does not prohibit HCFA from selecting a date earlier than July 1 or April 26 for making procedures list and payment rate updates. One commenter suggested making the updates concurrent as of July 1 rather than moving to an October effective date.

Response: We proposed making the effective date for the procedure list and payment rate updates coincide with the annual update of the hospital wage index, which we use for calculating payment to ASCs. Making these updates concurrently enables us to apply the most up-to-date hospital wage index in determining ASC payments. Making the ASC procedure list and payment rate updates concurrent in April or in July would perpetuate the use of an outdated wage index in determining ASC rates and payments.

Comment: One commenter suggested that we make an interim adjustment on July 1 of the first year the change is implemented followed by a final adjustment on October 1 for the next 12-month period, to avoid penalizing ASCs by extending from 12 months to 15 months the duration of the current ASC payment rates. Another commenter suggested that an allowance be included in the first October update to offset the 3 month shortfall to ASCs resulting from moving the rate update from July 1 to October 1.

Response: We anticipate that timely use of the most current data available will minimize and offset any payment shortfalls for the provision of ASC facility services.

We are also aware that had we updated the ASC payment rates in July 1991, the payment groups would have increased by 4.3 percent based on the change in the consumer price index for all urban consumers (CPI-U) forecast by Data Resources Incorporated (DRI) for calendar year 1991, and ASCs would have received payments in July, August, and September that reflected this increase. Therefore, we agree with the commenter who suggested that the first October update take into account the three-month delay in setting the rates. See section III.B Updated Payment Rates, below, for a more detailed discussion.

7. Lithotripsy

In the December 7, 1990 notice, we proposed for inclusion on the ASC list CPT-4 code 50590, extracorporeal shock wave lithotripsy, a method of treating kidney stones using shock waves generated outside the body to break up urinary tract stones. The procedure focuses the shock waves specifically on the stones under X-ray visualization and then pulverizes them by repeated shocks.

For coverage purposes under the ASC provision, we consider lithotripsy a surgical procedure. At one time, surgical procedures were thought of as only those involving an incision of some type done with a scalpel and followed by removal or repair of an organ or other tissues. In more recent years, the development of lasers and fiberoptics technology has resulted in surgical procedures that, while invasive and manipulative, do not require incisions. Scope procedures on the ASC list, such as bronchoscopy, gastroscopy, colonscopy, etc. are performed without an incision through various body openings. Many of these scope procedures may be employed either for diagnostic or therapeutic purposes or both at the same time, such as when the scope permits both detection and removal of a polyp.

Since the development of lithotripsy, many in the medical community have considered this procedure, which is in the CPT-4 surgical section, as invasive since it involves risks, requires anesthesia, destroys tissue and causes internal bleeding. Lithotripsy is frequently associated with the use of other invasive technology such as puncturing the body with a tube to allow drainage of urine and stone fragments from the kidney as well as cystoscopy and placement of appropriate drainage tubes, either prior to or concomitant with the shock wave treatment.

We received 177 timely comments in response to our proposal to set payment for lithotripsy at the Group 7 rate of $812. Comments were received from urologists, hospitals, lithotripsy centers, industry associations, and medical universities. Thirty-seven commenters submitted duplicate form letters. Also, 21 commenters submitted lithotripsy cost information in response to our request for information.

Comment: There were several comments regarding Medicare coverage of mobile lithotripsy services in an ASC.

Response: Procedures included on the ASC-approved list are covered in an ASC and payable at the prescribed rate. Section 416.41 permits an ASC to contract for services with an outside resource provided the ASC assures that the contracted services are provided in a safe and effective manner. Thus, mobile lithotripsy services in an ASC may be covered under a contract arrangement. The contract with the mobile lithotripsy company should state that, while in service to the ASC, the mobile lithotripsy premises will be treated as part of the ASC and will meet the conditions for coverage in part 416, especially requirements for a safe and sanitary environment set forth in § 416.44. Also, the contract should specify that Medicare payment for ASC facility services attributable to the mobile lithotripsy facility are made to the ASC.

Comment: Commenters opposed the $812 facility rate proposed for lithotripsy. They claimed that the procedure is capital intensive and that lithotripter capital costs warrant a substantially higher rate than that proposed.

Response: After carefully reviewing all comments and cost information submitted by the public and that obtained from some lithotripter manufacturers, we believe that ESWL services warrant a payment rate higher than we proposed. Therefore, we have assigned lithotripsy to a new payment group, Group 9, and set the rate for this procedure at $1,150. We believe that this allowance appropriately reflects procedure capital costs and encourages the provision of efficient and effective lithotripsy services.

Section 1833(i)(2)(A)(i) of the Act authorizes the Secretary to establish the ASC payment rate based on an estimate of a fair fee that takes into account the costs incurred, generally, in providing facility services in connection with a covered procedure. Since lithotripsy is being covered for the first time as an

VOL 56 ISS 251 DEC 31 1991 UMI

ASC procedure and ASC charges relative to this procedure are not included in our current database, we used the cost information submitted by commenters supported by discussions with several lithotripsy facilities and lithotripter manufacturers to identify resources consumed in performing ESWL.

We then created a procedure cost matrix model using direct and indirect procedure costs and annual utilization estimates based on operating a single lithotripter 5 days a week, 8 hours a day for 50 weeks. Annual utilization estimates ranged from a facility averaging less than one procedure per day to a facility performing on average a maximum of six procedures per day.

Capital costs used in this model are based on current manufacturer prices for state-of-the-art lithotripters and facility renovation required to house this equipment. Fixed (for example, labor, service contract) and variable (for example, medical supplies, electrodes) operating costs were derived from the latest and most reliable data sources available as indicated below. Costs were inflated to the midpoint of the October 1, 1991 to September 30, 1992 rate period (March 31, 1992) using the consumer price index for all urban consumers (CPI–U) as forecast by Data Resources, Incorporated. These inflation adjustments are provided below.

Cost items	Data sources
1. Salary/Wages	1991 Hay Management nursing survey published May 27, 1991 in Modern Healthcare. The survey includes salary data on 211,772 nurses employed at 897 hospitals as of January 1, 1991.
2. Indirect Expense	American Society of Radiologic Technologists.
3. Service Contract	Lithotripter manufacturers
4. Indirect Costs	Lithotripter manufacturers
5. Medical Supplies	Blue Cross and Blue Shield Association, Extracorporeal Shock Wave Lithotripsy: Clinical Assessment, Utilization and Cost Projections, May 1985
6. Electrodes	Same data source as for indirect costs. Medicare Part B Annual Data Files.
	Lithotripter manufacturer.

Capital costs and fixed operating costs were held constant across all estimated utilization levels. Variable operating costs on a per treatment basis were multiplied by each utilization estimate. We then summed capital costs, fixed costs, and variable operating costs separately for each utilization level. We set the payment level based on a facility performing an average of three ESWL procedures per day or 750 procedures annually. We believe that this payment level encourages efficient and optimal machine usage.

A review of lithotripsy per procedure costs as reported by 21 commenters showed that such costs varied widely, ranging from $1,469 to $4,185. Annual procedure volume ranged from 100 to about 1,100 treatments.

Cost comparability across facility settings was limited due to reporting inconsistencies. For example, a number of commenters submitted incomplete cost information. Some commenters reported costs on a per procedure basis or provided utilization information to permit the calculation of costs while others did not. Some simply stated total facility costs as a calculated value while others itemized components of such costs. Among those itemizing costs, some appeared to have commingled electrode costs with medical supplies while others reported these disposables separately.

While it was expected that costs would be a function of volume, distinct patterns between cost and volume were not evidenced. For example, eight facilities reported lower per procedure costs than the facility reporting the highest annual utilization. Seven of these eight facilities experienced less than one-half of the annual volume achieved by this high volume facility.

Published reports indicate that the demand for renal lithotripsy is leveling off and that early market saturation has resulted in low utilization of many lithotripters. When this noninvasive procedure was initially covered by Medicare in 1985, the Secretary estimated that ESWL would replace about 80 to 90 percent of conventional kidney stone surgery. It was then estimated that 100,000 kidney stone patients would seek treatment annually. This level of demand was projected to require about 100 extracorporeal shock wave lithotripters. According to the 1989–90 edition of the American Hospital Association's Hospital Statistics, the 283 lithotripters in the United States in 1988 were more than double the number needed. Biomedical Business International, a west coast research firm, estimated that the number of ESWL systems topped 300 in 1990.

Comment: Many commenters argued that adoption of the proposed rate would adversely impact hospitals performing lithotripsy in their outpatient departments since these facilities would be paid based on a blend comprised of 42 percent reasonable costs and 58 percent of the ASC payment rate.

Response: We agree and have increased our ESWL payment rate to $1,150.

Comment: Some commenters recommended a rate as much as $4,060, which is 5 times higher than $812.

Response: Section 1833(i)(2)(A)(ii) of the Act requires that Medicare payment to ASCs be substantially less than that for similar services furnished on an inpatient basis in the hospital. Under the Medicare hospital inpatient prospective payment system, the average FY 1992 payment for inpatient lithotripsy treatment is expected to be $2,600. Therefore, a rate established at the suggested level of $4,060 would violate this statutory requirement. Further, our final ESWL rate appropriately recognizes costs incurred by efficient facilities.

8. Miscellaneous Comments

a. *Appropriateness of proposed payment group assignment.* (See Addendum A.1 for a summary of payment group changes discussed below that are specific to procedures covered prior to this notice.)

Comment: Three commenters believe that high supply costs associated with performing complex repair procedures, 13100, 13120, 13150 and 13151 warrant assigning them to Group 3 rather than Group 2, as proposed.

Response: Based on careful review of the latest billing data, our medical staff has determined that only procedures 13150 and 13151 should be reclassified and they have been reassigned to Group 3.

Comment: Three commenters advocated assigning procedures 21390 and 21395 (treatment of "blowout" fractures) to Group 7 rather than Group 5, as proposed, because they allegedly incur higher facility costs than those associated with performing related procedures 21385, 21386 and 21387 that are assigned to Group 5.

Response: We concur and have reclassified procedures 21390 and 21395 to payment Group 7.

Comment: Two commenters contend that scapulopexy, 23400, is a difficult and time consuming procedure that should be assigned to Group 7 rather than Group 4, as proposed.

Response: We agree that the facility resources used in performing this procedure may be more similar to those consumed in performing procedures assigned to Group 7 rather than those assigned to Group 5. Therefore, we have reclassified procedure 23400 to payment Group 7.

Comment: Two commenters allege that procedure 23485 (repair of a nonunion or malunion of a clavicle) should be assigned to Group 7 rather than Group 5, as proposed, because the supply costs required to perform this procedure are similar to those incurred in performing procedures 23412 and 23466 both of which are assigned to Group 7.

Response: We concur and have reclassified procedure 23485 to payment Group 7.

Comment: Two commenters claim that procedure 23802 (fusion of shoulder joint) should be placed in Group 7 rather than Group 5, as proposed, because it is more difficult to perform than Group 7 procedure 23412 (repair of a torn rotator cuff in a shoulder).

Response: We agree that the level of facility resources used in performing procedure 23802 is more similar to those associated with procedures assigned to Group 7 and have reclassified this procedure to payment Group 7.

Comment: One commenter stated that procedure 25446 (complete elbow replacement) is equally as difficult and complex as a total hip or knee replacement commonly performed on a inpatient basis. The commenter believes that this procedure warrants a much higher payment level than the proposed Group 7 rate.

Response: After carefully reviewing that latest billing data, our medical staff found no basis for assigning this procedure to a higher payment group.

Comment: One commenter claims that procedure 28120 (partial bone excision (craterization, saucerization, or diaphysectomy) of bone (for example, for osteomyelitis or talar bossing), talus or calcaneus) assigned to Group 3 should be reclassified to Group 7 because it is equally as complex and require as much time to perform as procedure 26230 (partial excision (craterization, saucerization, or diaphysectomy) of bone (for example, for osteomyelitis); metacarpal).

Response: We agree that the two procedures are clinically similar and have reclassified procedure 28120 to payment Group 7.

Comment: One commenter advocated raising the payment level for procedure 28285 (hammertoe) from Group 3 to Group 5 to be consistent with procedure 26535 (arthroplasty interphalangeal joint).

Response: Based on a careful review of the latest billing data, our medical staff has determined that reassignment of procedure 28285 to payment Group 5 is not warranted.

Comment: Two commenters claim that the payment level for procedure 28293 (bunion correction that includes joint resection with implant) should be raised from Group 2 to Group 7. One commenter believes that the payment level for this procedure should be consistent with that for procedure 28531 (arthroplasty, metacarpophalangeal joint with prosthetic implant). The other commenter believes that the payment rate should cover the cost of the prosthetic implanted during this procedure.

Response: Our medical staff has reviewed the latest billing data and determined that it is more appropriate to reassign procedure 28293 to payment Group 3 rather than Group 7 as suggested.

With regard to payment for the prosthetic implanted during this procedure, the ASC facility payment rate does not include payment for prosthetic devices other than IOLs. Rather, a separate payment is allowed for this implant when furnished to a Medicare beneficiary during covered bunion correction surgery performed in a participating ASC. Medicare carriers have been advised to process claims for this hallux implant prosthesis using code "Q0073" until the 1992 HCPCS update is issued and a new code is established.

Comment: One commenter claims that the payment level for procedure 28525 (open treatment of closed or open fracture, phalanx or phalanges, other than great toe) should be raised from Group 3 to Group 4 to be consistent with that for procedure 26735 (open treatment of closed or open phalangeal shaft fracture).

Response: Our medical staff has carefully reviewed the latest billing data and determined that a payment group change is not warranted for this procedure.

Comment: One commenter claims that the payment level should be raised from Group 1 to Group 5 for procedures 28545, 28575, and 28805 (treatment of closed tarsal, talotarsal, and tarsometatarsal bone dislocations (respectively) requiring anesthesia) because they are extremely complex and more difficult to perform than procedure 28675 (open treatment of closed or open interphalangeal joint dislocation).

Response: After careful review of the latest billing data, our medical staff has determined that such claims about increased facility resource usage for these procedures is not supported. Therefore, we have retained the Group 1 assignment for all three procedures.

Comment: We received the following comments on several arthroscopy procedures.

One commenter claims that the proposed Group 3 payment level for procedures 29822 and 29826 (shoulder arthroscopy) should be increased due to high supply costs. The commenter suggests that a new Group 9 be established for these two procedures.

Another commenter claims that the currently covered procedure 29877 (arthroscopy, knee, surgical; debridement/shaving of articular cartilage (chondroplasty)) is inappropriately assigned to payment Group 4. The commenter believes that high supply costs associated with performing this procedure warrant establishing a new Group 9 for it.

Two commenters claim that the proposed payment Group 3 rate is inadequate for procedures 29888 and 29889 (arthroscopically aided anterior cruciate ligament repair). These commenters argue that the disposable supplies used in performing these procedures are quite expensive. They also believe that the facility rate for these procedures should be higher to cover equipment repair and replacement costs and related x-ray costs and recommended establishing a new Group 9 for these procedures.

Response: Based on a careful review of the latest billing data, our medical staff has found that these claims are not substantiated; therefore, payment group changes are not warranted for any of these procedures.

Comment: One commenter advocates raising the respective payment level to Group 5 for each of the following currently approved laryngoscopy procedures to account for high equipment costs incurred in performing these procedures.

Group 2 rate	Group 3 rate	Group 4 rate
31526	31531	31541
31530	31536	
31535	31540	

Response: Our medical staff has carefully reviewed the appropriateness of the proposed payment groups for the above 7 procedures using the latest billing data and determined that a change in payment groups is not warranted.

Comment: Three commenters contend that the payment level should be raised from Group 5 to Group 7 for procedure 65112 (exenteration of orbit) to be consistent with the related procedure 65114, that is, assigned to Group 7.

Response: We concur and have reclassified procedure 65112 to payment Group 7.

Comment: Three commenters argue that the proposed payment level should be increased to Group 2 from Group 1

VOL 56 ISS 251 DEC 31 1991 UMI

for procedure 65270 (repair of laceration; conjunctiva, with or without nonperforating laceration) to be clinically consistent with 65272 (repair of laceration; conjunctiva, by mobilization and rearrangement, without hospitalization) that is assigned to Group 2.

Response: We concur and have reclassified procedure 65270 to payment Group 2.

Comment: Three commenters recommended raising the proposed payment level to Group 4 from Group 3 for procedure 65275 (repair of laceration cornea, nonperforating, with or without removal of foreign body) to achieve clinical consistency with procedure 65280 (repair of laceration cornea and/or sclera, perforating, not involving uveal tissue) that is assigned to Group 4.

Response: We agree and have reclassified procedure 65275 to payment Group 4.

Comment: Three commenters claim that the costs associated with performing procedure 65850 (trabeculotomy) are similar to those required to perform procedure 66170 (trabeculectomy); and that 65850 should be assigned to Group 4 the same as 66170 rather than Group 2, as proposed.

Response: We concur and have reclassified procedure 65850 to payment Group 4.

Comment: Three commenters recommended raising the payment level to Group 7 from Group 5 for procedure 67108 (repair of retinal detachment with vitrectomy) because the American Medical Association's 1991 code revision of this procedure substantially altered it by expanding its surgical scope beyond that established when HCFA assigned this procedure to payment Group 5 in 1990. These commenters claim that high supply and equipment costs associated with performing this revised procedure warrant reassigning it to payment Group 7.

Response: We concur and have reclassified procedure 67108 to Group 7.

We received six comments on our proposal to add two vitrectomy procedures, codes 67038 and 67040, to our current ASC list and set payment for them at the Group 5 rate. Commenters included one ASC, two societies representing ophthalmic surgeons, and three ophthalmologists.

Comment: One commenter believed that the proposed Group 5 payment rate is too low for procedure code 67038, vitrectomy, mechanical, pars plana approach; with epiretinal membrane stripping. The commenter argued that the supply costs associated with performing this procedure are high and that it requires the use of special equipment and specially trained operating room technicians. The commenter further claimed that any comparison between the payment group assignment for this procedure and that of the currently approved vitrectomy procedure, code 67036, is inappropriate because the data used to derive the Group 4 assignment for procedure code 67036 were flawed. The commenter believed that use of these data as a benchmark for assigning the payment group for procedure code 67038 would result in an erroneous classification.

Response: Ophthalmologists represented by the two national opthalmology societies supported our proposed Group 5 payment rate for procedure code 67038. In commenting, they acknowledged that assignment of procedure code 67036 to Group 4 is appropriate and that the proposed Group 5 rate for procedure code 67038 adequately reflects higher costs associated with performing this procedure. Therefore, we have retained the Group 5 classification for procedure code 67038.

Comment: A number of ophthalmologists believe that the proposed Group 5 payment rate is inadequate for procedure code 67040, vitrectomy, mechanical pars plana approach; with endolaser panretinal photocoagulation. Some commenters suggested reclassifying this procedure from Group 5 to Group 7. One recommended establishing a Group 9 payment rate for it. All of the commenters claimed that this procedure requires the use of an endolaser with photocoagulation ability that costs $35,000 and a non-reusable probe that costs $125. They also contended that costs of inservice teaching, laser maintenance, and supplies are expensive.

Response: We are adopting the recommendation to assign procedure code 67040 to Group 7 rather than to Group 5. While we acknowledge that the facility costs incurred to perform this procedure may be significantly more than those of Group 5 procedures, we do not believe that these costs warrant developing a new payment group.

Comment: One commenter advocated changing the payment level to Group 7 from Group 5 for procedure 67112 (repair of retinal detachment, one or more sessions; previously operated upon, any technique) because it requires more time to perform than other retinal detachment repair procedures.

Response: We agree that the level of facility resources used in performing procedure 67112 is more similar to those associated with procedures assigned to Group 7 and have reclassified this procedure to payment Group 7.

Comment: Four commenters recommended raising the payment level to Group 4 from Group 2 for procedure 67121 (removal of implanted material, posterior segment; intraocular) to be clinically consistent with other intraocular posterior segment eye procedures.

Response: After carefully reviewing the latest billing data, our medical staff has found no basis for assigning this procedure to a higher payment group.

Comment: One commenter suggested that we raise the respective payment level to Group 7 for each of the following currently approved blepharoptosis and the extropion and entropion repair procedures to be consistent with that recommended for four blepharoplasty procedures (15820, 15821, 15822, and 15823).

CURRENT PAYMENT GROUP CLASSIFICATIONS

Group 1	Group 3	Group 4	Group 5
A. Blepharoptosis Procedures			
	67903	67908	67901
	67907		67902
	67909		67906
B. Repair Ectropion and Entropion Procedures			
67914	67917	67916	
67921		67923	
		67924	

Response: Procedures 15820, 15821, 15822, and 15823 were not accepted for addition to the ASC list; therefore, the rationale for revising the current payment groups for the above blepharoptosis and ectropion and entropion repair procedures to Group 7 was not sustained. However, after carefully reviewing the latest billing data, our medical staff has determined that payment group changes are warranted for six of the above procedures. These changes are shown below. We have retained the current payment group structure for all other blepharoptosis and ectropion and entropion repair procedures not indicated below.

PAYMENT GROUP CHANGES

Procedure	Reassigned group
67903	4
67907	4
67909	4
67914	3
67917	4
67921	3

Comment: Three commenters recommended that we raise the payment level from Group 1 to Group 3 for procedure 67911 (correction of lid retraction).

Response: We concur.

Comment: Three commenters claim that the payment level should be raised to Group 5 from Group 1 for procedures 68525, (biopsy of lacrimal sac) and 68825 (probing of nasolacrimal duct, requiring general anesthesia) to reflect the high cost associated with performing these procedures under general anesthesia.

Response: We incorrectly described procedure 68525 in Addendum A of our proposed notice. Through error, we combined the narrative descriptor for this procedure with that for procedure 68825. Since the narrative descriptor for procedure 68525, as shown, in the CPT manual does not specify the required use of general anesthesia, we find no basis for reclassifying this procedure to Group 5.

However, based on careful review of the latest billing data, our medical staff has determined that it is more appropriate to reassign procedure 68825 to Group 2 rather than Group 5.

b. *Other miscellaneous comments—*

Comment: One commenter stated that once a code is entered on the ASC list, after a few years that procedure must be performed on an outpatient basis. The commenter stated this has happened to a few eye codes that should not be routinely performed on an outpatient basis.

Response: A procedure generally is already performed a significant percentage of the time in the outpatient setting before it is placed on the ASC list. Again, whether or not a procedure has been placed on the ASC list, we expect physicians to select the appropriate setting for the performance of any procedure, taking into account the circumstances of a particular patient.

Comment: Twenty-one commenters stated that we should make clear in our final rule that prosthetic implants (other than IOLs) are not included in the ASC facility fee. The Gortex graft material used in the vascular access procedures was cited as an example of a surgical procedure for which the facility fee is inadequate to cover the cost of the implant. Adequate separate payments should be made for these as well as other implants.

Response: Under § 416.60(b), ASC facility services do not include items and services for which payment may be made under Part 405, such as prosthetic devices. Therefore, we are approving separate implant HCPCS alpha-numeric codes for metacarpophalangeal, interphalangeal and metatarsal joints, temporomandibular joint, orbit, mandible, and maxilla, distal humerus, proximal ulna, wrist, distal radius, distal ulna, scaphoid, lunate, trapezium, carpus, extensor tendon (hand/finger), tendon, patella, palate, cochleas, testicle, ossicles, breast, ocular, and vascular grafts. All these protheses are related to procedures that are on the current ASC list, as well as those procedures being added to the list by this notice.

Comment: One commenter expressed concern about the difference between Medicare payment for surgical procedures performed in a free-standing ASC and those performed in a hospital-affiliated (nonMedicare-participating) ASC.

Response: For Medicare purposes, a hospital-affiliated ASC that does not participate in Medicare as an ASC is an integral and subordinate part of a hospital. It is operated with other departments of the hospital under common licensure, governance, and professional supervision.

Section 9343(a) of Public Law 99–509 intended to eliminate disparity between the methods of payment for similar surgical procedures performed in Medicare-participating ASCs and in the hospital outpatient setting. This legislative provision mandates a totally prospective payment system for surgery performed in hospital outpatient departments and in hospital-affiliated ASCs. Until a fully prospective payment system is implemented, section 1833(i)(3) of the Act requires that the ASC payment rates be used in the formula to calculate Medicare payment for hospital outpatient ASC services.

Since 1987, the aggregate payment to hospitals for ASC-approved procedures performed in hospital-affiliated ASCs or hospital outpatient departments has been the lower of the hospital's reasonable costs or customary charges; or a blended payment amount comprised of the lower of the hospital's reasonable costs or charges and the ASC payment amount. Currently, the blend is comprised of 42 percent hospital cost and 58 percent ASC payment rate.

Comment: One commenter wants the former 100 percent payment for ASC physician services to be reinstated because the payment is warranted based on a procedure's complexity, technical support requirements, duration, type of anesthesia used, and the intensity of post-operative care and monitoring required.

Response: Section 4055 of the Omnibus Budget Reconciliation Act of 1987, Public Law 100–203, enacted on December 22, 1987, revised section 1833(i)(2)(A), of the Act to impose the Medicare Part B coinsurance and deductible requirements on physician services furnished in connection with an ASC covered procedure. Effective April 1, 1988, physicians' services are paid at 80 percent of reasonable charges, and beneficiaries are responsible for 20 percent coinsurance and the Medicare Part B deductible. Previously, these physician services were paid at 100 percent of reasonable charge; the Part B deductible did not apply in the ASC setting. To reinstate the 100 percent physician payment would require Congress to change the existing law.

Comment: Eight commenters indicated many State Medicaid plans and private insurers use Medicare's ASC list, and therefore we should not exclude from the list an otherwise qualified procedure solely because it is not frequently covered for Medicare patients.

Response: We have attempted to restrict the list to only those procedures applicable to the Medicare population. This restriction has even resulted in the deletions of some procedures from the original list. The ASC list is based on Medicare patient data and may not be appropriate for other patient populations. Its use for other groups should be cautionary.

Comment: One commenter stated he would like to see more frequent and simpler list expansions.

Response: Section 1833(i)(1) of the Act, as amended by section 9343 of Public Law 99–509, provides that the list of procedures must be reviewed and updated every 2 years. However, we believe this suggestion is important. Annual lists, rather than biennial lists, would more efficiently accommodate the annual CPT changes and make the list less cumbersome for each update. At this time, we are planning annual updates to the list.

III. Provisions of this Notice

A. Coordination of ASC Payment Rate and Procedure Updates

Beginning with this notice, changes in ASC payment rates and the list of ASC covered procedures will be implemented concurrently during the years in which both are updated. ASC rates and the ASC procedure list will be updated concurrently with the hospital wage index for the first time effective for ASC services provided on or after December 31, 1991. In addition, so that the most current wage index values can be used in determining future payment amounts for ASC facility services, annual ASC updates will be implemented

VOL 56 ISS 251 DE 31 1991 UMI

concurrently with the annual update of the inpatient hospital operating prospective payment system wage index.

B. Updated Payment Rates

We are updating the ASC facility rates published in the **Federal Register** (55 FR 27690) on July 5, 1990 that have been in effect since July 1, 1990. To adjust ASC payment rates for the effect of changing price levels on ASC costs, we multiplied the eight ASC payment amounts published in the July 5, 1990, **Federal Register** notice by an inflation factor of 5.1 percent. This factor takes into account actual and projected price changes occurring between January 1, 1991 (the midpoint of the rate period that began July 1, 1990) and March 31, 1992 (the midpoint of the rate period to which the rates published in this notice will apply.)

If we had retained the July 1 update cycle, ASCs would have received a 4.3 percent rate increase on July 1, 1991. However, by moving the update cycle to October, ASCs will receive a 5.1 percent increase for this update. This 0.8 percent difference in the rate increase reflects the change in the ASC update cycle that takes into account a 15-month rather than a 12-month rate period. Since ASCs did not have the advantage of receiving the 4.3 percent increase on July 1, we believe that this additional adjustment paid over the next 12 months is appropriate compensation for this 3-month period without an update. However, the 0.8 percent difference in the two inflation factors will not significantly affect program outlays over time.

As we did in 1987, 1989, and 1990, we are updating the ASC rates using changes in the consumer price index for all urban consumers (CPI–U) based on forecasts by Data Resources, Incorporated (DRI). The CPI–U is a generalized index that measures increases in the prices paid for a representative market basket of goods and services. We are using this across-the-board approach to establish revised rates until our database is updated with new survey information.

Section 4151(c)(3) of Public Law 101–508 revised section 1833(i)(2)(A)(iii) of the Act to freeze the amount of payment for an IOL furnished for insertion at an ASC during or subsequent to cataract surgery at $200, effective beginning November 5, 1990 and before January 1, 1993. The inflation adjustment for Groups 6 and 8, which include a $200 allowance for IOLs, was made prior to blending the IOL allowance into the facility rate.

Group 9 is a new payment group consisting of one procedure code, CPT–4 50590, renal extra corporeal shock wave lithotripsy (ESWL). The manner in which the payment amount for Group 9 was determined is explained in section II.B.7. above in this notice. The updated ASC facility services payment rates for services furnished on or after December 31, 1991, are as follows:

Group 1: $285
Group 2: $382
Group 3: $438
Group 4: $539
Group 5: $615
Group 6: $780 ($580 + 200)
Group 7: $853
Group 8: $905 ($705 + 200)
Group 9: $1,150

C. Wage Index Changes

Section 6003(h) of the Omnibus Budget Reconciliation Act of 1989 (Pub. L. 101–239) added section 1886(d)(10) to the Act (which was later amended by section 4002(h) of Public Law 101–508) to provide for the establishment of the Medicare Geographic Classification Review Board (the MGCRB) to consider applications by hospitals for geographic reclassification for purposes of payment under the prospective payment system, including the HCFA wage index. On September 6, 1990, we published an interim final rule with comment period (55 FR 36754) to implement the provisions in section 6003(h) of Public Law 101–239. In that interim final rule we set forth criteria and procedures to be used by the MGCRB in making determinations about hospital reclassifications. On June 4, 1991, we published a final rule with comment period (56 FR 25458) that implemented the provisions of section 4002(h) of Public Law 101–508 and responded to public comments on the September 6, 1990 interim final rule.

Although one hospital or all the hospitals in a county may seek geographic reclassification, the overwhelming majority of decisions made by the MGCRB concern a request for reclassification by one hospital only.

We have had to determine the appropriate wage index value to be applied to an ASC that is located in the same geographic area in which one or more hospitals have been reclassified by the MGCRB for purposes of the wage index value. Because in § 416.2 we define an ASC as a "* * * distinct entity that operates exclusively for the purpose of providing surgical services to patients not requiring hospitalization * * *", there is no mechanism to uniformly match the wage index value for a redesignated hospital with an individual ASC that is located in the same geographic area. Therefore, with the exception of certain rural counties that are deemed urban, which are discussed below and listed separately in Addendum B, the wage index values for urban areas and rural areas that were set forth in Tables 4A and 4B of the August 30, 1991 prospective payment system final rule at 56 FR 43274 that apply to hospital discharges on or after October 1, 1991, will also be used to calculate the amount to be paid to ASCs for services furnished beginning December 31, 1991. The hospital wage index values for urban areas and for rural areas are set forth in this notice as Addendum B. (We have made two changes to the hospital wage index to correct typographical errors in the August 30, 1991 prospective payment system final rule. These changes will also be published in a forthcoming correction notice that will include other typographical errors in the August 30, 1991 final rule.

Consistent with ASC payment methodology set forth previously in the February 8, 1990 ASC final notice (55 FR 4540), we are continuing our provision that rural counties that have been deemed urban under section 1886(d)(8)(B) of the Act are to have a unique wage index value, that is, the wage index value derived for hospitals that were reclassified by the MGCRB. These wage index values are set forth in the final table in Addendum B entitled—Wage Index Values For Counties That Are Deemed Urban—Computed As Separate Urban Areas. Also listed in the same table are several counties for which we have had to designate a wage index value because there are not prospective payment hospitals in those counties that would enable a county-specific hospital wage index value to be calculated. (See the inpatient hospital prospective payment final rule at 56 FR 43196 published August 30, 1991 for more detailed information on the calculation of hospital wage index values.)

Below are two examples of how the applicable wage index value is applied to the portion of the ASC payment rate that is attributable to labor costs (34.45 percent) in order to standardize payments amounts for variation across geographical areas.

Example 1:

The following is an example of how the payment is determined for a procedure in Group 4 ($539) for an ASC located in Vancouver, Washington. The appropriate hospital wage index value is 1.0722. The labor-related portion is 34.45 percent and the nonlabor-related portion is 65.55 percent.

Wage Adjusted Rate

= [($539 × .3445) × 1.0722] + ($539 × .6555)
= ($185.69 × 1.0722) + $353.31
= $199.10 + $353.31
= $552.41

The steps set forth in this example are used for calculating payment rates for Groups 1 through 5, Group 7, and Group 9. These are the groups whose payment rates do not include an allowance for IOLs.

Example 2:

The following is an example of how payment is determined for the two procedures in Group 8 ($905) performed in an ASC located in Vancouver, Washington. The steps set forth in this example are also used in calculating the payment amount for the one procedure in Group 6.

Since the IOL allowance is not subject to the labor adjustment, the $200 allowance must be subtracted from the composite payment rate ($905) before adjusting for labor variation.

Wage Adjusted Rate

= [(($905–200) × .3455) × 1.0722] + [($905–$200) × .6555]
= [($705 × .3445) × 1.0722] + ($705 × .6555)
= [$242.87 × 1.0722) + $462.13
= $260.41 + $462.13
= $722.57

Composite Adjusted Rate

= $722.57 + $200
= $922.57

D. Proposed Additions Not Accepted

1. Procedures Appropriate in an Inpatient Setting But Not in an ASC

We had proposed coverage for the following CPT codes but, after consideration of the comments, have decided they should not be covered in an ASC because they are more appropriate to the inpatient setting:

CPT code	Description
15820	Blepharoplasty, lower eyelid
15821	Blepharoplasty, lower eyelid; with extensive herniated fat pad
15822	Blepharoplasty, upper eyelid
15823	Blepharoplasty, upper eyelid; with excessive skin weighting down lid
21557	Radical resection of tumor (for example, malignant neoplasm), soft tissue of neck or thorax
27594	Amputation, thigh, through femur, any level; secondary closure or scar revision
36260	Insertion of implantable intra-arterial infusion pump (for example, for chemotherapy of liver)
42426	Excision of parotid tumor or parotid gland; total, with unilateral radical neck dissection
50600	Ureterotomy with exploration or drainage (separate procedure)
50605	Ureterotomy with exploration or drainage (separation procedure)
50920	Closure of ureterocutaneous fistula
50940	Deligation of ureter
51040	Cystostomy, cystotomy with drainage
51050	Cystolithotomy, cystotomy with removal of calculus, without vesical neck resection
51060	Transvesical ureterolithotomy
51065	Cystotomy, with stone basket extraction and/or ultrasonic or electrohydraulic fragmentation of ureteral calculus
51080	Drainage of perivesical or prevesical space abscess
51520	Cystotomy; for simple excision of vesical neck (separate procedure)
51525	Cystotomy; for excision of bladder diverticulum, single or multiple (separate procedure)
51530	Cystotomy; for excision of bladder tumor
51535	Cystotomy for excision, incision, or repair of ureterocele
54015	Incision and drainage of penis, deep
54111	Excision of penile plaque (Peyronie disease); with graft to 5 cm in length
54112	Excision of penile plaque (Peyronie disease); with graft greater than 5 cm in length
54400	Insertion of penile prosthesis; non-inflatable (semi-rigid)
54401	Insertion of penile prosthesis; inflatable (self-contained)
54402	Removal or replacement of non-inflatable (semi-rigid) or inflatable (self-contained) penile prosthesis
54405	Insertion of inflatable (multi-component) penile prosthesis, including placement of pump, cylinders, and/or reservoir
54407	Removal, repair, or replacement of inflatable (multi-component) penile prosthesis, including pump and/or reservoir and/or cylinders
54409	Surgical correction of hydraulic abnormality of inflatable (multi-component) prosthesis including pump and/or reservoir and/or cylinders
54430	Corpora cavernosa-corpus spongiosum shunt (priapism operation), unilateral or bilateral
54560	Exploration for undescended testis with abdominal exploration
54645	Orchiopexy, any type, with or without hernia repair, second stage (Torek type)
55725	Prostatotomy, external drainage of prostatic abscess, any approach; complicated
55740	Prostatolithotomy, removal of prostatic calculus (separate procedure)
55860	Exposure of prostate, any approach, for insertion of radioactive substance

2. Pediatric Procedures

We had also proposed the following CPT codes for addition to the ACS list. However, we realized addition of these codes would conflict with our policy that the ACS list be for Medicare patients only. Therefore, we have decided not to add these codes to our list:

CPT code	Description
31529	Laryngoscopy direct, with or without tracheoscopy; diagnostic, newborn
36488	Placement of central venous catheter (subclavian, jugular, or other vein) (for example, for central venous pressure, hyperalimentation, hemodialysis, or chemotherapy; percutaneous, age 2 years or under
36490	Placement of central venous catheter (subclavian, jugular, or other vein) (for example, for central venous pressure, hyperalimentation, hemodialysis, or chemotherapy; cutdown, age 2 years or under
42820	Tonsillectomy and adenoidectomy, under age 12
42825	Tonsillectomy, primary or secondary; under age 12
42830	Adenoidectomy, primary; under age 12
42835	Adenoidectomy, secondary; under age 12
46705	Anoplasty, plastic operation for stricture; infant
49580	Repair umbilical hernia, under age 5 years

E. Eye Procedure Additions

After further review by our medical staff and after consultation with appropriate outside medical sources, we are adding the following eye procedure codes not listed in our proposed notice. We are adding these codes to maintain clinical consistency or because some of the codes involve laser surgery, which is appropriate to the ASC setting. The eye procedure codes are the following:

CPT code	Description
65755	Keratoplasty (corneal transplant), penetrating (in pseudophakia)
66852	Removal of lens material; pars plana approach, with or without vitrectomy
67039	Vitrectomy, mechanical, pars plana approach; with focal endolaser photocoagulation

F. Additions and Deletions as a Result of Annual CPT Changes

The CPT is updated annually and some additions and deletions affect the ASC list. The following codes in the 1991 CPT have replaced the codes in the 1990 CPT which are listed in parentheses and we are now adding (except for CPT 65235 which is already on the ASC list) these codes to the ASC list:

VOL 56 ISS 251 DEC 31 1991 UMI

CPT code	Description
65235	Removal of intraocular foreign body from anterior chamber or lens (replaces codes 65230 and 65245)
66702	Ciliary body destruction, any method (for example, diathermy, cryotherapy, laser, dialysis) (replaces codes 66700, 66701, 66702, 66721, and 66741)
67314	Strabismus surgery, recession or resection procedure (patient not previously operated on); one vertical muscle (excluding superior oblique)
67316	Strabismus surgery, recession or resection procedure (patient not previously operated on); two or more vertical muscles (excluding superior oblique) (replaces code 65515)
67318	Strabismus surgery, any procedure (patient not previously operated on), superior oblique muscle (replaces code 67313)

We are deleting the following eleven procedure codes from the ASC list since they were deleted from the 1991 CPT:

CPT code	Description
65290	Removal of foreign body, intraocular; from anterior chamber, magnetic extraction
65245	Removal of foreign body, intraocular; from lens (without extraction lens), nonmagnetic extraction
66700	Cyclodiathermy; initial
66701	Cyclodiathermy; subsequent
66720	Cyclocryotherapy; initial
66721	Cyclocryotherapy; subsequent
66741	Cyclodialysis; subsequent
66500	Discission of lens capsule; incisional technique (needling of lens), initial
66801	Discission of lens capsule; incisional technique (needling of lens), subsequent
66915	Expression of lens, linear, one or more stages
67313	Strabismus surgery on patient not previously operated on, any procedure, any muscle (may include minor displacement, for example for A or V pattern); three or more muscles, one or both eyes

We are also deleting CPT code 50205, Renal biopsy; percutaneous, by surgical exposure of kidney, based on information from a professional nephrology organization that it is a hospital inpatient procedure. Our review of recent billing data verifies this information.

Because the above deleted codes were not suggested in our proposed notice, we are now requesting public comment solely on these deletions.

IV. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any final rule that meets one of the E.O. 12291 criteria for a "major rule"; that is, that will be likely result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Actuarial estimates of the cost of updating the ASC rates by 5.1 percent are as follows:

Fiscal year	Cost (in millions)
1992	$30
1993	$50
1994	$60
1995	$70
1996	$80

In addition, this notice will permit facility fees to be paid when the approximately 900 surgical procedure codes being added by this notice are performed in an ASC. However, payments to ASCs are generally lower than payments to hospitals for surgery performed in a hospital, whether on an inpatient or outpatient basis. Although we do not anticipate that many services will shift from the hospital inpatient setting to ASCs, we anticipate some program savings due to shifting of services from hospital outpatient departments to ASCs because payments to ASCs for a given surgical procedure are generally lower than payments to hospitals for the same procedure. Additional savings will be realized as a result of lower payments to hospitals when newly listed procedures continue to be performed on an outpatient basis because the hospital rate will become a blended payment amount comprised of the lower of the hospital's reasonable costs or charges and the ASC payment amount instead of hospital costs alone. Currently, the blend is comprised of 42 percent hospital cost and 58 percent ASC payment rate. Office of the Actuary data indicate that payments based on the ASC blended rate are approximately 10 percent lower than payments based solely on reasonable cost.

A small number of procedures are expected to shift from physicians' offices to the ASC setting as a result of the expansion of the list of covered ASC services. Since a facility fee is not paid when surgery is performed in the physician's office, this shifting may result in slightly increased program costs. However, the additional payments made to ASCs as a result of surgical procedures being shifted from physicians' offices to ASCs, are not likely to be so great as to offset the savings realized from the addition of nearly 900 procedures to the ASC list. We estimate $10 million in savings in each year from FY 1992 through FY 1996 as a consequence of expanding the list of ASC procedures. The net effect of these savings would be an estimated $10 million reduction in the above projected program costs for each year beginning FY 1992 through FY 1996.

Since this final notice will not meet the $100 million criterion or meet the other E.O. 12291 criteria, a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a final notice will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all physicians, ASCs and hospitals to be small entities.

In addition, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a final notice may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds. It is possible that small rural hospitals may believe the updated ASC rates are inadequate compared to the costs likely to be incurred in performing ASC procedures. While the updated ASC rates do not fully recognize actual cost increases to hospitals, the payment methodology applicable to hospitals for furnishing ASC procedures is based on a blended amount which is determined based on 42 percent of actual hospital costs and 58 percent of ASC payment rates. For the portion of the blended payment amount that is based on a hospital's actual costs, cost increases resulting from inflation are fully recognized.

Under section 1833(i)(3)(A) of the Act, Congress mandated the method of determining payments to hospitals for ASC-approved procedures performed in an outpatient setting. Congress believed

some comparability should exist in the amount of payment to hospitals and ASCs for similar procedures. However, Congress recognized that hospitals have certain overhead costs that ASCs do not and allowed for a blending of the payment. Finally, the total impact of these rates would also depend upon the number of Medicare beneficiaries a hospital services and the case-mix variation. For these reasons, we have determined, and the Secretary certifies, that this notice will not have a significant effect on a substantial number of small rural hospitals. Therefore, we have not prepared a small rural hospital impact analysis.

Although we believe an impact analysis on small rural hospitals is not required, this notice could have a significant impact on a substantial number of ASCs. Therefore, we believe that a regulatory flexibility analysis is required for ASCs. In addition, we are voluntarily providing a brief general discussion of the impact this notice may have on hospitals.

1. Impact on ASCs

We are updating the 1990 ASC payment rates, which were published in the **Federal Register** on July 5, 1990 (55 FR 27690). Although these new rates incorporate the estimated annual rate of increase in the CPI–U for calendar year 1991 and the first quarter of calendar year 1992, (5.1 percent), there are other factors affecting the actual payments that ASCs may receive.

First, we are using the revised HCFA hospital wage index values published in the prospective payment system final rule effective October 1, 1991 (see 56 FR 43196, published August 30, 1991). Although there may be significant changes in wage index values in some locales, because the labor portion of the ASC rate is only about one-third of the total payment amount, we believe that this will not have a major impact on ASC payments.

Second, variations in an ASC's Medicare case mix will affect the size of an ASC's aggregate payment increase. Although the ASC payment rates were uniformly inflated by the CPI–U change forecast for calendar year 1991 and the first quarter of calendar year 1992, the IOL payment allowance of $200 per lens has not been adjusted. Therefore, the increase in payments to ASCs that specialize primarily in IOL insertion procedures will be about 3.8 percent as compared to the increase in payments to multispecialty ASCs that primarily perform procedures in payment groups other than Groups 6 and 8. The actual increase in total payments to such multi-specialty ASCs will more closely approximate, in the aggregate, the 5.1 percent increase in the CPI–U.

A third factor determining the effect of the change in the payment rates is the percentage of total revenue an ASC receives from Medicare. The larger the proportion of revenues an ASC receives from the Medicare program, the greater the impact of the updated rates being implemented by this document. The percentage of revenues derived from the Medicare program depends on the volume and types of services furnished. For example, cataract surgery accounts for nearly 60 percent of all surgeries performed in Medicare participating ASCs. Since cataract surgery is generally performed on Medicare patients, an ASC that performs a high percentage of cataract procedures will probably receive a higher percentage of its payments from Medicare than would an ASC with a case mix comprised largely of non-cataract cases. For an ASC that receives a large portion of its revenues from the Medicare program, the changes implemented by this notice will likely have a greater influence on the ASC's operations and management decisions than they will have on an ASC that receives a large portion of revenue from other sources.

In general, however, we expect the changes implemented by this notice to affect ASCs positively by raising the rates upon which payments are based.

2. Impact on Hospitals

For ASC approved procedures performed in an outpatient setting, hospitals are paid the lowest of their aggregate cost, charges, or a blend of 58 percent of the applicable wage-adjusted ASC rate and 42 percent of the hospital-specific amount (the lower of their cost or charges). It should be noted that, although the blended payment methodology requires payments to be composed of a blend of 58 percent of the wage-adjusted ASC rate and 42 percent of the hospital-specific amount, the ASC portion may actually be less than 58 percent of the total payment. This is especially true for the more expensive cases, including cataract procedures in Groups 6 and 8. Hospital costs for these procedures may be almost twice the ASC rate. Thus, the effect of the ASC rate increase being implemented by this notice is diluted, since the actual percentage increase in payment to hospitals is equal to the ratio of the ASC payment amount to the total hospital payment amount multiplied by the average increase in the ASC rates of 5.1 percent. The other factors that may significantly affect payments to ASCs (that is, changes to the wage index and case-mix variations) will have less effect on payment to hospitals. For example, the wage adjustment to the ASC portion of a hospital payment is made only to the labor portion of the ASC amount, which accounts for one-third of the ASC rate. Similarly, the differences in the payments attributable to case-mix variations may be masked by variations in the ratio of the ASC payment portion to the total payment amount.

Another element that reduces the effect of the ASC rate increase is the application of the lowest payment screen in determining payments. Applying the lowest of costs, charges, or a blend can result in some hospitals being paid entirely on the basis of a hospital's costs or charges. In those instances, the increase in the ASC rates will have no effect on hospital payments.

Finally, we anticipate that adding CPT–4 code 50590, extracorporeal shock wave lithotripsy (ESWL), to the list of ASC covered procedures could result in a slight shifting of that procedure from a hospital outpatient to a hospital inpatient setting in order to maximize payment. However, outpatient ESWL currently represents only one-tenth of one percent (.10 percent) of provider bills to Medicare, and ESWL patients are typically drawn from outside the Medicare population. Therefore, we believe that the new ASC facility Group 9 payment rate for ESWL will not adversely affect the operation of lithotripsy facilities that serve a normal ratio of non-Medicare to Medicare patients and that operate efficiently within optimal utilization levels.

C. Conclusion

Overall, ASCs and hospitals will benefit from the updated rates implemented by this notice. We have noted that the increase in payment to ASCs may be affected by the changes in the wage index values for hospitals that were published in the **Federal Register** on October 1, 1991 and by differences in case mix. The amount of the increase to hospitals, however, appears to be less sensitive to changes in the wage index or case mix because the blended payment methodology used to pay most ASC procedures performed in hospital outpatient settings greatly reduces the effect of variations in the wage index or case mix on the ASC portion of the payment blend.

V. Other Required Information

A. Paperwork Reduction Act

This final notice does not impose any information collection requirements;

VOL 56 ISS 251 DE 31 1991 UMI

consequently, it need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 through 3511).

B. Public Comments

We will consider public comments concerning the updating of the payment rates and the comments concerning deletion of the following twelve procedure codes, which were not discussed in the December 7, 1990 proposed notice.

CPT code	Description
50205	Renal biopsy; percutaneous, by surgical exposure of kidney.
65220	Removal of foreign body, intraocular; from anterior chamber, magnetic extraction.
65245	Removal of foreign body, intraocular; from lens (without extraction lens), nonmagnetic extraction.
66700	Cyclodiathermy; initial.
66701	Cyclodiathermy; subsequent.
66720	Cyclocryotherapy; initial.
66721	Cyclocryotherapy; subsequent.
66741	Cyclodialysis, subsequent.
66800	Discussion of lens capsule; incisional technique (needling of lens), initial.
66801	Discussion of lens capsule; incisional technique (needling of lens), subsequent.
66915	Expression of lens, linear, one or more stages.
67313	Strabismus surgery on patient not previously operated on, any procedure, any muscle (may include minor displacement, for example for A or V pattern); three or more muscles, one or both eyes.

C. Waiver of 30-Day Delay in the Effective Date

We ordinarily provide a delay of 30 days in the effective date for documents such as this. However, if adherence to this procedure would be impractical, unnecessary, or contrary to the public interest, we may waive the delay in the effective date. We find good cause to waive the usual 30-day delay in the effective date for the update of the ASC rates.

As explained above, we believe that it will be beneficial to ASCs for the effective date of the biennial update of covered ASC procedures and the annual update of ASC payment rates to coincide as closely as possible with the annual update of the hospital wage index, which we use for calculating payment to ASCs. Making these updates close together enables us to apply the most up-to-date hospital wage index in determining ASC payments. Making the ASC procedure list and payments rate updates in April or in July would perpetuate the use of an outdated wage index in determining ASC rates and payments.

Any delay in the effective date would deprive the ASCs of the benefit of the use of the most up-to-date hospital wage index and coverage for the 858 procedure codes added in this notice. (This notice also deletes eight procedure codes.)

Thus, a 30-day delay in the effective date for the update of the ASC rates would be contrary to the public interest. Therefore, we find good cause to waive the usual 30-day delay in this effective date.

Authority: Sections 1832(a)(2)(F) and 1833(i)(1) and (2) of the Social Security Act (42 U.S.C. 1395k(a)(2)(F) and 13951(i)(1) and (2)); 42 CFR 416.120, 416.125, and 416.130.

Addendum A

Additions to the Current List of Covered Surgical Procedures for Ambulatory Surgical Centers (ASCs)

The following addendum is the final list of additions to the ASC List and the corresponding new payment groups. The additions are listed according to body system, appropriate terminology, and Physicians' Current Procedural Terminology, Fourth Edition, 1991 (CPT) coding.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)

Payment GRP	CPT code	Description
		Integumentary System
		Skin, Subcutaneous and Areolar Tissues
		Incision
2	10180	Incision and drainage, complex, postoperative wound infection.
		Excision—Benign Lesions
1	11404	Excision, benign lesion, except skin tag (unless listed elsewhere), trunk, arms or legs, lesion diameter 3.1 to 4.0 cm.
1	11444	Excision, other benign lesion (unless listed elsewhere), face, ears, eyelids, nose, lips, mucous membrane, lesion diameter 3.1 to 4.0 cm
2	11450	Excision of skin and subcutaneous tissue for hidradenitis, axillary; with primary suture.
2	11451	Excision of skin and subcutaneous tissue for hidradenitis, axillary; with other closure.
2	11462	Excision of skin and subcutaneous tissue for hidradenitis, inguinal; with primary suture.
2	11463	Excision of skin and subcutaneous tissue for hidradenitis, inguinal; with other closure.
2	11470	Excision of skin and subcutaneous tissue for hidradenitis, perianal, perineal, or umbilical; with primary closure.
		Excision—Malignant Lesions
2	11604	Excision, malignant lesion, trunk, arms, or legs; lesion diameter 3.1 to 4.0 cm.
2	11624	Excision, malignant lesion, scalp, neck, hands, feet, genitalia; lesion diameter 3.1 to 4.0 cm.
2	11644	Excision, malignant lesion, face, ears, eyelids, nose, lips; lesion diameter 3.1 to 4.0 cm.
		Miscellaneous
		Introduction
2	11960	Insertion of tissue expander(s).
3	11970	Replacement of tissue expander with permanent prosthesis.
1	11971	Removal of tissue expander(s) without insertion of prosthesis.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Repair
		Repair—Simple
2	12005	Simple repair of superficial wounds of scalp, neck, axillae, external genitalia, trunk and/or extremities (including hands and feet); 12.6 cm to 20.0 cm.
2	12016	Simple repair of superficial wounds of face, ears, eyelids, nose, lips and/or mucous membranes; 12.6 cm to 20.0 cm.
1	12020	Treatment of superficial wound dehiscence; simple closure.
1	12021	Treatment of superficial wound dehiscence; with packing.
		Repair—Intermediate
2	12034	Layer closure of wounds of scalp, axillae, trunk and/or extremities (excluding hands and feet); 7.6 cm to 12.5 cm.
2	12035	Layer closure of wounds of scalp, axillae, trunk and/or extremities (excluding hands and feet); 12.6 cm to 20.0 cm.
2	12044	Layer closure of wounds of neck, hands, feet and/or external genitalia; 7.6 cm to 12.5 cm.
2	12045	Layer closure of wounds of neck, hands, feet and/or external genitalia; 12.6 cm to 20.0 cm.
2	12054	Layer closure of wounds of face, ears, eyelids, nose, lips and/or mucous membranes; 7.6 cm to 12.5 cm.
2	12055	Layer closure of wounds of face, ears, eyelids, nose, lips and/or mucous membranes; 12.6 cm to 20.0 cm.
		Repair—Complex
2	13100	Repair, complex, trunk; 1.1 cm to 2.5 cm.
2	13120	Repair, complex, scalp, arms, and/or legs; 1.1 cm to 2.5 cm.
2	13131	Repair, complex, forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands and/or feet; 1.1 cm to 2.5 cm.
3	13150	Repair, complex, eyelids, nose, ears and/or lips; 1.0 cm or less.
3	13151	Repair, complex, eyelids, nose, ears and/or lips; 1.1 cm to 2.5 cm.
2	13160	Secondary closure of surgical wound or dehiscence, extensive or complicated.
2	14000	Adjacent tissue transfer or rearrangement, trunk; defect 10 sq cm or less.
2	14040	Adjacent tissue transfer or rearrangement, forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands and/or feet; defect 10 sq cm or less.
		Free Skin Grafts
2	15120	Split graft, face, eyelids, mouth, neck, ears, orbits, genitalia, and/or multiple digits; 100 sq cm or less, or each one percent of body area of infants and children (except 15050).
3	15121	Split graft, face, eyelids, mouth, neck, ears, orbits, genitalia, and/or multiple digits; each additional 100 sq cm, or each one percent of body area of infants and children, or part thereof.
2	15400	Application of xenograft, skin.
		Pressure Ulcers (Decubitus Ulcers)
3	15934	Excision, sacral pressure ulcer, with local or regional skin flap closure (eg, advancement, rotation, rhomboid, bipedicle).
4	15935	Excision, sacral pressure ulcer, with local or regional skin flap closure (eg, advancement, rotation, rhomboid, bipedicle); with ostectomy.
4	15936	Excision, sacral pressure ulcer, with other flap closure.
4	15937	Excision, sacral pressure ulcer, with other flap closure; with ostectomy.
3	15940	Excision, iachial pressure ulcer, with primary suture.
		Burns, Local Treatment
1	16030	Dressing and/or debridement, initial or subsequent; without anesthesia, large (eg, more than one extremity).
2	16035	Escharotomy.
		Breast
		Excision
1	19100	Biopsy of breast; needle (separate procedure).
2	19110	Nipple exploration, with or without excision of a solitary lactiferous duct or a papilloma lactiferous duct.
3	19112	Excision of lactiferous duct fistula.
7	19162	Mastectomy, partial; with axillary lymphadenectomy.
5	19260	Excision of chest wall tumor including ribs.
		Repair and Reconstruction
4	19318	Reduction mammaplasty.
1	19328	Removal of intact mammary implant.
1	19330	Removal of mammary implant material.
2	19340	Immediate insertion of breast prosthesis following mastopexy, mastectomy or in reconstruction.
3	19342	Delayed insertion of breast prosthesis following mastopexy, mastectomy or in reconstruction.
4	19350	Nipple/areola reconstruction.
5	19360	Breast reconstruction with muscle or myocutaneous flap.
5	19364	Breast reconstruction with free flap.
5	19368	Breast reconstruction with other technique.
4	19370	Open periprosthetic capsulotomy, breast.
4	19371	Periprosthetic capsulectomy, breast.
5	19380	Revision of reconstructed breast.
		Musculoskeletal System
		General
		Excision
2	20200	Biopsy, muscle; superficial.
1	20206	Biopsy, muscle, percutaneous needle.
1	20220	Biopsy, bone, trocar or needle; superficial (eg, ilium, sternum, spinous process, ribs).
		Introduction or Removal
1	20670	Removal of implant; superficial, (eg, buried wire, pin or rod) (separate procedure).
2	20690	Application of external fixation system (eg, Hoffmann apparatus), including removal.

VOL 56 ISS 251 DEC 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Grafts (or implants)
4	20924	Tendon graft, from a distance (eg, palmaris, toe extensor, plantaris).
		Head
		Excision
2	21025	Excision of bone (eg, for osteomyelitis or bone abscess); mandible.
2	21026	Excision of bone (eg, for osteomyelitis or bone abscess); facial bone(s).
2	21041	Excision of benign cyst or tumor of mandible; complex.
3	21070	Coronoidectomy (separate procedure).
		Repair, Revision, or Reconstruction
5	21206	Osteotomy (eg, for prognathism, micrognathism, apertognathism or for reconstruction); maxilla, segmental.
7	21208	Osteoplasty, facial bones; augmentation (autograft, allograft, or prosthetic implant).
5	21209	Osteoplasty, facial bones; reduction.
7	21210	Graft, bone; nasal, maxillary or malar areas (includes obtaining graft).
7	21215	Graft, bone; mandible (includes obtaining graft).
7	21230	Graft; rib cartilage, autogenous, to face, chin, nose or ear (includes obtaining graft).
7	21235	Graft; ear cartilage to nose or ear (includes obtaining graft).
4	21240	Arthroplasty, temporomandibular joint, with or without autograft.
5	21242	Arthroplasty, temporomandibular joint, with allograft.
5	21243	Arthroplasty, temporomandibular joint, with prosthetic joint replacement.
7	21244	Reconstruction of mandible, extraoral, with transosteal bone plate (eg, mandibular staple bone plate).
7	21245	Reconstruction of mandible or maxilla, subperiosteal implant; partial.
7	21246	Reconstruction of mandible or maxilla, subperiosteal implant; complete.
7	21248	Reconstruction of mandible or maxilla, endosteal implant (eg, blade, cylinder); partial.
7	21249	Reconstruction of mandible or maxilla, endosteal implant (eg, blade, cylinder); complete.
7	21267	Orbital repositioning, periorbital osteotomies, unilateral, with bone grafts; extracranial approach.
5	21270	Malar augmentation, bone or alloplastic material.
7	21275	Secondary revision of orbitocraniofacial reconstruction.
5	21280	Medial canthoplasty.
5	21282	Lateral canthopexy.
		Fracture and/or Dislocation
2	21300	Treatment of closed skull fracture without operation.
2	21337	Treatment of closed nasal septal fracture.
5	21339	Open treatment of nasoethmoid fracture; with external fixation.
5	21385	Open treatment of orbital floor "blowout" fracture; transantral approach (Caldwell-Luc type operation).
5	21386	Open treatment of orbital floor "blowout" fracture; periorbital approach.
5	21387	Open treatment of orbital floor "blowout" fracture; combined approach.
7	21390	Open treatment of orbital floor "blowout" fracture; periorbital approach, with alloplastic or other implant.
7	21395	Open treatment of orbital floor "blowout" fracture; periorbital approach with bone graft (includes obtaining graft).
2	21400	Treatment of fracture of orbit, except "blowout"; without manipulation.
3	21401	Treatment of fracture of orbit, except "blowout"; with manipulation.
4	21406	Open treatment of fracture of orbit, except "blowout"; without implant.
5	21407	Open treatment of fracture of orbit, except "blowout"; with implant.
4	21421	Treatment of palatal or alveolar ridge fractures (Lefort I type); closed manipulation with interdental wire fixation or fixation of denture or splint.
5	21422	Treatment of palatal or alveolar ridge fractures (Lefort I type); open treatment.
3	21440	Manipulative treatment of alveolar ridge fracture (separate procedure).
4	21445	Open treatment of alveolar ridge fracture (separate procedure).
5	21454	Open treatment of closed or open mandibular fracture with external fixation.
4	21455	Closed manipulative treatment by interdental fixation of closed or open mandibular fracture.
4	21461	Open treatment of closed or open mandibular fracture; without interdental fixation.
5	21462	Open treatment of closed or open mandibular fracture; with interdental fixation.
4	21465	Open treatment of mandibular condylar fracture.
5	21470	Open treatment of complicated closed or open mandibular fracture by multiple surgical approaches including internal fixation, interdental fixation, and/or wiring of dentures or splints.
3	21493	Treatment of closed or open hyoid fracture; without manipulation.
2	21497	Interdental wiring, for condition other than fracture.
		Neck (Soft Tissues) and Thorax
		Excision
1	21550	Biopsy, Soft tissue of neck or thorax.
2	21620	Ostectomy of sternum, partial.
		Repair, Revision or Reconstruction
2	21700	Division of scalenus anticus; without resection of cervical rib.
3	21720	Division of sternocleidomastoid for torticollis, open operation; without cast application.
3	21725	Division of sternocleidomastoid for torticollis, open operation; with cast application.
		Fracture and/or Dislocation
1	21800	Treatment of rib fracture; closed, uncomplicated, each.
2	21805	Treatment of rib fracture; open or complicated, each.
2	21810	Treatment of rib fracture; closed or open requiring external fixation ("flail chest").
1	21820	Treatment of sternum fracture; closed.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Back and Flank
		Excision
1	21920	Biopsy, soft tissue of back or flank; superficial.
2	21925	Biopsy, soft tissue of back or flank; deep.
2	21930	Excision, tumor, soft tissue of back or flank.
3	21953	Radical resection of tumor (eg, malignant neoplasm), soft tissue of back or flank.
		Spine (Vertebral Column)
		Excision
3	22100	Partial resection of vertebral component, spinous processes; cervical.
3	22101	Partial resection of vertebral component, spinous processes; thoracic.
3	22102	Partial resection of vertebral component, spinous processes; lumbar.
		Fracture and/or Dislocation
1	22305	Closed treatment of vertebral process fracture(s).
1	22310	Closed treatment of vertebral body fracture(s), without manipulation.
2	22315	Closed treatment of vertebral fracture and/or dislocation, with or without anesthesia, by manipulation or traction, each.
3	22325	Open treatment of vertebral fracture and/or dislocation; lumbar, each.
3	22326	Open treatment of vertebral fracture and/or dislocation; cervical, each.
3	22327	Open treatment of vertebral fracture and/or dislocation; thoracic, each.
		Manipulation
2	22505	Manipulation of spine requiring anesthesia, any region.
		Shoulder
		Excision
1	23065	Biopsy, soft tissue of shoulder area; superficial.
2	23075	Excision, tumor, shoulder area; subcutaneous.
3	23077	Radical resection of tumor (eg, malignant neoplasm), soft tissue of shoulder area.
4	23105	Arthrotomy for synovectomy; glenohumeral joint.
4	23106	Arthrotomy for synovectomy; sternoclavicular joint.
4	23107	Arthrotomy, glenohumeral joint, with joint exploration, with or without removal of loose or foreign body.
5	23120	Claviculectomy; partial.
5	23125	Claviculectomy; total.
5	23145	Excision or curettage of bone cyst or benign tumor of clavicle or scapula; with autograft (includes obtaining graft).
5	23146	Excision or curettage of bone cyst or benign tumor of clavicle or scapula; with allograft.
5	23155	Excision or curettage of bone cyst or benign tumor of proximal humerus; with autograft (includes obtaining graft).
5	23156	Excision or curettage of bone cyst or benign tumor of proximal humerus; with allograft.
		Introduction or Removal
1	23330	Removal of foreign body, shoulder; subcutaneous.
		Repair, Revision or Reconstruction
5	23395	Muscle transfer, any type for paralysis of shoulder or upper arm; single.
7	23397	Muscle transfer, any type for paralysis of shoulder or upper arm; multiple.
7	23400	Scapulopexy (eg, Sprengel's deformity or for paralysis).
5	23410	Repair of ruptured supraspinatus tendon (rotator cuff) or musculotendinous cuff; acute.
7	23412	Repair of ruptured supraspinatus tendon (rotator cuff) or musculotendinous cuff; chronic.
5	23415	Coracoacromial ligament release, with or without acromioplasty, for chronic ruptured supraspinatus tendon (rotator cuff)
7	23420	Repair of complete shoulder (rotator) cuff avulsion, chronic (includes acromioplasty).
4	23430	Tenodesis for rupture of long tendon of biceps.
4	23440	Resection or transplantation of long tendon of biceps, for chronic tenosynovitis.
5	23450	Capsulorrhaphy for recurrent dislocation, anterior; Putti-Platt procedure or Magnuson type operation.
7	23455	Capsulorrhaphy for recurrent dislocation, anterior; Bankart type operation with or without stapling.
5	23460	Capsulorrhaphy for recurrent dislocation, anterior, any type; with bone block.
7	23462	Capsulorrhaphy for recurrent dislocation, anterior, any type; with coracoid process transfer.
5	23465	Capsulorrhaphy for recurrent dislocation, posterior, with or without bone block.
7	23466	Capsulorrhaphy for recurrent dislocation with any type multi-directional instability.
4	23480	Osteotomy, clavicle, with or without internal fixation.
7	23485	Osteotomy, clavicle, with or without internal fixation; with bone graft for nonunion or malunion (includes obtaining graft and/or necessary fixation).
3	23490	Prophylactic treatment (nailing, pinning, plating or wiring) with or without methyl methacrylate; clavicle.
3	23491	Prophylactic treatment (nailing, pinning, plating or wiring) with or without methyl methacrylate; proximal humerus and humeral head.
		Fracture and/or Dislocation
1	23500	Treatment of closed clavicular fracture; without manipulation.
3	23510	Treatment of open clavicular fracture, with uncomplicated soft tissue closure.
1	23520	Treatment of closed sternoclavicular dislocation; without manipulation.
1	23525	Treatment of closed sternoclavicular dislocation; with manipulation.
3	23530	Open treatment of closed or open sternoclavicular dislocation, acute or chronic.
4	23532	Open treatment of closed or open sternoclavicular dislocation, acute or chronic; with fascial graft (includes obtaining graft).
1	23540	Treatment of closed acromioclavicular dislocation; without manipulation.
1	23545	Treatment of closed acromioclavicular dislocation; with manipulation.
3	23550	Open treatment of closed or open acromioclavicular dislocation, acute or chronic.
4	23552	Open treatment of closed or open acromioclavicular dislocation, acute or chronic; with fascial graft (includes obtaining graft).
1	23570	Treatment of closed scapular fracture; without manipulation.
1	23575	Treatment of closed scapular fracture; with manipulation (with or without shoulder joint involvement).
3	23580	Treatment of open scapular fracture, with uncomplicated soft tissue closure.

VOL 56 ISS 251 DEC 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
3	23585	Open treatment of closed or open scapular fracture juxta-articular.
1	23600	Treatment of closed humeral (surgical or anatomical neck) fracture; without manipulation.
4	23615	Open treatment of closed or open humeral (surgical or anatomical neck) fracture, with or without internal or external skeletal fixation.
1	23620	Treatment of closed greater tuberosity fracture; without manipulation.
1	23650	Treatment of closed shoulder dislocation, with manipulation; without anesthesia.
		Arthrodesis
4	23800	Arthrodesis, shoulder joint with or without local bone graft.
7	23802	Arthrodesis, shoulder joint, with primary autogenous graft (includes obtaining graft).
		Amputation
3	23921	Disarticulation of shoulder; secondary closure or scar revision.
		Humerus (Upper Arm) and Elbow
		Incision
2	23931	Incision and drainage, upper arm or elbow area; infected bursa.
		Excision
1	24065	Biopsy, soft tissue of upper arm or elbow area; superficial.
2	24066	Biopsy, soft tissue of upper arm or elbow area; deep.
3	24077	Radical resection of tumor (eg, malignant neoplasm), soft tissue of upper arm or elbow area.
4	24102	Arthrotomy, elbow; for synovectomy.
3	24150	Radical resection for tumor, shaft or distal humerus.
4	24151	Radical resection for tumor, shaft or distal humerus; with autograft (includes obtaining graft).
3	24152	Radical resection for tumor, radial head or neck.
4	24153	Radical resection for tumor, radial head or neck; with autograft (includes obtaining graft).
		Repair, Revision and Reconstruction
5	24360	Arthroplasty, elbow; with membrane.
5	24361	Arthroplasty, elbow; with distal humeral prosthetic replacement.
7	24363	Arthroplasty, elbow; with distal humerus and proximal ulnar prosthetic replacement ("total elbow").
5	24365	Arthroplasty, radial head.
5	24366	Arthroplasty, radial head; with implant.
4	24400	Osteotomy, humerus, with or without internal fixation.
4	24410	Multiple osteotomies with realignment, on intramedullary rod, humeral shaft (Sofield type procedure).
3	24430	Repair of nonunion or malunion, humerus; without graft (eg, compression technique).
4	24435	Repair of nonunion or malunion, humerus; with iliac or other autograft (includes obtaining graft).
3	24498	Prophylactic treatment (nailing, pinning, plating or wiring); with or without methylmethacrylate, humerus.
		Fracture and/or Dislocation
1	24500	Treatment of closed humeral shaft fracture; without manipulation.
1	24560	Treatment of closed humeral epicondylar fracture, medial or lateral; without manipulation.
1	24576	Treatment of closed humeral condylar fracture, medial or lateral; without manipulation.
1	24587	Open treatment of closed or open comminuted elbow fracture (fracture distal humerus and/or proximal ulna/radius), with or without internal or external skeletal fixation; with implant.
5	24586	Open treatment of closed or open comminuted elbow fracture (fracture distal humerus and/or proximal ulna/radius), with or without internal or external skeletal fixation; with implants and fascia lata ligament reconstruction.
1	24600	Treatment of closed elbow dislocation; without anesthesia.
2	24660	Treatment of open radial head or neck fracture, with uncomplicated soft tissue closure.
1	24670	Treatment of closed ulnar fracture, proximal end (olecranon process); without manipulation.
		Arthrodesis
4	24800	Arthrodesis, elbow joint; with or without local autograft or allograft.
5	24802	Arthrodesis, elbow joint; with autograft (includes obtaining graft other than locally obtained).
		Amputation
1	24925	Amputation, arm through humerus; secondary closure or scar revision.
		Forearm and Wrist
		Incision
2	25031	Incision and drainage, forearm and/or wrist; infected bursa.
		Excision
1	25065	Biopsy, soft tissue of forearm and/or wrist; superficial.
2	25075	Excision, tumor, forearm and/or wrist area; subcutaneous.
3	25077	Radical resection of tumor (eg, malignant neoplasm), soft tissue of forearm and/or wrist area.
4	25105	Arthrotomy, wrist joint; for synovectomy.
4	25115	Radical excision of bursa, synovia of wrist, or forearm tendon sheaths (eg, tenosynovitis, fungus, TBC, or other granulomas, rheumatoid arthritis); flexors.
4	25116	Radical excision of bursa, synovia of wrist, or forearm tendon sheaths (eg, tenosynovitis, fungus, TBC, or other granulomas, rheumatoid arthritis); extensors, with or without transposition of dorsal retinaculum.
2	25118	Synovectomy, extensor tendon sheath, wrist, single compartment.
3	25119	Synovectomy, extensor tendon sheath, wrist, single compartment; with resection of distal ulna.
3	25170	Radical resection for tumor, radius or ulna.
		Introduction or Removal
1	25250	Removal of wrist prosthesis (separate procedure).
1	25251	Removal of wrist prosthesis; complicated, including "total wrist".

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Repair, Revision or Reconstruction
5	25330	Arthroplasty, wrist.
5	25331	Arthroplasty, wrist; with implant.
5	25332	Arthroplasty, wrist; pseudarthrosis type with internal fixation.
3	25335	Centralization of wrist on ulna (eg, radial club hand).
3	25350	Osteotomy, radius; distal third.
3	25355	Osteotomy, radius; middle or proximal third.
3	25360	Osteotomy; ulna.
3	25365	Osteotomy; radius and ulna.
3	25370	Multiple osteotomies, with realignment on intramedullary rod (Sofield type procedure); radius or ulna.
4	25375	Multiple osteotomies, with realignment on intramedullary rod (Sofield type procedure); radius or ulna.
3	25400	Repair of nonunion or malunion, radius or ulna; without graft (eg, compression technique).
4	25405	Repair of nonunion or malunion, radius or ulna; with iliac or other autograft (includes obtaining graft).
3	25415	Repair of nonunion or malunion, radius and ulna; without graft (eg, compression technique).
4	25420	Repair of nonunion or malunion, radius and ulna; with iliac or other autograft (includes obtaining graft).
3	25425	Repair of defect with autograft; radius or ulna.
4	25426	Repair of defect with autograft; radius and ulna.
4	25440	Repair of nonunion, scaphoid (navicular) bone, with or without radial styloidectomy (includes obtaining graft and necessary fixation).
5	25441	Arthroplasty with prosthetic replacement; distal radius.
5	25442	Arthroplasty with prosthetic replacement; distal ulna.
5	25443	Arthroplasty with prosthetic replacement; scaphoid (navicular).
5	25444	Arthroplasty with prosthetic replacement; lunate.
5	25445	Arthroplasty with prosthetic replacement; trapezium.
7	25446	Arthroplasty with prosthetic replacement; distal radius and partial or entire carpus ("total wrist").
5	25447	Interposition arthroplasty, intercarpal or carpometacarpal joints.
5	25449	Revision of arthroplasty, including removal of implant, wrist joint.
3	25490	Prophylactic treatment (nailing, pinning, plating or wiring), with or without methyl methacrylate; radius.
3	25491	Prophylactic treatment (nailing, pinning, plating or wiring), with or without methyl methacrylate; ulna.
3	25492	Prophylactic treatment (nailing, pinning, plating or wiring), with or without methyl methacrylate; radius and ulna.
		Fracture and/or Dislocation
2	25624	Treatment of closed carpal scaphoid (navicular) fracture; with manipulation.
		Arthrodesis
4	25800	Arthrodesis, wrist joint (including radiocarpal and/or ulnocarpal fusion); without bone graft.
5	25805	Arthrodesis, wrist joint (including radiocarpal and/or ulnocarpal fusion); with sliding graft.
5	25810	Arthrodesis, wrist joint (including radiocarpal and/or ulnocarpal fusion); with iliac or other autograft (includes obtaining graft).
4	25820	Intercarpal fusion; without bone graft.
5	25825	Intercarpal fusion; with autograft (includes obtaining graft).
		Amputation
3	25907	Amputation, forearm, through radius and ulna; secondary closure or scar revision.
3	25922	Disarticulation through wrist; secondary closure or scar revision.
3	25929	Transmetacarpal amputation; secondary closure or scar revision.
		Hand and Fingers
		Excision
3	26117	Radical resection of tumor (eg, malignant neoplasm), soft tissue of hand or finger.
3	26130	Synovectomy, carpometacarpal joint.
3	26236	Partial excision (craterization, saucerization, or diaphysectomy) of bone (eg, for osteomyelitis); distal phalanx of finger
3	26250	Radical resection (ostectomy) for tumor, proximal or middle phalanx of finger.
3	26262	Radical resection (ostectomy) for tumor, distal phalanx of finger.
		Introduction or Removal
2	26320	Removal of implant from finger or hand.
		Repair, Revision or Reconstruction
4	26357	Flexor tendon repair or advancement, single, in "no man's land"; secondary, each tendon.
4	26415	Extensor tendon excision, implantation of plastic tube or rod for delayed extensor tendon graft, hand or finger.
3	26437	Extensor tendon realignment, hand.
1	26478	Tendon lengthening, flexor, hand or finger, single, each.
1	26479	Tendon shortening, flexor, hand or finger, single, each.
4	26504	Tendon pulley reconstruction; with tendon prosthesis (separate procedure).
5	26527	Arthroplasty, carpometacarpal joint.
4	26548	Repair and reconstruction, finger, volar plate, interphalangeal joint.
2	26560	Repair of syndactyly (web finger) each web space; with skin flaps.
3	26561	Repair of syndactyly (web finger) each web space; with skin flaps and grafts.
4	26562	Repair of syndactyly (web finger) each web space; complex (eg, involving bone, nails).
5	26565	Osteotomy for correction of deformity; metacarpal.
5	26580	Repair cleft hand.
5	26590	Repair macrodactylia.
3	26591	Repair, intrinsic muscles of hand (specify).
3	26593	Release, intrinsic muscles of hand (specify).
2	26596	Excision of constricting ring of finger, with multiple Z-plasties.
3	26597	Release of scar contracture, flexor or extensor, with skin grafts, rearrangement flaps, or Z-plasties, hand and/or finger.
		Fractures and/or Dislocations
4	26615	Open treatment of closed or open metacarpal fracture, single, with or without internal or external skeletal fixation, each bone.
2	26742	Treatment of closed articular fracture, involving metacarpophalangeal or proximal interphalangeal joint; with manipulation, each

VOL 56 ISS 251 DEC 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
2	26756	Treatment of closed distal phalangeal fracture, finger or thumb; with percutaneous pinning, each.
2	26776	Treatment of closed interphalangeal joint dislocation, single, with manipulation; with percutaneous pinning.
		Arthrodesis
4	26850	Arthrodesis, metacarpophalangeal joint, with or without internal fixation.
4	26852	Arthrodesis, metacarpophalangeal joint, with or without internal fixation; with autograft (includes obtaining graft).
		Pelvis and Hip Joint
		Excision
3	27049	Radical resection of tumor (eg, malignant neoplasm), soft tissue of pelvis and hip area.
3	27050	Arthrotomy, for biopsy; sacroiliac joint.
5	27060	Excision; ischial bursa.
5	27062	Excision; trochanteric bursa or calcification.
		Introduction and/or Removal
1	27086	Removal of foreign body, pelvis or hip; subcutaneous tissue.
		Repair, Revision or Reconstruction
3	27097	Hamstring recession, proximal.
3	27098	Adductor transfer to ischium.
4	27100	Transfer external oblique muscle to greater trochanter including fascial or tendon extension (graft).
4	27105	Transfer paraspinal muscle to hip (includes fascial or tendon extension graft).
4	27110	Transfer iliopsoas to greater trochanter.
4	27111	Transfer iliopsoas to femoral neck.
		Fractures and/or Dislocations
1	27190	Treatment of closed sacral fracture.
2	27192	Open treatment of closed or open sacral fracture.
1	27195	Treatment of sacroiliac and/or symphysis pubis dislocation, without manipulation.
2	27196	Treatment of sacroiliac and/or symphysis pubis dislocation, with anesthesia and with manipulation.
1	27210	Treatment of closed iliac, pubic or ischial fracture.
1	27230	Treatment of closed femoral fracture, proximal end, neck; without manipulation.
1	27238	Treatment of closed intertrochanteric, pertrochanteric, or subtrochanteric femoral fracture; without manipulation.
1	27246	Treatment of closed greater trochanteric fracture, without manipulation.
1	27250	Treatment of closed hip dislocation, traumatic; without anesthesia.
2	27252	Treatment of closed hip dislocation, traumatic; requiring anesthesia.
1	27265	Treatment of atraumatic hip dislocation (eg, post-total hip arthroplasty); without anesthesia.
1	27266	Treatment of atraumatic hip dislocation (eg, post-total hip arthroplasty); requiring general anesthesia.
		Femur (Thigh Region) and Knee Joint
		Excision
1	27323	Biopsy, soft tissue of thigh or knee area; superficial.
4	27331	Arthrotomy, knee with joint exploration, with or without biopsy, with or without removal of loose or foreign bodies.
4	27332	Arthrotomy, knee, for excision of semilunar cartilage (meniscectomy); medial or lateral.
4	27333	Arthrotomy, knee, for excision of semilunar cartilage (meniscectomy); medial and lateral.
4	27334	Arthrotomy, knee, for synovectomy; anterior or posterior.
4	27335	Arthrotomy, knee, for synovectomy; anterior and posterior including popliteal area.
3	27340	Excision, prepatellar bursa.
4	27356	Excision or curettage of bone cyst or benign tumor of femur; with allograft.
		Repair, Revision or Reconstruction
1	27380	Suture of infrapatellar tendon; primary.
3	27381	Suture of infrapatellar tendon; secondary. Reconstruction, including fascial or tendon graft.
3	27385	Suture of quadriceps or hamstring muscle rupture; primary.
3	27386	Suture of quadriceps or hamstring muscle rupture; secondary reconstruction, including fascial or tendon graft.
4	27403	Arthrotomy with open meniscus repair.
4	27405	Repair, primary, torn ligament and/or capsule, knee; collateral.
4	27407	Repair, primary, torn ligament and/or capsule, knee; cruciate.
4	27409	Repair, primary, torn ligament and/or capsule, knee; collateral and cruciate ligaments.
3	27418	Anterior tibial tubercle plasty for chondromalacia patellae (Maquet procedure).
3	27427	Ligamentous reconstruction (augmentation), knee; extra-articular.
4	27428	Ligamentous reconstruction (augmentation), knee; intra-articular (open).
4	27429	Ligamentous reconstruction (augmentation), knee; intra-articular (open) and extra-articular.
4	27437	Arthroplasty, patella; without prosthesis.
5	27438	Arthroplasty, patella; with prosthesis.
5	27440	Arthroplasty, knee, tibial plateau.
5	27441	Arthroplasty, knee, tibial plateau; with debridement and partial synovectomy.
5	27442	Arthroplasty, knee, femoral condyles or tibial plateaus.
5	27443	Arthroplasty, knee, femoral condyles or tibial plateaus; with debridement and partial synovectomy.
		Fractures and/or Dislocations
1	27500	Treatment of closed femoral shaft fracture (including supracondylar); without manipulation (includes traction).
2	27502	Treatment of closed femoral shaft fracture (including supracondylar); with manipulation.
2	27504	Treatment of open femoral shaft fracture (including supracondylar), with uncomplicated soft tissue closure.
1	27506	Treatment of closed femoral fracture, distal end, medial or lateral condyle; without manipulation.
1	27510	Treatment of closed femoral fracture, distal end, medial or lateral condyle; with manipulation.
2	27512	Treatment of open femoral fracture, distal end, medial or lateral condyle, with uncomplicated soft tissue closure.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
1	27516	Treatment of closed distal femoral epiphyseal separation; without manipulation (includes traction).
1	27517	Treatment of closed distal femoral epiphyseal separation; with manipulation.
1	27520	Treatment of closed patellar fracture, without manipulation.
1	27530	Treatment of closed tibial fracture, proximal (plateau); without manipulation.
1	27538	Treatment of closed intercondylar spine(s) fracture(s) of knee.
1	27550	Treatment of closed knee dislocation; without anesthesia.
1	27560	Treatment of closed patellar dislocation; without anesthesia.
		Incision
2	27604	Incision and drainage, leg or ankle, infected bursa.
		Excision
1	27613	Biopsy, soft tissue of leg or ankle area; superficial.
2	27614	Biopsy, soft tissue of leg or ankle area; deep.
3	27615	Radical resection of tumor (eg, malignant neoplasm), soft tissue of leg or ankle area.
2	27618	Excision, tumor, leg or ankle area; subcutaneous.
3	27619	Excision, tumor, leg or ankle area; deep, subfascial or intramuscular.
4	27625	Arthrotomy, ankle, for synovectomy.
4	27626	Arthrotomy, ankle, for synovectomy; including tenosynovectomy.
		Repair, Revision or Reconstruction
3	27687	Gastrocnemius recession (eg, Strayer procedure).
2	27695	Suture, primary, torn, ruptured or severed ligament, ankle; collateral.
2	27696	Suture, primary, torn, ruptured or severed ligament, ankle; both collateral ligaments.
2	27698	Suture, secondary repair, torn, ruptured or severed ligament, ankle; collateral (eg, Watson-Jones procedure).
5	27700	Arthroplasty, ankle.
2	27704	Removal of ankle implant.
2	27705	Osteotomy; tibia.
2	27707	Osteotomy; fibula.
2	27709	Osteotomy; tibia and fibula.
4	27715	Osteotomy; tibia and fibula, lengthening.
2	27730	Epiphyseal arrest by epiphysiodesis or stapling; distal tibia.
2	27732	Epiphyseal arrest by epiphysiodesis or stapling; distal fibula.
2	27734	Epiphyseal arrest by epiphysiodesis or stapling; distal tibia and fibula.
2	27740	Epiphyseal arrest by epiphysiodesis or stapling; combined, proximal and distal tibia and fibula.
2	27742	Epiphyseal arrest by epiphysiodesis or stapling; combined, proximal and distal tibia and fibula and distal femur.
3	27745	Prophylactic treatment (nailing, pinning, plating or wiring); with or without methylmethacrylate; tibia.
		Fractures and/or Dislocations
1	27750	Treatment of closed tibial shaft fracture; without manipulation.
1	27752	Treatment of closed tibial shaft fracture; with manipulation.
2	27754	Treatment of open tibial shaft fracture; with uncomplicated soft tissue closure.
1	27760	Treatment of closed distal tibial fracture (medial malleous); without manipulation.
1	27762	Treatment of closed distal tibial fracture (medial malleous); with manipulation.
1	27780	Treatment of closed proximal fibula or shaft fracture; without manipulation.
1	27786	Treatment of closed distal tibial fracture (lateral malleous); without manipulation.
1	27788	Treatment of closed distal tibial fracture (lateral malleous); with manipulation.
1	27800	Treatment of closed tibia and fibula fractures, shafts; without manipulation.
1	27808	Treatment of closed bimalleolar ankle fracture (including potts); without manipulation.
1	27810	Treatment of closed bimalleolar ankle fracture (including potts); with manipulation.
2	27812	Treatment of open bimalleolar ankle fracture with uncomplicated soft tissue closure.
3	27814	Open treatment of closed or open bimalleolar ankle fracture, with or without internal skeletal fixation.
1	27816	Treatment of closed trimalleolar ankle fracture; without manipulation.
1	27818	Treatment of closed trimalleolar ankle fracture; with manipulation.
2	27820	Treatment of open trimalleolar ankle fracture; with uncomplicated soft tissue closure.
3	27822	Open treatment of closed or open trimalleolar ankle fracture; with or without internal or external skeletal fixation, medial and/or lateral malleolus; only.
3	27823	Open treatment of closed or open trimalleolar ankle fracture, with or without internal or external skeletal fixation, medial and/or lateral malleolus; including internal skeletal fixation of posterior lip (malleolus).
1	27830	Treatment of proximal tibiofibular joint dislocation; without anesthesia.
1	27831	Treatment of proximal tibiofibular joint dislocation; requiring anesthesia.
2	27832	Open treatment of proximal tibiofibular joint dislocation with fixation or excision.
1	27840	Treatment of ankle dislocation; without anesthesia.
		Arthrodesis
4	27870	Arthrodesis, ankle, any method.
4	27871	Arthrodesis, tibiofibular joint, proximal or distal.
		Amputation
3	27884	Amputation leg, through tibia and fibula; secondary closure or scar revision.
		Foot
		Incision
2	28020	Arthrotomy, with exploration, drainage or removal of loose or foreign body; intertarsal or tarsometatarsal joint.
		Excision
2	28043	Excision, tumor, foot; subcutaneous.
3	28046	Radical resection of tumor (eg, malignant neoplasm), soft tissue of foot.
2	28054	Arthrotomy for synovial biopsy; interphalangeal joint.

VOL 56 ISS 251 DE 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
2	28060	Fasciectomy, excision of plantar fascia; partial (separate procedure).
3	28070	Synovectomy; intertarsal or tarsometatarsal joint, each.
2	28100	Excision or curettage of bone cyst or benign tumor, talus or calcaneus.
2	28104	Excision or curettage of bone cyst or benign tumor, tarsal or metatarsal bones, except talus or calcaneus.
3	28106	Excision or curettage of bone cyst or benign tumor, tarsal or metatarsal bones, except talus or calcaneus; with iliac or other autograft (includes obtaining graft).
3	28118	Ostectomy, excision of tarsal coalition.
4	28119	Ostectomy, calcaneus for spur, with or without plantar fascial release.
3	28130	Talectomy (astragalectomy).
2	28150	Phalangectomy of toe, single, each.
		Introduction and/or Removal
2	28192	Removal of foreign body, foot; deep.
		Repair, Revision or Reconstruction
2	28236	Transfer of tendon, anterior tibial into tarsal bone.
3	28238	Advancement of posterior tibial tendon with excision of accessory navicular bone (Kidner type procedure).
2	28240	Tenotomy, lengthening, or release, abductor hallucis muscle.
4	28262	Capsulotomy, midfoot; extensive, including posterior talotibial capsulotomy and tendon(s) lengthening as for resistant clubfoot deformity.
2	28280	Webbing operation (create syndactylism of toes) for soft corn (Kelikian type procedure).
3	28288	Ostectomy, partial, exostectomy or condylectomy, single, metatarsal head, first through fifth, each metatarsal head, (separate procedure)
2	28300	Osteotomy; calcaneus (Dwyer or Chambers type procedure), with or without internal fixation.
2	28302	Osteotomy; talus.
2	28304	Osteotomy, midtarsal bones, other than calcaneus or talus.
3	28305	Osteotomy, midtarsal bones, other than calcaneus or talus; with autograft (includes obtaining graft) (Fowler type).
4	28309	Osteotomy, metatarsals, multiple, for cavus foot (Swanson type procedure).
2	28313	Reconstruction, angular deformity of toe (overlapping second toe, fifth toe, curly toes), soft tissue procedures only.
		Fracture and/or Dislocation
1	28400	Treatment of closed calcaneal fracture; without manipulation.
3	28410	Treatment of open calcaneal fracture, with uncomplicated soft tissue closure.
3	28415	Open treatment of closed or open calcanesi fracture, with or without internal or external skeletal fixation.
3	28440	Treatment of open talus fracture, with uncomplicated soft tissue closure.
3	28445	Open treatment of closed or open talus fracture, with or without internal skeletal fixation.
3	28460	Treatment of open tarsal bone fracture (except talus and calcaneus), with uncomplicated soft tissue closure, each.
2	28476	Treatment of closed metatarsal fracture; with manipulation and percutaneous pinning, each.
3	28480	Treatment of open metatarsal fracture, with uncomplicated soft tissue closure, each.
2	28496	Treatment of closed fracture great toe, phalanx or phalanges; with manipulation and percutaneous pinning.
1	28635	Treatment of closed metatarsophalangeal joint dislocation; requiring anesthesia.
3	28640	Treatment of open metatarsophalangeal joint dislocation, with uncomplicated soft tissue closure.
1	28665	Treatment of closed interphalangeal joint dislocation; requiring anesthesia.
		Arthrodesis
4	28705	Pantalar arthrodesis.
4	28715	Triple arthrodesis.
4	28725	Subtalar arthrodesis.
4	28730	Arthrodesis, midtarsal or tarsometatarsal, multiple or transverse.
4	28735	Arthrodesis, midtarsal or tarsometatarsal, multiple or transverse; with osteotomy as for flatfoot correction.
5	28737	Arthrodesis, midtarsal navicular-cuneiform, with tendon lengthening and advancement (Miller type procedure).
4	28740	Arthrodesis, midtarsal or tarsometatarsal, single joint.
		Arthroscopy
3	29815	Arthroscopy, shoulder, diagnostic, with or without synovial biopsy (separate procedure).
3	29819	Arthroscopy, shoulder, surgical; with removal of loose body or foreign body.
3	29820	Arthroscopy, shoulder, surgical; synovectomy, partial.
3	29821	Arthroscopy, shoulder, surgical; synovectomy, complete.
3	29822	Arthroscopy, shoulder, surgical; debridement, limited.
3	29823	Arthroscopy, shoulder, surgical; debridement, extensive.
3	29825	Arthroscopy, shoulder, surgical; with lysis and resection of adhesions with or without manipulation.
3	29830	Arthroscopy, elbow, diagnostic, with or without synovial biopsy (separate procedure).
3	29834	Arthroscopy, elbow, surgical; with removal of loose body or foreign body.
3	29835	Arthroscopy, elbow, surgical; synovectomy, partial.
3	29836	Arthroscopy, elbow, surgical; synovectomy, complete.
3	29837	Arthroscopy, elbow, surgical; debridement, limited.
3	29838	Arthroscopy, elbow, surgical; debridement, extensive.
3	29840	Arthroscopy, wrist, diagnostic, with or without synovial biopsy (separate procedure).
3	29843	Arthroscopy, wrist, surgical; for infection, lavage and drainage.
3	29844	Arthroscopy, wrist, surgical; synovectomy, partial.
3	29845	Arthroscopy, wrist, surgical; synovectomy, complete.
3	29846	Arthroscopy, wrist, surgical; excision of triangular fibrocartilage and/or joint debridement.
3	29847	Arthroscopy, wrist, surgical; internal fixation for fracture or instability.
4	29880	Arthroscopy, knee, surgical; with meniscectomy (medial and lateral, including any meniscal shav.
3	29882	Arthroscopy, knee, surgical; with meniscus repair (medical and lateral).
3	29885	Arthroscopy, knee, surgical drilling for osteochondritis dissecans with bone grafting; with or without internal fixation (including debridement of base of lesion).
3	29888	Arthroscopically aided anterior cruciate ligament repair/augmentation or reconstruction.
3	29889	Arthroscopically aided posterior cruciate ligament repair/augmentation or reconstruction.
3	29894	Arthroscopy, ankle (tibiotalar and fibulotalar joints), surgical; with removal or loose body or foreign body.
3	29895	Arthroscopy, ankle (tibiotalar and fibulotalar joints), surgical synovectomy, partial.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
3	29897	Arthroscopy, ankle (tibiotalar and fibulotalar joints), surgical; debridement, limited.
3	29898	Arthroscopy, ankle (tibiotalar and fibulotalar joints), surgical; debridement, extensive.
		Respiratory System
		Nose
		Excision
1	30120	Excision or surgical planing of skin of nose for rhinophyma.
1	30124	Excision dermoid cyst, nose; simple, skin, subcutaneous.
		Repair
5	30540	Repair choanal atresia; intranasal
2	30560	Lysis intranasal synechia.
		Other Pocedures
1	30820	Cryosurgery of turbinates, unilateral or bilateral.
1	30903	Control nasal hemorrhage, anterior, complex (cauterization with local anesthesia and packing).
1	30905	Control nasal hemorrhage, posterior, with posterior nasal packs and/or cauterization; initial.
1	30906	Control nasal hemorrhage, posterior, with posterior nasal packs and/or cauterization; subsequent.
		Accessory Sinuses
		Incision
2	31050	Sinusotomy, sphenoid, with or without biopsy.
4	31051	Sinusotomy, sphenoid, with or without biopsy; with mucosal stripping or removal of polyp(s).
4	31075	Sinusotomy frontal; transorbital, unilateral (for mucocele or osteoma, lynch type).
4	31080	Sinusotomy frontal; obliterative without osteoplastic flap, brow incision (includes ablation).
4	31086	Sinusotomy frontal; nonobliterative, with osteoplastic flap, brow incision.
5	30190	Sinusotomy combined, three or more sinuses.
		Endoscopy
2	31252	Nasal endoscopy, surgical; with nasal polypectomy.
3	31254	Nasal endoscopy, surgical; with ethmoidectomy, partial.
5	31255	Nasal endoscopy, surgical; with ethmoidectomy, anterior and posterior (total).
3	31256	Nasal endoscopy, surgical; with maxillary antrostomy.
3	31258	Nasal endoscopy, surgical; with removal of foreign body(s).
2	31260	Maxillary sinus endoscopy, diagnostic, with or without biopsy.
3	31263	Maxillary sinus endoscopy, surgical; with removal of foreign body(s).
3	31265	Maxillary sinus endoscopy, surgical; with removal of cyst.
3	31267	Maxillary sinus endoscopy, surgical; with removal of mucous membrane and/or polyps.
3	31268	Maxillary sinus endoscopy, surgical; with removal of fungus ball.
1	31270	Sphenoid endoscopy, diagnostic.
2	31275	Sphenoid endoscopy, surgical, including sphenoidotomy.
3	31277	Sphenoid endoscopy, surgical; with removal of mucous membrane.
		Larynx
		Excision
5	31300	Laryngotomy (thyrotomy, laryngofissure); with removal of tumor or laryngocele, cordectomy.
2	31320	Laryngotomy (thyrotomy, laryngofissure); diagnostic laryngoscopy direct, with or without tracheoscopy; diagnostic, newborn.
		Endoscopy
2	31528	Laryngoscopy direct, with or without tracheoscopy; with dilatation, initial.
2	31529	Laryngoscopy direct, with or without tracheoscopy; with dilatation, subsequent.
5	31580	Laryngoplasty; for laryngeal web, two stage, with keel insertion and removal.
5	31582	Laryngoplasty; for laryngeal stenosis, with graft or core mold, including tracheotomy.
4	31584	Laryngoplasty; with open reduction of fracture.
1	31585	Treatment of closed laryngeal fracture; without manipulation.
2	31586	Treatment of closed laryngeal fracture; with closed manipulative reduction.
5	31588	Laryngoplasty, not otherwise specified (eg, for burns, reconstruction after partial laryngectomy).
5	31590	Laryngeal reinnervation by neuromuscular pedicle.
2	31595	Section recurrent laryngeal nerve, therapeutic (separate procedure), unilateral.
		Trachea and Bronchi
		Endoscopy
2	31629	Bronchoscopy; with transbronchial needle aspiration biopsy.
		Repair
5	31750	Tracheoplasty; cervical.
2	31755	Tracheoplasty; tracheopharyngeal fistulization, each stage.
4	31785	Excision of tracheal tumor or carcinoma; cervical.
		Suture
2	31800	Suture of external tracheal wound or injury; cervical.
1	31820	Surgical closure tracheostomy or fistula; without plastic repair.
2	31825	Surgical closure tracheostomy or fistula; with plastic repair.
2	31830	Revision of tracheostomy scar.

VOL 56 ISS 251 DE 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Lungs and Pleura
		Incision
1	32000	Thoracentesis, puncture of pleural cavity for aspiration, initial or subsequent.
2	32005	Chemical pleurodesis (eg, for recurrent or persistent pneumothorax).
2	32020	Tube thoracostomy with or without water seal (eg, for abscess, hemothorax, empyema) (separate procedure).
		Excision
1	32400	Biopsy, pleura; percutaneous needle.
1	32405	Biopsy, lung or mediastinum, percutaneous needle.
1	32420	Pneumonocentesis, puncture of lung for aspiration.
		Cardiovascular System
		Heart and Pericardium
		Pericardium
2	33010	Pericardiocentesis; initial.
2	33011	Pericardiocentesis; subsequent.
		Arteries and Veins
		Arterial embolectomy or thrombectomy
3	34101	Embolectomy or thrombectomy, with or without catheter: axillary, brachial, innominate, subclavian artery, by arm incision.
		Intra-arterial—intra-aortic
2	36261	Revision of implanted intra-arterial infusion pump.
1	36262	Removal of implanted intra-arterial infusion pump.
		Venous
1	36489	Percutaneous, over age 2.
1	36491	Placement of central venous catheter (subclavian, jugular, or other vein) (eg, for central venous pressure, hyper-alimentation, hemodialysis, or chemotherapy); cutdown, over age 2.
3	36495	Insertion of implantable intravenous infusion pump or venous access port.
2	36496	Revision of implantable intravenous infusion pump or venous access port.
1	36497	Removal of implantable intravenous infusion pump or venous access port.
		Arterial
1	36640	Arterial catheterization for prolonged infusion therapy (chemotherapy), cutdown.
		Intervascular Cannulization or Shunt (Separate Procedure)
3	36800	Insertion of cannula for hemodialysis, other purpose; vein to vein.
3	36810	Insertion of cannula for hemodialysis, other purpose; arteriovenous, external (Scribner type).
3	36815	Insertion of cannula for hemodialysis, other purpose; arteriovenous, external revision or closure.
3	36820	Insertion of Cannula for hemodialysis, other purpose; arteriovenous, internal (Cimino type).
3	36821	Arteriovenous anastomosis, direct, any site; creation of arteriovenous fistula.
4	36825	Autogenous graft.
4	36830	Creation of arteriovenous fistula: nonautogenous graft.
4	36832	Revision of an arteriovenous fistula, with or without thrombectomy, autogenous or nonautogenous graft.
4	36835	Insertion of Thomas shunt.
4	36840	Insertion mandril.
4	36845	Anastomosis mandril.
2	36860	Cannula declotting; without balloon catheter.
3	36861	Cannula declotting; with balloon catheter.
		Hemic and Lymphatic Systems
		Lymph Nodes and Lymphatic Channels
		Incision
1	38300	Drainage of lymph node abscess or lymphadenitis, simple.
		Excision
1	38505	Biopsy or excision of lymph node(s); by needle, superficial (eg, cervical, inguinal, axillary).
2	38525	Biopsy or excision of lymph node(s); deep axillary node(s).
		Digestive System
		Vestibule of Mouth
		Incision
1	40806	Incision of labial frenum (frenotomy).
		Excision, Destruction
1	40819	Excision of frenum, labial or buccal (frenumectomy, frenulectomy, frenectomy).
1	40820	Destruction of lesion or scar of vestibule of mouth by physical methods (eg, laser, thermal, cryo, chemical).
		Tongue, Floor of Mouth
		Incision
1	41006	Intraoral incision and drainage of abscess, cyst, or hematoma of tongue or floor of mouth; sublingual, deep, supramylohyoid.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
1	41007	Intraoral incision and drainage of abscess, cyst, or hematoma of tongue or floor of mouth; submental space.
1	41008	Intraoral incision and drainage of abscess, cyst, or hematoma of tongue or floor of mouth; submandibular space.
1	41009	Intraoral incision and drainage of abscess, cyst, or hematoma of tongue or floor of mouth; masticator space.
1	41010	Incision of lingual frenum (frenotomy).
1	41015	Extraoral incision and drainage of abscess, cyst, or hematoma of floor of mouth; sublingual.
1	41016	Extraoral incision and drainage of abscess, cyst, or hematoma of floor of mouth; submental.
1	41017	Extraoral incision and drainage of abscess, cyst, or hematoma of floor of mouth; submandibular.
1	41018	Extraoral incision and drainage of abscess, cyst, or hematoma of floor of mouth; masticator space.
		Excision
1	41110	Excision of lesion of tongue without closure.
2	41112	Excision of lesion of tongue with closure; anterior two-thirds.
2	41113	Excision of lesion of tongue with closure; posterior one-third.
		Repair
2	41250	Repair of laceration 2.5 cm or less; floor of mouth and/or anterior two-thirds of tongue.
2	41252	Repair of laceration of tongue, floor of mouth, over 2.6 cm or complex.
		Other Procedures
1	41500	Fixation of tongue, mechanical, other than suture (eg, k-wire).
1	41510	Suture of tongue to lip for micrognathia (Douglas type procedure).
2	41520	Frenoplasty (surgical revision of frenum, eg, with z-plasty).
		Dentoalveolar Structures
		Incision
1	41800	Drainage of abscess, cyst, hematoma from dentoalveolar structures.
1	41805	Removal of embedded foreign body from dentoalveolar structures soft tissues.
		Palate, Uvula
		Excision, Destruction
5	42145	Palatopharyngoplasty (eg, uvulopalatopharyngoplasty, uvulopharyngoplasty).
1	42160	Destruction of lesion, palate or uvula (thermal, cryo or chemical).
		Repair
1	42180	Repair, laceration of palate; up to 2 cm.
5	42200	Palatoplasty for cleft palate, soft and/or hard palate only.
5	42205	Palatoplasty for cleft palate, with closure of alveolar ridge; soft tissue only.
5	42210	Palatoplasty for cleft palate, with closure of alveolar ridge; with bone graft to alveolar ridge (includes obtaining graft).
7	42215	Palatoplasty for cleft palate; major revision.
5	42220	Palatoplasty for cleft palate; secondary lengthening procedure.
5	42225	Palatoplasty for cleft palate; attachment pharyngeal flap.
5	42235	Repair of anterior palate, including vomer flap.
4	42260	Repair of nasolabial fistula.
3	42281	Insertion of pin-retained palatal prosthesis.
		Salivary Gland and Ducts
		Incision
1	42300	Drainage of abscess; parotid, simple.
1	42310	Drainage of abscess; submaxillary or sublingual, intraoral.
		Excision
2	42405	Biopsy of salivary gland; incisional.
3	42409	Marsupialization of sublingual salivary cyst (ranula).
7	42420	Excision of parotid tumor or parotid gland; total, with dissection and preservation of facial nerve.
7	42425	Excision of parotid tumor or parotid gland; total, en bloc removal with sacrifice of facial nerve.
		Repair
4	42510	Parotid duct diversion, bilateral (Wilke type procedure); with ligation of both submandibular (Wharton's) ducts.
		Pharynx, Adenoids, and Tonsils
		Incision
1	42700	Incision and drainage abscess; peritonsillar
		Excision
1	42802	Biopsy; hypopharynx.
1	42804	Biopsy; nasopharynx, visible lesion, simple.
5	42821	Tonsillectomy and adenoidectomy; age 12 or over.
4	42826	Tonsillectomy, primary or secondary; age 12 or over.
4	42831	Adenoidectomy, primary; age 12 or over.
4	42836	Adenoidectomy, secondary; age 12 or over.
		Other Procedures
1	42960	Control oropharyngeal hemorrhage, primary or secondary (eg, posttonsillectomy); simple.
2	42962	Control oropharyngeal hemorrhage, primary or secondary (eg, posttonsillectomy); with secondary surgical intervention.

VOL 56 ISS 251 DEC 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Esophagus
		Endoscopy
1	43234	Upper gastrointestinal endoscopy, simple primary examination (eg, with small diameter flexible fiberscope).
2	43241	Upper gastrointestinal endoscopy, including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; with transendoscopic tube or catheter placement.
2	43243	Upper gastrointestinal endoscopy, including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for injection sclerosis of esophageal and/or gastric varices.
2	43245	Upper gastrointestinal endoscopy, including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for dilation of gastric outlet for obstruction.
2	43246	Upper gastrointestinal endoscopy, including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for directed placement of percutaneous gastrostomy tube.
2	43265	Endoscopic retrograde cholangiopancreatography (ERCP), with or without biopsy and/or collection of specimen; for destruction lithotripsy of stone, any method.
2	43267	Endoscopic retrograde cholangiopancreatography (ERCP), with or without biopsy and/or collection of specimen; for insertion of nasobiliary or nasopancreatic drainage tube.
2	43268	Endoscopic retrograde cholangiopancreatography (ERCP), with or without biopsy and/or collection of specimen; for insertion of tube or stent into bile or pancreatic duct.
2	43269	Endoscopic retrograde cholangiopancreatography (ERCP), with or without biopsy and/or collection of specimen; for removal and/or change of tube, stent or foreign body.
2	43271	Endoscopic retrograde cholangiopancreatography (ERCP), with or without biopsy and/or collection of specimen; for balloon dilation of ampulla, biliary or pancreatic duct.
2	43272	Endoscopic retrograde cholangiopancreatography (ERCP), with or without biopsy and/or collection of specimen; for ablation of tumor or mucosal lesion (eg, laser, hot biopsy/fulguration).
		Stomach
		Excision
1	43600	Biopsy of stomach; by capsule, tube, peroral (one or more specimens).
		Introduction
2	43750	Percutaneous placement of gastrostomy tube.
1	43760	Change of gastrostomy tube.
		Suture
1	43870	Closure of gastrostomy, surgical.
		Intestines (Except Rectum)
		Excision
1	44100	Biopsy of intestine by capsule, tube, peroral (one or more specimens).
		Enterostomy—External Fistulization of Intestines (Separate Procedure)
1	44312	Revision of ileostomy; simple (release of superficial scar).
		Endoscopy, Small Bowel and Stoma
2	44372	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; for placement of percutaneous jejunostomy tube.
2	44373	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; for conversion of percutaneous gastrostomy tube to percutaneous jejunostomy tube.
1	44385	Fiberoptic evaluation of small intestinal (Kock) or pelvic pouch.
1	44386	Fiberoptic evaluation of small intestinal (Kock) or pelvic pouch; for biopsy and/or collection of specimen by brushing or washing.
1	44393	Fiberoptic colonoscopy through colostomy; for ablation of tumor or mucosal lesion (eg, laser, hot biopsy/fulguration).
		Rectum
		Excision
1	45100	Biopsy of anorectal wall, anal approach (eg, congenital megacolon).
2	45108	Anorectal myomectomy.
1	45150	Division of structure of rectum.
		Endoscopy
1	45305	Proctosigmoidoscopy; for biopsy.
1	45307	Proctosigmoidoscopy; for removal of foreign body.
1	45310	Proctosigmoidoscopy; for removal of polyp or papilloma.
1	45315	Proctosigmoidoscopy; for removal of multiple excrescences, papillomata or polyps.
1	45317	Proctosigmoidoscopy; for control of hemorrhage (eg, electrocoagulation, laser photocoagulation).
1	45320	Proctosigmoidoscopy; for ablation of tumor (eg, electrocoagulation, photocoagulation, hot biopsy/fulguration).
1	45321	Proctosigmoidoscopy; for decompression of volvulus.
1	45332	Sigmoidoscopy, flexible fiberoptic; for removal of foreign body.
1	45336	Sigmoidoscopy, flexible fiberoptic; for ablation of tumor or mucosal lesion (eg, electrocoagulation, photocoagulation, hot biopsy/fulguration).
1	45337	Sigmoidoscopy, flexible fiberoptic for decompression of volvulus.
		Manipulation
1	45905	Dilation of anal sphincter (separate procedure) under anesthesia other than local.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Anus
		Incision
1	46030	Removal of anal seton, other marker.
1	46050	Incision and drainage, perianal abscess, superficial.
		Excision
2	46210	Cryptectomy single.
1	46220	Papillectomy or excision of single tag, anus (separate procedure).
		Endoscopy
1	46606	Anoscopy; for removal of foreign body.
1	46610	Anoscopy; for removal of polyp.
1	46612	Anoscopy; for multiple polyp removal.
		Repair
3	46700	Anoplasty, plastic operation for stricture; adult.
		Destruction
1	46922	Destruction of lesion(s), anus, (eg, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), simple; surgical excision.
		Biliary Tract
		Introduction
2	47510	Introduction of percutaneous transhepatic catheter or stent for biliary drainage.
1	47525	Change of percutaneous biliary drainage catheter.
1	47530	Revision and/or reinsertion of transhepatic T-tube.
		Endoscopy
2	47552	Biliary endoscopy, percutaneous via T-tube or other tract; diagnostic.
3	47553	Biliary endoscopy, percutaneous via T-tube or other tract for biopsy and/or collection of specimen by brushing or washing.
3	47554	Biliary endoscopy, percutaneous via T-tube or other tract for removal of stone(s).
3	47555	Biliary endoscopy, percutaneous via T-tube or other tract for dilation of biliary duct stricture.
		Excision
3	47630	Biliary duct stone extraction, percutaneous via T-tube tract, basket or snare (eg, Burhenne technique).
		Pancreas
		Excision
1	48102	Biopsy of pancreas, percutaneous needle.
		Abdomen, Peritoneum, and Omentum
		Incision
2	49080	Peritoneocentesis, abdominal paracentesis, or peritoneal lavage; initial.
2	49081	Peritoneocentesis, abdominal paracentesis, or peritoneal lavage; subsequent.
2	49085	Removal of peritoneal foreign body from peritoneal cavity.
		Excision and Destruction
1	49180	Biopsy, abdominal or retroperitoneal mass, percutaneous needle.
		Urinary System
		Kidney
		Introduction
1	50395	Introduction of guide into renal pelvis and/or ureter; with dilation to establish nephrostomy tract, percutaneous.
		Suture
1	50520	Closure of nephrocutaneous or pyelocutaneous fistula.
		Endoscopy
1	50551	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service.
1	50555	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with biopsy.
1	50557	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with fulguration and/or incision, with or without biopsy.
1	50574	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with biopsy.
		Other Procedures
9	50590	Lithotripsy, extracorporeal shock wave.
		Ureter
1	50685	Change of ureterostomy tube.
		Endoscopy
1	50951	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service.

VOL 56 ISS 251 DEC 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Bladder
		Incision
4	51020	Cystotomy or cystostomy; with fulguration and/or insertion of radioactive material.
4	51030	Cystotomy or cystostomy; with cryosurgical destruction of ravesical lesion.
4	51045	Cystotomy, with insertion of ureteral catheter or stent (separate procedure).
		Excision
4	51500	Excision of urachal cyst or sinus, with or without umbilical hernia repair.
		Urodynamics
1	51725	Simple cystometrogram (CMG) (eg, spinal manometer).
1	51726	Complex cystometrogram (eg, calibrated electronic equipment).
1	51772	Urethral pressure profile studies (UPP) (urethral closure pressure profile), any technique.
1	51785	Electromyography studies (EMG) of anal or urethral sphincter, any technique.
		Repair
1	51840	Closure of cystostomy (separate procedure).
3	51920	Closure of vesicouterine fistula.
		Transurethral Surgery (Ureter and Pelvis)
4	52325	Cystourethroscopy (including ureteral catheterization); with fragmentation of ureteral calculus (eg, ultrasonic or electrohydraulic technique).
3	52334	Cystourethroscopy with insertion of ureteral guide wire through kidney to establish a percutaneous nephrostomy, retrograde.
3	52336	Cystourethroscopy, with ureteroscopy and/or pyeloscopy (includes dilation of the ureter by any method); with removal or manipulation of calculus (ureteral catheterization is included).
4	52337	Cystourethroscopy, with ureteroscopy and/or pyeloscopy (includes dilation of the ureter by any method); with lithotripsy (ureteral catheterization is included).
4	52338	Cystourethroscopy, with ureteroscopy and/or pyeloscopy (includes dilation of the ureter by any method); with biopsy and/or fulguration of lesion.
		Urethra
		Excision
1	53200	Biopsy of urethra.
5	53210	Urethrectomy, total, including cystostomy; female.
5	53215	Urethrectomy, total, including cystostomy; male.
2	53250	Excision of bulbourethral gland (Cowper's gland).
2	53260	Excision of fulguration; urethral polyp(s), distal urethra.
		Repair
1	53442	Removal of perineal prosthesis introduced for continence.
		Suture
2	53505	Urethrorrhaphy, suture of urethral wound or injury; penile.
		Destruction
1	54057	Destruction of lesion(s), penis (eg, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), simple; laser surgery.
1	54060	Destruction of lesion(s), penis (eg, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), simple; surgical excision.
1	54065	Destruction of lesion(s), penis (eg, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), extensive, any method.
		Excision
1	54100	Biopsy of penis; cutaneous (separate procedure).
		Repair
3	54300	Plastic operation of penis for straightening of chordee (eg, hypospadias), with or without mobilization of urethra.
3	54360	Plastic operation on penis to correct angulation.
4	54420	Corpora cavernosa-saphanous vein shunt (priapism operation), unilateral or bilateral.
4	54435	Corpora cavernosa-glans penis fistulization (eg, biopsy needle, winter procedure, rongeur, or punch) for priapism.
		Manipulation
1	54450	Foreskin manipulation including lysis of preputial adhesions and stretching.
		Testis
		Excision
1	54550	Biopsy of testis, needle (separate procedure).
4	54550	Exploration for undescended testis (inguinal or scrotal area).
4	54600	Reduction of torsion of testis, surgical, with or without fixation of contralateral testis.
3	54620	Fixation of contralateral testis (separate procedure).
4	54640	Orchiopexy, any type, with or without hernia repair.
2	54660	Insertion of testicular prosthesis (separate procedure).
		Epididymis
		Excision
1	54800	Biopsy of epididymis, needle.
		Scrotum
		Incision
1	55100	Drainage of scrotal wall abscess.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
2	55110	Scrotal exploration.
		VAS Deferens
		Incision
2	55200	Vasotomy, cannulization with or without incision of VAS, unilateral or bilateral (separate procedure).
		Seminal Vesicles
		Incision
1	55600	Vesiculotomy.
		Female Genital System
		Perineum
		Excision
1	56100	Biopsy of perineum (separate procedure).
		Repair
5	56200	Perineoplasty, repair of perineum, nonobstetrical (separate procedure).
		Vulva and introitus
		Excision
5	56620	Vulvectomy; partial (less than 80% of vulvar area).
7	56625	Vulvectomy; complete (skin and subcutaneous tissue).
1	56700	Hymenectomy, partial excision of hymen.
1	56720	Hymenotomy, simple incision.
		Repair
3	56800	Plastic repair of introitus.
		Vagina
		Incision
1	57000	Colpotomy; with exploration.
2	57010	Colpotomy; with drainage of pelvic abscess.
		Destruction
1	57065	Destruction of vaginal lesion(s); extensive, any method.
		Excision
2	57135	Excision of vaginal cyst or tumor.
		Introduction
1	57180	Introduction of any hemostatic agent or pack for spontaneous or traumatic nonobstetrical vaginal hemorrhage (separate procedure).
		Repair
1	57200	Colporrhaphy, suture of injury of vagina (nonobstetrical).
2	57210	Colpoperineorrhaphy, suture of injury of vagina and/or perineum (nonobstetrical).
3	57220	Plastic operation on urethral sphincter, vaginal approach (eg, Kelly urethral plication) (separate procedure).
3	57230	Plastic repair of urethrocele (separate procedure).
5	57240	Anterior colporrhaphy, repair of cystocele with or without repair of urethrocele (separate procedure).
5	57250	Posterior colporrhaphy, repair of rectocele with or without perineorrhaphy.
5	57260	Combined anteroposterior colporrhaphy.
7	57265	Combined anteroposterior colporrhaphy; with enterocele repair.
3	57300	Closure of rectovaginal fistula; vaginal or transanal approach.
3	57310	Closure of urethrovaginal fistula.
4	57311	Closure of urethrovaginal fistula; with bulbocavernosus transplant.
3	57320	Closure of vesicovaginal fistula; vaginal approach.
		Endoscopy
2	57451	Culdoscopy, diagnostic; with biopsy and/or lysis of adhesions or tubal sterilization.
		Cervix Uteri
		Excision
2	57513	Cauterization of cervix; laser surgery.
3	57530	Trachelectomy (cervicectomy), amputation of cervix (separate procedure).
3	57550	Excision of cervical stump, vaginal approach.
		Repair
1	57700	Cerclage of uterine cervix, nonobstetrical.
1	57800	Dilation of cervical canal, instrumental (separate procedure).

VOL 56 ISS 251 DE 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
		Corpus Uteri
		Excision
5	58145	Myomectomy, excision of fibroid tumor of uterus, single or multiple (separate procedure); vaginal approach.
		Ovary
		Incision
3	58800	Drainage of ovarian cyst(s), unilateral or bilateral, (separate procedure), vaginal approach.
3	58820	Drainage of ovarian abscess; vaginal approach.
		Endoscopy-Laparoscopy-Hysteroscopy
1	58990	Hysteroscopy; diagnostic.
		Endocrine System
		Thyroid Gland
		Incision
1	60000	Incision and drainage of thyroglossal cyst, infected.
		Excision
4	60281	Excision of thyroglossal duct cyst or sinus; recurrent.
		Nervous System
		Skull, Meninges, and Brain
		Puncture for Injection, Drainage or Aspiration
1	61055	Cisternal or lateral cervical puncture with injection of drug or other substance for diagnosis or treatment.
		Twist Drill, Burr Hole(s) or Trephine
3	61215	Insertion of subcutaneous reservoir, pump or continuous infusion system for connection to ventricular catheter.
		Stereotaxis
3	61790	Creation of lesion by stereotactic method, percutaneous, by neurolytic agent (eg, alcohol, thermal, electrical, radiofrequency); Gasserian ganglion.
3	61791	Creation of lesion by stereotactic method, percutaneous, by neurolytic agent (eg, alcohol, thermal, electrical, radiofrequency); trigeminal medullary tract.
		Neurostimulators, Intracranial
2	61885	Incision for subcutaneous placement of neurostimulator receiver, direct or inductive coupling.
1	61888	Revision or removal or intracranial neurostimulator receiver.
		CSF Shunt
1	62194	Replacement or irrigation, subarachnoid/subdural catheter.
1	62225	Replacement or irrigation, ventricular catheter.
2	62230	Replacement or revision of CSF shunt, obstructed valve, or distal catheter in shunt system.
2	62256	Removal of complete CSF shunt system; without replacement.
		Spine and Spinal Cord
		Puncture for Injection, Drainage, or Aspiration
1	62268	Percutaneous aspiration, spinal cord cyst or syrinx.
1	62269	Biopsy of spinal cord, percutaneous needle.
1	62272	Spinal puncture, therapeutic, for drainage of spinal fluid (by needle or catheter).
1	62290	Injection of neurolytic substance (eg, alcohol, phenol, iced saline solutions); subarachnoid.
1	62292	Injection of neurolytic substance (eg, alcohol, phenol, iced saline solutions); lumbar or caudal epidural.
3	62294	Injection procedure, arterial, for occlusion of arteriovenous malformation, spinal.
		Stereotaxis
2	63600	Creation of lesion of spinal cord by stereotactic method, percutaneous, any modality (including stimulation and/or recording).
1	63610	Stereotactic stimulation of spinal cord, percutaneous, separate procedure not followed by other surgery.
		Neurostimulators, Spinal
2	63650	Percutaneous implanation of neutrostimulator electrodes; epidual.
1	63660	Revison or removal of spinal neurostimulator electrorodes.
2	63685	Incision for subcutaneous placement of neurostimulator receiver, direct or inductive coupling.
1	63688	Revision or removal of spinal neurostimulator receiver.
		Shunt, Spinal CSF
3	63744	Replacement, irrigation or revision of lumbosubarachnoid shunt.
2	63746	Removal of entire lumbosubrachnoid shunt system without replacement.
4	63750	Insertion, subarachnoid cathereter with reservoir and/or pump for intermittent or continous infusion of drug, including laminectomy.
2	63760	Insertion, subarachnoid or epidual catheter, with reservoir and/or pump for drug infusion, without laminectomy.
		Extracranial Nerves, Peripheral Nerves, and Autonomic Nervous System
		Introduction/Injection of Anesthetic Agent (Nerve Block), Diagnostic or Therapeutic
		Neurostimulators, Peripheral nerve
1	64575	Incision for implantation of neurostimulator electrodes; peripheral nerve.
2	64590	Incision for subcutaneous placement of neurostimulator receiver, direct or inductive coupling.

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
1	64595	Revision or removal of peripheral neurostimulator receiver.
		Destruction by Neurolytic Agent (eg, Chemical, Thermal, Electrical, Radiofrequency)
		Somatic Nerves
1	64620	Destruction by neurolytic agent; intercostal nerve.
1	64623	Destruction by neurolytic agent; paravertebral facet joint nerve, lumbar, each additional level.
		Sympathetic Nerves
2	64680	Destruction by neurolytic agent, celiac plexus, with or without radiologic monitoring.
		Transection or Avulsion of Nerve
2	64746	Transection or avulsion of phrenic nerve.
2	64771	Transection or avulsion of other cranial nerve, extradural.
		Excision—Somatic Nerves
2	64783	Excision of neuroma; hand or foot, each additional nerve, except same digit (list separately by this number).
3	64792	Excision of neurofibroma or neurolemmoma; extensive (including malignant type).
		Nerve Repair by Suture (Neurorrhaphy)
2	64858	Suture of sciatic nerve.
1	64859	Suture of each additional major peripheral nerve.
3	64861	Suture of brachial plexus.
3	64862	Suture of lumbar plexus.
3	64864	Suture of facial nerve; extracranial.
4	64865	Suture of facial nerve; intratemporal, with or without grafting.
4	64870	Anastomosis; facial-phrenic.
		Eye and Ocular Adnexa
		Eyeball
		Removal of Eye
7	65112	Exenteration of orbit (does not include skin graft), removal of orbital contents; with therapeutic removal of bone.
7	65114	Exenteration of orbit (does not include skin graft), removal of orbital contents; with temporalis muscle transplant.
		Repair of Laceration of Eyeball
2	65270	Repair of laceration; conjunctiva, with or without nonperforating laceration sclera, direct closure.
4	65275	Repair of laceration; cornea, nonperforating, with or without removal foreign body.
		Anterior Segment—Cornea
		Keratoplasty
7	65755	Keratoplasty (corneal transplant); penetrating.
		Anterior Segment—Anterior Chamber
		Incision
2	65850	Trabeculotomy ab Externo.
		Anterior Segment—Iris, Ciliary Body
		Destruction
2	66702	Ciliary body destruction, any method (eg, diathermy, cyrotherapy, laser, dialysis).
		Removal cataract
4	66852	Removal of lens material; aspiration technique, one or more stages, pars plana approach, with or without vitrectomy.
		Posterior Segment—Vitreous
2	67031	Severing of vitreous strands, vitreous face adhesions, sheets, membranes or opacities, laser surgery (one or more stages).
5	67038	Vitrectomy, mechanical, pars plana approach; with epiretinal membrane stripping.
7	67039	Vitrectomy, mechanical, pars plana approach, with focal endolaser photocoagulation.
7	67040	Vitrectomy, mechanical, pars plana approach; with endolaser panretinal photocoagulation.
		Posterior Segment—Retinal Detachment
		Repair
7	67112	Repair of retinal detachment, one or more sessions; previously operated upon, any technique.
2	67115	Release of encircling material (posterior segment).
2	67121	Removal of implanted material, posterior segment; intraocular.
2	67141	Prophylaxis of retinal detachment (eg, retinal break, lattice degeneration) without drainage, one or more sessions, cryotherapy, diathermy.
		Ocular Adnexa—Extraocular Muscles
4	67314	Strabismus surgery, recession or resection procedure (patient not previously operated on); one vertical muscle excluding superior oblique).
4	67316	Strabismus surgery, recession or resection procedure (patient not previously operated on); two or more vertical muscles (excluding superior oblique).
4	67318	Strabismus surgery, any procedure (patient not previously operated on); superior oblique muscle.
		Ocular Adnexa—Orbit
		Exploration, Excision
5	67420	Orbitotomy with bone flap, lateral approach (eg, Kroenlein); with removal of lesion.

VOL 56 ISS 251 DEC 31 1991 UMI

ADDITIONS TO COVERED PROCEDURES IN AMBULATORY SURGICAL CENTERS (ASCS)—Continued

Payment GRP	CPT code	Description
5	67430	Orbitotomy with bone flap, lateral approach (eg, Kroenlein); with removal of foreign body.
5	67440	Orbitotomy with bone flap, lateral approach (eg, Kroenlein); with drainage or decompression.
5	67450	Orbitotomy with bone flap, lateral approach (eg, Kroenlein); for exploration, with or without biopsy.
		Ocular Adnexa—Eyelids
		Excision or Removal of Lesion Involving More than Skin (ie, Involving Lid Margin, Tarsus, and/or Palpebral Conjunctiva
		Repair Blepharoptosis, Lid Retraction
3	67911	Correction of lid retraction.
		Ocular Adnexa—Conjunctiva
		Conjunctivoplasty
4	68330	Repair of symblepharon; conjunctivoplasty, without graft.
4	68335	Repair of symblepharon; with free graft conjunctiva or buccal mucous membrane (includes obtaining graft).
4	68340	Repair of symblepharon; division of symblepharon with or without insertion of conformer or contact lens.
		Ocular Adnexa—Lacrimal System
		Excision
1	68525	Biopsy of lacrimal sac; probing of nasolacrimal duct, with or without irrigation, unilateral or bilateral; requiring general anesthesia.
		Probing and Related Procedures
2	68825	Probing of nasolacrimal duct, with or without irrigation, unilateral or bilateral; requiring general anesthesia.
		Auditory System
		External Ear
		Removal Foreign Body
1	69205	Removal foreign body from external auditory canal; with general anesthesia.
		Repair
3	69310	Reconstruction of external auditory canal (meatoplasty) (eg, for stenosis due to trauma, infection), (separate procedure).
7	69320	Reconstruction of external auditory canal for congenital atresia, single stage.
		Middle Ear
		Incision
3	69421	Myringotomy including aspiration and/or eustachian tube inflation requiring general anesthesia.
1	69424	Ventilating tube removal when originally inserted by another physician.
3	69436	Tympanostomy (requiring insertion of ventilating tube), general anesthesia.
		Excision
7	69502	Mastoidectomy; complete.
7	69505	Mastoidectomy; modified radical.
7	69511	Mastoidectomy; radical.
7	69530	Petrous apicectomy including radical mastoidectomy.
5	69550	Excision aural glomus tumor; transcanal.
7	69552	Excision aural glomus tumor; transmastoid.
		Repair
7	69601	Revision mastoidectomy; resulting in complete mastoidectomy.
7	69602	Revision mastoidectomy; resulting in modified radical mastoidectomy.
7	69603	Revision mastoidectomy; resulting in radical mastoidectomy.
7	69604	Revision mastoidectomy; resulting in tympanoplasty.
7	69605	Revision mastoidectomy; with apicectomy.
		Other Procedures
3	69710	Implantation or replacement of electromagnetic bone conduction hearing device intemporal bone.
1	69711	Removal or repair of electromagnetic bone conduction hearing device in temporal bone.
		Inner Ear
		Incision, Destruction
5	69801	Labyrinthotomy, with or without cryosurgery or other nonexcisional destructive procedures or tack procedure; transcanal.
7	69802	Labyrinthotomy, with or without cryosurgery or other nonexcisional destructive procedures or tack procedure; with mastoidectomy.
7	69805	Endolymphatic sac operation; without shunt.
7	69806	Endolymphatic sac operation; with shunt.
5	69820	Fenestration semicircular canal.
5	69840	Revision fenestration operation.
		Excision
7	69905	Labyrinthectomy; transcanal.
7	69910	Labyrinthectomy; with mastoidectomy.
7	69915	Vestibular nerve section, translabyrinthine approach.
7	69930	Cochlear device implantation, with or without mastoidectomy.

DELETIONS TO COVERED PROCEDURES IN ASCS

CPT code	
27095	Injection procedure for hip arthrography; with anesthesia.
31578	Irrigation of constrast material for laryngography or bronchography, without catheterization.
41828	Excision of lesion or tumor, dentoalveolar.
42665	Ligation salivary duct, intraoral.
50205	Renal biopsy; percutaneous, by surgical exposure of kidney.
50394	Injection procedure for pyelography.
54205	Injection procedure for peyronie disease with surgical exposure of plaque.
54230	Injection procedure for corpora cavernosography.
57450	Culdoscopy, diagnostic.
64408	Injection, anesthestic agent; vegus nerve.
65230	Removal of foreign body, intraocular; from anterior chamber, magnetic extraction.
65245	Removal of foreign body, intraocular; from lens (without extraction lens), nonmagnetic extraction.
66700	Cyclodiathermy; initial.
66701	Cyclodiathermy; subsequent.
66720	Cyclocryotherapy; initial.
66721	Cyclocryotherapy; subsequent.
66741	Cyclodialysis; subsequent.
66800	Discission of lens capsule; incisional technique (needling of lens), initial.
66801	Discission of lens capsule; incisional technique (needling of lens), subsequent.
66915	Expression of lens, linear, one or more stages.
67312	Strabismus surgery on patient not previously operated on, any procedure, any muscle (may include minor displacement, for example for a or V pattern); three or more muscles, one or both eyes.
69105	Biopsy external auditory canal.
74741	Hysterosalpingography; complete procedure.

ADDEMDUM A.1. PAYMENT GROUP CHANGES FOR SELECT AMBULATORY SURGICAL CENTER (ASC) PROCEDURES COVERED ON SEPTEMBER 30, 1991 [1]

Old pymt grp	New pymt grp	CPT code	Description
			Musculoskeletal System
			Foot.
			Excision
3	7	28120	Partial excision (craterization, saucerization, sequestrectomy, or diaphysectomy) of bone (eg, for osteomyelitis or talar boosing); talus or calcaneus.
			Repair, Revision or Reconstruction
2	3	28293	Hallux valgus (bunion) correction, with or without sesamoidectomy; resection of joint with implant.
			Eye and Ocular Adnexa
			Posterior segment—Retinal detachment.
			Repair
5	7	67106	Repair of retinal detachment, one or more sessions; with vitrectomy, any method, with or without air or gas tamponade, with or without focal endolaser photocoagulation, may include procedures 67101–67107 and/or removal of lens by same technique.
			Ocular Adnexa—Eyelids
			Repair blepharoptosis, lid retraction.
3	4	67903	Repair of blepharoptosis; (tarso) levator resection or advancement, internal approach.
3	4	67907	Repair of blepharoptosis; superior rectus tendon transplant.
3	4	67909	Reduction of overcorrection of ptosis.
			Repair ectropion, entropion.
1	3	67914	Repair of ectropion; suture.
3	4	67917	Repair of ectropion; blepharoplasty, extensive (eg, Kuhnt-Szymanowski operation).
1	3	67921	Repair of entropion; suture.

[1] This addendum provides a listing of payment group changes that are discussed in section 6a. "Appropriateness of Proposed Payment Group Assignment" of this notice which are specific to certain ASC procedures covered on September 30, 1991.

ADDENDUM B.—WAGE INDEX FOR URBAN AREAS

[Areas that Qualify as Large Urban Areas Are Designated with an Asterisk]

10 CFR Part 420

State Energy Conservation Program; Notice of Proposed Rulemaking and Public Hearings

VOL 56 ISS 251 DEC 31 1991 UMI

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

10 CFR Part 420

[Docket No. CE-RM-91-120]

State Energy Conservation Program

AGENCY: Office of Conservation and Renewable Energy, DOE.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Department of Energy (DOE) proposes to amend the regulations for the State Energy Conservation Program (SECP) to incorporate modifications to its enabling legislation occasioned by the passage of the State Energy Efficiency Programs Improvement Act of 1990 (SEEPIA), Public Law 101-440, which amended title III, part D of the Energy Policy and Conservation Act (the Act) (42 U.S.C. 6321 *et seq.*). Changes required by SEEPIA include: Updating State energy efficiency goals; providing for a State energy emergency plan; broadening the range of permissible elements of State Energy Conservation Plans and eliminating the Supplemental State Energy Conservation Plan; and establishing an Energy Technology Commercialization Services Program.

DATES: Written comments (six copies) on the proposed rule must be received no later than February 14, 1992 to ensure their consideration. Two public hearings are scheduled to be held: Washington, DC, on February 4, and Dallas, Texas, on January 29. Requests to speak at the hearing must be received no later than February 3, for Washington, DC, and January 27, for Dallas, Texas.

ADDRESSES: All written comments (six copies), as well as requests to speak at the public hearing, are to be submitted to: U.S. Department of Energy, Office of Conservation and Renewable Energy, Hearings and Dockets, CE-90, room 6B-025, Docket Number CE-RM-91-120, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-3012.

The public hearings will each begin at 8:30 a.m., and will be held at the following locations:

Dallas, Texas: Earle Cabel Federal Building, 1100 Commerce Street, Room 1B16A (1st Floor)

Washington, DC: U.S. Department of Energy, 1000 Independence Avenue, SW., Room 1E-245.

Each person to be heard is requested to bring fifteen copies of his/her statement. In the event any person wishing to testify cannot meet this requirement, alternative arrangements can be made with the Office of Hearings and Dockets in advance by so indicating in the letter or phone request to make an oral presentation.

A transcript of the hearing, as well as other parts of the record, will be available for inspection between the hours of 9 a.m. and 4 p.m., Monday through Friday except Federal holidays at the following address: DOE Freedom of Information Reading Room, United States Department of Energy, room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6020.

For more information concerning public participation in this rulemaking proceeding, see section III, "Opportunity for Public Comment," of this notice.

FOR FURTHER INFORMATION CONTACT:

Sandra S. Monje, State Energy Programs Division, Office of Technical and Financial Assistance, Department of Energy, Mail Stop CE-522, 5E-052, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-8295.

Neal J. Strauss or Vivian Lewis, Office of General Counsel, Conservation and Regulations, Mail Stop GC-41, 6B-256, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9507.

VI. Review Under the Regulatory Flexibility Act
VII. Review Under the Paperwork Reduction Act
VIII. Review Under the National Environmental Policy Act
IX. Other Federal Agencies
X. The Catalog of Federal Domestic Assistance

I. Introduction

The enactment of the State Energy Efficiency Programs Improvement Act of 1990 (SEEPIA), Public Law 101-440, on October 18, 1990, requires changes to the regulations for the State Energy Conservation Program (SECP), which are codified at 10 CFR part 420. With this notice the Department proposes to amend the regulations for the SECP to bring that program into conformance with SEEPIA and to make several minor technical corrections to the existing regulatory language.

The passage of SEEPIA expands the role of the SECP by: broadening the permissible program measures that may be included in the State plan; eliminating the Supplemental State Energy Conservation Plan; and establishing an Energy Technology Commercialization Services Program. SEEPIA also sets new energy efficiency goals and provides for energy emergency planning activities.

II. The Proposal

DOE is proposing to delete all references to "supplemental plans" because SEEPIA repealed section 367 of the Act. In addition DOE proposes to revise references in § 420.6 to "ASHRAE 90-75" to reflect the updating of that standard by the Association of Heating and Refrigeration Engineers (ASHRAE), and to reference the Council of Building Code Officials (CABO) model code that provides design requirements for energy improvements in new residential buildings.

Section 420.1 Purpose and Scope

DOE proposes to revise this section by adding a new paragraph (c) to reflect the SEEPIA requirement for States to plan for a goal of at least a 10 percent increase in energy efficiency from calendar year 1990 to calendar year 2000. A State may choose to establish interim energy efficiency goals as well. This provision should be interpreted in view of explanatory comments contained in the House Committee report on SEEPIA, dated July 30, 1990:

> The expired goal was written in terms of reducing total energy consumption. The new goal contained in this legislation was written in terms of efficiency, not total consumption. Efficiency in this instance means energy consumed per unit of state economic product. This distinction is important because it allows states that are growing to increase their total use of energy while still improving the efficiency with which they use energy. (H. Rept. No. 646, 101st Cong., 2nd Sess. 13 (1990), reprinted in 1990 U.S. Code Cong. & Admin. News 1654).

Section 420.2 Definitions

As noted above, DOE is proposing to delete the definition of "supplemental plan," because the requirements for such a plan was repealed by SEEPIA. DOE also is proposing to delete the definition of "ASHRAE 90-75" and substitute the definition of "ASHRAE/IES 90.1-1989" to reflect the fact that ASHRAE has updated its standard. Definitions would be added for "institution of higher education," "small business," "start-up business," and "State economic product" because these terms have been introduced by SEEPIA. A definition for "commercially available" also would be added because questions concerning its meaning come up from time to time. The term "energy conservation measure" would be deleted because it is used only in reference to "supplemental plans." In addition, all references to "Operations Office Manager" would be replaced with "Support Office Director," to reflect a recent DOE functional realignment.

Section 420.3 Financial Assistance

DOE proposes to delete references to supplemental plans, which no longer exist, and to delete that portion of the allocation formula (subsection c) which applies only to supplemental plans.

Section 420.4 Annual State Plans

As required by SEEPIA, DOE is proposing that States give assurance that Federal financial assistance under this program will be used to supplement and not supplant State and local funds devoted to program activities. The intent of this provision is to increase the amount of funds available for the program, not to offset funds available from other sources.

As mandated by SEEPIA, DOE proposes in § 420.4(b)(6) to require, effective October 1, 1991, that a State shall submit to DOE, as part of its annual State plan, an energy emergency plan as a contingency against an energy supply disruption. The submission of such plan, while mandatory, will be for informational purposes only and without any requirement of approval by DOE. DOE regards this statutory requirement as a self-implementing provision, the language of which is self-explanatory. Should any questions arise, they will be handled by interpretation on a case-by-case basis.

Section 420.6 Minimum Criteria for Required Program Measures for Plans

As indicated earlier, DOE proposes to revise references to ASHRAE 90-75 for commercial and multifamily high-rise buildings to reflect the most recent version of the standard, now designated as ASHRAE/IES 90.1-1989, and for single-family and multifamily low-rise buildings to reference the CABO MEC-89. DOE also is proposing, as prescribed by SEEPIA, to require that States discuss in their annual State plans what procedures they have in effect for ensuring coordination among various local, State, and Federal programs, including any program administered by DOE's Office of Technical and Financial Assistance and the Low Income Home Energy Assistance Program administered by the Department of Health and Human Services.

Section 420.7 Optional Elements of State Energy Conservation Plans

In this section, DOE proposes a significant expansion of optional program measures that may be included in State plans in addition to the five mandatory measures. The expanded list of eligible measures is taken from the statutory language contained in SEEPIA and is, for the most part, self-explanatory. One new optional program measure is an Energy Technology Commercialization Services Program, which is intended by Congress to strengthen State outreach programs to aid small and start-up businesses by fostering a broader application of engineering principles and techniques to energy technology products, manufacturing, and commercial production, as well as greater assistance in dealing with the Federal Government on energy technology related matters. Because a number of States have already successfully implemented such programs, DOE is reluctant to go beyond those requirements imposed on States by SEEPIA. However, DOE would particularly like to receive comments on this section which are informed by actual State experience. States wishing to explore setting up a program of this nature may wish to contact DOE's Inventions and Innovation Division, which has had considerable experience in the commercialization process.

Section 420.12 Prohibited Expenditures

DOE proposes to revise this section to conform its language to the provisions of new § 420.7. The "33 percent limitation" on building retrofit and weatherization measures remains with one exception. The 33 percent limitation will not apply in the case of regular and revolving loan programs, funded with petroleum violation escrow funds, that issue loans requiring repayment within 10 years or less. Additionally, DOE is proposing correction of two typographical errors: In § 420.12(c), removing the reference to § 420.12(a)(6) and replacing it with the corrected reference, § 420.12(a)(5); and in § 420.12(e)(4), correcting the word "find" to read "fund."

III. Opportunity for Public Comment

A. Written Comment Procedures

Interested persons are invited to participate in this rulemaking by submitting data, views or arguments with respect to the matters set forth in this notice.

Comments (6 copies) should be identified on the outside of the envelope, and on the documents themselves, with the designation: "State Energy Conservation Program, Notice of Proposed Rulemaking, Docket Number CE-RM-91-120. Six copies should be submitted. In the event any person wishing to submit a written comment cannot provide six copies, alternative arrangements can be made in advance with the Hearings and Dockets Office.

Any person submitting information which that person believes to be confidential, and which may be exempt by law from public disclosure, should submit one complete copy, as well as two copies from which the information claimed to be confidential has been deleted. DOE shall make a determination of any such claim as set forth in 10 CFR 1004.11 [53 FR 15661, May 3, 1988].

B. Public Hearing Procedures

DOE will hold two public hearings on this proposed rule on the dates and at the locations indicated in the "**ADDRESSES**" section of this notice.

Any person who has an interest in the proposed regulation or who is a representative of a group or class of persons which has an interest in it may make a request for an opportunity to make an oral presentation. Request to speak at a hearing should be addressed to the Hearings and Dockets Office, at the address or phone number indicated in the "**ADDRESSES**" section of this notice.

The person making the request should briefly describe his or her interest in the proceedings and, if appropriate, state why that person is a proper representative of a group. The person also should provide a phone number where they may be reached during the day. Each person selected to speak at a public hearing will be notified. They should bring fifteen copies of their statement to the hearing. In the event any person wishing to testify cannot meet this requirement, alternative arrangements can be made in advance with the Hearings and Dockets Office by so indicating in the letter or phone call requesting an opportunity to make an oral presentation.

DOE reserves the right to select persons to be heard at the hearings, to schedule their presentations, and to establish procedures governing the conduct of the hearing. The length of each presentation will be limited to ten minutes.

A DOE official will preside at the hearing. This will not be a judicial or evidentiary-type hearing, but conducted in accordance with 5 U.S.C. 553. At the conclusion of all initial oral statements, each person will be given the opportunity to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made.

Any participant who wishes to ask a question at the hearing may submit the question in writing to the registration

VOL 56 ISS 251 DEC 31 1991 UMI

desk. The presiding officer will determine whether the question is relevant and material, and whether the time limitations permit it to be presented for an answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

If DOE must cancel a hearing, DOE will make every effort to publish an advance notice of such cancellation in the **Federal Register**. Notice of cancellation will also be given to all persons scheduled to speak at the hearing. Hearing dates may be canceled in the event no public testimony has been scheduled in advance.

IV. Review Under Executive Order 12291

Today's regulatory amendments were reviewed under Executive Order 12291. DOE has concluded that the rule is not a "major rule" because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographical regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete in domestic export markets. In accordance with the requirements of the Executive Order, this notice has been reviewed by the Office of Management and Budget.

V. Review Under Executive Order 12612

Executive Order 12612 requires that regulations be reviewed for any substantial direct effects on States, on the relationship between the national government and the States, or on the distribution of power among various levels of government. If there are sufficient substantial direct effects, the Executive Order requires preparation of a federalism assessment to be used in decisions by senior policy-makers in promulgating or implementing the regulation.

Today's regulatory amendments will not have a substantial direct effect on the traditional rights and prerogatives of States in relationship to the Federal Government. Preparation of a federalism assessment is therefore unnecessary.

VI. Review Under the Regulatory Flexibility Act

These regulations were reviewed under the Regulatory Flexibility Act, Public Law 96–354, which requires preparation of a regulatory flexibility analysis for any regulation that will have a significant economic impact on a substantial number of small entities, i.e., small businesses, small government jurisdictions. DOE has concluded that the rule will affect most of the State and local government operating State energy conservation programs. The impact of the amendments in this rule will be to provide even greater flexibility to State and local governments to develop and operate their respective programs. Therefore, DOE certifies that there will not be a significant economic impact on a substantial number of small entities, and that preparation of a regulatory flexibility analysis is not warranted.

VII. Review Under the Paperwork Reduction Act

No new information collection or recordkeeping requirements are imposed on the public by today's rules. However, OMB approval on Energy Savings Report, CD–62, has expired, and the form has been resubmitted for clearance under the Paperwork Reduction Act, 44 U.S.C. 3501, et seq., or implementing regulations at 5 CFR part 1320. Comments on the information collection requirements contained in this rule should be submitted both to: U.S. Department of Energy, Office of Conservation and Renewable Energy, Hearings and Dockets, Docket Number CE–RM–91–120, at the address given earlier in this notice; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention Ron Minsk.

VIII. Review Under the National Environmental Policy Act

DOE has concluded that promulgation of these rules would not represent a major Federal action having a significant impact on the human environment under the National Environmental Policy Act (42 U.S.C. 4321, et seq.), Council of Environmental Quality guidelines (40 CFR parts 1500–1508) and DOE environmental guidelines (10 CFR part 1021). Therefore, no environmental impact statement has been prepared.

IX. Other Federal Agencies

DOE has provided a draft copy of this notice to the Administrator of the Environmental Protection Agency, pursuant to section 7 of the Federal Energy Administration Act, as amended, 15 U.S.C. 766. The Administrator had no comment.

X. The Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance number for the State Energy Conservation Program is 81.041.

List of Subjects in 10 CFR Part 420

Energy conservation, Grant programs—energy, Reporting and recordkeeping requirements, Technical assistance.

For the reasons set forth in the preamble, DOE hereby proposes to amend chapter II of title 10, Code of Federal Regulations, as set forth below:

Issued in Washington, DC, November 5, 1991.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

In 10 CFR, chapter II, part 420 is amended as follows:

PART 420—STATE ENERGY CONSERVATION PROGRAM

1. The authority citation for part 420 is revised to read as follows:

Authority: Title III, part D, as amended, of the Energy Policy and Conservation Act (42 U.S.C. 6321 et seq.); Department of Energy Organization Act (42 U.S.C. 7101 et seq.).

12. The table of contents is revised to read as follows:

Sec.
420.1 Purpose and scope.
420.2 Definitions.
420.3 Financial assistance.
420.4 Annual State applications.
420.5 Review and approval of annual State applications and State plans.
420.6 Minimum criteria for required program measures for plans.
420.7 Optional elements of State energy conservation plans.
420.8 Extensions for compliance with required program measures.
420.9 Administrative review.
420.10 Technical assistance.
420.11 Reports.
420.12 Prohibited expenditures.
420.13 Administration of financial assistance.

3. Section 420.1 is amended by revising paragraph (a) and adding paragraph (c) to read as follows:

§ 420.1 Purpose and scope.

(a) This part prescribes requirements for program measures included in plans and guidelines for the development, modification, and funding of plans. It is the purpose of this part to promote the conservation of energy and to reduce the rate of growth of energy demand through the development and implementation of a comprehensive State energy conservation program and the provision of Federal financial and technical assistance to States in support of such program.

* * * * *

(c) Each State energy conservation plan with respect to which assistance is made available under this part on or after October 1, 1991, shall contain a goal, consisting of an improvement of 10 percent or more in the efficiency of use of energy in the State concerned in the calendar year 2000, as compared to the calendar year 1990, and may contain interim goals.

§ 420.2 [Amended]

4. Section 420.2 is amended by (a) removing the definitions for "ASHRAE 90–75," "Energy conservation measure," "Operations Office Manager," and "Supplemental plan;" and by (b) adding the definitions of "ASHRAE/IES 90.1–1989," "CABO MEC–89," "commercially available," "institution of higher education," "small business," "start-up business," "State economic product," and "Support Office Director" to read as follows:

§ 420.2 Definitions.

* * * * *

ASHRAE/IES 90.1–1989 means the building design standard published in December 1989 by the American Society of Heating, Refrigeration, and Air-Conditioning Engineers, Incorporated, titled "Energy Efficient Design of New Building Except Low-Rise Residential Buildings."

* * * * *

CABO MEC–89 means the model building code published in 1989 by the Council of American Building Officials, titled "CABO Model Energy Code/1989."

* * * * *

Commercially available means available for purchase by the general public or target audience in the State.

* * * * *

Institution of higher education has the same meaning as such term is defined in section 1201(a) of the Higher Education Act of 1965 (20 U.S.C. 1141(a)).

* * * * *

Small business means a private firm that does not exceed the numerical size standard promulgated by the Small Business Administration under section 3(a) of the Small Business Act (15 U.S.C. 632) for the Standard Industrial Classification (SIC) codes designated by the Secretary of Energy.

Start-up business means a small business which has been in existence for 5 years or less.

State economic product means State gross national product (GNP).

Suppport Office Director means the director of a DOE Field Support Office with responsibility for grant administration or any official to whom that function may be redelegated.

§§ 420.3, 420.4, 420.5, 420.8, 420.9, and 420.11 [Amended]

5. In §§ 420.3, 420.4, 420.5, 420.8, 420.9, and 420.11 the words "Operations Office Manager" are changed to read "Support Office Director" in the following places: § 420.3(a); § 420.4 (a), and (c) (2 times); § 420.5 (a) (3 times), and (b) (2 times); § 420.8; § 420.9 (b) (2 times), and (f); and § 420.11 (introductory paragraph).

6. 10 CFR 420.3 is amended by removing paragraph (c), redesignating paragraph (d), (e), and (f) as paragraphs (c), (d), and (e), and revising paragraphs (a), and newly redesignated paragraphs (c), and (e) to read as follows:

§ 420.3 Financial assistance.

(a) The Support Office Director shall provide financial assistance to each State having an approved annual application from funds available for any fiscal year to develop, modify, or implement a plan.

* * * * *

(c) The budget period covered by the financial assistance provided to a State according to § 420.3(b) will be set by the State within parameters established by DOE.

* * * * *

(e) Subawards which are included in a State's approved SECP plan are authorized under this part.

7. Section 420.4 is amended by revising the introductory text to paragraph (b), paragraphs (b)(2)(iv), and (b)(3), and by adding paragraphs (b)(5), (b)(6) and (b)(7) to read as follows:

§ 420.4 Annual State applications.

* * * * *

(b) An application shall include with respect to a plan:

* * * * *

(2) * * *

(iv) An explanation of how the minimum criteria for required program measures prescribed in § 420.6 shall be satisfied.

(3) A detailed description of the increase or decrease in environmental residuals expected from implementation of a plan defined insofar as possible through the use of information to be provided by DOE, and an indication of how these environmental factors were considered in the selection of program measures.

* * * * *

(5) Each State receiving Federal financial assistance pursuant to this section shall provide reasonable assurance to DOE that it has established policies and procedures designed to assure that Federal financial assistance under this part and under 10 CFR part 455 will be used to supplement, and not to supplant, State and local funds, and to the extent practicable, to increase the amount of such funds that otherwise would be available, in the absence of such Federal financial assistance, for those programs set forth in the State energy conservation plan approved pursuant to this part.

(6) Effective October 1, 1991, to be eligible for Federal financial assistance pursuant to this section, a State shall submit to DOE, as a supplement to its energy conservation plan, an energy emergency plan for an energy supply disruption, as designed by the State consistent with applicable Federal and State law. The contingency plan provided for by the program shall include an implementation strategy or strategies (including regional coordination) for dealing with energy emergencies. The submission of such plan shall be for informational purposes only and without any requirement of approval of DOE.

(7) Federal financial assistance made available under this part to a State may be used to develop an energy emergency plan for dealing with energy emergencies referred to in paragraph (b)(6) of this section.

8. Section 420.6 is amended by revising paragraphs (a)(3), (d)(3) and (d)(4), and by adding paragraph (f), to read as follows:

§ 420.6 Minimum criteria for required program measures for plans.

* * * * *

(a) * * *

(3) For new public buildings, be no less stringent than the relevant provisions of ASHRAE/IES 90.1–1989; and

* * * * *

(d) * * *

(3) For all new commercial and multifamily high-rise buildings, be no less stringent than ASHRAE/IES 90.1–1989;

(4) For all new single-family and multifamily low-rise residential buildings, be no less stringent than CABO MEC–1989;

* * * * *

(f) Procedures must exist for ensuring effective coordination among various local, State, and Federal energy conservation programs within the State, including any program administered within the Office of Technical and Financial Assistance of the Department of Energy and the Low Income Home Energy Assistance Program

administered by the Department of Health and Human Services.

8. Section 420.7 is revised to read as follows:

§ 420.7 Optional elements of State energy conservation plans.

(a) Other appropriate measures or programs to conserve and to promote efficiency in the use of energy may be included in the State plan. These measures or programs may include, but are not limited to, the following:

(1) Programs of public education to promote energy conservation;

(2) Programs to increase transportation energy efficiency, including programs to accelerate the use of alternative transportation fuels for State Government vehicles, fleet vehicles, taxis, mass transit, and privately owned vehicles;

(3) Programs for financing energy efficiency and renewable energy capital investments, projects, and programs—

(i) Which may include loan programs and performance contracting programs for leveraging of additional public and private sector funds, and programs which allow rebates, grants, or other incentives for the purchase and installation of eligible energy efficiency and renewable energy measures; or

(ii) In addition to or in lieu of programs described in paragraph (a)(3)(i) of this section, which may be used in connection with public or nonprofit buildings owned and operated by a State, a political subdivision of a State or an agency or instrumentality of a State, or an organization exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1986;

(4) Programs for encouraging and for carrying out energy audits with respect to buildings and industrial facilities (including industrial processes) within the State;

(5) Programs to promote the adoption of integrated energy plans which provide for:

(i) Periodic evaluation of a State's energy needs, available energy resources (including greater energy efficiency), and energy costs, and

(ii) Utilization of adequate and reliable energy supplies, including greater energy efficiency, that meet applicable safety, environmental, and policy requirements at the lowest cost;

(6) Programs to promote energy efficiency in residential housing, such as:

(i) Programs for development and promotion of energy efficiency rating systems for newly constructed housing and existing housing so that consumers can compare the energy efficiency of different housing; and

(ii) Programs for the adoption of incentives for builders, utilities, and mortgage lenders to build, service, or finance energy efficient housing;

(7) Programs to identify unfair or deceptive acts or practices which relate to the implementation of energy efficiency measures and renewable resource energy measures and to educate consumers concerning such acts or practices;

(8) Programs to modify patterns of energy consumption so as to reduce peak demands for energy and improve the efficiency of energy supply systems, including electricity supply systems;

(9) Programs to promote energy efficiency as an integral component of economic development planning conducted by State, local, or other governmental entities or by energy utilities; and

(10) In accordance with paragraph (b) of this section, programs to implement the Energy Technology Commercialization Services Program.

(b) This section prescribes requirements for establishing State-level Energy Technology Commercialization Services Programs as an optional element of State plans.

(1) The programs to implement the functions of the Energy Technology Commercialization Services Program shall:

(i) Aid small and start-up businesses in discovering useful and practical information relating to manufacturing and commercial production techniques and costs associated with new energy technologies;

(ii) Encourage the application of such information in order to solve energy technology product development and manufacturing problems;

(iii) Establish an Energy Technology Commercialization Services Program affiliated with an existing entity in each State;

(iv) Coordinate engineers and manufacturers to aid small and start-up businesses in solving specific technical problems and improving the cost effectiveness of methods for manufacturing new energy technologies;

(v) Assist small and start-up businesses in preparing the technical portions of proposals seeking financial assistance for new energy technology commercialization; and

(vi) Facilitate contract research between university faculty and students and small start-up businesses in order to improve energy technology product development and independent quality control testing.

(2) Each State Energy Technology Commercialization Services Program shall develop and maintain a data base of engineering and scientific experts in energy technologies and product commercialization interested in participating in the service. Such data base shall, at a minimum, include faculty of institutions of higher education, retired manufacturing experts, and National Laboratory personnel.

(3) The services provided by the Energy Technology Commercialization Services Program established under this part shall be available to any small or start-up business. Such service programs shall charge fees which are affordable to a party eligible for assistance, which shall be determined by examining factors, including the following: the costs of the services received; the need of the recipient for the services; and the ability of the recipient to pay for the services.

10. Section 420.11 is amended by revising paragraph (a) to read as follows:

§ 420.11 Reports.

* * * * *

(a) A quarterly program performance report and a quarterly financial status report. The reports shall contain such information as the Secretary may prescribe in order to monitor effectively the implementation of a plan. The reports shall be submitted within 30 days following the end of each calendar year quarter.

* * * * *

11. Section 420.12 is amended by revising paragraphs (a)(4), (a)(5), (c), (e), (e)(1), (e)(2), (e)(4), (e)(5), and (e)(7), removing paragraph (e)(6)(iii), and redesignating paragraphs (e)(6) (iv) and (v), as (e)(6) (iii) and (iv) to read as follows:

* * * * *

(a) * * *

(4) To subsidize utility rate demonstrations or State tax credits for energy conservation or load management;

(5) To purchase equipment to conduct research, development, or demonstration of conservation techniques and technologies not commercially available.

* * * * *

(c) Demonstrations of commercially available conservation techniques and technologies are permitted, and are not subject to the prohibitions of § 420.12(a) (1) and (5), or to the limitation on equipment purchases of § 420.12(b).

* * * * *

(e) A State may use funds under this part to promote the purchase and installation of equipment and materials for energy conservation building retrofits or weatherization subject to the following terms and conditions:

(1) Such use must be included in the State's approved plan and, if funded by petroleum violation escrow funds, must be consistent with any judicial or administrative terms and conditions imposed upon State use of such funds;

(2) A State may use for these purposes no more than 33 percent of all funds allocated by the State to SECP in a given year, regardless of source, except that this limitation shall not include regular and revolving loan programs funded with petroleum violation escrow funds in which loans issued through such programs require repayment of principal and interest within 10 years or less. Loan documents shall ensure repayment and shall not include provisions of loan forgiveness.

* * * * *

(4) Funds must be used to supplement and no funds may be used to supplant energy conservation building retrofits or weatherization activities under the Weatherization Assistance Program for Low-Income Persons, 42 U.S.C. 6861 *et seq.*, or the Institutional Conservation Program, 42 U.S.C. 6371 *et seq.*, nor to fund operation and maintenance activities in any building which is eligible for assistance under the Institutional Conservation Program;

* * * * *

(5) Subject to paragraph (e)(6) of this section, a State may use a variety of financial incentives to fund purchases and installation of materials and equipment under this paragraph including, but not limited to, regular loans, revolving loans, loan buy-downs, performance contracting, rebates, and grants.

* * * * *

(7) A State may use loan repayments, including any interest (or fees), only for activities which are included in the State's approved SECP plan.

LIST OF PUBLIC LAWS

Note: The List of Public Laws for the first session of the 102d Congress has been completed and will be resumed when bills are enacted into public law during the second session of the 102d Congress, which convenes on January 3, 1992. A cumulative list of Public Laws for the first session will be published in Part II of the **Federal Register** on January 2, 1992.

The List of Public Laws may be used in conjunction with "PLUS" (Public Laws Update Service) on 202-523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202-512-2470).

Last List January 2, 1992

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1991

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Public Laws

102d Congress, 2nd Session, 1992

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 2nd Session, 1992.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

LSA—LIST OF CFR SECTIONS AFFECTED

The LSA (List of CFR Sections Affected) is a monthly publication designed to lead users of the Code of Federal Regulations (CFR) to amendatory actions published in the Federal Register (FR). It should be shelved with current CFR volumes. Entries are by CFR title, chapter, part, and section. Proposed rules are listed at the end of appropriate titles.

HOW TO USE THIS FINDING AID

The CFR is revised annually according to the following schedule:

Titles 1–16—as of Jan. 1
17–27—as of April 1
28–41—as of July 1
42–50—as of Oct. 1

To bring these regulations up to date, consult the most recent LSA for any changes, additions, or removals published after the revision date of the volume you are using. Then check the CUMULATIVE LIST OF PARTS AFFECTED appearing in the Reader Aids of the latest Federal Register for less detailed but timely changes published after the final date included in this publication.

Boldface entries are used to distinguish current month amendments from previous entries. Example: **1413.23 Amended.....12345. Boldface** page numbers under a particular title indicate that the page numbers span 2 years.

Cite a page reference from this publication using the volume number (i.e. 56 FR for 1991) and the page number. Example: 24727 cite as 56 FR 24727. For your convenience, the volume number has been included in the Table of Federal Register Issue Pages and Dates.

ISSUES TO BE SAVED

There is no single annual issue of the LSA. Four ANNUAL ISSUES must be saved; the DECEMBER issue is the ANNUAL for Titles 1–16; the MARCH issue is the ANNUAL for Titles 17–27; the JUNE issue is the ANNUAL for Titles 28–41; the SEPTEMBER issue is the ANNUAL for Titles 42–50. ANNUAL ISSUES to be saved are clearly designated on the cover.

PARALLEL TABLE OF AUTHORITIES AND RULES

Following Title 50 is an update to Table I—Parallel Table of Authorities and Rules found in the CFR Index and Finding Aids. This table contains authority citations added to or removed from Table I as a result of documents published in the Federal Register since January 1, 1991.

TABLE OF FEDERAL REGISTER ISSUE PAGES AND DATES

A table is included at the end of this publication which identifies the volume number, the inclusive page numbers, and the corresponding Federal Register issue dates for the period covered.

INDEXES

An INDEX to the daily Federal Register is published monthly and is cumulated for 12 months. A separate volume, the CFR Index and Finding Aids to the entire Code of Federal Regulations, is revised as of January 1 each year.

INQUIRIES AND SUGGESTIONS

Jim Wickliffe was Chief Editor of the LSA. The LSA was prepared under the direction of Richard L. Claypoole, assisted by Laurice Clark. INQUIRIES, telephone 202-523-5227.

SUGGESTIONS concerning this and other publications of the Office are welcomed. Please send your suggestions to Martha L. Girard, Director, Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408.
